At a recent Chicago wedding the bridal bouquet was a shower of lily of the valley and the bride wore also a wreath of orange blossom. The maid and matron of honor both carried pink roses and a little flower girl carried a basket of rose petals. At the reception all the decorations were in pink and white.

The Second Congregational church, Holyoke, Mass., was elaborately decorated for the Judd-Newton wedding October 17 with autumn foliage, boughs of green and scarlet oak predominating. The bride carried a bouquet of white bouvardia an unusual event though why these beautiful flowers are not more used it is difficult to say. Killarney roses and maidenhair ferns were used in the bouquets carried by the bridesmaid and maid of honor. The flower girl dressed in white carried a Leghorn hat filled with pink Bon Silene rose buds. Palms, roses, and hydrangeas were used in the screen before which the bridal couple received their friends, the parlor and dining room decorations being effectively carried out in pink and yellow chrysanthemums respectively.

Palms, hydrangeas, ferns, and chrysanthemums were the principal plants used in the church decorations at the Watson-Ramage wedding, Holyoke, Mass., October 17, and the same kinds were used with good effect at the house of the bride's mother. All white flowers were carried by the bride, her bouquet consisting of Bride roses. The wedding was a very brilliant one and was witnessed by over 500 guests from Springfield and other New England cities.

New Canadian Tariff.

In the new tariff of import duties to be established by the Canadian government there are some important changes made in regard to importations of plants, fruits and vegetables. Palms, which were formerly free, and ferns, rubber plants, gladioli, cannas, dahlias, and peonies, which were dutiable at 20 per cent, are provided for at British preferential 15 per cent; intermediate 22½ per cent; general 25 per cent.

Azaleas, rhododendrons, pot grown lilacs and dormant roots, not otherwise

PRIZE DINNER TABLE DECORATION AT THE TORONTO EXHIBITION.
By J. H. Dunlop.

provided for in the tariff and formerly dutiable at 20 per cent, are made free.

For departmental reasons, on account of difficulty in following values, specific duties have been placed on pears, apricots and nectarines, formerly dutiable at 20 per cent, as follows: British preferential 35 cents per 100 pounds; intermediate 45 cents per 100 pounds; general 50 cents per 100 pounds. These rates also apply to plums and quinces, which were formerly dutiable at 25 per cent.

AT THE PARIS CHRYSANTHEMUM SHOW.
See issue of December 1, page 888.

Similar action and for the same reason has been taken in regard to melons. The new rates are, British preferential 2 cents each; intermediate 2½ cents each; general 3 cents each, as against the former duty of 25 per cent. Oranges, lemons, and limes, are transferred to the free list along with shaddocks or grape fruits, which have been free. The duty collected on oranges, lemons and limes last year amounted to $187,807.

Vegetables not otherwise specially mentioned, and subject in the old traiff to British preferential 16 2-3 per cent, and general 25 per cent, will on the new basis be dutiable as preferential 15 per cent; intermediate 27½ per cent, and general 30 per cent. Fresh tomatoes, formerly preferential 13 1-3 cents per bushel and 6 2-3 per cent; and general at 20 cents per bushel and 10 per cent; are now to be British preferential 50 cents per 100 pounds; intermediate 65 cents per 100 pounds, and general 75 cents per 100 pounds.

On beans, peas, buckwheat and barley the duty is raised considerably, as also on hops. Common and colorless window glass continues under the old rate, excepting that an intermediate rate has been fixed.

The intermediate rate established will affect no line of imports at present, being made for use as a special offer in case overtures for reciprocal concessions in trade are made by other countries than Great Britain or her colonies, whose goods will enter at the preferential rate.

American Carnation Society.

CARNATIONS REGISTERED.

By James D. Cockroft, Northport, L. I., N. Y. Harvard, a cross between Prosperity and Maceo, color, glowing crimson, just the Harvard color, size 3½ to 4 inches, calyx, non-bursting, stiff stems averaging 30 inches in length from early fall to spring. Has an exceptionally clean habit and is a free bloomer.

Georgia, a cross between Prosperity and Morning Glory, color clear white, size 3½ to 4 inches, calyx does not burst, strong stems 24 to 30 inches in length, an exceptional keeper with a growth where every shoot produces a flower and is very fragrant.

Faust, a cross between Maceo and Morning Glory, color bright scarlet, size 2½ to 3 inches, strong calyx which will not burst, strong, stiff stem, two to three feet in length. A good clean grower producing flowers all the time.

About a month back Stevenson Bros., of Govanstown, Md., registered with this society a carnation under the name of Debutante, this registration was made early in the week, but in order that registrations may appear in all of the Trade papers simultaneously the Secretary holds all registrations received during the week until Saturday, and they then appear the following week. On account of this delay of one week another carnation appeared in print under the name of Debutante and although it was not registered with any society, this of course gave this carnation precedence in print, and as the owner thereof would not consent to change the name, Stevenson Bros. have kindly consented to change the name of theirs in order that there may be no confusion in the trade. They now register their carnation under the name of Splendor; it is a very pretty shade of pink, large flower, good calyx, stiff stem, extremely prolific and a grand keeper.

ALBERT M. HERR.

To Be Done Now.

IN THE GREENHOUSES.

Rake out all dead leaves from the rose benches regularly, using a small-toothed rake to avoid injury to surface roots.

Clear out the remains of any crops that have been growing on the benches to be used for propagating, and get these cleaned up ready for use.

Large calla flowers are not always desirable, but if they are specially needed, the plants must be regularly fed with manure water from now on.

Remove a little at a time of the useless wood on the older roses. This does not check the plants like taking a lot away at one time.

Do as little feeding as possible to the violets that are to be retained for stock plants. Keep them in cultural condition of course.

Take care of the stock plants of double white petunias. A good strain of this plant is extremely useful for decoration, and the flowers may be used for design work.

Cow manure dried and crushed is the best of all manures for top-dressing rose benches.

Soot water is an excellent fungicide. Place a bag of soot in a barrel, allow the contents to settle, and use about one part to six of water.

Fuchsias, bouvardias and similar plants that are to be dried off must be

AT THE PARIS CHRYSANTHEMUM SHOW.
See issue of December 1, page 888.

dried gradually, not all at once, as this is too great a strain on the plant.

IN THE STORE.

Arrange cut orchids in small specimen glasses or some similar receptacles. Bunches of cattleyas, as frequently seen in the windows, are not attractive.

Always be ready to advise your customers as to suitable devices or decorations if they seem to need it, but do not force your opinions against their wishes.

Get at all banquet and dinner table orders early enough to allow full time for cleaning up, but not a minute earlier than is really necessary, freshness being a great point.

Florists who persist in crowding their windows pay a heavy price for an unattractive display.

Several shades of one color, no matter how attractive in themselves, are seldom satisfactory when arranged together. Strong contrasts are usually to be preferred.

Boxes for shipping cut flowers in should have the handle a little out of the center towards the blooms. In carrying, these are then kept higher than the stem end.

An air and dust proof window soon saves its price, as flowers last so much better in it, and being kept clean, look better at all times.

If you have no greenhouse arrange with a local grower to freshen up your plants occasionally. Never leave them around the store until they have to be thrown away.

In all cases where it is important that wreaths should last well, use asparagus instead of maidenhair fern.

OUTDOORS.

Keep off the soil when it is wet, and when it treads into a pasty mass, no matter what the work is that needs doing.

Stake all trees immediately they are planted; if allowed to blow about in the wind they will never take a hold on the soil.

As long as the weather keeps open keep on with mending the lawns, but do not touch them when frosty.

At odd times take up any drains under walks or drives that have been giving trouble during the heavy rains of autumn and get them well cleaned out.

It is too late now to transplant hollies and other evergreens. Leave them now until spring. Some growers consider late summer the best time to shift hollies.

When cleaning up cart all leaves, rough grass and turf clippings to a heap or pit. After rotting down for a couple of years they make excellent material for top-dressing shrubberies.

Go on preparing quarters for planting trees, but unless very mild weather keeps up, no more planting should be done until spring.

Where tree thinning is to be done avoid taking much out at once as this lets in the wind in winter.

Daphne laureola is one of the hardiest and best shrubs for planting underneath other trees or in shady places.

DES MOINES, IA. — The Iowa State Horticultural Society is to hold its forty-first annual convention in the horticultural room at the Capitol December 11, 12 and 13.

Kansas City.

BUSINESS COMPARATIVELY QUIET.

Business in general the past week has been comparatively quiet. There was no great demand for any particular class of work. The weather has been rather disagreeable during the first part of the week, much rain and sleet having fallen. The temperature, however, has ranged rather high. The cloudy weather resulted in a marked shortage in stock. A considerable shrinkage in carnations and violets was evidenced. Chrysanthemums are still an important factor, arriving in good quantities. white and yellow varieties are especially good. Yellow and white Timothy Eaton find much favor with buyers. Intensity was in great demand Thanksgiving day. Bonnaffon, white and yellow, were above the average of other varieties on the market. Pink sorts are comparatively scarce this season. Roses are in fair supply and the demand good. American Beauty roses are scarce and the price pretty well up to the top notch. The demand, however, shows a slight increase with the passing of the better grades of chrysanthemums, which have had a bad effect on the Beauty market. Killarney with most growers is proving to be a splendid rose. Bride and Bridesmaid are fully up to requirements. Cattleyas sell well, which appears characteristic of the present season. Christmas greens, in limited quantities, are in supply. Other greens are plentiful.

NOTES

The W. L. Rock Flower Co.'s store narrowly escaped destruction by fire last week. Some bales of moss which lay too near the furnace became ignited, and only due to the presence of mind of the boys, the blaze was extinguished before any damage was done. This firm had the decorations for the Jaccard Jewelry Co.'s opening.

The trade will regret to learn that Edward Tonquest, who was formerly with Miss Daley, was compelled to return to Colorado on account of poor health.

Mr. Kessler, of Topeka, sends in some extra fine smilax. Each string measures from four to six feet in length and all are fuller than the average.

The window of the Kansas City Floral Co. held some fine vases of yellow and white Timothy Eaton chrysanthemums last week.

Miss Daley's store was very pretty Thanksgiving day. Several cases of wild smilax were used with very good effect.

W. J. Barnes had some choice white Bonnaffon chrysanthemums for the Thanksgiving trade.

The Alpha Floral Co. is moving to its new location near Eleventh and Walnut streets.

Wm. A. Bastian had a large consignment of holly to dispose of last Monday.

Miss Ferguson, of J. W. & E. E. Arnold's, Omaha, was a recent visitor.

K. C.

Detroit.

THANKSGIVING TRADE SATISFACTORY.

Thanksgiving day trade in all its features was highly satisfactory to all concerned. The weather was clear and sufficiently cold to be suggestive of the festive week it was. The heaviest business was done on Wednesday, but the demand continued well into the forenoon of Thursday to a surprising extent. The business of the week did not develop any unusual features to distinguish it from the same period a year ago except in the increased volume transacted, and the embarrassment of many dealers who were unable to supply the spirited demand for violets for which the local market was very inadequate. Chrysanthemums were on the market in great quantities and all the really good stock was sold at remunerative prices while much of that offered was poor and met with its well merited fate. American Beauty roses were in good demand but the supply of good stock was short as was that of all other varieties, which had the effect of advancing the wholesale price of the available stock. Lilies, Paper White narcissus and Roman hyacinths were in evidence but played a minor part in the interest of flower

A SECTION OF THE DENISON, TEX., SHOW.

buyers. Poinsettias made their first appearance of the season and added materially to the variety and attractiveness of the stock offered. Plant sales felt the effect of the stimulated demand of the week and many ferns, cyclamen, chrysanthemums and palms were disposed of. The remaining stock of chrysanthemums now on the market includes very little that is really good and this week will mark their total disappearance from the retail counters and in their stead will be the increased stock of carnations now visible and the seasonable supply of bulbous flowers.

FLORISTS' CLUB MEETING.

The meeting of the Florists' Club occurred the evening of November 21. It was well attended and the proceedings were of exceptional interest to the members and visitors present. H. Knope, foreman of Breitmeyer's Mack avenue greenhouses, read a paper on chrysanthemums.

An exhibition was held in the spacious rooms of the Michigan Cut Flower Exchange under the club's auspices. There were no awards, classifications, or judges appointed, but it is needless to say that the stock shown was nevertheless well judged by the many interested growers present.

J. F. S.

Milwaukee.

NEWS OF THE DAY.

The demand for flowers this Thanksgiving was all that could be desired. We are glad to know that Gus Pohl has profited well by the good sense exercised. A few days before Thanksgiving, when flowers were scarce, he brought in all his customers asked for while the scarcity lasted; consequently he was able to clean out everything he had at fair prices and view with complacency the heavy consignments coming in Tuesday and Wednesday, some of which could not be sold and for which orders had been refused but a short time before. We have frequently heard the query "when will growers learn?" It is encouraging to know that least one grower has learned. By the way, this young man has bought out his partner and is paddling his own canoe which he is fully capable of doing.

Out on the Blaemound road the old Deuster place, now run by the Pollworth Co., has a very tired look. This is the last winter of the lease under which they have operated. They will pull all the houses down before July next. The stock of palms is not as extensive as it has been on account of the recent advance in prices. From various statements which have been current of late, it is quite natural to wonder if a palm trust has not been formed. The stock of calla lilies is in good condition and reminds one of old times. At the new plant further up the road, the latest addition of three carnation houses has just been completed. The plant is a large one and should produce a large and profitable supply of roses and carnations soon. Owing to the scarcity of labor during the summer a portion of the stock has been a trifle late in development.

Fred Schmeling has everything in "apple pie" order. There is an air of thrift that is pleasant to view. Fred himself and his batch of lilies look particularly well. He grows more roses and less of a variety of other plants than he used to do.

There has been considerable interest attracted by a movement started in the Twenty-first ward, advocating a small park for each public school, the park board at the time being about to purchase land a long distance out of town. The small park movement has developed sufficient strength to arrest the movement for the present. At this writing the small park ordinance has passed. The strongest opposition to the large outside park will therefore subside, as both are desirable, but the small parks are most needed just now.

Mrs. Davis, who is artistic in the arrangement of flowers, acknowledges the deficiency of the local flower market in the supply of such green as is desirable for the arrangement of all bulb flowers and chrysanthemums, particularly the single varieties, also daisies, poppies, etc., which demand can only be supplied by a variety of grasses. Why does not some one take this matter up?

For a man who does not pretend to be a gardener, one should see how Geo. Holton manages the Holton & Hunkel greenhouses, there is the finest display of poinsettias we ever saw all ready for Christmas. He has lily of the valley every day of the year, and some of the surplus is sold in Chicago.

Watertown violets and chrysanthemums are still of the choicest in this market. In regard to chrysanthemums people are beginning to realize that the largest flowers are most frequently not the choicest, this is encouraging.

We are very glad to congratulate Fred Holton and wife on the safe arrival on Thanksgiving eve of a daughter. The time was appropriate and their good health and happiness is gratifying to their many friends.

The Greeks have been ousted from the Railway Exchange building. A different sort of a trade is now established there under the name of the Loveland Floral Co., managed by Mr. Droppers.

Ben Gregory has made some very praiseworthy improvements in his retail establishment on the outskirts of the city; it is now quite a model.

Herman Stapes has become quite a specialist in American Beauty roses.

C. B. W.

Toronto.

BEST NOVEMBER ON RECORD.

Business for the month of November was the best ever experienced by the retail florists in this section for the same month of the year. All through the month there was a plentiful supply of stock and especially was this so in chrysanthemums, so many of these being grown in this section at present that many times it was necessary for the growers to dispose of them cheap to get the room. The very noticeable lack of sunshine has been detrimental to the growth of roses but the indications at present are very favorable for a large cut at Christmas time should we be favored with a fair amount of sunshine. Carnations have been about plentiful enough to fill orders and the plants at present are well covered with buds. There has been an unusual demand for violets. The growers who usually cut by the thousands are not cutting more than 1,000 or so a day and these are so quickly gathered up that it is almost impossible to get them. Azaleas have again made their appearance, being noticeable in most of the down town stores.

THE AMERICAN CARNATION SOCIETY.

For the coming convention of the American Carnation Society, everything is progressing favorably. Arrangements have been made for a very large space in the assembly room of the city hall and from present indications everything points to a good exhibition and a successful convention. Arrangements have been made with the government that all stock coming in for exhibition purposes will be brought in in bond and there will be no duty or any expense connected with this exhibition other than of course the usual express charges. Toronto is admirably located for a convention of this kind, lying midway between the east and the west and being well favored with railroad connections. Ample room to accommodate any extra entries or exhibitions can be had in this hall. A large number of special prizes will be offered, and can be had in the premium list issued by the association. There will be an executive meeting next week; the usual cheap rates will prevail. Do not forget certificates.

NOTES.

At the last meeting of the Gardeners' and Florists' Association at St. George's hall, officers were eected for the coming year, as follows: E. Dale, president; A. Houle, first vice president; E. Graham, second vice president; Geo. Mills, treasurer; E. Collins, secretary, and J. Mathews, assistant secretary. J. H. Dunlop, T. Manton, A. G. Jennings, Wm. Jay, W. Ford, D. Macintire, Geo. Douglas and W. Wilshire will compose the executive committee. J. H. Dunlop and T. Manton will be representatives at the industrial exhibition. Wm. Jay, W. Wilshire and E. Collins will act as the committee of the Ontario Horticultural Association.

Her excellency, the Countess Grey and members of the party had an automobile ride and visited J. H. Dunlop's greenhouses where they were personally shown around by Mr. Dunlop. Her excellency has more than an amateur knowledge of greenhouse work and is always enthusiastic over fine stock.

The visit of the vice-regal party from Ottawa helped the florists considerably. The big ball at the King Edward used many flowers for corsage bouquets and boutonnieres.

H. G. D.

Denver.

TRADE GOOD.

The market the past week was very good; everything brought good prices. There was no surplus of anything, the approach of Thanksgiving causing very heavy shipping to the small outside towns. Consequently, the market was very close the day before and on Thanksgiving day. Everything had to be cut very close. Violets brought good prices. This is the first season we know of that chrysanthemums were cut clear out. Anybody that had any

had placed an order for their chrysanthemums two or three weeks ahead, the others had to go without, and we cannot buy any on the market now. Poinsettias were offered in good condition in pans and single blooms and brought holliday prices. Narcissus, Roman hyacinths and lily of the valley are coming in splendidly and in fine quality, also stevia. American Beauty roses are now in great demand on account of the chrysanthemums being cut out, but are very scarce, especially medium and short stems. Richmond roses are coming in very fine long stems and large buds.

NOTES.

The Sylvia Floral Co., which started business a couple of months ago, has closed its doors. The management claims this course is due to not being able to buy up enough stock to run the business, and that the florists here have control of all the stock grown in this city.

Brenkert & Wall's place looks very good, Mr. Brenkert cutting some fine chrysanthemums, especially Major Bonnaffon and White Bonnaffon. They are the finest I have ever seen. The carnations at this place look very healthy, with the prospect of a big crop for Christmas. PLATTE.

OBITUARY.

George Ellwanger.

On Monday, November 26, George Ellwanger, the senior member of the firm Ellwanger & Barry, died at his home in Rochester, N Y., which he had cherished so much for more than an ordinary lifetime. Here he had surrounded himself with his pets, the choicest and rarest trees, shrubs and flowers of all descriptions. He saw these trees grow into magnificent specimens, samples of his own skill, which even today stand unsurpassed.

George Ellwanger was born December 2, 1816, in Gross-Heppbach near Stuttgart, Wurtemberg, Germany, as the son of a vineyardist, and there, under the guidance of his father, received the first lessons in practical horticulture. But the vineyards alone afforded no opportunity to satisfy his eager desire for a thorough and complete knowledge of horticulture in all its various branches and while a mere boy, he was apprenticed to a nurseryman and florist in Stuttgart, where every opportunity was given him to acquire the extensive knowledge for which he was famous in after life.

In 1835 Mr. Ellwanger came to America and soon found employment in Rochester with Reynolds & Bentham, which firm conducted a nursery and seed business. Three years later, in 1838, he bought out his employers and started for himself, but soon after found an able associate in the person of the late P. Barry, and in 1840, the first eight acres of ground were bought to establish the well known Mount Hope Nurseries. On this original ground the office building, greenhouses and trial grounds are still located. From this rather small beginning the nurseries have grown rapidly. Over 1,000 acres are now planted to young trees and shrubs.

Mr. Ellwanger has always paid personal attention to details in the nursery department. For a life time he himself selected all the scions for budding and grafting to avoid the mixing of varieties. He was up early and late. Wherever gangs of men were at work in the fields, often many miles apart and away from the home grounds, Mr. Ellwanger would be sure to pay them a daily visit, to see how the work progressed.

For more than a year old age compelled him to stay away from business cares. Last summer he was at times able to be out in his own spacious private grounds, enjoying the grand old trees, which he had planted and nursed with his own hands years ago. But as the cooler autumn days approached, and the leaves one by one began to fall, his strength, too, failed visibly, and when at last the storms had shaken the last remnants of foliage to the earth, from whence they sprang, he also got ready to pay his tribute to mother earth. Mr. Ellwanger had four sons, three of whom died before him. The fourth son, William D. Ellwanger, is the one surviving him. J. B. K.

MEMORIAL ON MR. ELLWANGER'S DEATH.

At a meeting of the directors of the Rochester Trust and Safe Deposit Company held November 27, the following memorial was adopted:

"Seldom has the span of human life given a record of accomplishment equal to that of our late associate, George Ellwanger, whose death occurred November 26, in the ninetieth year of his age. One of its charter members, this institution owes its existence and in large measure its success to the foresight and energy of Mr. Ellwanger and a few of his associates. Those of us who have served with him on this board for these many years well know the value of his business judgment and counsel, while his uniform courtesy and kindness of heart has endeared him to all. The history of his life for nearly 70 years is almost inseparable from that of the city of Rochester. His contributions of time, money and thought toward the city's beauty, its material and moral advancement, have been equaled by few and exceeded by none of her many public spirited citizens. Out of respect and reverence for his memory, it is ordered that this slight tribute be spread upon our minutes and a copy be sent to his family and the public press."

Albert Zimmerman.

Albert Zimmerman, of Pasadena, died November 22, while returning home with his wife from Arizona, and the funeral services were held the following Sunday, from his late home.

Mr. Zimmerman was for years superintendent of the parks of Pasadena, until failing health compelled him to resign and seek the desert climate, having battled with lung trouble for years. He leaves a wife who has been his constant attendant through his sickness. He also leaves a host of warm friends among the craft.

The Department of Agriculture.

Secretary Wilson, of the Department of Agriculture, has issued his annual report. The following sections will be found of interest to our readers:—

INTRODUCTION OF VALUABLE PLANTS.

In the Bureau of Plant Industry the leading features of the work of the past year have been the co-operative demonstration work with farmers, fruit growers, and others under the careful supervision of Department experts and the introduction of new crops of economic value. One of the most important achievements in this latter line is the discovery of the existence of a Siberian alfalfa, a plant native on the dry steppes of Siberia, where the mercury freezes without snow, thus proving the ability of the plant to withstand without protection a temperature of 40 degrees below zero. This discovery may mark an epoch in the agriculture of the northwest prairie regions of the United States. Among other valuable plants introduced are a vigorous alfalfa from Arabia, and the Tangier pea, which has yielded as high as nine tons of green feed per acre. With a view to increasing the matting industry, the Department's explorers have secured living plants of the best foreign varieties of rushes. Experiments in the propagation of many seeds and plants introduced from foreign countries are being carried on at the Plant Introduction Garden at Chico, Cal.

SUCCESS WITH INTRODUCED PLANTS.

Success is reported with the date palms in California and Arizona. Kharkof wheat, the hardiest winter wheat grown in this country, is now thoroughly established, and wherever it has been introduced the yield per acre is being increased by an average of five bushels. The durum-wheat crop is estimated at about fifty million bushels.

PLANT DISEASES.

The year has been an unusual one in the field of plant pathology. Serious outbreaks of disease kept the staff busy. Success is reported in controlling the pear blight. The efficacy of the method adopted for controlling the little peach disease has been successfully illustrated in Michigan. At the Mississippi Valley laboratory at St. Louis have been conducted investigations of many of the diseases affecting forest and fruit trees. At the subtropical laboratory at Miami, Fla., are conducted investigations of diseases affecting tropical and subtropical plants.

GRAIN STANDARDIZATION.

The Department holds that some system of standardization is necessary as a first step toward securing uniformity of grain grading. Congress at its last session authorized the establishment of laboratories with a view to eventually bringing about this standardization. Two laboratories have been established, one at Baltimore and the other at New Orleans, where a thorough study in the present system of grain grading will be made with a view to reaching methods which will make standardization possible.

DRY-LAND FARMING.

The Secretary voices a caution to the prospective settlers in the Great Plains area. While there are great agricultural possibilities in this region, farming there must be conducted along radically different lines from those in the more humid portions of the United States. In spite of recent abundant rainfall, conditions will doubtless soon resume their normal state, which is one of semiaridity.

GOOD SEED.

Much work has been done in the investigation of seed adulteration and in carrying on the campaign of education on behalf of good seed. Good results have attended work in securing high-grade strains of sugar-beet seed, and especially satisfactory results have been secured in the development of the sugar-beet seed containing a single germ, which will eliminate a considerable portion of the work of thinning.

FRUIT TRANSPORTATION.

Interesting and practical investigations in the methods of harvesting, packing and storing fresh fruits have been continued throughout the year. Studies in fruit transportation have dealt chiefly with the transcontinental shipment of deciduous and citrus fruits of the Pacific coast for the eastern markets.

NEW FRUITS AND PLANTS.

The work of developing by breeding and selection of new types of various plants has been very successful during the past year. This includes new citrus fruits, new pineapple varieties, new early variety of cotton and new

kinds of corn. The tobacco-breeding experiments have proved especially successful, new sorts having already been planted by tobacco growers and are giving excellent results. The tobacco-breeding experiments are being extended to the tobacco-producing areas of Kentucky, Ohio and Virginia, with the promise of results as important as those in Connecticut and Florida.

TEA EXPERIMENTS, INOCULATION TESTS, ETC.

The secretary reports the greatest yield in the history of the tea experiments—something over 12,000 pounds of dry tea. Many field tests in the inoculation of leguminous crops with nitrogen-fixing bacteria are under way on large farms. Farm-management investigations have been continued throughout the year along two principal lines—the study of farm practice and the demonstration of improved methods.

GYPSY AND BROWN-TAIL MOTH PARASITES.

European parasites of the gipsy moth and brown-tail moth have been successfully introduced into this country. Several colonies of parasites were liberated in the open. In return for the services of official entomologists abroad in securing the introduction of beneficial insects into this country the Bureau of Entomology has sought to render to its foreign colleagues similar service. It has been done in several cases successfully.

INSECTS DAMAGING FORESTS.

Investigations of insects damaging forests have progressed in a satisfactory manner, in co-operation with the forest service, resulting in the accumulation of a large store of general information upon forest insects.

OTHER INSECT STUDIES.

Investigations of the insect enemies of deciduous fruit have been carried on at field stations in New York, Georgia, Pennsylvania and Nebraska. Especial investigations have been made on the Hessian fly in the spring-wheat regions, and the work on insects affecting vegetable crops and stored products has been continued. Records have been brought together on the life histories and geographic distribution of the majority of mosquitoes inhabiting North and Central America and the West Indies. A publication has been issued calling attention to the tendency of the house fly to spread the typhoid fever and urging the adoption of methods for its control.

INCREASED APPROPRIATION FOR STATIONS.

Recognition by congress of the great value of the experiment stations as agencies of agricultural advancement through scientific research is reported by the secretary as manifested by the passage of the Adams act, under which the present appropriation of each experiment station, under the Hatch act, will shortly be doubled. In this connection he pays tribute to the late Henry C. Adams, of Wisconsin, the author of this act. He states that the untimely death of Mr. Adams has taken away one of the foremost men in the cause of agricultural progress in this country, and concludes with the assertion that the name of Representative Adams, of Wisconsin, will ever be linked with that of Senator Morrill, of Vermont, and of Representative Hatch, of Missouri, as the author of a measure of fundamental and permanent importance to the institutions which advance and disseminate the knowledge on which our agricultural progress and permanent possibilities largely depend.

GOOD WORK IN HAWAII AND PORTO RICO.

Good work has been done at the Hawaii station toward diversifying the agricultural industries of the islands. This year fully 200 acres of tobacco have been planted. Investigations have been begun looking toward the rehabilitation of the rice industry. In Porto Rico coffee experiments give promising results. An increased yield has resulted from improved methods of cultivation. The Porto Ricans are large consumers of rice, most of which is now imported, and experiments on the suitability of the country for rice growing are being conducted.

IT is the firm of Dailledouze Bros. which is now being given the unenviable newspaper notoriety of having paid a fancy price for a new carnation.

WE commend to the attention of our readers the list of wholesale plant prices at New York, November 28, 1906, compiled by Wm. Wallace Burnham, Bloomingdale's floral manager.

THE results of the Chicago flower show will be a couple of hundred dollars on the wrong side of the ledger, but the good 1905 balance can stand this.

THE New York Board of Fire Underwriters has issued its annual warning to department stores and other firms having Christmas displays, showing that policies are void where the hazard is increased.

THOSE who send us queries expecting answers must in all cases supply correct names and addresses as well as assumed names. Where correct names and addresses are not given the queries go to the waste basket.

THE AMERICAN FLORIST Christmas Number, replete with illustrations and valuable reading matter for growers, dealers and retailers in all lines, will be issued December 13. Advertisers should send their copy early to make certain of good location display.

HOLDING back stock for holidays that is fit for market often results in waste. Trying to force values by these and similar methods frequently brings its own reward in a manner not intended. Grow stock to come in times of scarcity and extra demand by all legitimate methods, but do not try to foist old stock upon a discerning public.

REPORTS from various sources show that there is in many quarters a preference for single over double violets. This is a good sign. The single flowers are far prettier, their fragrance lasts in many cases longer and they are more effective in color. A really good single white would be a great acquisition; we have plenty of good single colored varieties and double whites. There are other single flowers that we would like to see more popular, chrysanthemums, dahlias and pyrethrums occuring to mind. One great advantage of the single over the double violet is the ease with which it can be grown.

Important To Subscribers.

The date on the yellow address label on your copy of THE AMERICAN FLORIST will show when your subscription expires. Please renew subscription promptly on expiration to make certain of receiving your copy of each issue.

Illinois State Florists' Association.

J. F. Ammann, president of the State Association, will meet with the Bloomington Florists' Club December 13 to consider the appointment of several working committees for the next annual meeting of the association, to be held in Bloomington on the second Tuesday in Ferbuary. Additional arrangements will also be made to make the meeting a success.

Yuletide.

By sending THE AMERICAN FLORIST to your employes every week of next year they will be given a weekly reminder of you and it will make a most appropriate and useful gift if sent to their home addresses. In many ways it will be a good investment. Send us their names and addresses now, enclosing one dollar for each subscription and we will start with our grand Christmas number and continue sending the paper every week of 1907.

Society of American Florists.

DEPARTMENT OF PLANT REGISTRATION.

The Conard & Jones Co., West Grove, Pa., submit for registration Canna New York, (C. & J. Seedling No. 1549). Height, six to seven feet, with broad bronze leaves and mammoth flowers of intense carmine.

W. J. STEWART, Sec'y.

French Exhibitions.

The photographs reproduced in this issue were taken at the recent show of the National Horticultural Society in Paris and should be carefully studied by all who, either as exhibitors or managers, are connected with our home exhibitions. We have usually a great wealth of material of excellent quality; our florists are just as clever and artistic as those of the European countries, and their individual exhibits are excellent in every way.

But there is a finish about the French exhibits, or rather the exhibition as a whole, that is usually lacking in American shows. Some of the British exhibitions are noted for the excellence of their general appearance, but for real artistic effect and finish the French and other continental shows have them all easily beaten. There is absolutely no reason why this should be so and it is up to our florists and flower show managers all over the country to take these fine groups as an example, and to make our home exhibitions the finest and most artistically finished in the world.

Flower Show for St. Louis.

The St. Louis Florists' Club at its November meeting, voted in favor of holding a mammoth flower show in St. Louis, under the auspices of the club, in November, 1907, provided that a guarantee fund of $10,000 for premiums and other expenses of running said show is subscribed by bona fide subscriptions, 25 per cent of which is to be actually paid in and placed into the hands of the treasurer on or before June 1, 1907. An additional call of 25 per cent of the subscription will be made if deemed necessary on or before November 1, 1907.

After defraying all legitimate expenses incurred, the amount subscribed will be refunded to the several subscribers in full or pro rata, according to circumstances. Should any surplus funds remain after paying all expenses and refunding subscriptions, the same is to be apportioned among the several orphans' homes of St. Louis and St. Louis county in proportion to the number of children cared for in each, to be determined by a committee especially appointed for the purpose.

The undersigned committee, appointed by the president, is anxious to make a good report at the next meeting and therefore urges every one interested in the cause, to subscribe to the guarantee fund and to report at once, such subscription as he may make and also the approximate amount that can be raised for the cause among friends.

FRANK A. WEBER,
A. G. BENTZEN,
WM. C. SMITH,
Committee.

The Glass Question and Greenhouse Men.

Pursuant of the action taken by the Society of American Florists at Dayton, O., in appointing a committee to consider what might be done with the glass tariff, the correspondence below is of interest to everyone in the craft:—

Fishkill-on-Hudson, N. Y., Nov. 20, 1906.
Hon. Sereno E. Payne,
Auburn, N. Y.

Dear Sir:—I am constrained to address you upon a matter of considerable interest to a large craft of men who use window glass in their business to the amount of millions of square feet, and that is the florists of the United States.

At the annual convention of the Society of American Florists, held at Dayton, O., one of the most important matters brought up was that of the duty now imposed upon window glass, which is an advance so much greater than existed prior to 1896, and which tariff raised the price of this commodity very materially per pound on every box of glass used.

With the knowledge of your standing in congress and being a member of the committee appointed by the convention, I have for some time thought of laying this matter before you and to ask that now election is over and we know how the drift of affairs will be the next two years, if the matter of reduction of tariff rates would stand any chance of receiving consideration at the approaching session of congress, or if at the present stage of public opinion, it would be labor lost to attempt to do anything directly without pronounced agitation.

The greenhousemen of the United States, which run into the thousands, all feel that the present high cost of this necessary article is to them very largely enhanced by the existing excessive duty and if this duty could be brought down to the rate prior to the tariff of 1897, that it would be an economic gain, which would work no harm to producers, because many of us believe and think, that the tariff as it exists today, is overdone and the party that should correct the matter is the republican in control of the majority.

Our General Ketcham is dead so we cannot go to the old gentleman for advice as to what we might gain if we went to Washington. Enclosed is an article from a florists' trade paper, which shows the interest by the florist craft. We should be glad to hear from you upon this important subject.

Yours respectfully,
BENJAMIN HAMMOND.

Committee on Ways and Means.
House of Representatives, Washington, D. C.,
Auburn, N. Y., Nov. 21, 1906.
Mr. Benjamin Hammond,
Fishkill-on-Hudson, N. Y.

Dear Sir:—Yours of the 29th inst. received. Congress meets this year on December 3, and the term of this congress expires March 4, giving three months, with the exception of the holidays, for what work we have to do. The time is barely sufficient to give consideration to the appropriation bills which will come up. All would agree it would be entirely impossible to pass a tariff bill.

While you desire but one item of the tariff changed, this could not be considered without taking up the whole subject of tariff revision and considering all the claims for changes to be made to the different schedules. This, of course, is a matter that requires much time and deliberation.

I read with interest your statement in the weekly florists' papers. While we imported $54,000,000 of cylinder, crown and common window glass in 1896 and but $18,066,000 in round numbers in 1905, it would appear that our workmen had $36,000,000 worth more of glass to manufacture at the latter date than in 1896. This means ,of course, prosperity to the workmen in the glass manufacturing business.

You would readily admit that your business has been much better since 1897, than it was in the three years preceding that year under the Wilson tariff act, and the year or two before that when the country was prostrated because of the uncertainty of what the Wilson people might do, for your business must be very dependent upon the general prosperity of the country.

It would be well for you to take into consideration whether it is not better to have the country generally prosperous under the present act, which brings prosperity to your business, rather than to restore the glass business to its condition under the Wilson tariff, thereby bringing your business back to the same condition of affairs. I only throw out this suggestion for your consideration, because when the subject of tariff revision is taken up, I shall hope to hear from the florists on this subject.

Yours very truly,
SERENO E. PAYNE.

Meetings Next Week.

Baltimore, Md.—Gardeners' Club of Baltimore, Royal Arcanum building, 18 W. Saratoga street, December 10, at 8 p. m.

GOOD THANKSGIVING TRADE.

Thanksgiving day has come and gone and from all accounts trade was good with both wholesalers and retailers. Chrysanthemums were leading, as a great many were used as the colors of the football games, yellow for St. Louis and dark red for the Iowas. Violets went to $1.25 for extra fancy and some fine doubles were in the market. Carnations were sold from 3 to 5 and in a few cases 6 cents each. It is very much to be regretted that a great many carnations were pickled and arrived in a sleepy condition. Some fine narcissus was in also some extra fine callas which found a ready sale. Smilax, Asparagus, Sprengeri and A. plumosus sold well. At time of writing the market remains firm, especially in violets and carnations.

NOTES.

Charlie Schoenle and Will Adels, the terrible twins, were talking loudly at the wholesale market Thursday and they were cautioned, as they were near a batch of white carnations, which would surely have woke up from their sleepy condition had they not discontinued their loud talk.

Gullett & Sons of Lincoln, Ill., are shipping in some fine roses, also Geo. M. Kellogg, Kansas City and Pleasant Hill, Mo. These growers' cut is handled to advantage by H. G. Berning.

Louis A. Giger, formerly with Grimm & Gorley, has been visiting his wife at the Deaconess Hospital, where she underwent an operation for appendicitis and is slowly recovering.

Charlie Kuehn and his assistants had their hands full filling orders last Wednesday and Thursday. They had a fine stock of everything, which they cleaned out.

Miss Theresa Bardaracco, who is a very conservative buyer, was very angry having paid a big price for carnations Wednesday which were asleep Thursday.

C. Young & Sons have a fine house 100 feet long of poinsettias and expect to have a fine crop for Christmas, also some fine cyclamen plants.

F. C. Weber has a very pretty air-tight case on the counter, in which he keeps his violets in water, cool, fresh and dark.

Adolph Brix is cutting some fine carnations from his newly purchased plant and expects to have a full crop for the holidays.

George Hartmann of Kirkwood, Mo., is bringing in some extra fancy long stemmed violets, which find a ready sale.

Geo. Angermueller is completely restored to health and was working very hard last Wednesday and Thursday.

Geo. Waldbart is handling some fine orchids. He says that all kinds of flowers sold well for Thanksgiving day.

Otto Koenig was appointed on the National Flower Show committee by the executive committee of the S. A. F.

The Ayers Floral Co. had a very large trade during the past week in chrysanthemums, violets and fancy roses.

Mrs. Bertha Linthicum has a very pretty store on Easton avenue and is building up a good trade.

W. C. Smith and Otto Bentzen were very busy one day last week unloading a car load of flower pots.

W. C. Smith & Co. disposed of everything at good prices Wednesday and Thursday.

The Ellison Floral Co. and the Eggeling Floral Co. have had a first class trade.

Some extra fine samples of well berried mistletoe are in the market.

Henry Frerck is cutting some fine callas and Asparagus plumosus.

Miss Newman had a splendid Thanksgiving trade.

Alex. Siegel reports trade as good for the holidays.

Greens and holly are in the market.

W. F.

Louisville.

TRADE FLUCTUATING.

Business the previous week was very good, up to and including Thanksgiving, but the balance of the week was very poor. Chrysanthemums were in very good demand, but good yellow and especially white were impossible to get. With the exception of a few very late varieties, the chrysanthemum season is about over locally. There have been plenty of good roses on the market and the demand is beginning to get up to where it should be. Carnations of good quality can be had in great quantities and find a satisfactory demand. Violets, both single and double, have had a good demand and are obtainable in good quantities. Lily of the valley continues in good demand, with the supply short. Mignonette sells well. Green goods are in fair supply.

F. L. S.

HAYWARDS, CAL.—A Japanese firm has purchased a ten-acre tract of land here from W. H. Spencer of Castro valley at the price, it is reported of $3,750. The idea is to start a large flower growing establishment, the erection of a range of greenhouses being part of the project. The soil is fertile and the location good.

Nasturtiums.

Lightly lov'd, and coldly nam'd,
By the roses' glory sham'd;
Left, with penury of song,
To enrich some barren wall,
And receive no thanks at all:
In thy burning loveliness,
I behold the fire and stress
Of that beauty, mix'd with life,
Whence such splendor hath its birth,
Like the fairest things on earth.
Wine-dark petals, amber-freak'd,
Orange cups suffus'd and streak'd,
Lin'd with primrose, vein'd with red—
Fitting vessels every one
For the ichor of the sun!
Thou shalt drape the poor man's fence
In thy royal opulence;
And, where roses rarely come,
Filling some dark court with flame,
Have, like them, thy meed of fame.
—Pall Mall Gazette.

TRADE AGAIN NORMAL.

Reports concerning the Thanksgiving trade of this year vary considerably, but the general concensus of opinion seems to be that, after only a fairly good Saturday and a dull Sunday, the shipping business of Monday, Tuesday and Wednesday of last week was just about the same as last year. The local trade, however, was not so good. Business on Wednesday afternoon and Thursday morning fell off very sharply. This in all lines of stock, but particularly in carnations. These showed evidences of having been held by the growers. Wednesday's receipts of carnations were not at all suitable for shipping, and a great quantity of stock had either to be sacrificed or sent to waste pile. American Beauty roses were the one exception to the above condition, having been very short in supply and not equal to the demand. Trade is again good, having resumed its normal tone. Chrysanthemums are no longer a considerable item on the market. Good large blooms bring $4 per dozen, but there is little call for other grades. American Beauty remains on the short side, but other roses are plentiful enough. Really first class carnations are seen on the market and all demands are being promptly met at reasonable prices. Violet prices are down again to a figure at which people will buy. There seems to be an increasing demand for the locally grown single violets. Double violets, too, are moving satisfactorily. Asparagus plumosus and A. Sprengeri are not so plentiful as might be desired, but other green stock is in satisfactory supply. Growers generally are getting ready for the holidays, and a week or so of fine clear weather would materially aid them. They are either forcing bulb stock or else raising the temperature in the rose houses.

NOVEMBER CONDITIONS.

Why business this past month did not show a satisfactory increase over that of November, 1905, is a much discussed question on the market. Many causes no doubt were at work. For one thing the weather was not so favorable this year. It was slightly warmer, the average according to the weather bureau being 1.2° higher than last year and very nearly 3° above the average for the past 34 years. The precipitation this year was 3.08 inches against 2.05 for the same period last year, a gain of just about one-half. The past month saw only four clear days, whereas there were 10 the year before. There were 15 cloudy days this year against only 12 of a year ago, and 11 partly cloudy days against 8 in the same periods. Rainy days numbered 13 as against 9 last year. These conditions not only affect the growers, they are depressing on the demand. Retailers say they received their regular orders from steady customers, but the transient trade was small.

Another possible cause was the lateness in all varieties of chrysanthemums. Small growers who are usually through with them before Thanksgiving this year had plenty. Then, too, carnations and violets early in the month, and the carnations even longer, were at an abnormal figure. Florists say that flowers being a luxury which people can get along without can only bring a certain price. When prices pass that mark people buy only what they think they have to for funerals and special occasions. Another cause which some assign to the situation is the increase in glass area this year, greenhouse builders having experienced an extraordinary active season. The absence of big Thanksgiving football games also added its mite to the other depressing circumstances.

"The Busiest House in Chicago."

J. B. DEAMUD CO.
51-53 Wabash Ave., CHICAGO.

All Flowers and Greens in Season.

J. B. DEAMUD, Pres. W. P. KYLE, Vice-Pres. ALEX. NEWETT, Mgr.

NOTES.

Ferdinand Kating, a packer, and Robt. Hand, rose foreman in plant B, both employes of Poehlmann Bros., were run down by a train while returning home from a dance early Thanksgiving morning. They had taken to the railway track as a short cut for home. A train approaching they stepped from one track to the other in front of a train coming up from the opposite direction. Kating was killed instantly and Mr. Hand had his arm so badly splintered that, while the doctors may perhaps save it, he will never be able to bend it again. After the accident Mr. Hand crawled half a mile to the nearest house for help.

One of the curiosities of the holiday decoration trade is the annual trip of the Schooner Geo. L. Wrenn, Capt. Schoeneman. This boat makes one trip every year to the northern wilds, making all those points inaccessible by rail and not touched at by the other lake craft. Christmas trees and decorations are gathered by the Michigan and Wisconsin Indians and bought up by the captain at a small figure. The stock brought here in this manner is only a very small percentage of that which reaches this market by rail.

Leonard Kill is showing around the market a prize he received for bowling, or billiards or something else. In fact Leonard himself gets a bit mixed as to how he won it. It is in the form of a plush watch case. Harry Lubliner came in the other day when the store was most crowded. Harry released the spring and the explosion sent him about four feet into the air. He dropped the thing as if it had been a bomb, but all it held was a small cap such as the small boys make merry with along about July 4.

Wietor Bros. are coming in with a fine crop of Uncle John and Mme. Chatenay roses. This past week they were showing some fine sample chrysanthemum blooms sent in by the E. G. Hill Co., of Richmond, Ind., the varieties being Golden Dome and Mlle. Jeane Rosette, the latter a fine late pink. Nick. Wietor claims a 12 per cent increase in this year's Thanksgiving business over that of a year ago.

L. Coatsworth, of the Benthey-Coatsworth Co., was last week elected president of the Ravenswood golf club. Mr. Coatsworth is one of the few enthusiastic golfers in the local trade. This firm is bringing in some fine Bride, Bridesmaid and Killarney roses. Richmond will be coming in for Christmas and New Year's.

H. N. Bruns has an extremely fine cut of lily of the valley on now and this noted grower will be cutting heavily all through the holidays. One day's cut, December 1, amounted to over 6,000 and the demand continues extremely brisk for this fine stock.

Mrs. Annie Ryak, formerly in the retail business, died late Sunday evening at her residence, 486 W. Eighteenth street. Mrs. Ryak was the daughter of Frank Holy, the oldest florist in that section of the city, and a sister of Joseph Holy.

C. W. Johnson, well known to the trade of this section, passed through the city this week with his family, enroute to Europe, having severed his Seattle connections.

The west side retail florists are still showing very fine chrysanthemums and a good demand is reported. Palms and pot plants are moving slowly in most places.

The J. B. Deamud Co. is showing some extra fine carnations of all the leading varieties, including Enchantress, Lawson, Boston Market and White Cloud.

Chas. W. McKellar is receiving some fine dendrobiums. There are some cattleyas coming in, but these are not yet sufficiently plentiful to meet all demands.

"Biggest Thanksgiving over," says John Risch, of Weiland & Risch; "40 per cent better than last year. Roses, especially Killarney, did the trick."

Otto Schwill, Jr., of Memphis, Tenn., who has the sympathy of the trade in the recent loss of his wife, was Leonard Kill's guest this week.

Thos. Knight, representing the Julius Roehrs Co., Rutherford, N. J., was in the city this week showing Christmas plants.

Vaughan & Sperry have already received one advance Christmas order for 10,000 violets.

Peter Reinberg is bringing in some very fine Uncle John and Mme. Chatenay roses.

Visitors: E. G. Hill, Richmond, Ind.; C. A. Johnson, Chillicothe; Wm. Swinbank, Sycamore; C. H. Frey, Lincoln, Neb.; A. L. Glasser, Dubuque, Ia.; A. Caspers, Rochelle, Ill.

BUSINESS GOOD.

Last week's business was good, everybody working every minute. It was a record breaker for Thanksgiving business. The chrysanthemum men made a grand clean up, as with the exception of Jeanne Nonin and Mrs. Jerome Jones the market is now almost entirely bare. Jeanne Nonin is a grand late white which sells at sight. Prices jumped considerably, tea roses getting up to $10 and $12 while American Beauty sold as high as $7.50 per dozen for the specials. These latter are fine, however, showing almost midwinter form. Carnation figures were also raised, the fancies bringing $5 to $6. Violets were in great demand. One dollar was the price for the best singles, while doubles readily brought $1.50. But little mignonette is seen as yet. For some reason it seems very late. Poinsettia is now seen in the commission houses. Twenty-five cents to 40 cents is the price.

NOTES.

The week rounded up with a great demand occasioned by the army and navy football game. There were the flowers worn at the game and for the great number of visitors in town for the event there was much entertaining. Habermehl's at the Bellevue-Stratford had over 200 table decorations in the hotel for the Saturday after the game, their large force being taxed to the utmost to get the orders filled.

W. B. Lake has a novelty in violet ties which is taken in all the best stores. Instead of a bow at the end each end has a short piece attached with a gold braid band, making a double end. The gilt effect when attached to the bunch gives it a very up-to-date appearance.

The Leo Niessen Co. is right in it on American Beauty roses, its growers' crops seeming to be just right. A new consignor of double violets of fine quality is a recent addition. Mr. Niessen says business is most excellent.

It is astonishing how the demand for orchids is growing. The Pennock-Meehan Co. is handling large quantities of flowers daily, shipping them all over the country. This company's white violets are also much in demand.

Wm. E. McKissick says that his Thanksgiving business was fine. His Christmas stock is reported by his growers to be the best they have ever had and he already has orders booked for the holidays.

All the wholesale men are handling Christmas greens and holly, the latter by the way reported to be very well berried.

Mr. McLean, of the Rosary shop, is to go west again to assist his father in their growing business at Youngstown.

W. J. Baker has been on the sick list, but is reported better.

K.

Boston.

TRADE AND PRICES GOOD.

Thanksgiving is over and the demand for flowers, without which the day would not be appropriately observed, was never so great. Large quantities of flowers were used, not only for the home but for churches and hospitals. However there was no serious scarcity and but little was sought that could not be easily procured. Chrysanthemums were chiefly in demand, the most favored color being yellow and the most popular varieties Major Bonnaffon, Nagoya and T. Eaton. Pink and crimson varieties were rather scarce, but the market was well supplied with white blooms, which sold unusually well. Next to chrysanthemums the demand was for roses, carnations and violets, roses being the most attractive. Richmond was well displayed and the supply of this rose was unequal to the demand, high prices being asked. American Beauty roses brought good prices. Killarney, Mme. Chataney, Morgan, Bon Silene, Safrano, Bridesmaid and Bride were only fairly good and rather scarce. Carnations are high in price in view of the supply, which was sufficiently large to meet all demands. Fair Maid is far superior to any other variety on the market and increasingly popular. Violets have been very scarce, bringing good prices. Yellow marguerites never sold better than now. The growers receive $1 to $1.50 per 100 for them yet still the demand is far greater than the supply. This seems to be a line of stock in which there is a good field for adventurers. The latter part of the week found the market entirely depleted and with but little stock procurable, consequently prices jumped to abnormal figures.

NOTES.

The Henry N. Robinson Co. far exceeded their anticipation in the holiday trade. Not a small proportion of this was delivered to out-of-town dealers, this firm shipping flowers to all sections of New England. They are now preparing for Christmas with a larger force of men than ever before employed by them.

Mrs. G. L. Clark, the enterprising grower from Cohasset, may be seen daily travelling to market with her automobile loaded with boxes of chrysanthemums. Her example may well be followed by other growers who spend a great amount of valuable time on the road.

The decorations for the Armory ball given December 4 at the Algonquin club were under the direction of Wm. E. Doyle. This was one of the largest coming out parties of the season and the club was attractively beautified by the lavish use of cut flowers and plants.

Houghton & Clark have been very busy, having a number of large decorations booked, among them being the decorations for the town of Needham, which is celebrating its establishment.

Frank T. Hanley the well known violet grower of Brookline, Mass., sailed November 27 on the steamship Ivernia for his old home in Ireland, where his aged father is seriously ill.

The Newtonville Avenue greenhouses where the Miss Jerome Jones chrysanthemum is a favorite, cut a great quantity of this variety in three shades, white, yellow and pink.

Peirce Bros. of Waltham, Mass., were the backbone of the chrysanthemum market during the holiday business and had a fine crop of yellow and white Eatons on sale.

The Central Avenue Greenhouses have an unusually good stock of cyclamens of fancy varieties which are among the popular holiday plants.

John Walke of Salem, Mass., is supplying to the trade a fine stock of Begonia Gloire de Lorraine in various sizes.

The W. W. Edgar Co., Waverly, Mass., is cutting quantities of cypripediums of fine quality.

B.

Pittsburg.

THANKSGIVING TRADE GOOD.

Thanksgiving sales were good, is the general report. The cut of flowers was expected to be larger but there seemed to be enough to go around. Carnations were good and ran as high as $5 per 100. Roses were rather scarce especially red. American Beauty was plentiful and good. Paper White narcissus and Roman hyacinths were abundant but did not sell well. Stevia was very plentiful as were chrysanthemums. Yellow varieties were the only ones carried over, there being quite an over-supply of them. Violets cleaned up quick Wednesday, but several lots which arrived Thursday were put in storage until Saturday. There was just enough green stock to go around. Shipping orders were good.

NOTES.

T. P. McCormick, of the Florists' Exchange, was knocked senseless by a couple of thieves on the Ninth street bridge November 24. Luckily two strangers happened to approach at which the robbers fled. In a few days Mr. McCormick expects to be back at his post.

John Baldinger was called to New Martinsville, W. Va., November 24, owing to the sudden death of his brother.

Geo. Stanger is now with G. & J. W. Ludwig, Allegheny Market.

Patrick Maier has a nice cut of Harrisii lilies.

Visitors: Joseph Thomas, Greensburg; G. L. Huscroft, Steubenville, O.; Mr. Warrick, Washington, and B. A. Mick, Wellsville, O.

J.

PLAINFIELD, N. J.—A serious accident befell Mr. Carson, the florist, on November 9, when he fell from a tree and was so seriously injured that he was taken to Muhlenburg hospital.

PICKLING PROCESS AGAIN WORKING.

The business occasioned by the Thanksgiving holiday was a little disappointing. As usual many growers considered it good policy to hold back their stock on the two days preceding the holiday, dumping it in pretty heavily late on Wednesday afternoon and on Thursday. The violet growers were the gravest offenders in this respect, and it is very evident that they have not profited by the experience of former special seasons. Violets were husbanded until Wednesday evening when a quantity arrived which taxed the selling facilities of the wholesalers sadly, and on Thursday morning the commission men received consignments absurdly large. The result was that large concessions in prices were made to move the stock, and on Friday the street men were in their glory, trays full of good violets being very conspicuous around the shopping district. Rose and chrysanthemum growers also succeeded in hampering their commission men with late shipments to an extent which is probably plainly to be seen in the returns made for last week. Taken altogether the market was flooded to such an extent that anything like cleaning out on a profitable basis proved impossible. Monday saw a continuance of such conditions in the main, but cleaning out was easier. Roses from a supply standpoint were nearer the normal, but values changed very little, owing possibly to a shorter supply. Liberty and Richmond seem to be in competition in point of quality and it would be hard to say which is best. Chatenay is a good seller, and many of the now quotable sorts, particularly Killarney, move well. Carnations are getting on the over-supply side and ordinary grades are suffering somewhat. Enchantress and Lawson are preponderating and militate in demand against the finer varieties. Chrysanthemums, at midweek, are bringing closing prices, some of the late fine varieties closing out easily at $3.00 per dozen. Bouvardia, pansies, stevia and other stock all find an output at remunerative prices.

NOTES.

Some of the Broadway florists made fine window displays during the Thanksgiving season. Chas. Thorley had the center column of his big store window covered with preserved adiantum enlivened with poinsettias. Large vases of special American Beauty roses made a fine background for some splendid plants of Begonia Gloire de Lorraine. On another day he made a fine showing of Camellia elegans Chandleri. J. H. Small & Sons had a grand exhibit of Nephrolepis Whitmani well grouped in one of their windows and used leaves and pine cones loosely scattered on the window floor for the holiday effect. Siebrecht & Son made a fine showing of cattleyas and Otaheite oranges. Camellias and Begonia Gloire de Lorraine were used in the window displays of quite a number of florists, and pussy willow twigs seemed also very popular.

At a meeting of the West End association held recently, the question of beautifying Broadway came up. J. L. Brower made the suggestion that the center strips in upper Broadway be planted with Norway maples and horse chestnut trees, with gravel spread on the ground, as such things were done in France and Germany. Grass plots and shrubbing in street centers he considered out of place, as children and dogs destroyed them. Shrubbery was also dangerous in view of the fast increasing number of automobiles, children being apt to jump from it without seeing the machines, to their injury or possibly death.

The meeting of the Florists' Club on Monday, December 10, is of more than ordinary interest. Election of officers for the ensuing year is the main business and there is much conjecture as to the outcome. For the presidency, the candidates are C. H. Totty and John B. Nugent, Jr.; for vice president, Harry O. May and Jos. A. Manda; for secretary, John Young and Alex. J. Guttman, and for treasurer, Charles B. Weathered and L. W. Wheeler. In the voting the outlook presages a very close vote and a large attendance at the meeting may be expected.

The city branch of the National Plant, Flower and Fruit Guild last week distributed prizes to tenement dwellers for the best window boxes seen in tenement windows during the summer. The guild placed over 800 window boxes in tenement houses last spring, and is doing excellent work in the direction of cultivating a love for flowers in such homes.

The third regular meeting of the Horticultural Society of New York for the season of 1906-7, will be held in the rooms of the American institute, 19-21 West Forty-fourth street, December 12. A lecture will be given at the public meeting at 4:30 p. m., on "Sports," by P. O'Mara. A meeting of the council will be held in the Board Room at 4 o'clock p. m.

R. Armstrong, of Los Angeles, Cal., who has been spending several weeks here, left on Tuesday for Chicago, enroute for the coast, expecting to spend his Christmas among the roses. Mrs. Armstrong, who shared his visit, left with him.

Gottlieb Meyer, the Fifty-eighth street and Madison avenue florist, has just added to his store front a frameless extension window which he keeps particularly well dressed.

James W. Begbie, recently with Arthur T. Boddington, 342 West Fourteenth street, has removed to Shreveport, La., where he has opened a seed and flower store.

Herbert Bradley, of Montclair, N. J., who was killed a few days ago by a deer in his park, was a lover of orchids and was about to put a large stock in his greenhouse.

There is quite a shortage of white moss reported by wholesalers, and retailers are somewhat anxious as to the source of supply for immediate and future wants.

Next Tuesday will probably wind up the auction season and the auctioneers will rest their voices until next March.

Louis Schmutz, of Flatbush, is the poinsettia king this year.

THERE is a very noticeable absence of red Christmas bells in the general store windows of the larger cities this season and no doubt low price and quality hastened their going more than fashion.

Newport, R. I

RETAIL FLORISTS BUSY.

Thanksgiving trade was better this year and most of the stores sold more plants than in former years. There was a good stock of fruited oranges, Jerusalem cherries, partridge berries, cyclamen, primroses, Begonia Gloire de Lorraine and azaleas white and pink on hand. There was also an increase in the sale of cut flowers, chrysanthemums taking the lead. Carnations and violets were cleaned out by all the florists. A great number of yellow chrysanthemums were used for a golden wedding. A large quantity of good size funeral designs were sent from New York to Nicholas Kane's funeral, who was buried in the late Delancy Kane's family lot in this city.

NOTES.

F. L. Ziegler supplied the decorations at the church and house, at the Thompson-Weaver wedding, also the bride's bouquet of Bride roses and lily of the valley in shower effect. The bridesmaids bouquets were made of yellow chrysanthemums. The flower girl carried a basket of pink and white carnations. Gardenias were worn by groom and ushers.

Carl Jurgens received several millions of lily of the valley pips from Germany. He is possibly the largest importer and grower of lily of the valley in this country.

W. C. Elliott, originator of the Newport Prizetaker sweet corn and grower of several other fancy varieties of sweet corn, beans and peas, died November 27.

Miss Fadden reports a good trade, one order calling for four large wreaths, one made entirely of red carnations, others of galax leaves, chrysanthemums, etc.

V. A. Vanicek, proprietor of the Rhode Island nursery, reports a greater sale, and a large increase of trade in the nursery line.

Wm. H. Maher furnished the decorations and bouquets for the Martin-Lynch wedding held on Thanksgiving day.

F. L. Z.

Morristown, N. J.

The November meeting of the Morris County Gardeners' and Florists' Society was postponed to November 21 to allow the many members, exhibitors at various points, to return home. Evidently all were pleased, particularly the contingent which visited Chicago. The description they gave of the Windy city, and the treatment they received there, made more of us wish we had gone. Nomination of officers was the main business. R. Vine and R. M. Schultz were nominated for the presidency; Percy Herbert for vice-president; Wm. Charlton and Wm. Duckham for treasurer, and E. Reagan for secretary. R. Vine had a vase of carnation White Perfection. He secured a cultural certificate. Chas. H. Totty had a dozen Miriam Hankey on hand. It was ahead of any pink we have seen this year. By request, Mr. Totty is to tell at the next meeting how the new chrysanthemum showed up this fall at the various exhibitions. One new member was elected and three more names proposed.

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S. Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

TOMATO SEED is one of the cheap and plenty items on the vegetable seed lists.

A GOOD lot of Indiana grown onion sets are tied up in Indianapolis by some legal complications.

THE Saturday Evening Post of Philadelphia tells of Albert Dickinson in its talks of "Who is who."

ONION SETS left about Chicago now are mostly stored by growers who are not disposed to sell to spring.

CHICAGO.—Alex. Henderson, of Vaughan's Seed Store, returned from Europe with his family December 2.

HORATIO NELLIS, father of A. C. Nellis, died suddenly at the latter's residence, November 13, in his eightieth year.

ROCKFORD, ILL.—H. W. Buckbee has returned from his California trip, having covered most of the seed growing districts there.

S. M. ISBELL & Co. are offering a new musk melon called The Grand, said to be 10 to 14 days earlier than Osage and equal in flavor.

BOSTON, MASS.—Peter Miller of Joseph Breck & Sons, sailed from New York December 1 for a two months' pleasure trip in Europe.

SOME important changes, affecting nurserymen and seedmen, have been made in the new Canadian tariff, particulars of which appear elsewhere in this issue.

A VERY useful bulletin entitled "The Melon Aphis," by F. H. Chittendon, has been issued by the Department of Agriculture. The bulletin of 16 pages is fully illustrated.

SEEDS of vegetables, flowers and plants in common with beans, maize and other grain-products on entering Costa Rica pay a duty of .02 colon per kilo. The colon is equal to $0.465.

SECRETARY WILSON in his annual report says: "The congressional seed work for the year has been conducted practically along the same lines as in the past. The number of packages of miscellaneous vegetable and flower seeds sent out during the year was about 7,000,000. There has been no change in this number during the past five years."

VISITED CHICAGO:—L. C. Routzahn, of the Routzahn Seed Co., Arroyo Grande, Cal.; H. A. Johns, of Sioux City, Ia.; R. H. Shumway, of Rockford, Ill.; C. R. Kimberlin, of San Jose, Cal.

CUCUMBER BLIGHT has become so prevalent about Chicago that the hundreds of acres planted in Cook county have nearly become a thing of the past. Cuke pickles must now be shipped here.

CHICAGO.—L. A. Budlong, of the Budlong Co., is taking a winter yachting trip along the south Atlantic coast and the Florida waters as the guest of his nephew, Frank Budlong of Providence, R. I.

EARLY INQUIRIES are coming in for onion seed showing that planters are alive to the shortage and are ready to get prices as well as samples for testing for vitality. The smart grower has to be "shown" nowadays.

LOUISVILLE, KY.—Western and Minneapolis buyers have been looking for onion sets in this market the past week Yellows are worth about $1.40 here today, December 1st, sacks extra, and stocks are pretty well out of first hands at this time.

PROF. W. W. TRACY, of the Department of Agriculture, Washington, D. C., and member of the Council of Horticulture, has been appointed chairman of a committee to co-operate with the Jamestown Exposition authorities in planning a horticultural congress during that time.

CHICAGO ONION SET growers are reported as buying Louisville seed for Set planting for the coming season, using the so-called Yellow, which is somewhat reddish or mixed with light red, for that purpose at a price of 60 cents per pound, also some of the Louisville White Seed. Buyers of sets next autumn who are looking for Chicago yellows will certainly be disappointed with this colored stock.

THE present rate of duty on clover seed entering Cuba is $4.50 per 100 kilos, gross weight. From this a reduction of 20 per cent is made to United States produce making the net duty $3.60. Flax seed, gross weight, enters at $1.25 from other countries, 82 cents from United States. Timothy seed enters at $2.50 and $2.00 respectively and the unit of quantity is in each case 100 kilos. The importation of foreign tobacco seed into Cuba is prohibited until further notice.

THE Bureau of Plant Industry, of the Department of Agriculture, reports the introduction of a Siberian alfalfa, that in its native country withstands without snow protection a cold of 40° below zero. The report says, "This discovery may mark an epoch in the agriculture of the northwest prairie regions of the United States." Other introductions are a vigorous Arabian alfalfa and the Tangier pea which has yielded nine tons of green feed per acre. Much good work has been done by the department in the investigation of seed adulteration, also in securing high grade strains of sugar beet. Especially satisfactory are the results obtained in the development of a sugar beet seed with a single germ, which will lessen the work of thinning and singling, a very important point.

Experiments In Bulb Culture.

Thirty thousand hyacinth tulip and narcissus bulbs have been imported and distributed among various farmers in Washington state with a view of testing how far the soil is suitable for their culture. John Vander Bosch is associated with John Mass, the owner of one of these farms at Hillyard Orchard Heights. The former has had considerable experience as a bulb grower both in Holland and England.

The soil at Hillyard is described as

A. J. Pieters Seed Co.

THE FINEST VALLEY FOR EARLY FORCING NOW READY.
$14.00 per 1000; $1.50 per 100.
Selected Pips for forcing at all seasons.
THIS stock has been picked out with the greatest care. We feel satisfied that they will force out at Christmas or earlier and do splendidly. No better pips can be had. (All cold storage stock sold out.)
FANCY CUT VALLEY FOR THANKSGIVING.
H. N. BRUNS,
1409 W. Madison St., - - CHICAGO.

volcanic ash and is thought by the expert to be good for bulb culture. His estimate is that from a quarter acre lot 50,000 to 60,000 bulbs can be taken and as all flowers produced are a by-product that goes to the grower the bulb farm should show a handsome profit. There are two other farms where bulbs are to be grown, at Tacoma and Bellingham. The bulbs are supplied free of cost by the government but one-tenth of the produce has to be returned, and the farm making the best showing is to be made a permanent experiment station.

LOS ANGELES, CAL.—This is the time the store boys are thinking of smuggling holly from Catalina for the Christmas trade.

WELLINGTON, KANS.—Mrs. J. H. Hill has bought the Hiram Myers greenhouse and rebuilt it 30x100 feet, with steam heat, and electric lights.

The Nursery Trade

American Association of Nurserymen.
Orlando Harrison, Berlin, Md., President; J. W Hill, Des Moines, Ia., Vice-President; George C. Seager, Rochester. N. Y., Sec'y.
Thirty-second annual convention, Detroit, Mich., June, 1907.

CONSUL H. S. BRUNOT in a report from St. Etienne suggests the culture of the English—so-called—walnut in the southern states. Over $30,000 worth of this nut is exported to America from St. Etienne alone.

IF the colored plate in the Garden November 24 is as true to nature as these plates were wont to be, the new rambler rose Hiawatha should prove to be a good variety for garden use. The flowers are single, borne in large clusters, the color an intense bright crimson with a white center.

THE Pennsylvania railroad has sodded down several stretches of the banks and ditches with a view to prevent erosion by storm water, and though the cost has been very great it is estimated that it will be a good investment, much less labor being needed to keep the track clear. There will also be less interference with the ordinary traffic of the road by ballast and laborer's trains.

Nurseryman Vanderbilt.

Baltimore, November 22.—From this date George W. Vanderbilt, Lord of Biltmore, is to be gardener in chief of the city of Baltimore, his honorarium being $3,280 a year. Some time ago the park board made up a list of the nursery stock, plants, shrubs, bulbs and other things it felt it needed for the adornment next year of the parks and squares and then advertised for bids. The only response came from the landscape department of the Biltmore estate, Mr. Vanderbilt's magnificent place in North Carolina, which offered to furnish all the things needed for $3,280.13. As this was within the estimated cost, the offer was promptly accepted.

The customary certified check accompanying the bid was in unusual form. Instead of being a check, it was a voucher, certified by the National Park bank, of New York.

The Climbing Rose Rubin Or Bury.

In its issue for August 25, 1906, the Deutsche Gartner-Zeitung, Erfurt, publishes on page 414 a large illustration of the climbing rose Rubin, originated by J. C. Schmidt, a horticulturist at Erfurt, Germany, and introduced in 1899.

This climbing rose, which is very vigorous, is especially recommended for decorating pillars as well as for quickly covering arbors. It is simply an improved variety of Crimson Rambler, with which it has much similarity; its flowers are a little larger and of a brighter red. These are the principal characteristics which distinguish it from Crimson Rambler.

This rose is the variety which was exhibited as a novelty in 1905, in the rose division of the French National Horticultural Society, by Cayoux & Leclerc, seedsmen, Paris, under the erroneous name of Ruby.

Why change further the already badly mixed nomenclature of roses? The first name of this sort is the one which should be retained for this climbing rose, whose purchase and planting are to be particularly recommended in high and cold regions because of its hardiness.—Journal des Roses, September 1906.

Nurserymen Landscape Despoilers.

A correspondent of our esteemed contemporary, Country Life in America, gives our well known bumptious friend,

The Late George Ellwanger.
See obituary

the nurseryman landscape despoiler, a timely and well deserved castigation as follows:

A friend of mine who has recently completed a new house and grounds asked me what to plant in the way of shrubs and trees. I went over the place, sketched a little plan, located shrubs quite freely, and handed him the list. He counted them up and smilingly said, "A man came into my office and said he would like to go up to my place, look it over, and prepare a plan and estimate the number of shrubs wanted. He said it wouldn't cost me anything; that he was a landscape gardener and could buy quite cheaply and would charge a slight commission on cost for his services. Here is the list."

This list called for over 350 shrubs. My list was 40. The space to plant was an area 48x100 feet. Out of this 100 feet width, space must be taken for the walk, 4x48, and a service walk 3x48. In addition to this, the ground is already occupied by seven large native oaks and maples and ash, some 40 to 50 feet tall. My friend came very near letting this man clutter up his place because he did not know any better. Undoubtedly many persons are swindled in this manner and they ought to be warned.

There is another class of landscape gardener equally dishonest and obnoxious, the fellow who goes out and wantonly destroys fine natural landscape, trees and shrubbery in order to substitute the artificial work and nursery stock. Our aim is to promote the interests of the trade, horticulture and floriculture, and in doing this we say with all the fervor at our command, put these holdup men and all others of that ilk out of business as quickly as possible. We have given our views on the villanous class repeatedly in these columns and we are very pleased indeed to see that others are awakening to the fact that it exists.

Tree Peonies.

THE great beauty and utility of the Chinese or tree peony is not sufficiently recognized in America. At the time of its flowering in May there is nothing that can compare with the better varieties for gorgeous beauty, rich tint and size of flower, while the beautiful foliage coming right up under the blooms makes a perfect bouquet of each. With all their size and rich coloring there is a refinement and grace about them that is lacking in most other flowers of the same effective character; even those of the single forms of the herbaceous peony cannot compare with them in this respect. They are strictly hardy in any but the most exposed positions, but they well repay being planted in a sheltered position by their increased growth and earliness. Good soil and careful culture are essential, and a light shading over the plants, should very hot weather ensue at flowering time, helps to bring out the richest tints of color.

WILKESBARRE, PA.—Many suggestions for the extensions of the parks system have been made by the local papers lately, including one from the Times to sell the coal underlying the river and common to provide the necessary funds.

Buffalo.

CARNATIONS SCARCE.

Trade for Thanksgiving was about as good as could be desired and an increase over last year. Stock was equal to all demands with the exception of carnations which are not in very great supply at present. Chrysanthemums were plentiful and good. But since Thursday the autumn flower is almost classed with the past. Violets, American Beauty and other roses are good. Harrisii lilies are coming in daily and of very good quality. The weather is cool and everything indicates a snow storm, which, if it comes good, will enliven things for the holidays.

NOTES.

More honors have come to W. F. Kasting; he is now president of the Buffalo German hospital association, and it is safe to say that things will hum under his administration.

Receptions and banquets last week, together with the college boys' and girls' dinner kept the florists busy on the days preceding Thanksgiving.

Joseph Sangster who has been in Paterson, N. J., the past two years is again at Anderson's and greeting the customers as of old.

S. S. Pennock of Philadelphia, and C. H. Roney of Jamestown, N. Y., were recent callers.

S. A. Anderson has a fine lot of begonia plants that will be just right for Christmas.

J. H. Rebstock has started the improvements at his Elmwood avenue place.

BISON.

FOR SALE—'MUMS.

One of the Finest Gifts for the Holidays is a Beautiful Plant.

FINE, WELL-GROWN PLANTS OF OUR

Tarrytown Fern

(NEPHROLEPIS PIERSONI ELEGANTISSIMA)

Makes one of the finest plants for a holiday gift that we know of. We sell large quantities of these at retail among our local customers, and there is nothing more profitable or satisfactory for Christmas sales than a few of these nice plants.

We can offer fine selected specimens in all sizes, from medium sized plants in 6-inch pans up to immense elegant specimens in 16-inch pans, suiting all purses and all classes of trade. Order early and have the stock on hand where you can show it. You will find nothing more satisfactory or profitable. We can supply fine plants as follows:

Fine plants, 6-inch pans, 75c and $1.00 each, according to size. Fine specimen plants, 8-inch pans, $1.50 and $2.00 each, according to size. Very fine specimen plants, 10-inch pans, $3.00 each. Large specimens, 12-inch pans, $5.00 each. Extra large specimens, 14-inch pans, $7.50 each. Still larger specimens, 16-inch pans, $10.00 each. Also young stock for growing on, $12.00 per 100.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York.

My New List Will Be Ready December 1. SEND FOR IT.

CHARLES H. TOTTY, Madison, N. J.

Indianapolis.

THANKSGIVING TRADE.

The best that can be said of Thanksgiving trade is, that it was about as good as last year, but in several instances, it was even less. Violets fell away behind other years and chrysanthemums better than any other cut flower. "The people were trying to get the biggest show for the least money," is what one grumbling retailer had to say.

NOTES.

A. Wiegand & Son had a very attractive window decoration representing early Thanksgiving evening, with the moon rising over an old time rail fence, which inclosed a pen of turkeys and other domestic fowls just going to roost, unaware of the fate that awaits the choicest of them. The scene was unusually realistic and attracted a good deal of attention.

Sparks from Martin Nelson's smokestack set his shed roof on fire the other night, and Martin had a lively time saving his buildings; Sidney Smith came to his assistance, establishing a new record in covering the distance between his own and Nelson's place.

The east market hall is likely to be torn down to make room for the new city hall; the occupants, including the florists, have to be ready to vacate on a 30-days notice. Many are in fear that this change will be detrimental to business.

Carl Sonnenschmidt, of Smith & Young Co., visited St. Louis. He was much pleased at the way his tea roses sell in that city.

Irvin Bertermann has sold his residence on E. Washington street.

Visitors: W. W. Coles of Kokomo, Ind., James McHutchison of New York, and Miss Cossairt of Shelbyville.

J.

GENEVA, N. Y.—The annual display of chrysanthemums at the state experimental station opened November 12. W. J. Kitney the gardener has a finer show this year than ever, the chrysanthemum having received special attention from the horticultural department.

ZION CITY, ILL.—Chas. Uhlik reports very poor business at Thanksgiving, only $10 having been taken in two days. This florist has purchased the stock and leased the greenhouse of the Zion City horticultural department.

Last Call for Chrysanthemums

Clementine Touset Jeanne Nonin. Monrovia, white and pink Pacific, white and yellow Bonnaffon, white and yellow Eaton, Mrs. Weeks, Viviand Morel J. K. Price: $5.00 per 100; $40.00 per 1000. 250 at 1000 rate.

5 per cent discount for cash with order.

RUDOLPH FISCHER

Great Neck, L. I., N. Y.

THE NEW

Cyclopedia of American Horticulture.

BY PROFESSOR LIBERTY H. BAILEY.

Over 4,357 articles in all by 450 expert writers, including practically all the best botanists, nurserymen, seedsmen, florists, market gardeners and experimental station horticulturists. Occupying 2,100 pages and covering 24,434 plant names, 2,800 detailed illustrations, enormously increasing the ease of identification, and 146 beautiful full page illustrations.

Every reader of this paper who is interested in farming, in gardening, in trees, in shrubs, and all out of door matters, absolutely needs this set. It takes the place of all others combined on American gardening.

In Six Great Quarto Volumes of 2,100 Pages You Find:

Descriptions alphabetically arranged of all—over a thousand—of the native trees, plants and flowers worth cultivating, with keys enabling you to name any species, as well as to find all information regarding it. Practical articles by leading experts of the country on all phases of commercial plant production and greenhouse management—cut flowers, vegetables, etc.

Fullest cultural instructions for every flower, fruit and vegetable, tree and ornamental plant you may wish to grow.

SPECIAL OFFER.

The regular price is ***$30.00.*** For a few weeks we are able to offer this new and revised edition with the new material added at ***$22.80*** cash. This offer will be withdrawn January 1, and the price increased.

Prepare for Christmas.

PRICES SLAUGHTERED ONE-HALF THE NORMAL.

☞ **THIS IS OUR LAST SLAUGHTER.** ☜

Is it possible to sell an Araucaria Excelsa, 4 years old, 18 to 23 inches high, 5 to 6 tiers for 75c? YES! Aschmann can do it. Read explanation below.

Prices **never** offered so low in the history of Araucaria cultivation. Why is that? For the simple reason, to obtain room to cultivate our great Easter stock. About 5,000 Araucarias, with an immense lot of Palms, Ferns, Azaleas, Rubbers, Begonia Gloire de Lorraine, etc., must be sold by Christmas.

☞ Please take notice. In all the Araucarias only spring importations are offered: raised in pots all summer, and can be shipped any distance safely without drooping

ARAUCARIA EXCELSA

There is no home complete without an Araucaria 5½ to 6-in. pots, 18 to 23 in. high, 5 to 6 tiers, years old, 75c; 6-in. pots, 23to 25 in. high, 5, 6 to 7 tiers, 4 years old, $1 00; 6 to 7 in. pots, 25 to 30 in high, 5, 6 to 7 tiers, 4 years old, $1.25; 7-in. pots, specimen plants, from $1.50, $1.75 to $2.00 each.

ARAUCARIA COMPACTA ROBUSTA—have several thousand of them; can supply all wants. These plants were never so fine in shape and condition as this year. The pet of the greenhouse; as broad as long. 6-in. pots, 3 tiers, 12 to 14 and 16 to 18 in. high, same wide, 3 years old, $1.00 to $1.25 each; 6 to 7 in. pots, 4 to 5 tiers, 18 to 20 and 22 to 25 in. high, same wide, 4 years old, $1 50 to $1.75 each; 7-in. pots, specimen, 6 to 7 tiers, and 25 to 30 in. high, same wide, 5 years old, $2.00 to $2.50 each.

ARAUCARIA EXCELSA GLAUCA—this variety on account of its beautiful green-bluish tiers, dwarf habit, fine compact shape gives it a striking appearance, and anybody seeing the plants must undoubtedly fall in love with them at sight. 6-in. pots, 3 tiers, 14 to 16 and 18 to 20 in. high, same wide, 3 years old, $1.00 to $1.25 each; 6 to 7 in. pots, 4 to 5 tiers, 20 to 25 and 25 to 30 in. high, same wide, 4 years old, $1.50 to $1.75 each; 7 in. pots, specimen, 5 tiers, 30 to 35 in. high, same wide, 5 years old, $2.00 to $2.50 each.

All these plants are as broad as long; the finest you have ever seen.

Aschmann's Ever-Prosperous Greenhouses Now Great Slaughter Houses.

HAVE NO MERCY, DOWN GO THE PRICES.

NO SCARCITY OF KENTIA PALMS.

Can meet all wants cheaper than ever.

KENTIA FORSTERIANA, 7-in. pots, made-up plants, 1 large size, about 45 to 48 in. high in the center, and 3 smaller sizes 25 x 30 in. high around, which gives them a good appearance, $2.00 to $2.50 each; 6-in. pots, single plants, 36 to 45 in. high, 5 to 6 good leaves, 4 years old, $1.25, $1.50 to $1.75 each; 6-in. pots, 32 to 36 in. high, 5 to 6 good leaves, 4 years old, $1.00 each; 5½ to 6 in. pots, 4 years old, 30 in. high, 5 good leaves, 4 years old, 75c; 4-in. pots made-up plants, 3 plants in a pot, 18, 20 to 25 in. high, 25c, 30c to 35c each.

ARECA LUTESCENS, 5-in. pots, 24 in. high, made-up with 3 plants, 35c; 4-in. pots, 20 to 24 in high, made-up with 3 plants, 25c.

ARECA SAPIDA, just imported from Belgium, something new, very attractive, looks like Kentia, 25 in. high, 50c.

COCOS WEDDELLIANA, 15c.
ASPARAGUS PLUMOSUS NANUS, 4-in. pots, large bushy, 10c to 12c
ASPARAGUS SPRENGERI, 4-in., 10c.
FICUS ELASTICA, or **Rubber Plant,** 6 in. pots, 25 to 30 in. high, 40c to 50c each.

FERNS, all raised in pots and not on benches as follows:

NEPHROLEPIS BARROWSII, 7 in. pots, as big as a bushel basket, 75c to $1 00 each; 6-in. pots, large, ready for 7-in., 50c; 5½-in., 40c; 5-in., 35c; 4-in., 25c.

NEPHROLEPIS SCOTTII, 8-in., as big as a washtub, worth $3.00, now $1.50; 7-in., as big as a bushel basket, worth $1.50, now 75c to $1.00; 6-in., 50c; 5¼-in., 40c; 5-in., 30c to 35c; 4-in., 20c to 25c.

NEPHROLEPIS ELEGANTISSIMA, 5-in. pots, 30c.

BOSTON FERNS, 7-in., very bushy, only 75c; 6-in., 50c or $5.00 per doz.; 5-in., 30c to 35c; 4-in., 20c

FERNS—A fine assortment of Ferns for dishes, large, bushy, out of 2½-inch pots, $5.00 per 100

JERUSALEM CHERRIES, (or Solanum), 6 to 7 in. pots very bushy, full of berries, from $3.00 to $6.00 per doz.

DRACAENA BRUANTI, (imported), 30 in. high, full of green, waxy foliage from top to bottom; the only Dracaena for parlor, store or house culture, that can stand heat, dust and dirt; 6-in. pots, 50c, $5.00 per doz.

CYCLAMEN, will bloom for Christmas, 4-in. pots, 12c.

CHINESE PRIMROSES, 5¼-in. pots, very strong, in bloom and buds, $2.00 per doz.

HYDRANGEA OTAKSA, only pot-grown is offered, sure success for Easter forcing, 6-in. pots, 25c; 7 to 8-in., 50c.

AZALEA INDICA for Christmas, **all ready forced** in bud and bloom, Deutsche Perle, double white; Simon Mardner, double pink; Vervæneana, double rose variegated, flowers very large. Prices: 50c, 75c, $1.00, $1 25 to $1.50, cash. In the small sizes mostly white. Some white must be taken with colored. Azaleas for Easter forcing in the best American varieties, pink, white or variegated; 35c, 40c, 50c, 75c, $1.00, $1.25 to $1.50, cash.

BEGONIA GLOIRE DE LORRAINE, 6-in-pots, in bloom and bud, for now and Christmas, 50c to 75c each.

BEGONIA FLAMBEAU, sells on sight, 4-in., ready for a shift into 6-in., 20c.

BEGONIA ERFORDII. New Improved, 4-in., 20c; 5¼-in., 25c.

All plants must travel on **purchaser's risk only.** CASH WITH ORDER.

When ordering, say whether the plants should be shipped in the pots or not.

GODFREY ASCHMANN,

IMPORTER AND WHOLESALE GROWER OF POT PLANTS.

1012 Ontario Street, - - PHILADELPHIA, PA.

Cleveland, O.

INCREASED THANKSGIVING BUSINESS.

The reports on Thanksgiving day trade from the different stores, proves that most all were more than pleased with the increased trade. There seemed to be plenty of stock in all lines with the exception of fancy chrysanthemums which were all cleaned up early in the day. One notable occurrence was the lack of demand for violets; both single and double went very slowly, which is hard to understand when one considers that the weather was bright and clear.

NOTES.

A visit to the greenhouses of Chas. Bartells, who has leased the Essex place at North Olmstead, revealed everything in fine shape. Carnations are grown here for quality and Mr. Bartells may well be proud of the fine appearance of his whole place. Lawson is the principal carnation grown; pink, white and red varieties all give promise of a large cut for the holidays. A house of Crane which was in full crop for Thanksgiving was surely a picture to be remembered. A house of White Cloud and another of Boston Market are also very fine.

Smith & Fetter's window display for Thanksgiving was greatly admired by the flower-loving public. The fret work was draped with old gold velvet trimmed with artificial autumn leaves and the foreground, in fruits and vegetables, trimmed with novelties in flowers.

Peter Nichols, the Arcade florist, reports Thanksgiving trade as almost double that of last year, he having handled about 10,000 carnations, the same amount of violets and quantities of chrysanthemums and other stock.

At A. M. Coe's place stock is in first-class shape. Carnations, especially give promise of a good season's cut. H. A. Hammond, formerly of the Essex place, is now with Mr. Coe.

The Cleveland Cut Flower Co. has been receiving a fine cut of chrysanthemums from Wooster, Ohio.

J. M. Gasser has returned to this city from Cincinnati, having been brought back by relatives. OHIO.

DOBBS' FERRY, N. Y.—The sixth annual show of the local gardeners' association was held November 10, $300 being the amount realized thereby for the hospital. An exceptionally fine display was made by prominent amateur gardeners and the Ward Co., of Queens, L. I. Scott Bros., Elmsford, and the F. R. Pierson Co., of Tarrytown, N. Y., also exhibited.

H. R. CARLTON, Willoughby, O.
INTRODUCER and ORIGINATOR.

MABELLE, New Pink Carnation for 1907
Color—A peculiar shade of lovely pink, with a faint yellowish cast; several shades lighter than the Lawson. Unlike most pinks, the brightest sun does not injure the color. Size—3 to 4 inches in diameter when established. Odor—Pleasing, but not strong. Stems—Invariably strong, but always graceful, ranging from 12 to 30 inches during the season. Habit, etc.—A very quick, active grower, making specimen plants in a short time, even from late cuttings. On account of its rapid growth, requires supporting very soon after benching. Gets away rapidly, blooms early and gives long stems right from the start. Productiveness—Prodigious is the best word we know of to use here. It is the most incessant bloomer, early and late, we have ever grown. Stock limited. Delivery January 5 to 10 and later. Price, $12.00 per 100, $100.00 per 1000.

SUGGESTIONS FOR FLORISTS.

Needle Pines.

If you have any churches or large halls to decorate needle pines will come in handy. We plant them in 6-inch pots. They will keep fresh two to three weeks. You will make no mistake by ordering a few. Good tops three feet in length are offered at about $2 per dozen.

Leucothoe Sprays.

We use these quite extensively of late years. They are not only very useful for Christmas decorations, but are of great value to give your customer as green with cut flowers, as well as for the arrangement of flat bouquets, or large dinner decorations. They keep fresh a long time in a dark cool place. Cut a little off the stems and put into water.

Mistletoe.

When your customer gives you an order for holly she will ask you to put in just a little bunch of mistletoe, and this is the reason you handle it, for the profit that is in it doesn't amount to anything. If you want to prevent a loss of time, tie up your mistletoe in little bundles, wrap each bundle in wax paper, with price marked on each, and keep in a cool place until sold.

California Pepper.

I don't know of anything outside of holly itself that is as useful as California pepper for Christmas decoration, and while the price of $5 per small crate—almost half of which amount goes to the express company—is rather stiff, still a good profit is realized. Every spray in the crate can be used, as they are generally all good. And don't neglect to put in a good stock. It keeps well, and you are bound to have call for it after Christmas should you have any left over.

Laurel Wreathing.

More artistic than pine is laurel wreathing. I suppose one reason for our thinking so is because of its higher price, and it is not so extensively used by the general store keepers. For church or hall decoration it is to be preferred and can be used for this purpose as it comes all ready made up. For house decorations it will be best to make the garlands yourself, and just a little lighter than those usually offered. The made-up article is offered at 4 to 5 cents per yard. You can do better than this by making it yourself, but not much if you have many other things to attend to.

Christmas Greens.

In my last notes I spoke of the handling of holly. Next in importance as a decorative green comes ground pine. If you have call for the ordinary grade of wreathing it will be advantageous to buy it made up, but most likely your customer will ask for a better grade than that offered by your local grocer or butcher. In that case make up the wreathing yourself, and charge accordingly. There is little demand for evergreen wreaths, and this is as it should be, since a well made holly wreath is far more beautiful and more appropriate. While the ground pine is not affected by frost as holly is, yet you should keep it in a cool dark place, and as with holly, show only a fair sample from which to take orders.

Pot Covers for Plants.

Only too often the dressing up of plants for Christmas is overdone. You ought to know best, yourself, what your trade demands, and it would be wrong to give you a set rule for just what to do in that respect, yet it is not out of place to say that no plant, foliage or flowering, should be displayed in your store without a jardineire or pot cover. You can buy the waterproof crape paper in almost any shade now, the best for Christmas being white, deep red and dark green. A pot cover adds 50 per cent to the appearance of any plant, and using the waterproof paper will enable you to dress your plants three to four days before Christmas, as the paper will not droop or fade when it comes in contact with water.

Roman Hyacinths.

If you planted your Roman hyacinths early and brought them in during the

last week of November, where they were kept in a light house in a temperature of about 45° at night, they will be just right for Christmas. Our boxes contain about 60 bulbs. We put the plants into pans, averaging from six to 15 plants per pan about December 20. This transplanting does not seem to hurt them in the least. They have short stocky leaves and the stems are able to hold up the flowers without artificial support. A pan of Roman hyacinths or lily of the valley is always in demand for Christmas, and both want some sheet moss to cover up the soil in the pans. Moss on the top of the pots of palms or flowering plants in general gives a rather artificial appearance to the plants, except azaleas or bulbous stock, and I think it adds to the appearance of a dish of lily of the valley or Roman hyacinths.

Winterberries.

Last year one of our men arranged a centerpiece of nothing but winterberries surrounded by holly. It stood in the store and was the means of bringing us a number of orders for Christmas table decorations, and I believe that nothing we did in the way of exhibiting our goods paid us as well. It is quickly put up by using a thin piece of board, say 8 x 8, or any size desired. Sphagnum to the depth of three inches is fastened to the board and the branches of winterberry eight to 12 inches in length are stuck in the moss, after which the base is filled up with small pieces of thickly berried holly branches to give the winterberry a green setting, and while you can't sell a centerpiece of this kind to every customer, you will find a great many who will prefer it to cut flowers for Christmas day. Another thing I must not forget to tell you about is this, do not allow your boy, when filling a 25-cent order for winterberries, to pull out five or six small branches and by so doing strip all the remaining branches of their berries. Have them taken out carefully, tied in bundles as with holly, and, if at all possible, keep the stems in water. This will keep the wood and berries full and plump.

In conclusion, I will say to those who are after a satisfactory holiday business: Push the sales of holly and other greens. Try to sell your customer a palm, fern or blooming plant whenever possible, especially when you have to buy all, or nearly all, of your cut flowers, for the demand in this line is nine times out of 10 for red flowers, the orders for which in most cases your wholesaler will be unable to fill to his or your satisfaction. See to it that all goods sold are properly booked as well as labeled, with the time of delivery marked on each tag. Reserve a place to put all plants sold. You will not make a mistake by ordering a few more palms, or ferns than you think you will need, as there are always orders coming in at the last minute, so to speak, where a customer, in case you are out of cut flowers or flowering plants, will take a foliage plant and be glad to get it. Your customer wants you to wait on her and not your clerk. Don't take an order you cannot fill. Watch the details of your business, attend to them yourself whenever possible, for only by so doing will you be able to sit down and enjoy your Christmas dinner without fearing the 'phone will ring and someone spoil your meal.

Begonia Gloire de Lorraine.

This, the most beautiful of begonias, is certainly one of the best Christmas selling plants when well done. It is only a few years ago since it was introduced from France, and at that time only a few of us had any success with it. The writer, among others, was, after several unsuccessful attempts, almost ready to discard it, but after seeing those splendid specimens that good grower, J. A. Peterson, of Cincinnati, showed, another attempt was made, with the best of results. The cheapest way for the man who uses 200 or 300 plants is to buy well established stock out of 2 or 2¼-inch pots in early June, at about $15 per 100. Those who wish to propagate from leaves can do so now. Use nice fully developed leaves, not old rusty, dried up ones. Insert the stem in the sand bed up to the base of the leaf. The first watering you give will settle the sand enough to allow an air space between the sand and the leaf, which is necessary, as the leaf should not come in contact with the sand.

While a number of plants can be grown from a single Rex begonia leaf, if laid flat on the sand and incisions are made with a knife across the middle and branch ribs of the leaf, the leaves of Gloire de Lorraine are liable to damp off if placed flat on the sand bed, and each leaf will make only one plant. If you maintain about 72° of bottom heat, you will in six weeks be able to pot your young stock in 2-inch pots, using a sandy loam. Leaf cuttings will make the best single specimen plants. If you use made up plants, you can grow nice 3½-inch stock from cuttings struck in May, and it will not pay you to go to the trouble to propagate now unless you have the proper facilities to do so. For the price of $1 to $1.50, which you realize for a well grown plant at Christmas is well worth the money you lay out for nice established plants, such as the men who make a specialty out of Gloire de Lorraine send out in June. And if you do a general plant trade, you have your hands full in March, April and May and it doesn't take much to stunt your young stock.

Christmas Baskets.

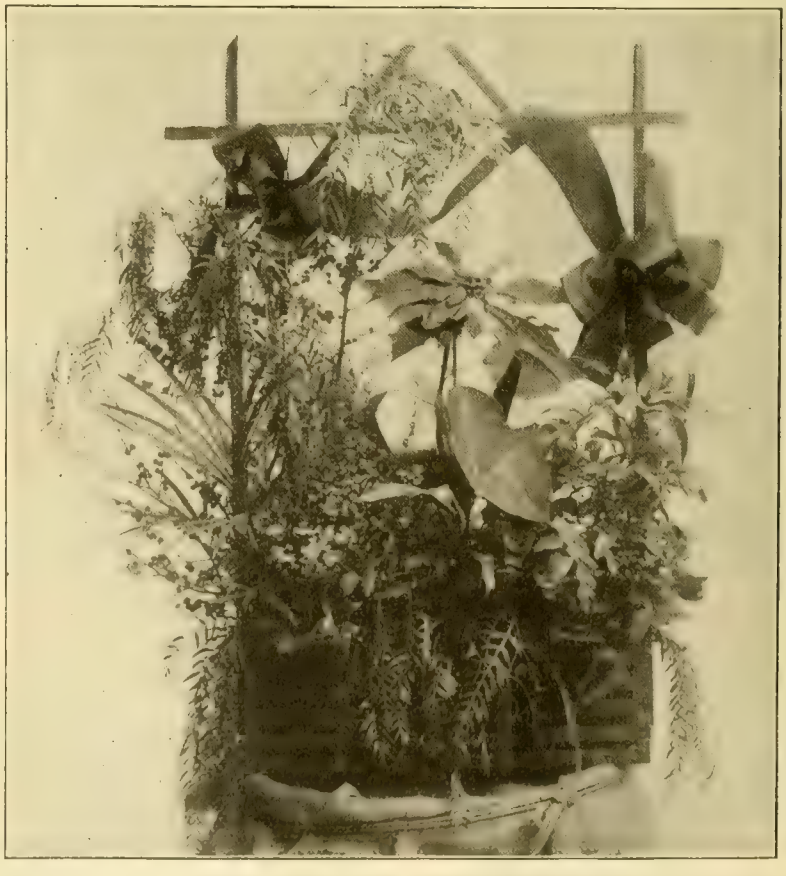
Figured herewith are a few of the varied and beautifully arranged baskets and other receptacles for plants at Christmas time, put up by several of the leading New York retailers.

No. 1—A latticed box, with cross tree, filled with poinsettias, ericas, amaranthus, small kentias, ardisias. California peppers and acacia, small ferns being used for finishing. Crimson ribbon.

No. 2—Latticed box filled with crotons, kentias, ericas, small ferns, Christmas berries and dracænas; tied with crimson ribbon. By J. H. Small & Son, New York.

No. 3—A rough bark canoe with paddles, filled with Adiantum Farleyense and cypripediums. Light green chiffon. By W. H. Donohoe, New York.

No. 4—A wicker basket, painted green, filled with ericas, fountain crotons, cocos



CHRISTMAS BASKETS.

and Dracæna terminalis. Pink ribbons and chiffon. By W. H. Donohoe, New York.

No. 5—A fiber hamper containing poinsettias, crotons, small ferns and cocos. Dark pink chiffon and tassels. By W. H. Donohoe, New York.

No. 6—A wicker basket filled with poinsettias, fountain crotons and small ferns. Crimson ribbons and tassels. By W. H. Donohoe, New York.

No. 7—A fiber hamper of cypripediums, Adiantum Farleyense and Begonia Gloire de Lorraine. Pink ribbons. By W. H. Donohoe, New York.

At the Store Before Christmas.

Hang a case or two of wild smilax in your own store; other merchants can afford it, why can't you?

Inform your clerks that it will be necessary to work overtime, thereby avoiding any misunderstanding.

Have the driver hunt up all the old lanterns, and put them in readiness. The chances are that they will be needed.

See that every plant is marked plainly and staged to the best advantage. In an accessible place hang the cut flower price list.

Above all things, that system must be practised in every detail to insure satisfactory results and perfect harmony.

See that your supply of pot labels, delivery tags, order tags and the like is sufficient. Better have too many than to run out. If the tags be wired and ready for use, a great deal of time will be saved.

Appoint some member of the force to look after the "front part" of the store, and instruct him that when a plant is sold to put another in its place.

Get out that accumulation of old, left-over hampers and baskets; this is your best opportunity to dispose of them. Apply a small amount of gold bronze and you'll be surprised at the result.

Select a clean place for plants that are purchased beforehand for delivery Christmas day. A few flower pots turned upside down will afford drainage at the same time save trimming them again.

Have a box in some convenient place, containing a small amount of sphagnum, and a few pieces of sheet moss. This will be a great help if you are called upon to arrange a plant basket on short notice.

Find a convenient place for crepe paper, ribbons, etc. It is well to bear in mind that this is the only time in the whole year you have the opportunity to dispose of red trimmings, ribbons and mattings.

PETERMAN, ALA.—Holly shipments for Christmas decorations have been going forward for the past two weeks. The quality this year is up to the standard. The prices realized by the shippers so far have been comparatively good.

EAU CLAIRE, WIS.—A. F. T. Lauritzen, of the Oakdale greenhouses, has just returned from St. Paul where he had been on an inspection tour. He speaks highly of the very complete retail store of Holm & Olson, which he describes as the finest in the United States. The floor of the sales department alone covers a space 75x150 feet.

CHRISTMAS BASKETS.
No. 2.—By J. H. Small & Sons, New York.

THE CARNATION.

Bud Rot in Carnations.

Bud rot in carnations due to a species of Fusarium has been described by F. D. Heald. The rotting buds always contained a mite in addition to the fungus. Pure cultures were made of the fungus and successful inoculations were carried out. The fungus was again isolated and new inoculations made which indicated that the fungus alone was capable of producing the rotting. The experiment of inoculating the mite into the buds did not produce the disease. It was suggested that the mites only act as carriers of the fungus and intensify its severity. The Lawson carnation was noticed as the most susceptible variety.

Seasonable Notes.

Growers in their anxiety to have plenty of flowers at Christmas should not force their plants unduly, as such custom is weakening even to the strongest plants and also tends to the propagation of insects. A rise of 3° or 4° will not injure strong plants, but see that the soil in the benches is kept moist at such times. Plants unduly forced now may produce a few extra flowers, but it is at the risk of their health and they will be next to useless in spring. The dark cloudy days at this season render very careful handling of the plants necessary. Above all, give all the air possible when the weather permits, this strengthening the plants materially. Even in cold weather change the air in the houses daily, no plant being so dependent upon a fresh air supply as the carnation.

As soon as the cuttings recently inserted are sufficiently rooted, usually in about 30 days, they must be potted or planted out. If potted they can be more easily given a shift as required, but a very good way is to plant them out in light soil on the benches, just deeply enough to keep them standing upright after the first watering. Perhaps it may not be out of the way to warn growers who are about to purchase novelties. It is not sufficient that a variety wins prizes; it should also possess the other qualifications that go to make up a good commercial sort. This season there are some sterling novelties offered to the trade in a wide range of color, and these will prove a first class investment.

J.

Carnations from Seeds.

The remarks President Duckham made at the last Chicago florists' banquet, urging growers to do more hybridizing, induced me to write these lines, for no place where carnations are grown is too small for the owner, or the man in charge, to devote a little of his time and space to the growing of at least a few seedlings. To my mind there can be nothing more interesting than to experiment in that way, and it should be so to all who love flowers; and while those who don't may make a living at the business, they will never be very successful, nor get the pleasure out of

it that those who love flowers do, nor should they.

The crossing of carnations is so simple, and while pages have been written on just how to do it, covering the subject thoroughly, I might say to those who have never done any crossing, that they should use only perfect flowers of good varieties. Select bright sunny days to do the crossing. The flowers have to be fully open. If your operation has been successful, the flower crossed will go to sleep in a few hours afterward, for nature is satisfied by having, with your assistance, accomplished that for which she had intended the flower. If your attempt has not been successful, repeat the operation. Stake the flowers you have crossed and label properly, for should you be fortunate enough to introduce a new carnation which would be an improvement over all existing varieties and prove itself a moneymaker for all, nobody would give you much for the names of the varieties you used in producing it, no more than the world of today cares for the pedigrees of a really great man, yet it it interesting to know the varieties you have crossed.

Don't pick your seed pods too soon. Sow seeds a few days after harvesting. Treat the young plants like your other carnations grown from cuttings. Most of them will bloom in the field, and you need only house such as you may see fit to grow on for further trial. While it has taken over thirty years to produce a White Perfection through crossing from such varieties as President DeGraw, Edwardsi and others, we are today progressing in this line as in all other fields, and with such varieties as Aristocrat, Robert Craig, Winsor and others to work on, someone in the near future will produce a variety which will take our breath away, just for a minute; a variety which will be further ahead of what we have today than Scott was over Grace Wilder, or Enchantress over Daybreak. Don't think for a moment that this or the other variety of today is about ideal; we have just begun.

The past 25 years of progress in the hybridizing of carnations cannot be called anything but the commencement from the short stem carnation used for set floral arrangements of all descriptions thirty years ago. The grower made improvements in stem and flowers, and thereby created a demand for them until today the public wants the largest flowers and the longest stems money will buy. The price is a second consideration. The grower who can produce a flower wholesaling at 15 to 25 cents is the one who makes money, and not the one who offers 1, 1½ and 2-cent stock. The day of 25 in a bunch, tied up to the necks with twine, is over—the twine is almost used up—and new varieties are wanted, better flowers, larger, new shades, longer stems.

The public will pay $3, $4 or $5 a dozen if you show the goods, and it isn't said that it must be a Dorner, Ward or Fisher to originate them; it may happen to any of us, and while we can't all be successful, someone will and thereby help us all. And, after all, the pleasure there is in it, from the time the flowers are selected for crossing until the last seedling has bloomed for the first time, is compensation enough for all the trouble taken.

CHRYSANTHEMUMS

Blooms for Various Purposes.

IN REPLY TO MR. LEMON.

In THE AMERICAN FLORIST of December 8 I notice Fred H. Lemon takes exception to the notes which appear in your issue of December 1 on "Blooms for Various Purposes."

It was not my intention to convey by the illustration that all European progeny were as long stemmed as is the case with Mrs. Thompson, but simply to show the pronounced difference which exists between some of the American and foreign products.

We notice the varieties Mr. Lemon refers to as possessing commercial quality and as some of these have been thoroughly tested, I am frank to admit they do possess commercial qualifications. This list extends to the dissemination of Mme. F. Perrin in 1896 and during these 10 years there has been sent out in this country 385 foreign varieties.

By excluding Matchless, Mrs. Geo. Beach and Beatrice May, for reasons which I will explain later, we have seven remaining varieties, which does not exceed two per cent. As to Matchless, I can scarcely agree with Mr. Lemon as to its real commercial value. The flow-

ers are a beautiful crimson and of good substance, which is entirely satisfactory; but if planted late it is inclined to be short stemmed, and if benched early to make sufficient height, the wood is very weak, as was shown in a vase staged at Chicago.

Mrs. Beach and Beatrice May are really novelties of the present year and I feel we should know more of their real worth before giving strong indorsement. The latter variety has a magnificent flower when well grown, but it has not been fully demonstrated that it can stand the battle with older kinds under all conditions.

Commercial value is based on popular demand as well as the grower's ability to successfully handle the varieties coming under his care. Past records teach us a great deal if we refer to them occasionally.

As much as I respect Mr. Lemon's ability and judgment on matters pertaining to chrysanthemums, I feel it my duty to convince him that I have not greatly exaggerated the demerits of foreign production.

Referring to the 1902 catalogue of the firm in which he is bending his energies, I find offered 11 foreign novelties and also recommended 33 varieties especially for commercial purposes. Among the 33 varieties mentioned there were four of foreign origin, or rather three of foreign origin and one which sported in this country, including the two Fitzwigrams, Golden Wedding and Mme. Perrin.

In 1903 his firm offered 52 foreign varieties and recommended 31 commercially. The only foreign varieties added to the preceding year's list were Nellie Pocket and Marie Liger, but neither of these were among the novelties offered the previous year.

In 1904 the firm offered 63 foreign novelties and 26 of commercial merit. I find a few of these were sent out the previous year, viz., Mlle. M. Douillet, C. J. Salter, and Marie Liger. There were added to this list Alice Byron, Mounier, and Mrs. Coombes, also foreigners.

In 1905 its foreign novelty list comprised 68 varieties and their commercial list 28 sorts. Among the latter I find the following varieties that were disseminated the previous year, Carrie, Olive Miller, Wm. Duckham, Dr. Enguehard, Mrs. Mileham, Ethel Fitzroy and Lord Hopetoun.

It is also well to note that in the list commended the previous year, the following were omitted from the present one: C. J. Salter, Marie Liger, and A. J. Balfour. Matchless was also included but was a novelty of the current year. In 1906 there were 64 listed of foreign origin and 25 specially recommended commercially.

Among the 68 novelties offered in 1905 three found their way into the commercial list, viz., Clementine Touset, Jeanne Nonin and Matchless. We also find that Mlle. M. Douillet, Olive Miller, Wm. Duckham and Mrs. Mileham recommended that year, were excluded from the present year's commercial list. Just what will become of the 64 foreigners offered this spring remains to be seen.

Again referring to last spring's commercial list, I find all the foreign varieties except two were disseminated since 1901. The foreigners seem to lack tenacity and cannot present such clean records as Ivory, disseminated in 1889, Glory of Pacific in 1895, Major Bonnaffon, 1894, and W. H. Chadwick, 1898.

There are possibly a few French varieties which perfect good flowers from late buds. Dr. Enguehard is an exceptionally good example. How many others are there? Mr. Lemon can indicate them all with the fingers of his two hands that have emanated from the hundreds which have been sent out in the past ten years. For this reason it scarcely seems necessary to exempt them. To

CHRISTMAS BASKETS.

No 7.—By W H. Donohoe, New York.

CHRISTMAS BASKETS.

No 4.—By W. H. Donohhe, New York.

be fair it is only just to state that the French novelties are as a whole, easier to manage and will be more satisfactory in my opinion to the average grower than those received from other foreign sources.

I note what Mr. Lemon states regarding the C. S. A. scale as well as the certificates granted the current year. I do not wish to cast reflection upon the good judgment of the committees or judges, as I am fully aware their deductions are strictly conscientious and were made to the best of their knowledge and belief, forming their opinion from the six blooms submitted. Some varieties, however, possess peculiarities that are not fully set forth in the few flowers considered and commercial value cannot be fully established until the variety has passed from the disseminator into the hands of the commercial grower for his final approval or condemnation.

There are quite a number of foreign varieties which, when there is a certificate in view, really appear good for our purpose, but when transferred alongside the old-time tried ones they cannot hold their place. The truth of the matter is that 30 to 60 foreign varieties are brought to America annually and are knocked down like ten-pins when we consider commercial qualifications from the American standpoint. It is true that American productions get very much the same medicine, which is natural enough, as all new comers cannot be indorsed on every hand.

I do not wish to convey that it is impossible for our English, French and Austrailian brothers to give us good commercial sorts, for occasionally they produce excellent kinds, for example, old Viviand Morel, Dr. Enguehard and Alice Byron. When their demand for commercial sorts exceeds that of the exhibition class, and they are able to look at the desired qualifications in the same light as we do on this side, then we may expect some advance that will be permanent.

In conclusion I will say there is no patriotism whatever in this proposition, as I should certainly be glad to accept and assist in popularizing good commercial varieties from abroad. Under the existing conditions I feel that the importation of so large a number of varieties and offering them, or any considerable part of them, to the American trade is a loss of time and money and as a rule disappointing to all concerned.

ELMER D. SMITH.

Sports from The Queen.

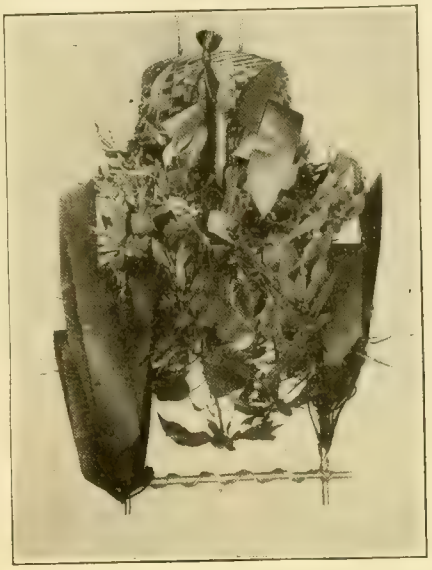
We notice there has recently been mention made of light yellow sports from The Queen, and if not mistaken they have originated in two localities. While there is no doubt but they are as good as the original variety, they are by no means new. Domoto Bros., of Oakland, Cal., disseminated a lemon yellow sport from The Queen in 1896, under the name of Gov. Budd. We purchased stock of this variety and it appears with the general collection in Nathan Smith & Son's catalogue of 1897. This shows how soon the things of today are those of yesterday and lost sight of.

ELMER D. SMITH.

THE ROSE.

Grafting Roses.

There still seems to be a good deal of uncertainty among growers of no great experience, as to whether grafting is beneficial or otherwise. Those who have consistently followed grafting for a number of years have no doubt on the matter. To such, grafting is an essential cultural detail, just the same as watering or disbudding, and they will not use own root plants if grafted stock is to be had. The great majority of kinds do best when grafted, but some growers find that Meteor does best on its own roots, while a few of the stronger growing teas, especially that fine variety, Madame A. Chatenay, seem



Christmas Baskets.

No. 6 —By W. H. Donohoe, New York.

to do well either way. The grafted stock though, even with this variety, will produce flowers quicker than plants on their own roots.

The time is upon us now for obtaining stocks and preparing them for the purpose indicated, for though it is not wise to commence the actual work of grafting until New Year's, there is much to be done meanwhile. The manetti is the best stock for general purposes because the cheapest, and, if properly prepared, not likely to sucker very much. The seedling briar suckers badly but the same stock prepared from cuttings is preferred to any other by some growers of the tea scented kinds.

Manettis are commonly imported from France but, however they come, they are usually pretty well dried up by the time they reach the grower. A good soaking must at once be given, the best way being to throw them into a tank or tub. When well soaked lay them upon a bench to dry a little, and select all that are large enough for grafting into one heap, the small ones for planting up being kept separate. For grafting, nothing should be selected smaller than a lead pencil at an inch or two above the roots. A little time spent in the preparation of these stocks now is well repaid by the ease with which the grafting can be done later. All the roots must be trimmed so that they will go easily into 2½ or 3-inch pots, according to their strength. All bruised or damaged roots are to be cut back to sound wood, and if necessary the upper roots must be trimmed off to allow of a couple of inches of clear stem being left for grafting, just above the surface of the soil. The heads must then be pretty well shortened back, not studying the shapes in particular, but leaving them thin. This takes a little time to describe, but when experience has been gained they can be got out of hand very rapidly.

The selected plants must be potted at once in the sizes mentioned above, allowing the straight clean portion of stem to show just above the surface as indicated. After potting stand the plants outside on a hard bottom, give one good watering to settle the soil, and cover the pots with an inch or two of fine ashes. The plants must be placed convenient for covering in some way, so that they can be got at in any kind of weather. Although grafting may be practiced nearly the whole year, the first three or four months at most are sufficient for working up stock for planting benches cleared in the early summer. A month before commencing, a sufficient number of the potted stocks must be brought inside, an ordinary rose house temperature or any structure kept above 50° suiting them. This will ensure the sap working freely by the time the stocks are wanted. For scions choose plump hard wood such as is cut when taking the crop. Avoid both old hard wood and that which is soft and pithy. The blind wood that makes such good cuttings, is not sufficiently strong for grafting.

The actual operation of grafting is very simple. First cut the tops off the stock at the upper part of the straight portion left above the surface. Choose a scion with one eye and a couple of inches of growth, as near the size of the stock as possible. Take a thin slice of bark and wood off the stock, entering the knife about ¾ inch below the top and bringing it upwards. Cut the bottom of the scion in a similar slanting direction to fit it, taking the knife right through in this case, and making a sloping cut a little over an inch in length. Now see that the bottom, and at least one side of the bark, unites with that of the stock. If both sides unite all the better. This is the important point, for unless the cambium layers in the barks come exactly opposite, the sap will not pass from stock to scion and a good union of the two is unlikely. All that is now necessary is to tie the scion to the stock by wrapping raffia or cotton around them, just sufficiently tight to hold the scion in place till the union is effected.

The treatment of the grafted plants for the first two months consists of placing them in a warm moist propagating case, spraying them lightly, and shading during bright weather. Open the cases every day to allow the accumulated moisture to escape, but never allow the growth to flag when it starts. When a few inches of growth has been made, begin gradually to harden the plants just in the same way that plants from cuttings are treated, until they

are ready to take their place in the growing quarters.

Drawn Roses.

ED. AMERICAN FLORIST:—

What is the cause of benched forcing roses becoming drawn in their growth? What is the best way to make them break from the ground?

YOUNG GROWER.

Young Grower does not state at what temperature the roses were kept or how the ventilating has been handled, but the cause of the drawn growth may be blamed to very high temperature with very little air. The temperature should seldom exceed 60° at night, nor 75° on bright days with plenty of air. On cloudy days 65° with air on and a little steam or artificial heat at the same time if necessary will be about right.

As for the best way to induce the plants to break from the ground, this is rather a hard question to answer. Own-root stock usually breaks freely at the base if the plants have been properly disbudded, but at times one gets very few canes from the bottom, until early spring and some varieties break free while others do not. Very often if a heavy crop is cut off late in the fall or winter the check will often cause the plants to throw some bottom canes, but I find that if the plants are shy of bottom breaks they usually produce more blooms on top; especially is this true when grafted stock is handled, and unless the grafted stock is planted with the union several inches below the soil they seldom break near the ground. If Young Grower is a subscriber to THE AMERICAN FLORIST he will find under the rose notes seasonable suggestions throughout the season that may be a help to him, and if not a subscriber, he should get in line at once as there are many things published weekly invaluable to the young grower. E.

Rose Foliage Injured.

ED. AMERICAN FLORIST:—

Will you, if possible, tell me the trouble with the enclosed rose leaves. All the plants are not affected in the house; they comprise Bride, Killarney, Golden Gate, and Richmond. Plants are otherwise perfectly healthy and making strong growth. Planted about August 1. Any information will be appreciated. H. B. B.

The marks on your rose leaves are caused by the red rust fungus. They have probably been too heavily sprayed or kept in an atmosphere too close and moist. Remove all affected leaves, dust a little sulphur over the plants, and endeavor to keep a dry atmosphere about them in dull weather.

Best Own Root Roses.

ED. AMERICAN FLORIST:—

Please state what forcing roses do best on their own roots. X.

It is yet a question to decide between grafted and own root forcing stock. As all of our prominent indoor forcing roses are grown successfully either way it seems to be a matter of soil and skill. American Beauty should be grafted if grown in a rather light soil, but own root stock does much better if planted in a stiff soil. E.

UNNAMED SEEDLING FROM AMERICAN BEAUTY, KAISERIN AND LIBERTY.
See Philadelphia show report, issue of November 17, page 794.

PALMS AND FERNS.

PHOENIX ROEBELENII.—Phœnix Roebelenii is something we have long been looking for in a phœnix. It seems of easy culture; it is sturdy and capable of sustaining itself under hard treatment for an indefinite period, quite a qualification for a palm of its make-up. It will be found very useful in its small and medium sizes for purposes where hitherto only cocos was suitable. We have not seen any large plants of this variety but judging from its habit in the stage of growth in which we observed it, it will be in demand both for greenhouses and house decoration.—L. D.

Raising Seedling Ferns.

There is money in the raising of young fern stock from sports and it is very interesting work. Besides the chance of obtaining a really distinct novelty among the young plants raised, there is a pleasure in watching their development from the earliest stages. Considering that the spores found on the back of mature fern fronds are purely vegetative structures and have at this time no sexual or other apparatus conducive to crossing or hybridization, it is remarkable what a variety of forms appear from an ordinary sowing. Kinds that are not grown in the same house or on the same place are constantly appearing. In some cases there are certain kinds that are really weeds of the fern family, in the sense that by their persistency they crush out other and more valuable sorts. Pteris serrulata, P. tremula, P. cretica and Gymnogrammas of coarse growing species occur to mind. The grower who wishes to perpetuate stock of weaker sorts, or obtain new forms should carefully weed these strong growers out, as early as their identity can be established. The trouble is that often by this time the mischief has been done, the prothalli of weaker kinds having already been elbowed out of existence by the big fellows.

The surest way to effect a cross between two ferns is to sow the ripe spores of each in the same or adjacent pans. Then, when the tiny organs that represent the sexual arrangements of other plants are ready to perform their functions, both male and female organisms are present. Doubtless there are many strong growing kinds that are reproduced for generations without any crossing and possibly by vegetative structure only, but as noted, these are present only to be destroyed by the fern raiser if he wishes to develop the better and weaker sorts, or to create new forms.

Fern spores may be sown anywhere in a moist atmosphere; under stages in a moderately heated house, in pans, or on the walls in the house where the parent plants are growing. All that is necessary is moisture and a temperature of 60° to 70°. The purely cultural details are very simple. The spores are collected and shaken over the seed bed and in a few weeks the prothalli appear. These are green shield like processes that cover the surface, each containing the rudiments of a new plant and the nutriment required for it during the earliest stages of growth. After a time the first fronds make their appearance, these being almost too small to be seen at first. But soon they are showing up plainly enough and the plants are ready for a light compost of loam, peat and sand. It is usual to take out small bunches an inch or so across and either place them in pots or prick them out on a bench. But in any case they should only be left long enough to gain a little strength, when they should again be divided, this time to single plants. They are then ready to commence life for themselves and may be separately potted or put out in flats or on benches as desired. The subsequent treatment consists of growing them on to whatever size is required.

The lovers' lane.

Small Pots for Adiantums.

Much of the failure attending the culture of maidenhair ferns arises from a mistaken idea that a large amount of rooting space is necessary. Both on benches and in pots it is a common occurrence to see plants practically starved and producing fronds of poor quality, not for any lack of soil or nutrition but simply because the roots cannot take a grip of the soil in which they are trying to grow. It makes no difference how careful the attendant on the plants may be with the watering, he simply cannot induce roots that are weak and unhealthy to push through several inches of soil.

And in most cases the roots, at any rate the feeding roots, of these ferns are weak and in a manner out of health when potted or planted. They can hardly be otherwise unless they happen to be those on young stock in vigorous condition. This naturally is the kind of goods wanted but the plants are not always to be had. Presuming that the grower is confronted as he often is with a lot of unhealthy, badly rooted plants, they are usually either potted or benched right away. Now this is a great mistake and an equally simple plan involving very little more trouble but greatly better in its results, may be noted. This is to turn the plants out of the pots and do what division of the roots is necessary. Then simply lay them on a bench in a rather moist and shady house having a temperature of 70° to 75°. If at hand a little rough light compost of loam and leaf soil or peat may be sprinkled over and around them. Spray the plants over very lightly several times daily during bright weather, once if dull.

In a few weeks young feeding points of roots will make their appearance all over the old ball or portion of the ball of soil. Handle these with care and either repot them into sizes just large enough to take the ball easily or plant them on prepared benches. Either way let the soil be light and open and not too firmly placed. In a very short time, if the grower is careful, the young roots noted above will be pushing through the soil in all directions and then the plants are in a fair way to long continued health. If in pots these will soon be full of roots; on the bench there will be enough to enable the grower to water freely. Until this time gentle spraying is of great assistance but beyond an occasional good washing it is not often necessary after this. Owing to the grip they have on the soil the plants take up moisture very freely and the drier the fronds are kept in reason the harder and better in lasting quality they will be. Naturally a healthy and genial moist atmosphere must be provided, but steaming hot and very moist conditions are not necessary and should be avoided. Give the plants plenty of room and fine fronds will develop.

A point very often lost sight of by growers is that ferns need a resting season as well as any other plants and if they are to be kept healthy over a series of years they must have it. The fact of A. cuneatum and its allies as grown for cutting being of an evergreen character makes no difference. The plant may be resting in the sense meant, even when carrying a fair sized head of fronds. By cutting the whole lot from

LANDSCAPE GARDENING AT JAMESTOWN EXPOSITION.
Scene on the grounds.

each individual plant or from a sufficient number of plants for the supply needed this resting is helped, for when the plants are being constantly picked at regardless of condition it becomes very difficult for the grower to know how to treat them. The material cut may then be taken to the packing shed and sorted without any trouble, the plan resulting in a saving of time and labor, and increased health in the plants. It is of course necessary to have regular batches of plants coming on continuously but this is easily arranged and each grower must vary his details according to his individual circumstances.

Landscape Gardening at Jamestown.

Much good work has already been done in the landscape department of the next World's Fair. This work is in charge of Warren H. Manning, landscape designer, and Chas. H. Pratt, engineer and superintendent of grounds. Although on a much smaller scale than the Chicago exposition in 1893, and the one at St. Louis in 1903, the location is delightful, the naval display will be imposing, and the temperature will be kept low, even in August, by the strong breezes from Hampton Roads (Willoughby bay). On this fine sheet of water Uncle Sam will exhibit his navy, and the English, French, German, Russian, Italian and Japanese navies will be represented. These displays should of themselves draw large crowds. The government appropriations amount to $1,575,000, as against $500,000 at the Pan American, and 400 acres of ground are embraced in the exposition grounds as against 350 acres at Buffalo in 1901.

Work in the landscape department was very properly begun as early as the spring of 1905, two years before the opening of the exposition. The entire grounds are enclosed by a beautiful fence, three miles long, eight feet high, constructed of wire, with barbed wire coping two feet wide to keep out intruders. This fence is now entirely covered with honeysuckle, Crimson Rambler roses and bignonias. I can imagine no more appropriate inclosure. The planting along the avenues has been done principally with the native trees and shrubs with the idea of getting good results at a minimum of expense. The transplanting has been very successful; even the large apple trees which skirt the large parade ground have taken hold, and the other large trees which border the main avenues are all doing well. The plan of using one kind of tree and one variety of shrub along each highway is a good one, producing a symmetrical and pleasing effect. For instance, Commonwealth avenue, the principal thoroughfare, about three-fourths of a mile long, is bordered with mountain laurel; on another the wax myrtle is used; on another the wild rose of the locality is used, and is at present beautiful with its wealth of bright fruit; on another street is the red bay, Persea Carolinensis; on yet another are beautiful rows of white dogwood of uniform size, about 10 feet high and full of flower buds.

All the planting along these avenues will be of permanent value, as they will eventually be streets of the city of Norfolk, which is growing very fast, and is destined, owing to its shipping and other facilities, to become a great city in the near future. Under these trees and larger shrubs are carpets of periwinkle, strawberries and other trailing plants, the prettiest being the periwinkle. Along the "trails" through the woods Mr. Manning is now sowing forget-me-not and other suitable dwarf flowering plants, which are just the things to make these "lovers' lanes" as sweet and seductive as may be. In spring the borders of the avenues in the open will be sown with all the best annuals, petunias, zinnias, celosias (these do particularly well in this vicinity), Phlox Drummondi, etc., using only one kind in each avenue, making in some cases nearly a mile of uniform color line. Mr. Manning has already thousands of loads of good compost, turf and manure prepared for the flower beds, which I think is the best of the many good things he has done.

The formal flower beds, which have already been laid out, are all in the most popular and prominent parts of the grounds, where the most visitors will be continually passing, so that each exhibit in the plant department will certainly get all the benefit that locality can give. Many of the smaller beds are edged with privet planted a year or more ago and kept repeatedly and severely pruned, so that now it bears a close resemblance to box edging; the effect is very pretty. Privet should come into more general use in this way. Mr. Manning says that cannas, musas and other tall growing, large leaved plants will not do well in the exposed parts of the grounds owing to the strong winds that blow in from the bay, and will therefore prepare beds for this class of plants in the large sheltered court between the mining and hygienic buildings.

There are on the grounds a forest of pines, and one of oaks, gums and hollies, some of the latter being 30 feet high, with trunks 18 inches in diameter. A school garden was maintained on the grounds in the summer of 1906 and was cared for by scholars from ten miles round about Newport News, Hampton, Portsmouth, Berkeley and other points. This feature was interesting and educational and will be continued in the summer of 1907.

Should the Council of Horticulture decide to hold an exhibition and congress during the exposition, there are abundant facilities. The large auditorium holds 3,000 people, and there are a number of committee rooms accommodating from 200 to 300. A court, 80 x 250 feet, in the center of the large circular states building can be readily covered with

canvas and used for a chrysanthemums show in November.

Applications for space should be made to James L. Farmer, Department of Agriculture and Horticulture, Norfolk, Va.

ROBERT CRAIG.

Cutting the Coal Bill in Two.

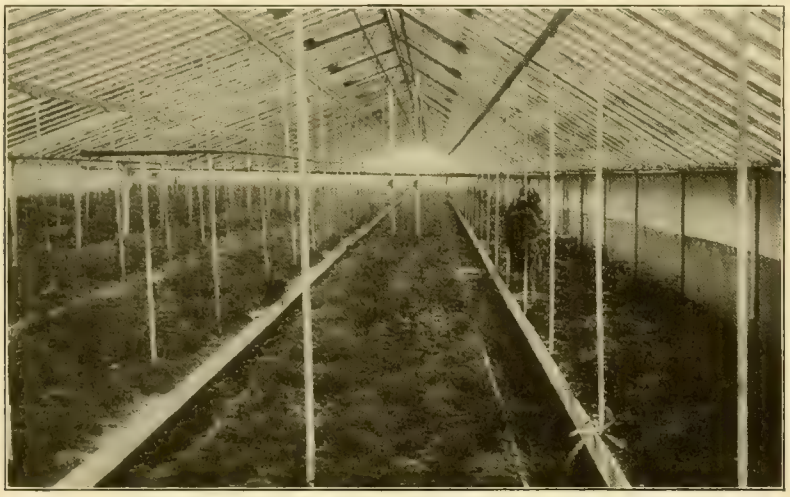
The proposition of lessening the coal bill depends altogether on the cost of slack. Where slack is cheaper than lump coal, a great saving comes from burning it—the saving in the price. There are localities where slack is not much cheaper than lump coal. When slack has to be hauled in, the freight being the same, then the saving from the use of slack above the saving of lump, is necessarily small. But the slack produced in coal yards, from the breaking up of the lump coal by handling, is often sold at a great reduction. So that the saving of coal first of all, on the difference of price between slack and lump. Commonly, this difference is about one-half to one-third; in other words, say that lump sells at $3, then slack will be ordinarily rated at $1.50 to $2. Where slack is not thus reduced in price, there can not be any reason why it should be more economical than lump coal. Now when anybody talks of reducing the coal bill by substituting slack for lump, he naturally means that that is possible only where slack is cheaper than lump. If it expenses by the use of slack, depends is not cheaper, why bother with it? Slack is not so good as lump at the same price. This at once disposes of all criticism of attempting to reduce first cost of fuel. If the first cost is not itself a saving, there can be no halving of any coal bill.

Yet there is a saving, not of 50 per cent, to be sure, but of an appreciable amount, by supplying an extra quantity of oxygen-charged air, fresh air, to a fire. This is best done above the grate, as all my experiments show both for boilers and for common soft coal burning stoves. If any one wishes to know that a supply of air is advantageous above a fire, let him examine any down draft stove fire. The way the fire grows in fierceness, as well as the way the smoke is better consumed, will likely be satisfactory to the inquirer. The same principle can be applied to common boilers. When smoke is not dark, it is largely burned; when dark, it is composed of cinders and soot, both unconsumed carbon and both burnable. Besides this saving, which can be verified by any one at the expense of a little time and thought, a saving is possible by using the heated air of the boiler top. Now this air is never "super-heated"; it is hot, not to the point of bending the grate bars—unless it be that the grate bars are very poorly cast—with a tension, transverse or lateral, that would cause them to warp sooner or later in any fire. The science of casting bars is a difficult one, as moulders know. The trouble may be in the mixture of the contents of the crucible, or in the manner of cooling the product. However, this is the point: Air must be heated before it will give up oxygen; preliminary heating is therefore a wise and economical thing to do.

The popular idea that water assists combustion because it is water, is erroneous. Water allays dust of slack coal. But its chief function when added to slack is to separate the fine particles which, when wet or damp, are thus better prepared to let the air pass through after being charged into the furnace. In short, there is a chemical reason why water in itself cannot cause carbon to unite with oxygen. Yet, because of this physical reason—that water causes coal to split up when subjected to fire, or causes fine coal not to run together under the trial of fire—this, and this alone is why water to the degree only of dampness should be added to slack. This statement will probably be disputed by "practical" firemen who are wedded to the illusion that water, because it is water, makes a fire burn better, whence arises that wonderful assumption, that a little water makes anything burn better, while a great deal of water puts a fire out. If a little water aids a fire, it is in spite of the water, and because of the water leaving small channels behind (when it evaporates) through which the air can penetrate the mass of coal.

THALEON BLAKE.

[Other articles on this subject by Thaleon Blake, John N. May and S. L. Harper will be found in our issues of September 8, 1906, page 316, October 6, 1906, page 484, and October 20, 1906, page 580.—ED.]



ASPARAGUS PLUMOSUS NANUS AT PETER REINBERG'S, CHICAGO.

Gilia Coronopifolia.

This is a half-hardy biennial of considerable value as a garden plant, according to the Garden, and received an award of merit at the recent meeting of the Royal Horticultural Society of England. The Garden adds: "It bears a large panicle of beautiful scarlet flowers, making a very showy display. The flowering stem reaches a height of two or three feet. The plant is easily raised from seed and thrives best in a fairly light soil."

[Should this prove as easily grown as the older gilias, it might be worth testing as a subject for cutting in late summer.—ED. A. F.]

LANDSCAPE GARDENING AT JAMESTOWN EXPOSITION.

The Pocahontan oak.

RECENT BOOKS.

We can supply any of the books mentioned under this head where the prices are given, if the requisite amount is forwarded with order.

The Book of Cut Flowers.

The opening chapter of this book, written by R. P. Brotherston, Scotland, is of a retrospective and historical character very interesting to those who have time for this kind of thing. This is succeeded by notes on fashion in flowers, selection in flowers, selection and arrangement in colors, and the packing of cut flowers for transmission. The methods adopted would hardly commend themselves to florists in this country. Enveloping each rose in separate paper, for instance, would prove a little troublesome in a few places we know.

But many very artistic arrangements of flowers are figured, and some of the aids to support are worth a trial. The author writes pleasantly and practically upon the numerous methods of floral decoration in rooms, on the table, in churches, at exhibitions and at funerals, while personal decoration also receives notice. The notes show the author to be possessed of the powers of observation and artistic feeling. Excellent descriptive notes on some of the most useful and popular species of annuals and perennials follow, the volume closing with an extremely interesting description of the Japanese methods of floral arrangement. The book is eminently readable throughout, and should be in every florist's library. Price $1.50.

The Garden, You and I.

In this delightful book an entertaining narrative of interesting and pleasant people meanders along, side by side with pithy and useful garden reminders; also hints to lovers of nature and beautiful gardens. We have all read the class of book that pretends to teach gardening through the medium of inane dialogue and chats between master and teacher, or something of this kind. There is nothing of this in "Barbara's" breezy, natural chatter, anecdote, pleasant satire, and sensible logic, all of which follow each other as the book and story unfolds. There are over a score of illustrations of beautiful garden scenes and plants finely produced from photographs, and a pretty bit of color printing in the frontispiece, "A Seaside Garden." Even the "terrible example" of plants so crowded and with so many bare stakes showing, is not without its use. Price is $1.50.

The Season in a Flower garden.

The subtitle of this book is "a handbook of information and instruction for the amateur," and not much more than this need be said about it. It is of convenient size, and the instructions given are for the most part correct, and will be useful to those owning or occupying small gardens, but not employing regular garden help. The book is arranged in three parts, the first called preparation, and containing a small list of garden terms; the second a monthly record of garden operations, going out of business from November until March; the third general information." The author's name is Louise Shelton and the price is $1.

The Book of Market Gardening.

This is one of a series of very instructive little books published in England at various dates. It is by R. Lewis Castle, a well known cultivator and writer after English methods, and of course appeals most strongly to British folks. Still there is much in it that would repay perusal at odd times, particularly the chapter referring to vegetable cropping, and to the methods adopted by large growers. The cultural data are excellent, and the general information concise and readable. Price $1.

The Reclamation Service.

From President Roosevelt's message to the Irrigation Congress at Boise, Idaho, September 3-8, 1906.

Operations under the reclamation act, which I signed on June 17, 1902, have been carried on energetically during the four years since that date. The reclamation service, consisting of over 400 skilled engineers and experts in various lines, has been organized, and it is now handling the work with rapidity and effectiveness. Construction is already well advanced on 23 great enterprises in the arid states and territories. Over 1,000,000 acres of land have been laid out for irrigation, and of this 200,000 acres are now under ditch; 800 miles of canals and ditches and 30,000 feet of tunnel have been completed, and 16,000,000 cubic yards of earth and 3,000,000 cubic yards of rock have been moved. Detailed topographic surveys have been extended over 10,000 square miles of country within which the reclamation work is located, and 20,000 miles of level lines have been run. Three hundred buildings, including offices and sleeping quarters for workmen, have been erected by the reclamation service, and about an equal number by the contractors. Over 10,000 men and about 5,000 horses are at present employed.

The period of general surveys and examinations for projects is past. Effort is now concentrated in getting the water upon a sufficient area of irrigable land in each project to put it on a revenue-producing basis. To bring all the projects to this point will require upwards of $40,000,000, which amount, it is estimated, will be available from the receipts from the disposal of public lands for the years 1901-1908.

The pressing danger just now springs from the desire of nearly every man to get and hold as much land as he can, whether he can handle it profitably or not, and whether or not it is for the interest of the community that he should have it. The prosperity of the present irrigated areas came from the subdivision of the land and the consequent intensive cultivation. With an adequate supply of water, a farm of five acres in some parts of the arid west, or of 40 acres elsewhere, is as large as may be successfully tilled by one family. When, therefore, a man attempts to hold 160 acres of land completely irrigated by government work, he is preventing others from acquiring a home.

Leaves light yellow in center with broad green margin

A. F. Longren.
Representative Chicago Carnation Co.

WITH THE GROWERS

Chicago Carnation Co., Joliet, Ill.

The widespread interest in the carnation work carried on at Chicago Carnation Co.'s establishment made the prospect of a visit very attractive and this was quite justified recently by a look round the stock therein grown. Although other plants are grown more or less, carnations are the principal crop, and they are grown in very large quantities. Luckily our visit was timed just right to see a grand lot of the much talked of Aristocrat, and the sight of 25,000 of this grand carnation in full flower is well worth a journey to Joliet. Aristocrat is a very fine variety without a doubt, its beautiful deep cerise flowers being of excellent form, size and substance. It is borne on fine stiff stems and the flowers are well up in the center, while as to its freedom in flowering, there can be no possible doubt. A. T. Pyfer assured us that they were cutting 18-inch stems on it in September and that the plants have been flowering freely ever since. We can speak of what we saw in early December, and that was a decidedly heavy crop of magnificent flowers, of the most exquisite form and grand substance. Orders are coming in for rooted cuttings very freely and Mr. Pyfer counts on having 150,000 ready for delivery early in the new year.

White Perfection is a grand variety. We have seen no other white to compare with it in the way it holds up its beautiful head and added to this it is an excellent keeper and an abundant producer. This is a coming kind without a doubt and it is being propagated here in very large numbers. Red Riding Hood is the name given to the seedling which was freely exhibited and with such gratifying success by the Chicago Carnation Co. at the Chicago show. It is a beautiful clear scarlet, early and continuous flowering, the stem strong and the habit of growth very desirable in every way. Preparations for its dissemination on January 1 are in a forward state, a very large number of cuttings being already rooted. Valentine is a fine shade of pink, quite a new tint, and the petals have a beautifully clean edge. Judging by its appearance it should ship well and it is extremely free.

Jessica is a fine variegated variety after the style of Patten but a more refined flower. The color of the stripes too is deeper, and its habit and flowering qualities are of the best. Sky Rocket is a pretty red seedling, but rather on the small side compared with those already named. The popular Enchantress is largely grown here, 25,000 of this and the rose pink sport having been benched this year. Large numbers of Daybreak and White Lawson, Bountiful, Lieutenant Peary, Cardinal, Prosperity and other popular market kinds are grown and in common with all the stock here are in excellent cultural shape. A look into the propagating house revealed a grand lot of cuttings, some rooted, others partly rooted and many just inserted. Mr. Pyfer says there are 400,000 in this house, and we took his word for it, not having time to count them.

A. T. Pyfer.
Manager Chicago Carnation Co.

The propagating bench bottoms are of brick resting on T iron supports, and large houses are being cleared of plants to make room for the cuttings, for which orders are pouring in. There are 1,250,000 square feet of glass in all, in 20 finely constructed modern houses. The cellars and office buildings, sheds and other structures are large and commodious, well adapted to the handling of a large volume of business. Both steam and hot water are used, the latter being provided by several large Kroeschell boilers and the steam by two Atlas boilers of 100 h. p. each. Morehead steam traps are used.

A large retail business is done in a fine store on the road to Joliet where excellent flowers of all these choice kinds were noted as well as a large stock of palms and pot plants. For the retail trade several houses of roses are grown in the leading commercial varieties, American Beauty, Uncle John, Bride, Bridesmaid, Mme. Chatenay, Perle, Golden Gate, and Richmond being in good order at the time of our visit. Like the carnations the roses are in fine health the clear air of the district apparently suiting the plants well.

A. T. Pyfer, the present manager of the Chicago Carnation Co., Joliet, Ill., has been with the concern the past five years, in the capacity of bookkeeper until the death of the late James Hartshorne, who was always very confidential with Mr. Pyfer, they working together in harmony in all business transactions. Mr. Pyfer was born August 26, 1878, near the city of Freeport, Ill., attended the country schools and Mt. Morris college, where he prepared himself for teacher, afterward taking a business and shorthand course in the Freeport college of commerce, graduating in 1899. After filling various clerical positions he engaged with John Bauscher Jr., florist of Freeport, Ill., remaining two years and coming to Joliet in 1901 as bookkeeper for the Chicago Carnation Co. Always taking an active interest in the carnation industry, and becoming acquainted with the trade in general, he is well qualified for his present position as manager.

Peter Olsem, the superintendent of the growing for the Chicago Carnation Co., has been connected with the company the past five years, always being in close touch with the late James Hartshorne, whose ideas of growing the carnation he is carrying out. He is making a good showing so far in his new capacity and bids fair to rank among the leading carnation growers of the country. Peter Olsem was born August 11, 1879, coming to this country in 1892 and engaged in the florist business with the leading florists of what was known at that time as Rogers Park, now a part of Chicago. He at once selected the carnation as his favorite flower and has been connected directly or indirectly with the leading carnation growers ever since, being very successful. Much of the Chicago Carnation Co.'s success at the last Chicago flower show was due to Mr. Olsem's hard work in keeping the carnation to the front. Being naturally energetic he became interested in the greenhouse building, and spent several summers with

Peter Olsem.
Grower Chicago Carnation Co.

Michael Winandy, returning to the growing of carnations each winter.

A. F. Longren, the traveling representative of the Chicago Carnation Co., was born in the city of Chicago 27 years ago and was trained in the great greenhouses built to the north of Chicago, beginning his career in the florist business at the age of 14 working in the greenhouses, which at that time were considered large establishments, of several florists on the north side of Chicago. After an apprenticeship of several years, on the inducements held forth in the construction line, he engaged in this phase of the industry with which he has been connected directly or indirectly ever since. A. F. Longren has been connected the past four years with the leading carnation growers in the capacity of traveling representative and grower, and in the past two years has acted in this capacity for the Chicago Carnation Co. As a salesman Mr. Longren can always be relied upon, being a good judge of carnations. He is also able to keep his customers in close touch with all new varieties.

CARNATION ARISTOCRAT DECEMBER 1. 1906.
At Chicago Carnation Co's, Joliet, Ill.

J. D. Thompson Carnation Co., Joliet, Ill.

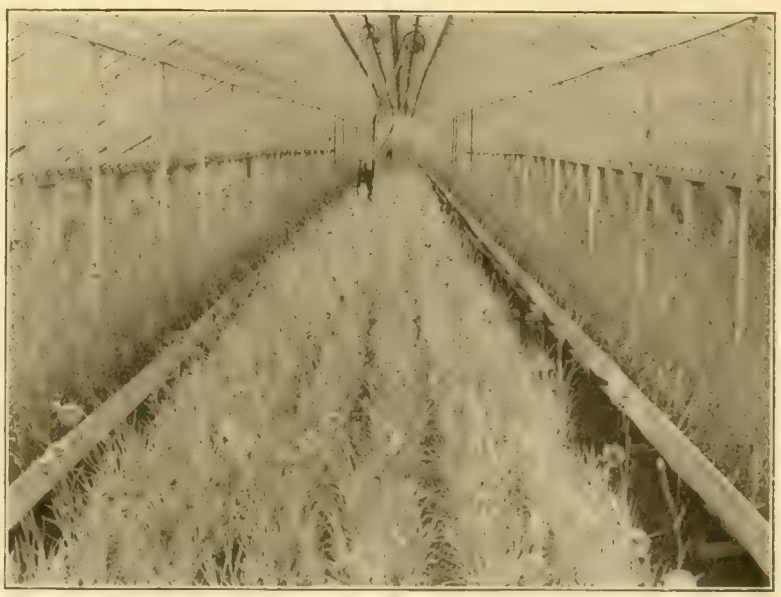
It would be difficult to find a more compact, neater, or more up-to-date plant than that of the J. D. Thompson Co. The houses are of the latest and best construction, admitting all possible light on every side owing to being built separately, with short corridors connecting them midway. A useful scheme in connection with these houses is the small steam pipes running along under the eave plates, the heat from which thaws the snow and ice that lodges on the roof in winter, causing it to slide to the ground and leave the glass clear and the light unobstructed.

The stock in all the houses is in the finest possible cultural condition from the cuttings in the propagating bed to the flowering plants. Not a sign of insects or disease of any kind can be seen and the plants have that robust hard look about them that indicates their having a good grip on the soil. The free growth made too, shows that the soil contains the right kind of nutriment for building up strong healthy plants and fine bold flowers. J. D. Thompson is the ruling spirit here, and only the best in culture, in soil and its preparation, in varieties, or in any other feature connected with the business is good enough for him. A plant has to be very good indeed, possess all the needful market qualifications and be a decided improvement on existing kinds if it is to find a lasting home in the Thompson collection, where many are called but few chosen.

One of the most striking novelties is Lucille, a lovely variety just registered by Mr. Thompson. There are about 600 plants of this on a bench and they certainly are worth seeing. The habit is excellent, the flowering stems long and stiff, holding the flowers perfectly erect, while these are crowded below with other fine grass coming on, showing it to be a perpetual as well as a free bloomer. The flower is magnificent, 3½ inches across, pearly white, lightly overlaid with a delicate shade of pink, full of stiff petals that rise well in the center, and by far the most fragrant of any of the large flowering varieties. Probably this will not be sent out until 1908 but it will be worth waiting for. We counted 14 flowering stems upon one plant selected at random on this bench.

Evangeline is a grand flower the color a bright salmon pink several shades deeper than Enchantress, a tint which finds great favor on the markets. Out of 1,000 plants grown not one per cent has a split calyx and it is to be more largely propagated. Robert Craig is the stand-by here in scarlet, and by all appearances it will soon be the only one grown in this class. There are 16,000 of it benched for cutting and not a poor plant can be seen in the lot. Mr. Thompson proposes growing this practically to the exclusion of all other scarlets and it is difficult to see how it could be improved on as grown here. Rachel Marie Thompson is a pretty pink variety named after the daughter of the house, but though an excellent flower in every respect it is not perhaps as free as some others. About 7,000 of it are grown.

About 4,000 Boston Market are benched this year, but probably this will be its last season here, substitutes of greater value having been found in White Perfection and Belle. Enchantress of course is largely grown and the plants are in excellent shape and full of grand blooms. Rose Pink Enchantress is also well done and mention must be made of an entirely new sport that has appeared here. It is as deep as the Rose Pink Enchantress and when we say that it is a perfectly clear self pink with no streak of any tint of deeper or lighter color, discerning growers will probably understand the value that this sport will have if Mr. Thompson succeeds in fixing it. This does not exhaust the list



CARNATION ARISTOCRAT SEPTEMBER 1, 1906
At Chicago Carnation Co's, Joliet, Ill.

of good things by any means, all the best market kinds being grown in quantity.

The equipment here is of the latest and most up to date kind, two large Kroeschell boilers supplying the steam. By means of valves the pressure is reduced to 5 or 6 pounds, at which it enters the various sections. Red jacket coal from West Virginia is used, this being a hard coal with very little waste and practically no clinker. By means of a switch the coal is brought and unloaded right into the storage and

PROPAGATING CARNATIONS AT POEHLMANN BROTHERS', MORTON GROVE, ILL.

a passenger train stops twice daily for flowers and express parcels that are to be shipped to a distance. Other excellent devices were seen, notably the Morehead steam traps, which return the condensed water automatically at any temperature to the boiler. In case of an accident a system of pumps has also been installed for the same purpose. A word is needed in praise of the excellent system of packing the flowers. They are packed in layers in boxes with thoroughly soaked newspapers, laid the whole length of the stems. The papers are kept for many days in a tank in the cool room, so that they are thoroughly saturated with water, not merely wetted. Strips of oiled paper lie between the blooms and so carefully is the work done, that the flowers from here always arrive at their destination in excellent order. The cool room is finely arranged with three dead air spaces in the walls, the outside vent being below the tables to prevent drafts reaching the flowers. There are many other interesting points about this fine place that might be noted did space permit. Go and see them, is our advice: you are sure to learn something before you leave.

A Nebraskan on Chicago Concerns.

Having arrived home in good order I am sending a few notes on things of interest seen in and around Chicago. First of all must come the Poehlmann Bros. Co.'s fine plant at Morton Grove, Ill. This is the most up to date place I have ever seen and all the stock grown there is in fine cultural condition. Carnation Victory as grown here is a grand thing and I also noted a pink sport of rose Mme. Chatenay that should prove of great value on account of its pure pink color. A bench of Merry Christmas chrysanthemums will be in fine shape for the holidays.

The next place I visited was Vaughan's greenhouses at Western Springs, Ill. Among the many fine things seen here was a grand lot of poinsettias, filling several houses. There was also a fine house of Begonia Gloire de Lorraine, and large lots of solanums, azaleas and Boston ferns in all varieties, coming on for the Christmas trade. A white form of Baby Rambler, and an exceptionally bright form of Rose Pink Enchantress carnation were also noted.

Out at Peter Reinberg's great plant Mrs. Marshall Field rose took my eye at once. It is a strong grower and a very free bloomer, the color a fine pink. I also noted fine Golden Gate, and its sports Ivory and Uncle John, the last named being exceptionally fine.

At Joliet, Ill., I called on the Chicago Carnation Co. and the J. D. Thompson Carnation Co. What I wished particularly to see was Aristocrat and White Perfection carnations growing. They certainly are well named, for the one is the aristocrat of pink carnations the other the perfection of whites. There is a great future before these carnations and I would advise any one who is interested to go and see them at the Chicago Carnation Co.'s greenhouses. Robert Craig and Enchantress were particularly noted at the J. D. Thompson Co.'s place, large houses full of them being there in superb condition.

A look through the sales departments was interesting. At Wietor Bros. the cut stock was excellent and the quick way they cleaned out was surprising. While I was there a box of chrysanthemums from the E. G. Hill Co., Richmond, Ind., was opened, containing fine Golden Dome, a clear bright yellow which took my eye, and a good looking pink. The former is not unlike Yellow Chadwick.

Weiland and Reisch were just unpacking a fine lot of Killarney rose which seems a favorite kind here. All the wholesalers had good stock and plenty of it, with the exception of Bride and Bridesmaid roses, which seemed weak, the latter fine variety being off color.

C. H. FREY.

THE RETAIL TRADE

RETAIL florists give themselves a deal of trouble, and incidentally lose a lot of stock, by placing small pots of ferns and asparagus right in the front of their windows. These plants have been grown close together in a moist atmosphere and when they are spread out in the full light in a window the small amount of soil in the pot dries up so rapidly that it is impossible to keep them in good condition. Their position renders them very difficult to get at to water and a few days usually puts them out of business.

The Alpha Floral Co., Denver, Col.

The Alpha Floral Co. has moved into its new quarters, 424 Sixteenth Street, and really it is a credit to the street. The firm opened up with a big display. Mr. Mahan has been working the last two months getting together different varieties of chrysanthemums, also specimen blooms. I should judge he had about 300 of as fine chrysanthemum blooms as one could wish to see. He also had a nice display of chrysanthemum plants, Begonia Gloire de Lorraine, cyclamens, etc. He claims his opening day was very satisfactory. The store was crowded from morning till night, as he had advertised it extensively during the previous month or six weeks, placing a card in every box of flowers sent out, so that everybody was looking forward to the opening day. He

CARNATION WHITE PERFECTION, NOVEMBER 1, 1906.
At Chicago Carnation Co.'s, Joliet, Ill.

really has one of the nicest stores on the street. It is in a new block just completed, and his new store stands where his old store used to be. He has very handsome fixtures and his arrangement is very complete. He has a full cellar and a palm room in the rear, which is partitioned off with glass so that the heat can be kept in.

PLATTE.

Business Pointers for the Retail Trade.

Paper read by W. C. Hall, Montreal, at the convention of the Canadian Horticultural Association, at Guelph, August 29-30, 1906.

Most of the items that I am obliged to set down as pointers are really, as you will notice, merely things that we ought to do more carefully, or, perhaps, that we entirely neglect to do, in the furthering of our interests in the retail trade. Writers of other papers, in telling you how to grow good stock for our business, invariably tell you to take some earth, and make a good compost; but I start my paper by saying, take some soap and make a good lather. It is no credit to a florist to have a clean place of business; but it is mighty discreditable to be trying to sell stock in a filthy, dirty store. So I say first, take some soap.

I think that white, with light green trimmings, is the color best adapted to a florist's store. Very light frescoes, if any, and, for my taste, absolutely no wall papers. Plain painting, or tinting in tasty light colors makes the florist's stock very attractive to the public.

There are florists who have had many years' experience, whose tastes in floral decorating are legion, who turn out the most beautiful design work, and who have occupied their present premises for some years, yet their stores are dark, dingy, dusty and dirty. I won't say anything about the floor, the color of the walls or fixtures; but $50 to $100 would paint and renovate their stores and make them very pleasant places. That is a pointer.

It is not for me to go into details about cleaning, but I will mention the windows. I have found it necessary to have a regular window cleaning man to look after the windows. When I cleaned the glass myself, something always turned up to take me away; now it is always clean, because it is done regularly.

The proprietor and his clerks should personally be neat and tidy and at all times the essence of good nature—not the kind of good nature that gives a dollar's worth of flowers for a quarter, but pleasant mannered, good listeners, and always ready with a suggestion in good taste.

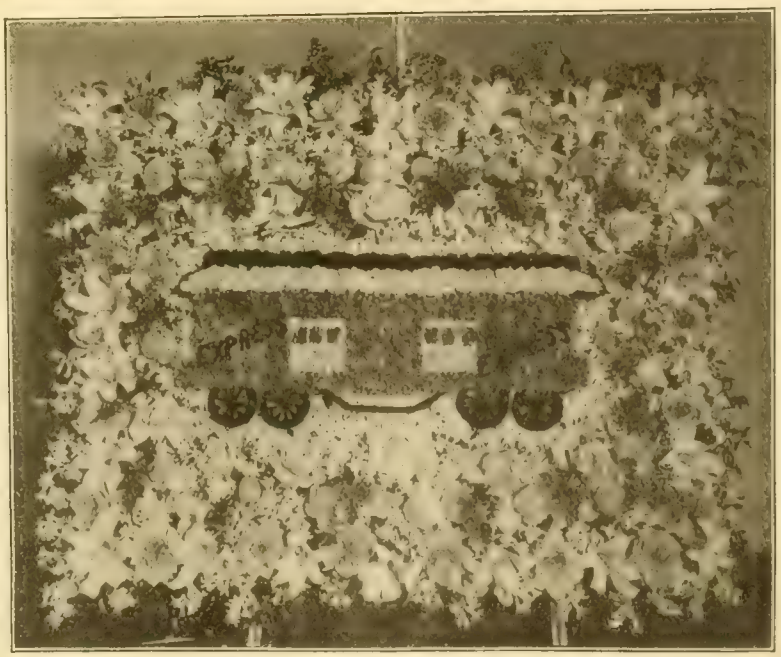
With a neat, clean store and healthy people to run it, you next want the stock. If you do any kind of a regular trade, you must have the flowers always in stock; so have them come in regularly. If you grow stock yourself, or buy locally, have these flowers come in on alternate days with flowers out of town; but always have your own flowers come in Monday, and early, as flowers shipped from a distance on Sunday are often unsatisfactory and arrive late. In my own experience, I have noticed that Monday was always a busy day for floral design work; therefore it was particularly necessary to be prepared with a supply of stocks, lily of the valley, Roman hyacinth, adiantum and other incidentals in season, which are so necessary for nice work.

Buy only the best quality of stock. Of course No. 2 is much cheaper in some cases, if the only difference lies in the length of stems, but for general stock buy No. 1. Always keep on hand a nice assortment of plants. The stock of these is just as important as of cut flowers. Don't be afraid to invest in a novelty or a new variety; it interests your customers, and they in turn advertise your store. If your plant trade is to be successful, sell only well grown, thoroughly established plants and only well hardened plants at the holiday seasons. I attribute much of our success to the selling of this kind of stock. Anyway, if you want a pointer, don't put up palms or Boston ferns just out of a case and sell them at once over the counter. That kind of stuff won't advertise your store—I mean it won't advertise it in the right way.

Make your store attractive. If you are equipped with tile floors, marble top counters, mirrors, fancy fixtures, it is easy; but it matters not if you have none of these. With a few fine palms and ferns you can do wonders; and by moving your plants around and arranging them in different ways with your cut and flowering stock, you can make your place very attractive. Display your stock in a natural way. As your plants don't grow on their sides, don't pile them up that way for your customers to look at.

The window of a florist's store is a great business getter or loser. Don't neglect to dress your window regularly. Take everything out of it at least twice a week, or every day if possible. You want to put stock in your window that people are thinking of buying, and only one kind of flowers at a time. Don't cram your window full of mixed stock. Try a large bowl of golden glow, with a setting of Boston ferns; side glasses, golden glow—yes, common golden glow. The next day two or more fern

DINNER TABLE DECORATION BY J. S. SIMMONS, TORONTO, CANADA.



FLORAL DESIGN BY HOLM & OLSON, ST. PAUL, MINN.

plants. The next day a dozen varieties of asters, if you have them, in as many vases, named on neat cards, and the same ferns. Nothing is so attractive as flowers with their names attached. Then a window filled with aster plants, each color by itself, with a Scottii, a Tarrytown and a Boston fern, each named and raised on pedestals, as a background. Soon you will have chrysanthemums; the window filled first with one color, then another. Next a half dozen pots of pompons in nice jars or pot covers. Then carnations, cyclamen, poinsettias, etc. When you think of it, what a wealth of changes we can make if we want to. How often a florist will say, "I haven't much for the window these days;" and at the same time his window is full of all kinds of stock, and has been so for a long time. He feels dissatisfied with it—people don't seem to be attracted. When he redresses his window he makes the same mistake over and over again—he fills it with mixed stock. Well, look after your window.

Show your best stock. Don't be afraid to have it on view. Keep your stock seasonable and well balanced. Don't have boxes of buggy color and stringing geraniums (New York kind) at your door the whole summer long marked, "Your choice, 5c each." It looks awful, and that sort of a display sends a buyer further along the street or puts the notion out of his head entirely.

When I said "healthy" people to run the store, I meant honest people. Look out for the clerk who gives the dollar's worth of flowers for a quarter and the customer who expects such treatment. Both are blood suckers. But, Mr. Proprietor, don't place temptations in the way of your help; keep your eyes open, see what goes into every parcel and note where it goes. Keep tab on everything. Check your sales and balance your cash every evening. To do all this you must stay in your store as much as possible—yes, and while you are there, serve as many customers as you can yourself. Your customers will appreciate this.

Pay strict attention to charging, boxing and delivery. Many a dollar is lost through not being charged up. Many a customer is lost through careless packing. Many a plant or box of flowers has to be replaced through careless delivery. It all needs very close attention. The collection of accounts has always been a knotty problem. I say, send your bills out regularly every month; then go out and collect them. If a customer cannot pay in 30 days, he won't be better off in 60 days. If you let him alone he will go elsewhere and pay cash for a dozen carnations, or whatever he wants, as long as he owes you a dollar; but make him pay up, no matter if he gets mad. He will come back in a month or so, after he has got into the other fellow. He is bound to deal with you if you make him pay. After awhile you are the only one he can deal with, because you always make him pay.

Here is the final pointer: Don't forget "the early start in the morning."

FLORAL DESIGN BY HOLM & OLSON, ST. PAUL, MINN.

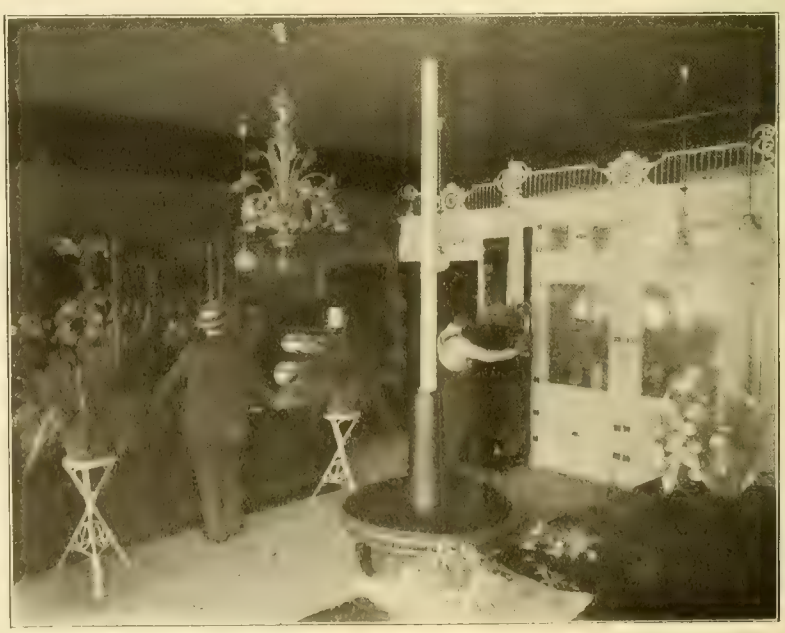
Sports.

A paper by Patrick O'Mara, read before the New York Horticultural Society, December 12, 1906.

About a year and a half ago I was invited to address this body on the subject of "Sports" in connection with a paper read here from Prof. L. C. Corbett. At that time the opportunity was not forthcoming to deliver the address which I had planned, and so the material which was accumulated was lost or mislaid and is not available now. My intention was to address this meeting without the aid of a written paper and thus possibly it would be more extended, but having been called away on a pressing matter, was compelled to hastily put something together so as not to disappoint the members and visitors.

It is with much misgiving as to my fitness for the task that I approach the subject, and willingly would I forego it entirely. It is to be hoped that at some future meeting someone competent to deal with it from its scientific aspect will be found who will address this body on the subject and treat it exhaustively, as I believe there are many of us who are intensely interested in it. The possibility that I may say something which will induce a further ventilation of the subject here is probably the motive which impels me to venture into it now. It is not my purpose to broadly consider the question of sports, but only to confine myself to a few of the leading varieties of cultivated plants which have originated in that manner, with possibly a passing reference to a few noted "seed sports," so popularly designated, to distinguish them from those which have been produced by bud variation.

A sport, as popularly understood



STORE OF ADOLPH BRIX, ST. LOUIS, MO.

amongst florists and gardeners, is that portion of a plant which assumes one or more characteristics essentially different from the rest of the plant, either in flower, foliage or habit. The vexed question amongst gardeners and florists is, how does this change take place? to what prime cause can it be ascribed? I candidly confess to knowing little of what science has imparted on the subject, but that little leads me to believe that nothing definite has been enunciated. The preponderance of opinion as far as I have sounded it seems to be that sporting is due mainly to conditions of growth, or to put it in one word, environment. This cause is not accepted by the vast majority of growers as responsible for the phenomena of sports, the general belief is that it lies in the blood, to use the vernacular, or to put it in one word, heredity.

In his paper presented to this society March 8, 1904, Prof. L. C. Corbett said: "Sporting, then, may be encouraged by extreme conditions. Either extreme feeding or extreme poverty may induce plants or sports. Severe changes in climate or soil conditions may result in decided changes in stature, habits of growth and faithfulness, which are as marked attributes of a sport as are changes in the color of foliage or fruit."

This is undoubtedly true in the abstract, but it is when brought to bear on concrete cases that it fails to fully satisfy. If by extreme feeding is meant the culture given to roses, for example, by florists and gardeners, when forced under glass for winter flowering, the question arises, why are not more sports developed? When thousands of growers are forcing the same variety, it is not always the one who is feeding his crop the heaviest that finds it produces a sport. The fact, too, that a few varieties alone have displayed sportive tendencies to the extent of producing new sorts, strengthens the conviction that the cause lies in the blood.

The rose Catherine Mermet has been the most prolific in sports of the many which have been grown for cut flowers. Its greatest descendants as sports are the Bride and Bridesmaid, the latter displacing the parent entirely. If feeding was the prime cause, why did not many growers find a Bride and a Bridesmaid? Catherine Mermet also produced Waban and I think one or two other sports which have disappeared. Parti-colored sports have appeared occasionally in the Bride and now a grower has one beautifully striped white and pink, the latter being the Bridesmaid color and largely predominating.

Maman Cochet produced a white sport, and in this connection I would say that when a neutral shade like pink is produced, it seems that the combination which produced it carries with it the tendency at some time to produce a white sport. The rose we know as American Beauty has produced two pink sports, American Belle and Queen of Edgely and it is not too much to expect that from these if largely grown would emerge a white sport.

From the rose Safrano came the yellow sport Isabella Sprunt and from Perle des Jardins came Sunset; from the latter I believe came Lady Dorothea, from Golden Gate came Ivory, from Bon Silene came the striped rose American Banner, which in addition to the change in flower showed a marked change in foliage, being decidedly rugose. The latter characteristic is slowly disappearing under propagation, in fact has almost vanished at the present time. Caprice, Striped La France and other striped roses coming from neutral tinted sorts, coupled with the fact that the other sports enumerated follow in the same line, are sufficient warrant for the belief that the combination, which resulted in the parent sorts, laid the foundation for the sports which resulted from them, and that the manner of growth had no part in it as a prime cause.

The sporting cycle in the bouvardia is very interesting and in results it exactly parallels the examples set forth relating to the rose. From B. Hogarth a deep scarlet variety issued B. elegans a lighter colored form, and from that issued B. Davidsoni a pure white. It is interesting to note that two white sports originated at the same time, one in Greenville, now Jersey City, N. J., with Mr. Vreeland and offered as B. Vreelandi, the other B. Davidsoni. They were identical and as Davidsoni was first on the market the other name was dropped. The original stock of B. elegans in both cases was purchased from Peter Henderson and the conclusion arrived at then was that the elements of change were contained in the plants, and that it would occur under any circumstances.

Subsequently a double white and a double pink variety were produced as sports, and later a dwarf variety, White Bouquet, sported from B. Vreelandi with Wm. Bock, of Cambridge, Mass., who retained the old nomenclature (Vreelandi), having the same flowers as the parent, but a dwarf, bushy habit, about a foot high when in flower. The fact that these sports were progressive in color leads to the belief that the cause for their appearance was within the plant rather than that their coming was brought about by outside forces. As bouvardias are largely propagated by root cuttings, it strengthens this belief.

An instance where a white sport issued from a scarlet variety is found in Salvia splendens alba. In Salvia splendens, at the base of the tube is always found a bleached white which extends less or more beyond the sheath; therefore, the white sport seems a natural progression, as the subsequent striped sport is.

The double abutilon, a sport from A. Thompsoni and identical in its variegated foliage and color of flowers is the only case of sporting which I can recall in that plant, although widely grown.

The carnation sports are numerous and here again they are progressive. I cannot recall, for instance, where a yellow issued from a red or white, or a white from a yellow or a crimson. It is when neutral shades are reached that sporting begins. The same is true of chrysanthemums and to a leser extent of dahlias, both of which are very prolific in sports. It seems to be along well defined lines of color changes then that sporting follows, and the layman may well be pardoned when he arrives at the conclusion that it is in the blood and is not brought about by growing conditions. If the latter theory was correct, it seems to me there would be no limit to sports while the limitations seem to be arbitrarily fixed, which is not the case with seminal reproduction.

Another phase of sporting is when the habit of the plant is changed, some examples of which I have alluded to previously. Climbing roses issue frequently from dwarf sorts, particularly in the monthly class. As far as I can recall, the flower in such cases is always identical with the parent. In the hybrid perpetual, and hybrid tea classes too, climbing sports are produced, but there is a difference very marked from the monthly sports. The latter are easily fixed and never "run back," while the others to the best of my knowledge are never absolutely fixed, and there are constant reversions, temporary and permanent, in individual plants.

The foliage sports are many, but I will only mention one, viz., the Golden Bedder coleus, which resulted as a sport from Lady Burrill, a variety with harlequin markings of dark red and yellow. It has never reverted. While on the subject of coleus, I cannot forbear from referring to a marked instance of the occurrence, wide apart, of a similar break in this plant. The golden leaved coleus originated in England and was imported by Peter Henderson. Before the plants arrived, seedlings raised from seed saved on the place from the old dark leaved sorts developed some golden varieties.

In Prof. Corbett's paper, already quoted from, he says, "Burpee's Dwarf lima bean is a good example of a sport where the habit of the plant was markedly changed." This brings us into the realm of seed sports, wider and more complex than the other and I do not mean to explore it to any extent.

Prof. Bailey is authority for the statement that: "Bud variation and seed variation are one in kind," and again: "I am ready to say that I believe bud variation to be one of the most significant and important phenomena of vegetable life, and that it is due to the same causes, operating in essentially the same way, which underlie all variations in the plant world." Again he observes: "I want to express my conviction that mere sports are rarely useful. Sports are no doubt the result of very unusual or complex stimuli or of unwonted refrangibility of the energy of growth, and not having been induced by conditions which act uniformly over a course of time they are likely to be transient." Again "The vexed questions associated with bud variation are not yet greatly elucidated." Again: "All these conclusions prove the unwisdom of endeavoring to account for the evolution of all the forms of life upon any single hypothesis; and they illustrate with greater emphasis the complexity of even the fundamental forces in the progression of organic nature." Again: "Now this matter of bud variation has been a most puzzling one to all writers upon evolution who have touched upon it. It long ago seemed to me to be inexplicable, but it is no more unintelligible than seminal variation of plants." These quotations from "The Survival of the Unlike" are introduced to show how contradictory even an eminent authority on the subject can be, at least so it appears to me, a layman. If I understand him at all, it is to the effect that all sports are the result mainly of the conditions under which the subjects are grown; that all variations are of a sportive character:

that the difference between well cultivated and poorly cultivated plants is a sportive one.

The average florist and gardener is hardly prepared to accept that view, perhaps the reasoning is too subtle for him to follow. He knows that no cultivation of which he is master can make a poor variety into a good one; he knows that sports, as he understands them, are sporadic and many believe that by a careful study of heredity on the part of scientists the law governing sports might be discovered. But to return to the lima bean. Here again we find a cycle of change. Three sports appeared within a very short time, almost simultaneously, viz., Kummerle's, subsequently called Dreer's. Henderson's (the latter appearing with several growers at the same time) and Burpee's. Of the origin of the first two I have no specific knowledge, they merely happened; but as to the last, the raiser—I had almost said the creator—claimed that a horse trod on a plant while it was young, that it never grew to be a climber, and that the beans reproduced dwarf plants. This was generally known in the trade and more than one grower crippled vine plants in an effort to develop a dwarf, but without success.

The White Plume celery is another notable example of a seed sport and once the break came others followed. I had almost forgotten to mention the latest and most interesting forms of sporting, viz., the ferns which have sported from the Boston variety. If I remember correctly, when that variety first made its appearance, there was considerable discussion as to what it really was, and it was finally classified as a sport from Nephrolepis exaltata. Darwin said: "Of all the causes which induce variability, excess of food, whether or not changed in nature, is probably the most powerful." Here again we have the food question. The florist and gardener believes that the amount of food which will bring his crop to the highest perfection is not excessive, possibly he is wrong. The excessive amount is that which will cause deterioration, and it is not under such conditions that sports have appeared with him. It might not serve any useful purpose, yet it seems to promise an interesting field of study for some of our scientists to thoroughly examine into sports obtained through bud variation under domestication in an effort to clear away the mists which now surround their origin.

Broad Beans.

The almost complete failure of broad beans to produce a crop owing to the ravages of the black aphis is well known. A friend of mine, Percy Taylor, has for the past 12 years made beans of all kinds a hobby. He has in the neighborhood of 100 varieties. Last spring he got together all the kinds of broad beans from Europe and this country. Row after row, on July 12, were in the usual condition with black aphis, and barren, except 25 plants among a row of Scarlet Runners, on which there was not a single aphis, and they bore a good crop of perfect pods and beans. On one plant I counted 17 full pods.

JOHN THORPE.

To Be Done Now.

IN THE GREENHOUSES.

Keep Odontoglossum citrosmum quite dry; even if it shrivels, no harm will come to it, as the bulbs plump up again when watered in spring.

Allow all the light possible to the new crop pips of lily of the valley that have not been in cold storage.

A light fumigation should always be given Easter lilies just before the spikes begin to form.

Bulbs fresh from the plunging material should not be exposed to the full light at once, but shaded lightly for a few days.

Keep seedling cyclamen always on the move. If once they are checked they will not start freely until spring.

Avoid giving large shifts to young stock of any kind now, but any growing plants really needing it may be given a small shift.

Sow Dracæna indivisa early and thinly in a gentle bottom heat and when the seedling plants appear see they are not checked.

Grevillea robusta seeds germinate freely in peat and sand, kept always moist, in a moderate temperature.

Resting conditions are best now wherever possible for all classes of palms, ferns, crotons and other foliage plants.

IN THE STORE.

Always take the opportunity of making a fine display when possible, especially when good and showy flowers are cheap.

Cover all flowers at night with tissue paper or other light material as a protection from dust.

The blooms of Cypripedium insigne now appearing are good property, as owing to their long lasting qualities they can frequently be used the second time for table decoration.

Never use or recommend the use of dyed or artificial flowers where there is a chance of trade in natural ones.

Be very careful to write the addresses plainly on all parcels of goods sent out, delay being thus avoided.

The Mexican lælias do not last as long as cattleyas but have longer stems and very bright colors.

Look out for something to fill up with when the chrysanthemums are over. Think out something original.

A thinly arranged wreath or bouquet uses less flowers and is more decorative than one closely packed.

Thick wrapping paper inside a flower box is a fine non-conductor, keeping out the cold in frosty weather.

OUTDOORS.

Take advantage of frosts to get out all manure and compost onto the vacant land.

Where flower pots are lying around outside either cover them up or place them out of the reach of frost without delay.

Get down to work on any necessary alterations, such as removing trees, soil grading and road making.

KEEP the paths on your place in good order so that prospective customers will not be afraid to examine your stock in wet weather.

Cultivate the soil for trees as well as circumstances will allow, as they are usually a long time on the ground, and often little care is given the soil when once they are planted.

In making rockeries try to give as natural an effect as possible; stones sticking up at all angles are neither natural or beautiful.

Give kalmias, rhodendrons and azaleas a moist soil and situation. Lime in the soil in any quantity is fatal to their well doing.

Look after young plantations of larch carefully the first two seasons; after this they will look after themselves.

In making briar or manetti cuttings be sure to take out all eyes excepting two or three at the top to prevent suckering in the plants later. They are better without a heel.

Charles Henry Totty.

Charles Henry Totty, the newly-elected president of the New York Florists' Club, is a native of Shropshire, England, and was born in September, 1873. After passing through the public schools with honors when 14 years of age, he indentured for a three years' apprenticeship in Allbrighton, Shropshire. Completing his term he engaged with the Dickson's at Chester for a year, passing through the graduating course.. Subsequently he spent a year in Liverpool at a private establishment, leaving there to come to the United States, landing in New York in 1893. He at once obtained employment in the establishment of Messrs. Thompson at Canandaigua, N. Y., and stayed there about two years. He then located in Madison, N. J., as foreman under Arthur Herrington at the horticultural establishment of H. M. K. Twombley. He remained there about three years and a half, then taking over on his own account the greenhouse establishment of James Hart.

What he has done since is well known to everybody in the florist's trade. As a disseminator of chrysanthemums he is perhaps best known, and his stagings at the exhibitions all through the country have shown that as a grower of judgment and foresight, he has done very much towards bringing the chrysanthemum, in this country, to the position it now holds among flowers. As a rose and carnaiton grower he is also prominent and the output of his greenhouses, as seen in the New York market, is fully representative of his great capabilities as a florist.

New York Florists' Club.

The annual meeting was held at the Grand Opera House building December 10, with an attendance approaching 150 members. Emil Savoie, Benoit De Meyer, Camille Sierens and H. D. Darlington were elected to membership; and J. D. Cockcroft, C. R. Gloeckner, David Howells, John Seligman, Joseph Levy, and Malachi Tierney were nominated for election at the next meeting.

There was a very interesting exhibition of carnations. A Demonsy, of Brooklyn, showed a vase of crimson carnations which had a score of 85, and was awarded a preliminary certificate. Dailledouze Bros., of Flatbush,

L. I., showed Welcome, a light pink sport from Mrs. T. W. Lawson, with a score of 89, and were awarded a preliminary certificate. John E. Haines, of Bethlehem, Pa., showed a beautiful pink, Imperial, for which he gained a preliminary certificate. Malachi Tierney, of Highlands, N. J., showed a vase of red carnation, Mrs. Robt. Hartshorne, scoring 74, for which he gained a vote of thanks. A. C. Zvolanek, of Boundbrook, N. J., showed a vase of mixed winter flowering sweet peas, for which the club thanked him, and expressed a wish that he show them before the club later in the season. F. G. Mense, of Glencove, L. I., showed a splendid bunch of Princess of Wales violet, and was awarded a cultural certificate. H. Turner, of Castle Gould, L. I., showed a magnificent specimen of Begonia Gloire de Lorraine nearly four feet in diameter, for which he was awarded a cultural certificate.

The resignation of J. N. May, of Summit, N. J., was followed by a resolution making Mr. May an honorary member of the club. C. H. Allen, of Floral aPrk, N. Y., also resigned his membership and was similarly honored.

The election of officers was fraught with unusual interest. All the candidates were popular, and to the voters the ballot seemed like a division of friends. The result was: Chas. H. Totty, president; A. J. Manda, vice-president; John Young, secretary (re-elected); L. W. Wheeler, treasurer; John Scott, Walter F. Sheridan and Julius Roehrs, Jr., trustees for a two-year term. P. O'Mara, Walter F. Sheridan, and Wm. Duckham were the tellers on the ballots. On resolutions, passed with enthusiasm, the votes were made unanimous in each case. Afterwards the successful candidates made addresses and L. W. Wheeler gave notice that at the next meeting he should move to amend section 4, article 5, of the by-laws to the extent that it should require the treasurer to furnish bonds covering the amount in the treasury, and floating income. A committee was appointed to prepare a memorial on the death of the wife of E. V. Hallock, of Queens, L. I., an esteemed member of the club.

Massachusetts Horticultural Society.

At a meeting of the board of trustees of the Massachustees Horticultural Society held December 8 nine new members were elected. Several protests against recent awards made by the committee on vegetables were considered and referred to a special committee for investigation. To provide for such cases in the future a new rule was adopted as follows:

"Whenever any exhibitor shall consider himself personally aggrieved by any award of a prize, he may file a written protest with secretary immediately after such award. The secretary shall forthwith transmit such protest to the committee that made the protested award and such committee shall thereupon reconsider such award. No protest shall be considered unless made as provided in this rule."

It was voted also that the free use of one of the halls of the society's building be granted to the landscape gardening class of the Gardeners' and Florists' Club of Boston.

Committees for the year 1907 were appointed as follows:

Finance.—W. Hunnewell, chairman, A. F. Estabrook, S. M. Weld.

Library.—C. S. Sargeant, chairman, T. O. Fuller, C. W. Jenks, H. P. Walcott, S. Henshaw.

Lectures and Publications. — W. P. Rich, chairman, J. W. Manning, J. A. Pettigrew, E. B. Wilder.

Prizes and Exhibitions.—J. K. M. L. Farquhar, chairman, W. N. Craig, A. H. Fewkes, W. Wheeler, Isaac Locke, W. H. Spooner.

Chas. H. Totty.
President-elect New York Florists' Club.

Plants and Flowers.—A. H. Fewkes, chairman, R. Cameron, W. N. Craig, T. D. Hatfield, W. Nicholson.

Fruits.—W. Wheeler, chairman, C. F. Curtis, J. W. Hill.

Vegetables.—Isaac Locke, chairman, Duncan Finlayson, J. B. Shurtleff, Jr.

Gardens. — C. W. Parker, chairman, Oakes Ames, Geo. Barker, W. N. Craig, W. H. Elliott, A. H. Fewkes, J. A. Pettigrew, W. W. Rawson, W. P. Rich, H. P. Walcott, S. M. Weld.

Children's Gardens. — H. S. Adams, chairman, H. S. Rand, W. E. C. Rich, W. P. Rich.

The St. Louis Horticultural Society.

The executive committee of the St. Louis Horticultural Society held its regular monthly meeting at the residence of Fred H. Meinhardt.

The commitee in session adopted application forms and an attractive folder to be distributed at large which contains extracts from the by-laws of the society and sets forth its objects, aims and privileges, of which some of the most important are "To give at least one creditable flower show each year to its members and invited guests," "Act as authority in horticultural questions pertaining to the best methods of amateur gardening," "Give instructing public lectures relating to beautifying home surroundings," "Issue bulletins on the care of plants in the house or conservatory, and in every manner assist the public in their horticultural wants."

The privileges are so inviting that members have asked to be enrolled without solicitation, besides the folder bears the indorsement and signatures of the president of the Civic League of St. Louis, Dr. Wm. Trelease, director Missouri Botanical Garden; F. W. Taylor, Chief Department of Agriculture and Horticulture Louisiana Purchase Exposition and others, all of whom have volunteered to "stand by the ship." At the next regular meeting preparations will be made for the first grand annual meeting in January. Watch for this, it will surely be something out of the ordinary.

A resolution was offered and adopted indorsing Wm. Young for state vice-president of the S. A. F. for Missouri east.

The next regular meeting takes place the third Tuesday in December.

OTTO G. KOENIG, Secy.

A Thoughtful Giver.

It was a thoughtful and gracious gift, so like the giver, which Mrs. Henry G. Russell presented to the Rhode Island Hospital, as mentioned in the report of its Superintendent. A conservatory, splendidly equipped and cared for as that will necessarily be, is one of those things, the refining and comforting influence of which over the sick and suffering, is beyond computation.

The lesson of quiet contentment which flowers teach is a lesson sadly needed in this striving and struggling world of ours. They bloom patiently in their appointed place, whether it be in the rich man's greenhouse or the poor workwoman's garret. They pour forth their fragrance in the house of prayer or on the desert air. They gladden the sick child in the hospital ward, and the sweetest memories of boyhood to many a world-worn man as he lies on the bed of pain are visions of buttercups and clover blooms with the fragrance of dewy meadows.

It may seem a small thing to lay a bunch of flowers beside a sick woman's cot, or to attempt to sooth a poor family in their bereavement by the tender of a few buds for a baby's coffin. But it is just these little acts of sympathy which touch the heart when great deeds might not be able to melt it. The giver of this greenhouse is a true minister of joy to many hearts, blessing others and being blessed in her gift. — Providence Tribune.

THOMPSONVILLE, CONN.—D. W. Brainard, of Pease street, has remodeled and greatly improved the office and sales department of his establishment.

MILLBROOK, N. Y.—Wm. C. Russel has resigned his position as gardener in chief at the Daheim greenhouses, where he has been employed for 14 years steady. The Daheim fruithouse, 23x542 feet is being painted inside. Stewart Smith, of the Millbrook wholesale greenhouse was in New York last week and Ross M. Welling took his place.

Washington.

A BUSY WEEK.

There is a marked improvement in trade and last week was a busy one. There were a number of high class decorations for dinners and other social events. In addition to the house decorations at the homes of debutantees the counter trade in bunches for the fair ones was also a noteworthy feature. For that class of trade the Killarney roses and Enchantress carnations are very popular. Increased business is telling on the visible supply of stock. At one leading store, on Saturday night, they were completely cleaned out, while at another there was barely enough left for seed. Thus far, in large dinner decorations, American Beauty roses are dividing honors with the poinsettia, the latter being now a good seller, with only a fair supply in sight. Carnations of all grades continue to be decidedly scarce. The price of violets, $3 per 100 retail, has put them out of the reach of many pocketbooks. There is a good demand for all kinds of bouquet green, one commodity which is never over-plentiful in this market.

NOTES.

The Gridiron club gave its first dinner of the season on the night of December 8, in the banquet hall of the Willard hotel. J. H. Small, Jr., who is also a member of the club, personally superintended the decorations. The club has given many dinners but the decorative features of this one seemed to outclass all previous efforts. The big banquet hall was a perfect garden of tall American Beauty roses, poinsettias and tea roses, with a profusion of smilax, palms and foliage plants as a setting.

As stated in THE AMERICAN FLORIST of December 8, the correspondence between Hon. Serremo E. Payne and Benjamin Hammond is of interest to the trade. It should also furnish some amusement to those who have been initiated into the mysteries of standpatism. It has been told of Louis XIV., of France, that he expressed surprise that the Lord had defeated his armies, as he had done so much for the Lord! Pity he didn't live to be a standpater in the Fifty-ninth congress. As the faithful Moslem bows down at the muzzein's call to prayer, so does the standpater when the "infant" industries make a noise like protection. The following is from one of our daily papers:

Massachusetts tariff revisionists in the house, who last session worried the speaker and the republican standpat leaders by their agitation, are renewing the fight.

Butler Ames, of Lowell, who waged his congressional campaign on revision, and who is one of the foremost members of the delegation in the movement to force the stand-patters to give away, today said:

"For two years have I pledged myself and worked for immediate tariff revision, and more firmly and hopefully than ever I believe that now is the time to revise the tariff. By 'now' I mean that we should at once hold a caucus of the republicans of congress to give a concrete expression of our determination to immediately revise the bad qualities present in our tariff law to give all possible notice to the country at large by fixing the time of revision, which should be immediately after the fourth of next March, and to determine the best method of procedure, whether under a special rule to treat only those schedules which are manifestly too high and so a manifest burden on the country generally, or whether it be advisable to open the whole subject."

LADIES' NIGHT AT FLORISTS' CLUB.

Announcement had previously been made that the monthly meeting of the Florists' Club, December 4, would be "ladies' night," consequently a goodly number of members were on hand accompanied by their wives, daughters and in some cases, sweethearts. In a brief address President Bisset said that while a night of entertainment by the ladies was an innovation for the club, the results were so gratifying that he hoped the custom would be established. An excellent musical programme was carried out by Miss O. Ulrickson, Miss Walker and Miss Ward in piano solos. Miss Ida Uhlman's violin solos were very entertaining features. Mrs. Woodhead sang "Annie Laurie" and other Scotch melodies with fine voice and expression.

The John E. Haines carnations, Imperial and Pink Imperial, were again exhibited and, to the writer, seemed a better quality of bloom than when shown here a year ago. Pink Imperial will surely make a good commercial carnation.

Congressman Butler Ames.

Carl Anderson, gardener to Mrs. Southwick Briggs, exhibited a fine specimen of Begonia Gloire de Lorraine.

The hall was nicely decorated with palms and cut flowers and a bountiful collation was served. S. E.

SEATTLE, WASH.—Chas. W. Johnson has severed his connection with the Washington Floral Co.

ORANGE, N. J.—A burglar pried open a side door at Popkin & Collins' salesroom, Main street, December 5, stealing an old coat, two pruning knives and about $4 cash.

WELLSTON, O.—Walter Butler, of Chilicothe, has disposed of his business there to Chas. A. Johnson and has decided to locate here. He intends building greenhouses and conducting a general florists' business.

St. Louis.

GOOD PRICES FOR STOCK.

The market since Thanksgiving has held firm and prices, although lower, have been good. At the time of writing the weather is clear and warm. Carnations are bringing 2 to 4 cents, and roses 1 to 6 cents. Long stemmed American Beauties are in demand and seem to be scarce. Short stemmed ones do not bring much, as they are not in demand. Chrysanthemums seem to be over, although it is expected a few stragglers will be seen as late as Christmas. Narcissi and good Roman hyacinths are in the market and sell well. Stevia, if good and full, is selling well. Violets are now down to 50 and 60 cents per 100. It is a good thing that violets are not over plentiful as the general public does not seem to take to high prices for them. It is to be hoped that the growers will not hold back their stock now that Christmas is two weeks off. Let them take advantage of a daily market and demand and they will find that this will bring them a much better average price. Smilax, Asparagus plumosus and A. Sprengeri are selling well. Lilies and lily of the valley are in demand. Fancy ferns have been scarce and are bringing $2 per 1,000. Holly is selling at $4.50 per case, Delaware stock. Some first-class samples of mistletoe are in the market and it is expected sales will be good on this commodity.

NOTES.

At the greenhouses of C. Young & Sons Co. there will be a very large assortment of flowering plants for the holidays. The azaleas, poinsettias and cyclamens are very fine. The windows of this company's down-town store, 1406 Olive street, show choice specimens of stock very tastefully aranged by Will Dee, who has charge of this department.

The Riessen Floral Co. had the decorations for the ball given by the Daughters of the Confederacy. This concern also made a United States flag of flowers used on the stage in the Olympic theater in Cohan's show, George Washington, Jr.

It is reported that Miss Clara Holtzman, at Young & Sons Co.'s retail establishment, will shortly be married to a young man well known in the wholesale cut flower district.

W. C. Smith & Co. report a good trade. They are handling Boston ferns and Asparagus Sprengeri in pots, also a large assortment of palms.

Julius Beneke is very busy pushing the $10,000 guarantee fund for the mammoth flower show to be held here in 1907 by the Florists' Club.

J. W. Ross, Centralia, Ill., was a recent visitor. He grows roses, carnations and sweet peas. His stock is handled by H. G. Berning.

Wm. Hutchingson is growing some fine carnations, violets and calla lilies. His stock is handled by W. C. Smith & Co.

The Townsend Floral Co. reports trade as first class at Thanksgiving. The firm is booking many orders for Christmas.

J. W. Dunford is now growing carnations, Asparagus Sprengeri, violets and callas. He has discarded roses.

Harry Rieman, formerly with the

Michel Plant and Bulb Co., has started in the landscape and tree business.

Ayers Floral Co. has its hands full with decorations and making preparations for the Christmas holidays.

The Koenig Floral Co. is cutting some fine carnations. The firm expects a full crop for the holidays.

Geo. C. Waldbart has a fine display of begonias, cyclamens, orange trees and other decorative plants.

Chas. J. Bleekert has a fine stock of Begonia Gloire de Lorraine, cyclamens and Boston ferns.

Max Rotter has been very busy with weddings and funeral work the past week.

Chas. Connon has been offered a position with the Michel Plant and Bulb Co.

Adolph G. Ahner is growing some fine violets and Enchantress carnations.

Alex. Waldbart & Sons have a fine stock coming on for the holidays.

C. W. Wors is the proud father of a 12-pound girl, born December 5.

W. F.

Baltimore.

WEATHER AND TRADE GOOD.

The magnificent weather continues and the vivifying sun and bright skies are electrifying alike to men and flowers. Trade has responded and everyone has been busy, the supply of cut flowers, with the exception of chrysanthemums, not being sufficient for the calls. Unfortunately a great proportion of the business done was in funeral flowers, notably for the obsequies of one of the best known and best beloved of our great physicians, Dr. I. E. Atkinson. The whole city grieved, and scores of floral offerings were sent to signify the esteem and sorrow of his afflicted friends. Another exceptional demand was created by the burials of two prominent citizens, killed in a lamentable railway accident in Virginia.

MARYLAND HORTICULTURAL SOCIETY.

The ninth annual meeting and exhibition of the Maryland State Horticultural Society is counted by the officers as its greatest success, and the immense building in which they were held, the Armory of the Fifth Regiment, gave a fine opportunity for displaying the deposits. After the usual ceremonies, the welcome by the mayor and a suitable response by Orlando Harrison, of Worcester county, the president submitted his annual report, which was devoted largely to the necessity of protecting and encouraging the orchard, garden and trucking interests of the state, and filled with energetic warnings against allowing the spread of the insect and bacteria enemies of fruit culture, the pear blight, peach yellows and San Jose scale, threatening to seriously injure if not exterminate these interests, unless by co-operation between individuals, communities, and state officials these dangerous pests, especially in small orchards where system unfortunately does not always prevail, are kept down and destroyed. Wm. Duckham, president of the national chrysanthemum society made an address on that popular flower and the state officials spoke on their several specialties, forestry, noxious insects, etc.

A very large and gratifying show was made of orchard and garden products, including apples, pears, quinces, grapes, nuts, lemons, sweet and white potatoes. There were nearly 150 distinct varieties, it was said, of Maryland grown apples and 1,000 separate exhibits of this popular and healthful fruit. It was too late in the season for peaches, but there was one exhibit from Cloverly Farm, in the mountain peach belt of western Maryland.

Not a very large but a fairly attractive display of flowers and foliage plants was made. George Morrison, gardener to Mrs. Henry Barton Jacobs, had fine specimens of warm house species, and some cut flowers. Isaac H. Mop, Fredk. C. Bauer and Edward Herrmann deposited evergreens and flowering plants, and Edward Krep had a fine wreath of double white camellias and violets. The municipal park department sent in large collections of palms and other decorative plants from Carroll and Patterson parks.

On Thursday evening the governor of the state, Hon. Edwin Warfield, made an address urging the cultivation of flowers and the adornment of country homes by some ornamental planting, as not only a thing desirable and beautiful in itself, but as tending to refined taste, increasing the love of home and the genuine and pure pleasures which only country homes can afford, whilst at the same time impressing neighbors and travelers with the idea of higher ideals prevailing where such decorations exist and, largely more than these cost, increasing the pecuniary value of such places.

There being no admission fee, the society being a creature of the state, the attendance was large. On one afternoon there were 3000 school children in attendance.

At the election Orlando Harrison was elected president for the ensuing term.

NOTES.

Monday night saw a different cause for active trade, that being the night of the first German of the season, where an unwritten social law requires that each debutante of the season shall receive a bouquet from each of her admirers. Sometimes one popular belle will receive from 30 to 40, these bunches being arranged afterwards on the walls, where the wire netting supports the decorations, turning the scene into a veritable garden of flowers. For these offerings the choicest products are required, American Beauty and Bridesmaid roses, orchids, lily of the valley and others. One of the daily papers says the floral display of the season exceeded in extent and quality all former years.

At the Florists' Exchange, which concluded on Saturday night its first week in its new quarters with a very satisfactory result, it is said the quantity of chrysanthemums coming in so late in the season is something quite unprecedented. For the Thanksgiving trade there were boxes upon boxes, far more than could be forced on buyers except at great concessions. On Saturday one grower sent in practically a wagon load of Timothy Eaton.

Thos. Vincent, of W. Baltimore and St. Charles streets, is seriously ill with pleurisy.

S. B.

Pittsburg.

DEMAND AND PRICES GOOD.

A general shortening up of stock occurred during the latter part of the week, and on Saturday night the wholesalers had entirely cleaned up at good prices. Carnations have been running from 2 cents to as high as 5. Roses sold as high as 10 cents while American Beauties were held at $5 per dozen. Violets were plentiful and during the week many thousands went to the barrel. Lilies and lily of the valley have been very scarce. Paper White narcissi and Roman hyacinths were a glut. Daisies, sweet peas and baby primroses are coming in and make welcome additions to the list. A few chrysanthemums are yet to be seen. Asparagus Sprengeri is coming from the south. Everyone is making great preparatons for Christmas as it is looked forward to as being the best yet.

CLUB MEETING.

The Florists' Club met Tuesday evening and there was a display of Christmas plants. Mr. Clark and I. S. Crall of Monongahela, gave us an interesting talk on "How to Offer Plants for Sale." Mr. Clark said there was a fine opening for a first class commercial plant grower and roundly scored local men for letting outside growers come in and take all the orders. The display which comprised all of the Christmas plants were exhibited by H. L. Blind & Bros., the Phipps Conservatories, McRea-Jenkins Co., Mr. Jenkinson, of A. R. Peacock's, and others. John E. Haines also had a vase of Imperial and Pink Imperial carnations. The Pittsburg Florists' Exchange had a vase of Superior (pink) and Purity (white) carnations, grown by the B. K. & B. Floral Co., of Richmond, Ind. They are new varieties and were very favorably commented on.

The next meeting of the Club will be a smoker. E. C. Reineman, H. L. Blind, T. P. Langhans and Julius Ludwig were appointed the committee in charge.

NOTES.

E. M. Hall, Fairmont, W. Va., was in town and stated the candy department he recently established in connection with his florists' business was more than coming up to his expectations.

Mr. Meyers, of Chestnut Hill, was in town during the week. Mr. Meyers sends this city quite a portion of its American Beauties and states he will have a fine crop for Christmas.

T. F. Imboch, of Morgantown, W. Va., in charge of the government experiment station there, was buying Christmas goods during the week.

Wm. Loew is back in his old quarters for Christmas, at Liberty and Ferry streets. Almost all his green goods are in and moving rapidly.

L. L. Lamborn, of Alliance, O., was a recent visitor and while here took in the Pittsburg Rose and Carnation Co.'s place.

Jas. B. Smith, of McKeesport, has returned from the woods where he has been getting laurel and ground pine.

P. J. Demas has returned from a trip through the west.

Mr. Warrick and J. B. Wilson, of Washington, were visitors.

ARSENIC is often used on punk for fumigating in houses where thrips are troublesome, but care is needed not to use too much.

ROBT. KIFT, the well known Philadelphia florist, says that the violin rubber plant, Ficus pandurata, is the greatest thing that ever came down the pike and reports that he is selling a lot of it at $6 to $10 per plant.

INQUIRY is made regarding the responsibility of the Pine Grove Nurseries, Oriental Nurseries and the Scioto Plant Co. at Portsmouth, O. We respectfully refer inquirer to the National Florists' Board of Trade, 56 Pine street, New York.

THE low price of tobacco stems as fumigating material make it a desirable article, especially for large plants. Some growers say it cannot be used with safety for roses, but it is used by others with perfect success, no injury being caused to the youngest shoots or buds. It is probably a case of the judicious user being successful owing to careful calculation of the amount to be used, and vice versa.

SUBTROPICAL BEDDING.—One of the prettiest bits of subtropical effect, says H. K. Heritage, of Philadelphia, Pa., is produced by planting dwarf or Orinoco bananas, interspersed with Black Beauty canna, and bordered with Verschaffeltii coleus. The bananas can be carried through the winter in tubs or boxes of sand in the cellar, kept almost dry. A better plan is to trim the plants back to the trunk and pot them, keeping them in a cool greenhouse in which the temperature does not fall below 50°.

Important To Subscribers.

The date on the yellow address label on your copy of THE AMERICAN FLORIST will show when your subscription expires. Please renew subscription promptly on expiration to make certain of receiving your copy of each issue.

Chrysanthemum Society of America.

WORK OF THE COMMITTEES.

Chicago, December 1. Mlle. Jeanne Rosette, pink, exhibited by the E. G. Hill Co., Richmond, Ind., scored 91 points commercial scale.

DAVID FRASER, Sec'y.

An Engineering Feat.

R. O. King of the King Construction Co. of N. Tonawanda, N. Y., and Toronto, Ont., has in conjunction with W. W. Wotherspoon of New York been successful, where others had failed, in raising the wreck of the Allan liner Bavarian from the Wye rocks in the St. Lawrence river. Compressed air was the medium used, the water being actually blown out of her by these means, causing the valuable hull to float.

Yuletide.

By sending THE AMERICAN FLORIST to your employes every week of next year they will be given a weekly reminder of you and it will make a most appropriate and useful gift if sent to their home addresses. In many ways it will be a good investment. Send us their names and addresses now, enclosing one dollar for each subscription and we will start with our grand Christmas number and continue sending the paper every week of 1907.

American Rose Society.

MORE PRIZES.

The president of the Washington Florists' Club, Peter Bisset, notifies us that Mrs. S. C. Briggs offers a cash prize of $10 for six or more blooms of any new rose never before exhibited. This prize is given especially to encourage private gardeners, who would be likely to show six blooms but would not be able, owing to limited space, to show a greater number.

H. F. Michell & Co., of Philadelphia, offer a cup valued at $25 for a vase of Richmond rose to be exhibited next March and Miss M. I. Hammond, of Fishkill-on-Hudson, N. Y., offers a $5 gold piece for the prettiest exhibition in the hall, to be decided by some three Washington ladies visiting the exhibition.

BENJAMIN HAMMOND, Sec'y.

National Congress of Horticulture.

One who would safely navigate the ocean finds it essential to occasionally make observations to establish his exact location. He may have kept a record of the ship's course, know to a nicety the force of the wind and of the ocean currents, the number of revolutions of the propeller, and be able to tell just where the ship ought to be, but experience has taught that in addition to this he must by observations ascertain just where it is. In like way those who essay to explore the ocean of the unknown should occasionally make observations and comparisons to ascertain just where they are. We can learn something of this through a mere physical exhibition of what has been and can be accomplished, but it is far more important that we come to an exact knowledge of the laws through and by which the results are obtained. This can only come through a conference between those who are studying these laws, for what seems to be a truth to one and under certain conditions, the experience of another under other conditions may show is only a seeming truth.

It is well for all who are engaged in any particular line of study to meet occasionally for council, that they may ascertain how much of that we think we know is actually so, to ascertain just how far we are in our voyage into the unknown. To this end the National Council of Horticulture has thought it wise to call for the meeting of a congress of the horticulturists of the world to assemble at Jamestown, Va., during the latter part of the exhibition to be held in 1907 to commemorate the four-hundredth anniversary of the first permanent English settlement in what is now the United States. The date of the meeting and the formal programme has not been decided upon but will be announced later; but in the meantime we ask that all interested in progressive horticulture, plan to attend the congress and communicate with H. C. Irish, Missouri Botanical Garden, St. Louis, Mo., U. S. A., as to what definite subjects should be discussed.

W. W. TRACY.

OBITUARY.

George R. Moore.

The death of this well-known grape grower and horticulturist occurred on December 3 at the home of Dr. Nash. Mr. Moore was 55 years of age and was president of Fredonia, N. Y. He was also president of the Chautauqua & Erie Grape Co. and had made a considerable fortune. Leaving home to get medical advice at Buffalo, the deceased was taken so ill en route that he was forced to go to the house of his relative, where he died. A year ago Mr. Moore had a bad fall, sustaining a broken leg, from which he never really recovered. He is survived by a widow, and a son by a former marriage.

Ernest Huckriede.

Ernest Huckriede, senior partner of E. Huckriede & Son, died suddenly December 5. Mr. Huckriede had not been feeling well for several days preceding his death, but insisted on being about. A coughing fit caused a blood vessel to burst and he expired in one of his greenhouses. He was born August 26, 1835, in Westphalia, Germany, and came to this country before he was of age. He was employed by the Vandalia railroad for 35 years. While still with the railroad company he started to grow bedding stock on a small scale. For the last 18 years he devoted his entire time to his greenhouses, gradually adding and improving until he was the owner of a modern, well-kept retail place, which enjoyed a very good patronage. His son and partner, Fred, was his only child. Mr. Huckriede took great interest in church work, superintending Zions church Sunday school for several years.

J.

Chicago Notes.

The John C. Moninger Co. report a great increase in their business this year over any previous one. Although the present is considered by the greenhouse builders as a dull one, and although a very few years ago there was practically nothing doing, yet there are orders and requests for plans and estimates coming in by every mail, and this with the additions to their own plant now in progress keeps every one hustling.

The three-masted schooner La Rabida, bringing to this port 11,000 Christmas trees, was wrecked the night of November 22 off Naubinway, Mich. The boat ran on a reef in the storm and was immediately beached. Capt. Arthur Dow and his two sailors narrowly escaped to shore with their lives.

Percy Jones is sustaining his reputation of having fine chrysanthemums when most others are through. He will have a quantity of yellow Chadwick and Jeanne Nonin (a white) for Christmas.

Mrs. C. W. Reimers, of Louisville, Ky., was in town last week for the purpose of disposing of her poinsettias which she did with no difficulty.

Peter Risch, of Weiland & Risch, was under the weather for several days last week, but is around again in good spirits.

Fire broke out Friday night in the boiler sheds and palm houses of John Weiland, of Evanston, causing a loss of $2000.

R. W. Peterson, of Cincinnati, O., was in town this week showing fine samples of Begonia Gloire de Lorraine.

Kroeschell Bros. Co. have been favored with an order for one of their boilers from Salt Lake City, Utah.

Otto Schwill returned to Memphis, Tenn., after a 10-days stay in this city.

SITUATIONS, WANTS, FOR SALE.

One Cent Per Word.

Cash with Adv.

Plant Advs. NOT admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1906 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—By a first-class grower of roses and carnations; can come well recommended; single, age 26; prefer eastern states.
Key 847, care American Florist.

Situation Wanted—By two florists of good habits, with experience in greenhouse, special bulb forcing, etc.; Hollanders; good references; ages 21 and 23. Address
Key 852, care American Florist.

Situation Wanted—Position as working foreman or manager; A1 rose and carnation grower; good grower of palms, ferns and all Easter stock; southern state preferred. Address
Key 854, care American Florist.

Situation Wanted—By all-around florist; first-class references; married; 20 years' experience on private and commercial places. State particulars and wages in first letter. Address
Key 853, care American Florist.

Situation Wanted—By a hustling, up-to date grower as foreman or assistant; roses and carnations a specialty; 16 years' experience 31 years of age, single; best of references furnished; good wages expected. Would like a place west of Missouri. Address
Key 851, care American Florist.

Help Wanted—A good grower; steady place to a married man; wages, $55. Address
Key 855, care American Florist.

Help Wanted—A good young man to work in greenhouse, take care of carnations, roses, etc.
MULLEN BROS, 1036 Main St., Dubuque, Ia.

Help Wanted—Two gardeners for private places; must be all-around men. State reference.
KLEHM'S NURSERIES, Arlington Heights, Ill.

Help Wanted—At once, a man who understands general greenhouse work; reference expected; state wages.
JOSEPH HEINL & SONS, Jacksonville, Ill.

Help Wanted—Young man to assist in up-to-date flower store; must be decorator and understand taking care of plants, and also be able to wait on good trade. Address
Key 841, care American Florist.

Help Wanted—Carnation grower; must be a No. 1 man, strictly sober and reliable; wages $30 per month with board and washing; state experience and references. Address
Key 844, care American Florist.

Help Wanted—At once, good florist, able to take charge of 10,000 feet of glass; general retail business in central Wisconsin; steady position for the right man. Address
Key 850, care American Florist.

Help Wanted—First-class night fireman, thoroughly familiar with high pressure steam boilers, who has had experience with the vacuum system, to work at large greenhouse plant. Pay good salary. Write
GREEN FLORAL AND NURSERY CO., Dallas, Texas.

Help Wanted—General greenhouse man to take charge of a department; force bulbs, azaleas, grow ferns and a general line of pot plants for retail trade; man between 30 and 40 preferred; must be sober; steady position; wages, $12 per week.
IOWA SEED CO. GREENHOUSES,
30th & Kingman Blvd., Des Moines, Ia.

Wanted to Rent—About 15 000 sq. ft. of glass near Philadelphia, Pa.; must be in good repair. Will take place in spring. Address
EMIL WOHLERT, Bala, Pa.

Wanted—A top florists' delivery wagon for one horse. Address, with price
HAZELWOOD GREENHOUSES, Grinnell, Iowa.

Wanted—Applications of reliable and capable men as salesmen, decorators, or designers, or assistants thereto.

CHICAGO.

LEGAL POINTS.

A Washington Smoke Decision.

The suit of J. Louis Loose for $20,000 damages against the Southern railroad on which the jury disagreed, will again go to trial. The contention set up by the railway people was that Mr. Loose's own smoke stacks or those of neighboring florists may have caused damage to his flowers as well as theirs. In charging the jury, Judge Nicols said that if any part of the damage, no matter how small, was caused by other smoke stacks than that of defendant railway company, plaintiff could not recover damages from said company.

S. E.

Orchid Not As Described.

The Court of appeal at Brussels has at present for decision a suit brought by an English orchidist, Mr. Leman, who purchased from M. Linden, a Belgian florist, an orchid for 30,000 francs. This at the time of sale was not in flower and when the flowers opened subsequently they were found to be quite different in color and form from the description given by M. Linden at the time of sale. The Court of trade ordered the restitution of the price paid and the payment of 5,000 francs damages to the disappointed Englishman.

QUERIES.

Azaleas and Roses for Easter.

ED. AMERICAN FLORIST:—

When should Azalea Mme. Van Der Cruyssen, Bernard Andreas and Niobe be brought into a house of 50°, to come in bloom for Easter? They are now in a cold frame. When should roses be potted to come in bloom for Easter such as Crimson Rambler, Paul Neyron, Ullrich Brunner, Mrs. J. Laing, Fisher Holmes and Mme. Plantier?

D.

Five weeks before Easter will be time enough to bring azaleas into a sunny house of 50° at night to have them in bloom for Easter, that is, if the plants have been kept up to that time in a cool place, say 38° to 40° at night. They will stand 35° but should not freeze and unless "D" can keep his cold frame from freezing it will be best to bring the plants into a violet house temperature. Should we have a lot of cloudy weather before Easter, and the plants do not show color two weeks before Easter 60° to 70° at night will do the work, in which case syringing twice a day will be necessary. "D" should not overlook the removing of all new growth which may appear next to the buds during the winter months. If this is neglected, the flower buds will in most cases be either shoved off all together or the flowers will not develop properly.

No time should be lost in potting up roses intended for Easter blooming. After the plants have been thoroughly watered and the soil has settled sufficiently, place the plants into a deep cold frame. Cover the frame with boards, on which spread 12 inches of long straw manure. Remove the plants to a greenhouse early in January. Cut back the small wood on Ramblers a little. Bend back the big canes and tie to root neck, forming a loop. In the case of the other roses, cut the heavy wood back to three eyes, medium to two, light to one eye. Keep the plants at 40° until February then increase the temperature gradually to 55°. Give the plants a good sunny spot. In case of dark, cold weather, you may have to increase the temperature to 60° or 65° at night. MIDDLE WEST.

Remedies for White Fly.

ED. AMERICAN FLORIST:—

We have tried tobacco fumigation and various other treatments for white fly without results. The insects almost cover every plant about the place including cucumbers, tomatoes, lettuce and carnations. Can you not give us a remedy that will be effective? F.

The Bureau of Entomology of the United States Department of Agriculture recommends hydrocyanic-acid gas, but where the use of this is impossible or for some reason undesirable, sprays are recommended as follows: "Among the sprays, the best brands of whale-oil soap, used in the proportion of one to one and one-half ounces per gallon of water, have been found to destroy all of the white flies except the eggs, a small percentage of the nearly mature pupæ, and from 25 to 50 per cent of the adults which escape the spray by flying from the plants. It is not advisable to syringe tomato plants in greenhouses at any time, when avoidable, as syringing interferes with pollination and produces a damp atmosphere which promotes rot, but the injury by syringing may be as nothing compared with that which is caused daily by the insects. When the use of hydrocyanic-acid gas is impractical, an all-night fumigation with a tobacco extract is recommended, followed during the next day by a syringing with a solution of whale-oil soap or its equivalent."

Fumigating Cucumbers.

ED. AMERICAN FLORIST:—

Is fumigating with tobacco stems injurious to cucumber vines? I have used above and some of the leaves have turned light colored, especially where they came in direct contact with smoke. Kindly tell me what is best to fumigate with.

J. H.

Evidently the stems used in your case were injurious, but probably they were used too freely, or allowed to flare. The right quantity to use can only be determined by experiment and two or three light fumigations are far better and less risky than one heavy dose. Always fumigate plants with such soft foliage as cucumbers in the evening, preferably in dull weather.

SILVER CITY, N. M.—Miss Kate Crawford has recently added a new greenhouse to her establishment, with a view to growing plants, and flowers for cutting, for sale in her retail store.

OAK PARK, ILL.—John Farson, the banker has found a diversion, in landscape gardening, from his financial and other business. He became enthusiastic after the flower show, where he purchased shrubs largely, and he is now to be seen in early morning in overalls and sweater, planting these around his house.

Indestructible Greenhouses.

The Channel Islands press has some notices of a new style of greenhouse which is attracting considerable attention among the Guernsey growers. The house is, with exception of the doors and ventilating lights, built entirely of concrete, even the rafters being of the same material. These last are, it appears, made in wooden moulds with thin steel wires in the centers to strengthen them; and it is claimed that they, in common with the rest of the structure, are practically indestructible. These houses are said to need no paint, a coat of lime or whitewash periodically being all that is needed to make them look as good as new. The cost is said to be about 25 shillings ($6) per foot run for a house 30 feet wide. We have not yet had the pleasure of a personal inspection, but if all the claims made are substantiated, the invention should, we think, have a considerable influence upon the future prospects of cultures under glass. We only hope it will not be the means of altering the present legal status of glass houses from "trade fixtures" to "buildings." The inventors are the Ramee Vineries Co., Ltd., Guernsey.—Horticultural Advertiser.

The Morehead Steam Trap.

Among the many appliances that are constantly being placed on the market for perfecting the growth of flowers none seem to have been received with such favor as the Morehead steam trap for greenhouse heating systems manufactured by the Morehead Mfg. Co., of Detroit, Michigan. Florists that have installed this trap are enthusiastic and say that it has proved satisfactory in every way. It is far superior to the old method of employing a pump to return the water of condensation to the boiler against the steam pressure. The Morehead traps recently sold represent a glass area of over 2,000,000 square feet.

The following are a few of the greenhouses recently equipped with the Morehead traps: Memphis Floral Co., Memphis, Tenn., 130,000 square feet of glass surface; Wietor Bros., Chicago, Ill., 500,000 feet; M. Weiland, Evanston, Ill., 700,000 feet glass surface; Arthur James, Wilkinsburg, Pa., 150,000 feet glass surface; John D. Imlay, Zanesville, O., 25,000 feet glass surface; Chas. P. Mueller, Wichita, Kans., 25,000 feet glass; and L. I. Neff, Pittsburgh, Pa., 15,000 feet of glass surface.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points December 8 were as follows: Kansas City, cucumbers, $1.50 per dozen. Cincinnati, cucumbers, $1.25 per dozen; lettuce, 10 cents per pound. Minneapolis, cucumbers, $1.50 per dozen; lettuce, $1.25 per dozen. New York, cucumbers, No. 1, $1 to $1.25 per dozen; No. 2, $2 to $4 per box; mushrooms, 70 cents to $1 per pound. Boston, cucumbers, $6 to $8 per box. Chicago, cucumbers, 50 cents to $1.25 per dozen; radishes, 50 cents to 75 cents per dozen bunches.

ALBANY, N. Y.—A fire which fortunately did little damage broke out in the greenhouse of Jacob Gorgen at the rear of 45 Slingerland street November 17.

CHRYSANTHEMUM NOVELTIES.

This Year I Have to Offer Among Many Others:

IN WHITES

WHITE SPORT of Wm. Duckham, winner of the $50.00 Frick Prize at Chicago.

Detroit.

E. A. Fetters and wife announce the marriage of their daughter Gertrude to Welz Stephens.

G. H. Taepke has purchased the greenhouse premises and residence on Elmwood avenue which he has occupied during the past 26 years on a lease. The property embraces several acres and is now very valuable.

The very inclement weather of Wednesday, December 5, was alone responsible for the meager attendance of the club meeting that evening. Very little was done of the work assigned for that date. At the next regular meeting, December 19, the interesting subject, "Christmas Twenty Years Ago and Today," by Ex-president Robert Flowerday, will entertain the members.

Visitors: Chas. Schwake, New York; Robert E. Berry, New York; Thos. Knight, Rutherford, N. J.

A WEEK OF CLEAR WEATHER NEEDED.

Trade can be said to be about normal for the time of year. There is not a great deal doing, and possibly there is more time to find fault with conditions than at some other times; still good stock is moving in a satisfactory manner. The call for American Beauty roses is very active, due largely to the fact that there are hardly enough to go around. Other roses are in good supply. The quality is off a bit on some varieties, notably Bridesmaid and Killarney. There are just about enough carnations to meet demands. These, too, are a bit off in quality. Violets are in plentiful supply, and some very fine blooms are seen. Bulb stock does not seem to be moving any too well. Orchids have been going well, in fact, many more cattleyas could have been sold had they been in the market. Gardenias are a scarce article, bringing all the way from 60 cents to $1 each. Most greens are in very good supply, but Asparagus Sprengeri remains somewhat short. The conditions of the Christmas trade will depend very largely on the character of the weather in the next 10 days. Clear and cold weather will put all kinds of stock into excellent shape, but weather such as we have had the past couple of weeks would certainly work a hardship. Both holly and Christmas greens is in great demand for the holidays. Holly is plentiful enough, selling from $3.25 to $4, the best grades even going as high as $5. Green is scarce this year, going readily at $10 to $11. Some has been sold at as high as $12.

WHOLESALERS' HOLIDAY STOCK.

Zech & Mann will offer their usual fine assortment for the holidays. Bride, Bridesmaid, Liberty and Richmond roses, the leading varieties of carnations, narcissus, Roman hyacinths, poinsettias and smilax will be their principal supply. John Zech, after his splendid trade at Thanksgiving, is hoping he may duplicate that success this approaching holiday.

For a novelty, a number of Sunrise roses may be seen at Peter Reinberg's. Leonard Kill also reports having sold some Marshall Field with 48-inch stems. A specialty has been made this season with Uncle John, a rose of a rare shade of pink, somewhat lighter than Bridesmaid. Other roses, too, are appearing in excellent shape.

The J. B. Deamud Co. is offering some exceptionally fine carnations of such varieties as Enchantress, White Cloud, Boston Market, Lawson and Morning Glory. Roses, too, will be in good supply. This firm has just received a fresh supply of perpetuated sheet moss.

J. A. Budlong's Bride and Bridesmaid roses continue to come in fine shape. An excellent crop of these is expected for the holidays. Lawson carnations of superior color were also seen at this place. Enchantress and Boston Market also are doing well.

The Benthey-Coatsworth Co. expect a full crop of tea roses which are a specialty with this house. Bride, Bridesmaid, Killarney and Richmond, all promise a good account of themselves.

Scheiden & Schoos will be especially strong on carnations and smilax for Christmas. This firm has just entered the violet market on a small scale, showing a few choice bunches this week.

Poehlmann Bros. will have their usual crop of roses for the holidays, especially in red, plenty of Richmond being in sight. White chrysanthemums also will be an offering of this firm.

Bassett & Washburn will have as a Christmas specialty some extra fine giganteum lilies. Roses, carnations and greens of the desirable grades are also offered.

Wietor Bros. are through with their chrysanthemums and are getting ready for propagating. Their roses are looking exceptionally fine for the Christmas cut.

The A. L. Randall Co. are offering fancy mignonette, violets, stevia, Paper White narcissus, Roman hyacinths, carnations and roses, especially Liberty.

The E. F. Winterson Co. will have poinsettias, the Christmas flower par excellence, in quantity, and of a quality not to be surpassed.

The signs are that Sinner Bros. will continue through the holidays their present success with narcissus, tea roses and carnations.

Chas. W. McKellar will offer a good lot of orchids and poinsettias, not overlooking other flowers, especially violets.

NOTES.

Shippers are advising buyers to place orders for Christmas early. December 23 is usually the heaviest shipping day from this market, but this date falls on Sunday this year, and there are likely to be delays and disappointments for the tardy ones.

At an executive committee meeting of the Horticultural Society, held at the Auditorium Annex December 7, there was a good attendance and Secretary Rudd presented his report on the fall exhibition, showing a deficit of $314.78.

E. H. Hunt has received a carload of holly, exceptionally well berried.

Visitors: Eli Cross and Geo. F. Crabb, Grand Rapids, Mich.; H. P. Smith, Piqua, O.; Wm. C. Murray, representing F. E. Rue, B. Juerjens, and J. C. Murray, Peoria; J. L. PRICES ADVANCING.

Business the past week has been good for the season, there being very little stock left over. Chrysanthemums are still to be seen in limited quantities, but have ceased to be a factor. Poinsettias are coming in lively and help out, their showy heads being much admired in table decorations. American Beauty roses are scarce, very scarce. New York is after the whole supply and the retailers have to look sharp to keep up their stock. Even Bride and Bridesmaid were shipped to New York wholesalers the past week. Prices have jumped on all roses, the special American Beauty leading off with $7.50 per dozen. The select teas bring $15 per 100. Carnations have moved up in sympathy, $6 now being the price for all the top notchers. Good lily of the valley is scarce, there seeming to be but little fine stock coming in. Violets sell out clean at good prices. In all branches of the business there is great activity in getting ready for the holiday trade. The green goods men have large orders for holly, laurel, wreaths and lycopodium, all reporting an increase over the business of last season. Prices remain much the same except for loose lycopodium, which is quoted at 10 to 12 cents per pound. Box is moving lively at $15 per 100 pounds. Statice wreaths have sold well the past year or two and large quantities are being made up in the stores. Holly seems very well berried this season and is coming in in fine shape. The wholesale supply men say they have had an exceptional demand for Christmas goods, such as bells, wreaths, crepe paper, immortelles, etc. Bayersdorfer & Co. and M. Rice & Co. are working to the limit to keep up with their orders. E. J. Fancourt, of the Pennock-Meehan Co., says they have never had such a demand for red ribbon, large shipments going out for the trade all over the country.

NOTES.

The Leo Niessen Co. is handling quantities of Christmas greens. Large lots of cut box are turned out every day, it seeming to be a great favorite this season. Fine crops of American Beauty roses are in sight for Christmas and large orders have been booked already. There will be a fine stock of blooming plants for the holiday demand, the leaders being azaleas, poinsettias, begonias and cyclamens.

Dennis Connor, of the Lord & Burnham Co., is keeping busy these days. The last leaves of his order book contain the following: For Alfred Burton, a house 22x200. For Geo. Burton, three houses 21x132. August Doemling, Lansdowne, five houses 21x150. Also a conservatory for the private grounds of E. R. Hoffman, of Angora. He has also numerous inquiries for new work which he thinks will materialize in the early spring.

The Philadelphia Carnation Co., at its establishment at Secane, is making a great hit with a large house of mushrooms which is now in full crop. Fifty to 75 pounds a day at the present market price of over $1 per pound is just a litle comforting when we count up the week's business.

Wm. E. McKissick is handling some very choice red roses. He says that from the advance orders received there is no question but that the Christmas trade will be all O. K.

K.

Boston.

TRADE SLOW.

With the market at present unusually well filled with general stock, appearances for a plentiful supply of Christmas flowers are quite favorable especially considering the exceedingly dark days experienced of late. Although the past week was a busy one for traders in certain sections, the general market was found to have surplus stock after each day's business. Specialties moved off well, but the ordinary flowers dragged heavily. The last of the chrysanthemums are now coming in, a few good yellow Bonnaffon and Maud Dean being still seen. The chrysanthemum season of 1906 has been the worst for many years. Unlike other seasons which have usually produced something new, this year we have seen nothing but the veterans, and these in poor shape. We have now an excellent variety of the best carnations and they have attained their usual prominent position in the market. Of special interest is the pink Mrs. Patten, a fine deep pink, much resembling Mrs. Lawson, but smaller. The variegated Mrs. Patten is also attractive, as is Fair Maid, Fiancee, Prosperity and white Lawson. American Beauty roses have improved considerably and though higher in price, are plentiful. Richmond, Killarney and Mme. Chatenay lead in demand for tea roses. Violets have become more plentiful but the call has fallen off slightly, being transferred to orchids, gardenias and lily of the valley. The market is well supplied with stevia which is of great utility. Easter lilies and poinsettias, both valuable holiday stock, are in the market, but at rather high prices. In the small flowers we have different varieties of bouvardias, hyacinths, pansies and others.

NOTES.

Peter Fisher, the renowned originator of the famous Lawson carnation, has devoted his entire establishment to the propagating of new carnations. Among these, the celebrated scarlet variety Beacon, one of his own productions, is being grown for stock; it will be placed on the market next year. It is the best red carnation claiming this state as its birth place and no doubt will take high rank among this raiser's productions.

Samuel Goddard is having great success with his new carnation Helen Goddard, which achieved great fame last year. The stock of this variety now on the market is greatly admired and it ranks with those first class carnations which have come to stay.

The Waban Rose Conservatories is cutting some of the finest American Beauty roses of its career, surpassing in many ways those received from out of town specialists. The best Bridesmaid seen in the market this season is also from this firm.

The excellent stock of various choice orchids which T. J. Butterworth so ably produces are now in full bloom and he sends to market daily beautiful specimens of cattleyas and cypripediums.

Dell Cartwright, the popular and genial salesman for the Waban Rose Conservatories, is the proud possessor of a new son which greeted him December 8.

B.

Louisville.

STOCK AND TRADE GOOD.

The past week has been a very good one, almost everything having been used up. The weather is very changeable, and it has been cloudy for sometime, which no doubt will affect the Christmas crops to some extent. There is still some demand for chrysanthemums, which are hard to get of good size. The demand for roses has increased. The supply and quality are both good. Carnations have had an unusually heavy demand, there being just about enough on the market to meet it. The quality is very good. Violets have been in great demand, and the supply fell short. The quality is good. Lily of the valley has a good demand, and is to be had in small quantities of good quality. Green goods are in satisfactory supply.

NOTES.

The regular monthly meeting of the Kentucky Society of Florists was held December 4 at August R. Baumer's store, with a very good attendance. The election of officers was very interesting, the following being the result: Mrs. C. B. Thompson, president; August R. Baumer, vice-president; Fred L. Schulz, secretary; Joseph Wettle, treasurer; Louis Kirch, financial secretary; Ross Walker, sergeant-at-arms, and H. Kleinstarink, trustee. Robert Campbell was elected honorary member. The next meeting will be held at Joseph Wettle's on January 3.

This time the cigars are on John Hettinger. It's a girl! This makes about 16 in Germantown during the past few months. A very progressive country.

William Walker continues to have an atractive window.

MARKET SATISFACTORY TO GROWERS.

Taking everything into consideration the market is highly satisfactory from a grower's standpoint, at least as far as prices are concerned. Nearly everything is what may be termed high in price, so much so that in some cases retailers can hardly turn a profit on the wholesale price. A light supply, of course, creates this condition, which, although satisfactory, is not the best for the general trade. Roses are very light, and, when selected, run a few points above maximum quotations. Richmond, Liberty and Meteor are in good demand, but are somewhat short in stem as yet. American Beauty roses are also wanted, and while short grades seem pretty good, specials are not yet at their best. Killarney and Chatenay have an increased following in the race for popularity and seem to more than make good. Carnations are a good article, and prices are pretty strong. Grades above the minimum are plentiful, an average price for general sorts of medium grade being four cents. Crimson varieties are coming to the front, and color seems to be the thing with purchasers. Bulbous stock is coming in freely. Paper White narcissus sells well. Violets are plentiful and keep pretty well to the established price. Chrysanthemums are nearing the end but will probably be in the market until Christmas. Some excellent stock is coming in every day and prices are pretty strong at quotations. Stevia is a prominent thing just now and rose geraniums sell well. Orchids have gone up a little, and are somewhat shorter in supply, consequently cleaning up is not difficult. Lily of the valley is holding up well to the maximum of quotations. Lilies, also, through scarcity, keep up pretty well at quoted figures. Smilax and asparagus move very well. Christmas greens are on the move, and the prospects are that a big business will result. Christmas trees are arriving and with the roping and wreaths offered a holiday aspect is given to such stores as cater to the wants of retailers in this line.

NOTES.

John P. Scherer, of Union Hill, N. J., the green goods dealer, has just returned from a visit to his newly acquired Ulster county territory. As a result of his trip some very fine laurel is coming to the city by the carload. Princess pine and Christmas trees are also arriving from the same source. Mr. Scherer has completed arrangements with C. W. Eberman, the Thirtieth street wholesale plantsman, to carry for him a stock of greens, including galax and ferns, and thus afford the advantage of a city depot which has been much needed.

The window of A. Warendorff's store at Broadway and Twenty-eighth street looked very brilliant last week with a lavish display of poinsettias. A close inspection, however, showed that the flowers used in the background were of the crepe paper variety. For all that the window served its purpose. The use of artificial flowers in Broadway store windows is anything but novel, more than one florist having been guilty of the practice of late. Artificial hydrangea blooms and foliage have all had their season in prominent stores.

The second annual ball of the wholesalers' employes is announced to take place on Saturday, January 5, at the Manhattan Casino, One Hundred and Fifty-fifth street and Eighth avenue. A first-class regimental band has been secured for the occasion and a big crowd is anticipated. The officers of the association are N. C. Schreiner, president; Charles Matthews, vice president; John Foley, treasurer; John Egenbrod, financial secretary; and Arthur Weise, recording secretary.

The New York Cut Flower Exchange was in total darkness one morning last week at market opening, owing to an accident to the electric lighting service. Such an occurrence so early in the morning was rather a problem to the many growers in atendance. That a shut down until daylight was avoided was due to Phil Kessler, who from some source or other got a supply of candles and presented one to each grower.

George Cotsonas & Co. have provided themselves with an unusually large stock of holiday requisites and anticipate the largest volume of holiday business since their establishment. Thousands of yards of roping daily come from their "mill" and their premises are crowded with the offerings.

Lou Kuebler, of Brooklyn, met with a painful accident on Monday morning early. While near the Coogan building he slipped on the icy pavement and cut his head badly. Immediate medical attendance was secured and he was able to reach his home.

The sympathy of the trade goes out to E. V. Hallock, of Queens, L. I., in the death of his wife which occurred suddenly at her residence on December 8. Funeral services were held at the house on Monday morning, and interment was made later.

John Young will have a fine offering for the Christmas trade. Besides some high grade American Beauty and other roses, he will have carnations from the Cottage Gardens Co. in fancy qualities, and a lot of gardenias with stems three feet long.

Ernest Sampson, for many years at Hodgson's, is now with C. W. Eberman.

Visitors: Wm. F. Kasting, Buffalo, N. Y.; Wm. J. Stewart, Boston, Mass.

Cleveland, O.

TRADE SLOW.

Trade the past week has been a trifle slow, but as there was a shortening up in the cut of all lines of stock, little was left over. Very few chrysanthemums are to be seen in the market now and these are very poor. Roman hyacinths have put in an appearance and will be eagerly sought for funeral work. Quantities of stevia, pansies and Paper White narcissus are to be had and poinsettias have also arrived.

NOTES.

A visit to the greenhouses of Mc Murray & Son, Wapakeneta, revealed fine stock. Cyclamen is the specialty grown and the plants are well worth going to see. A fine lot of ferns give evidence of good culture.

Chas. Bramley, of Bramley & Mann, is the originator of a new idea in buttonhole wear, which consists of a miniature plant in a flower pot. He claims that it is impossible to fill orders for them fast enough.

J. M. Gasser will again resume the control of his business, having been judged capable by the court the past week. He will spend the winter in the south and possibly take a trip to Bermuda.

The Ohio Floral Co. will add new houses to the already large plant during the coming season.

J. Kirchner, of Quincy street, has had a fine run of funeral work the past week.

Visitors: S. S. and Mrs. Lamborn, Alliance, O.

OHIO.

Lenox, Mass.

The meeting of the Lenox Horticultural Society took place December 1, president S. Carlquist in the chair. The following members were unanimously elected as officers for the ensuing year: F. Heeremans, president; W. Jack, vice president; Robt. Speirs, treasurer; Geo. Foulsham, secretary, and Joseph Tousey, assistant secretary. After all business had been dispatched, refreshments were served, after which several of the members gave an exemplification of their vocal and instrumental abilities. Altogether a very enjoyable evening was spent.

G. F.

GEIGERTOWN, PA.—Chas. V. Geiger has his new greenhouse in operation on his farm near White Bear. Theodore Sheeler will have charge.

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S. Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

VISITED NEW YORK: J. C. Vaughan, Chicago.

VINE seeds cannot be raised profitably at the present prices.

CERTAIN congressmen desire a much larger free seed distribution.

ASPARAGUS PLUMOSUS NANUS is very slow in ripening this season.

BOUQUET GREEN deliveries have been greatly delayed by the heavy railway traffic.

PANSY SEED is both scarce and high, many colors and strains being 100 per cent higher.

THE newer sweet peas of the Countess of Spencer type are in strong demand in England.

GIANT COSMOS, both mixed and in separate colors, are among the short items again this year.

OLLIOLUES, FRANCE.—Mme. Martial Bremond, of this place died here November 16, aged 28 years.

HENRY NUNGESSER & Co., of New York, have issued their wholesale price list of grass and clover seeds.

ROCKFORD, ILL. — John T. Buckbee, who has been ill with pneumonia, suffered a relapse December 11.

THE pea and bean growers must surely get a big increase in prices on account of the heavy losses this season.

SEEDS entering the Philippine Islands have to pay a duty of 50 cents per 100 kilos this being the unit of quantity.

THE catalogue expenses are double those of five years ago and an increase of 10 per cent is expected next year.

CONNECTICUT grown onion seed is being quoted by growers at $4 per pound for white globe, $3 for yellow and $2.50 for red.

JACKSON, MICH. — Fred Pierson, an employe of the Isbell Seed Co., was injured recently by a heavy sack of seed falling on him.

RUMOR has it that onion seed growers do not care for contracts this year. Labor and machinery are much higher the growers say.

SHEEP MANURE of good quality rightly put up is higher in price. Nitrate of soda is up 30 cents per 100 pounds to about $2.50 at seaboard in car lots.

VISITED CHICAGO: L. C. Routzahn, of the Routzahn Seed Co., Arroyo Grande, Cal.; C. L. Kunz, representing the M. G. Madson Seed Co., Manitowoc, Wis.

AN agent at Algiers has shipped to Paris a cargo of black carrots. They are said to be of better quality than red carrots and are striped or mottled black inside.

ALL the early holly shipments from Kentucky and Tennessee have been delayed six days or more by the floods of November 22 and 23. Freights are 25 per cent higher.

ALL kinds of vegetable and flower seeds enter Guatemala free of duty. Fenugreek pays .25 pesos and linseed .15 pesos per kilo. This is practically the same as 25 cents and 15 cents.

E. V. HALLOCK, Queens, N. Y., has the sympathy of the trade in the loss of his wife, who died December 8. Blood poisoning, following an operation for varicose veins, was the cause of death. The funeral was held December 10.

WASHINGTON, D. C.—Among the seedsmen here this week in the interest of the trade in the congressional investigation of the government free seed distribution are H. W. Wood, Albert McCullough, W. Atlee Burpee, Wm. Henry Maule, Alex. Forbes, Patrick O'Mara and Walter P. Stokes.

ALMOST without exception the wholesale price lists this year have on most items a higher price than last year. The retail catalogues quote about the same prices as last year. Compared with four years ago there is no change except in losses, labor being about 25 per cent higher than the seedsmen formerly paid.

THE question of the legality of the American Seed Trade Association's disclaimer has always been an open one. Vaughan's Seed Store will for 1907 add the following sentence to the regular disclaimer adopted by the association: "Subject to the above conditions, and by reason thereof, we make the moderate prices quoted in our catalogues."

THE catalogue tax imposed by the British colonies in South Africa has been removed on ordinary catalogues and price lists imported through the post and weighing less than eight ounces, these now entering free except in the case of South African firms sending large quantities through the post. The delivery fee of 6d. on catalogues weighing less than six ounces has also been abolished by the Natal, Transvaal, Orange River Colony and Rhodesian governments.

BALTIMORE, MD.—At a recent annual meeting of the Maryland State Horticultural Society a resolution against the continuance of the free seed distribution by the national government, couched in strong terms, was adopted, as being an unwarranted application of public funds and the representatives of the state in congress were urged to use their influence and to vote against this useless and pernicious system, which has gone far beyond the original purpose of distributing new and rare seeds for trial in various sections of the country under varying conditions.—S. B.

San Francisco.

One of the leading seed growing concerns writes under date of December 7 as follows:—

"The past season has been unprofitable for all of the northern growers. We are inclined to think they all lost money, and we know some of them lost considerably. It looks as if the dealers will be compelled to get an advance on the old contract prices.

"There will be no surplus of onion bulbs, particularly of the Globe varieties; that means, the acreage will not be increased. There has been considerable discussion about the prices for next year, on account of the increased price of labor. Everything is costing extra money. We cannot grow the onion bulbs for the same price, nor can we harvest at the same price, and the prices are unfavorable to the growers.

"The season, so far, has been very unfavorable and very dry, and very little planting has been done yet. This has a tendency to lessen the acreage, as many onions will have to be sorted over again.

"Local business has commenced to pick up, and it looks as if dealers are going to get their old business back again."

JAMES VICK'S SONS
ROCHESTER, N. Y.

The Leading Specialists and Largest Growers of High-Grade Asters in the World.

Five New Varieties for 1907

VICK'S SUNSET—Companion to Daybreak and Purity, in color a delicate pink shading to a deep rich pink in center. Profuse bloomer. Price per packet 25 cts., 2 pkts. 40 cts.

VICK'S UPRIGHT—Long graceful stems, branch out at the ground and grow directly upwards. Flowers are symmetrical, double and full to the center. Splendid for cutting. Especially valuable for shipping. Price per packet 25 cts., 2 pkts. 40 cts.

VICK'S ROYAL PURPLE—An offshoot from the Branching. Unlike its parent it sends out stems close to to the ground. A medium early variety but lasting until late in Fall. Nearly every stem produces specimen flowers. Price per packet 20 cts., 2 pkts. 35 cts.

VICK'S BRANCHING ROSY CARMINE—A new color in the Braching Class. Leading florists pronounce it a shade which will be popular with the trade. Price per packet 25 cts., 2 pkts. 40 cts.

VICK'S CARDINAL—The best bedding Aster ever introduced. A good one for cutting. With its profusion of flowers and brilliant coloring it makes a handsome showing. Price per packet 25 cts., 2 pkts. 40 cts.

As we would like to know where you saw this adv. please mention THE AMERICAN FLORIST when you write.

St. Paul.

BUSINESS QUIET.

Business up to December 1 was a record breaker, there being a greater call, and for finer flowers than ever before, orchids, lily of the valley and fancy violets selling very readily. Trade has dropped off though to quite an extent since then. But this is usually expected, as very little entertaining is done by society folk here between Thanksgiving and Christmas. Chrysanthemums are practically over, only a few stragglers being seen. Poinsettias are being displayed but there is very little call for them. Roses and carnations have improved wonderfully in this section and some fine stock is being brought in. Mme. Chatenay and Kate Moulton lead in pink, and Richmond in red varieties. Violets grown locally are good, but cannot compare in size with the Eastern grown, which are being received by most of the retailers. The outlook for Christmas stock is fair. With a little sunshine several very promising crops of roses and carnations would come into line. Lycopodium wreathing does not seem to be very scarce here, as it is being sold by the local commission houses at very low figures. Holly seen so far has been of varied quality.

NOTES.

Alfred W. Lemke, a son of E. F. Lemke, has acquired A. S. Swanson's interest in the Swanson Floral Co., and the firm will hereafter be known as Colberg & Lemke. Their store, which was damaged by water from a fire in the building recently, is being redecorated and will be all ship-shape in a few days.

J. Fotheringham, representing the F. R. Pierson Co., was a recent caller. He had a box of Winsor carnation come through in fine shape. Every one who saw them admired them greatly and Mr. F. booked some good orders for them.

A recent visit to Jas. J. Hill's greenhouses revealed things in better shape than usual at this season. A house of chrysanthemums was especially fine. These have been in charge of Emil Popp for the past year.

Wm. King has removed from his old stand to new quarters at 267 E. Seventh street.

Visitors: J. M. Hutchison, New York; E. M. Sherman, Charles City, Ia., and T. E. Cashman, Owatonna, Minn. O.

Omaha.

DEMAND GOOD.

Thanksgiving business has been very good, chrysanthemums taking the lead and American Beauty roses and violets next. Carnations are always in demand but there were lots of tea roses unsold. It seems chrysanthemums are becoming more and more popular for Thanksgiving Day. The weather was very fine and stock in good shape. Chrysanthemums are of the past and none of the florists are sorry. There is considerable funeral work and stock is cleaned up pretty well every day. Violets are somewhat scarce in this vicinity and command a good price right along.

Hess & Swoboda made a fine display in their window of cattleyas and oncidiums, which was very much admired.

GRIPPE.

Indianapolis.

NOTES.

Fourteen members were present at the November meeting of the Indiana Floral Association, and it was decided to have a dinner and an exhibition in connection with the annual meeting in January, for which rooms have been engaged in the commercial club building. "Take the elevator." Certificates will be awarded on meritorious novelties.

Of blooming Christmas plants grown for this market, at least 100 per cent more Gloire de Lorraine begonias and poinsettias will be available than in former years, while cyclamens and primulas are not nearly as numerous as before.

Local papers, describing the flower mission charity ball, commented upon the fact that the beautiful custom of wearing corsage bouquets is being revived, and that, among the flowers used, orchids were more in evidence than ever before.

The death of E. Huckriede came as a shock to his family and his numerous friends. Although 71 years of age, Mr. Huckriede was very spry and active.

The South Park Floral Co. is sending fine Killarney roses to this market and this rose seems to be gaining favor with local retailers.

R. Carry, for several years foreman of the Indianapolis Flower and Plant Co., has resigned, intending to go to New Castle.

Thos. Knipe of Kokomo was in town and reports his stock as doing well and business increasing.

H. D. Schilling is under the care of a doctor. J.

Scranton, Pa.

CLUB MEETING.

The Scranton Florist Club held its annual meeting November 16 in Guernsey Hall. There were many fine chrysanthemums, arranged on two large tables and in several groups through the hall. Wm. MacDonald and T. B. McClintock were the principal exhibitors. The following officers were elected: President, Anton Schultheis; vice-president, Edgar McConnell; secretary, T. B. McClintock; corresponding secretary, G. R. Clark; treasurer, Wm. MacDonald; trustees, James Davis, John Hill, A. D. Turnbull, Ira G. Marvin and C. H. Gerbig.

A silver cup will be presented by the Scranton Florist Club, to the member scoring the greatest number of points. Twelve exhibits will be allowed each member, but not more than three at any one meeting. Flowering plants, foliage plants, roses, carnations or chrysanthemums, not less than six of any one variety, floral designs, table and mantel decorations, fruits or vegetables may be exhibited. After the meeting the members and their wives and friends partook of an excellent banquet.

SCRANTONIA.

DOVER, N. H.—Chas. A. Davis florist of 339 Washington street was married November 14 to Miss Ella Gertrude Libby of 9 Gold street. The happy pair were the recipients of many useful and handsome presents, and left the same evening for their honeymoon. They will reside at Washington street.

The Nursery Trade

American Association of Nurserymen.
Orlando Harrison, Berlin, Md., President; J. W Hill, Des Moines, Ia., Vice-President; George C. Seager, Rochester N. Y., Sec'y.
Thirty-second annual convention, Detroit, Mich., June, 1907.

THE nurserymen of Paris are interestingly described in an illustrated article in the December House and Garden.

SELMA, CAL.—W. M. Post will open a nursery here for the Capital City Nursery Co., Salem, Oregon, and is at present taking orders for the firm.

JOHN C. OLMSTED, of Olmsted Bros., Boston, Mass., has been appointed landscape architect of the Alaska-Yukon-Pacific exposition, which is scheduled to be held at Seattle, Wash., in 1909.

SIDE shoots of conifers seldom make good shaped plants if used as cuttings or scions for grafting. But seedling trees sometimes throw up erect shoots after the first or leader is taken off, and these as a rule grow into good shaped specimens.

IN the wild garden nothing is prettier in spring than the blue periwinkle, Vinca cœrulea, and the wood anemone. The deep green foliage and blue flowers of the vinca, and the pretty white flowers of the anemone make one of the prettiest combinations of color imaginable.

AMONG the shrubby spireas many fine species and varieties may be found, but few if any surpass the old S. callosa for beauty and general utility. It thrives in all kinds of unlikely places, is quite hardy and every shoot in summer produces a spike of the pretty pink flowers, thus keeping up a succession over several months. In good soil it rapidly increases, growing into immense bushes in a few years.

ACCORDING to a pamphlet by H. M. Hale, issued by the U. S. Department of Agriculture, there were used in 1905, 3,192,223 cords of wood for pulp making. The value of this was $17,735,665 and 4,168,964 pounds of pulp were produced. Spruce is the wood most used, furnishing more than 70 per cent of the total amount. Poplar, domestic and imported, comes next, hemlock, pine, balsam and cottonwood being used in smaller quantities.

THE evergreen laburnum, Piptanthus Nepalensis, is a very beautiful shrub, far superior to the ordinary kinds of cytisus. It is not, of course, perfectly hardy, but in a sheltered position where the young growths are not injured by spring frosts and cold winds it is a gem. The finely cut deep green foliage forms a fine setting to the long racemes of golden yellow flowers. Grafted plants are often sent out from nurseries, but own root plants are better if they can be obtained. Seeds are freely produced and ripen in autumn, this being a good method of propagation.

I. N. BROWN, who has for 15 years had charge of the Atlantic, Ia., nurseries, first under Silas Wilson and latterly for Stark Bros., intends starting up for himself. He is at present engaged in pulling down the buildings on the Stark property and these, together with the land, are to be offered for sale. Mr. Brown will remain on the same ground if he can make terms for it, but if not, he will establish a nursery on his own ground. Well known in the trade and an expert in his business, there is every reason to suppose that he will make it a success. Excessive taxation and shortage of cars for handling their shipments are the reasons given by Stark Bros. for quitting the business in Atlantic. As somewhere about $5,000 annually have been paid by them in wages, the loss to the city will be keenly felt.

THE suggestion by Consul Brunot in his article on English walnuts that they be raised commercially in the southern states is a practical one. Their culture is shown by him to be no more difficult than other crops, and that they can be grown here is proven by the bearing trees scattered over the middle and southern states, although they are not inclined to develop a crop north of Maryland. English walnut orchards have already become very profitable in southern California. However, the home market is still large and growing, as the imports of walnuts (mostly English or Juglans regia) amounted to 21,684,104 pounds, valued at $1,469,463, in the fiscal year 1905, and 24,917,028 pounds, valued at $2,193,653, in the fiscal year 1906. Furthermore there is a protective duty of 3 cents per pound on unshelled walnuts and 5 cents per pound on the shelled. In addition to walnuts, other nuts were imported to the value of $4,688,880 in 1905 and $5,179,782 in 1906. These figures indicate a broad field for the expansion of the nut-growing industry of the United States.

Utah State Nurserymen Meet.

The leading members of the nursery trade in Utah state met in conference at the new Chamber of Commerce building, Salt Lake City, November 26. A desire to co-operate by forming an association was expressed, this being rendered necessary by the steadily increasing volume and importance of the trade in the state.

Among other matters discussed was the necessity of protecting the public from the tree peddling fraternity, who not only do not represent good nurseries, but do much to bring the trade into disrepute by shady methods. A suggestion was made that all nurseries desiring to do business in the state file a bond with the state board of horticulture and pay a license to sell trees.

JAMES TRUITT & SONS, of Chanute, Kan., have made considerable additions to their greenhouses, and have now an area of 20,000 square feet under glass. A large storage and packing house is also under way in the north part of the town. This building will be 115x225 feet, frame built, and brick veneered, to render it frost proof. Walter Truitt is manager of the entire business, the rapid growth of which is a great tribute to his energy and ability. The increase tn the nursery end of the business is equally as large as that of the greenhouse portion.

Mountain Misery.

By this alliterative title is sometimes called a pretty little evergreen shrub of the middle Sierra region of California, where in sunlit, coniferous forests it often covers immense areas with a dense carpet of dull green, which looks at a short distance like a sown turf. The branching, wiry stems are about a foot high and are clothed with an abundance of finely dissected leaves, amid which throughout the summer an occasional solitary white flower is borne resembling a strawberry blossom. Like the strawbery, indeed, the plant is a member of the rose family, and is botanically known as Chamaebatia foliolosa—a name familiar to readers of John Muir's works, who speaks of it sympathetically in "Our National Parks." The leaves are so fern-like in appearance that it is said that an old lady of one of the foothill towns, who added to her income by selling pressed flowers to tourists, used to palm off bits of foliage on the uninitiated as fronds of a peculiar fern of the region.

"But why Mountain Misery?" you ask. Upon plucking a few leaves of the plant, you become conscious of an indefinable, pungent odor, somewhat of a cross between that of tobacco and fresh paint. Then you notice that your hands are discolored and begummed with a sticky resin which dots the leaves, and, if you do not observe it then, you will later. Your clothes, wherever they have come in contact with the plant, are liberally smeared with the same substance; so that if they are of a delicate fabric, it will be a nice matter to restore them to their original estate. "So," you think, "misery enough," and deem the plant well named.

Cattle frequenting land where Chamaebatia is abundant, are said to get their bells so gummed up with its tarry exudations at times, that the metal no longer makes a sound. Mountaineers often call it tarweed—a generic term, like greasewood, applied in the west to many plants of quite diverse botanical families.—C. F. Saunders in the American Botanist.

TRADE GOOD.

The past week has been a busy one for the florists, several important social functions having taken place, the most important being the St. Andrew's ball. The decorations were chiefly carried out with bunting and large palms. All kinds of flowers were worn by the ladies with the exception of the thistle, roses being chiefly in evidence. The chrysanthemum is gradually decreasing in number and in public favor and the rose and carnation are taking their former place, carnations especially taking the lead, owing to the excellent quality of the flowers now offered.

NOTES.

Tom McHugh landed home safely from Toronto with the Hanlan cup, winning it for the second time. Tom is quite confident of winning it for a third time, and then owning it.

McKenna's new delivery wagon is quite a novelty and altogether out of the ordinary; in addition to this the firm has a new horse, new harness and a new driver.

Chas. Craig, late head gardener to A. Joyce, Outremont, has secured a position with Graham Bros., Ottawa.

John Walsh won the first honors in the aggregate euchre, John Eddy, second, and W. H. Horobin, third.

Visitor: Harry A. Bunyard.

LUCK.

Columbus, O.

TRADE GOOD.

Thanksgiving trade here exceeded all expectations, good stock and plenty of it, together with good demand, making a very successful day of it. Several weddings also helped to make it a busy day. The chrysanthemum proved to be a very popular flower and in some places was sold out completely. There was also a good call for carnations and roses. Chrysanthemum houses are now beginning to look empty, long benches of short stubs not being ornamental. Within the past few weeks several small shipments of orchids have been received. Although Columbus is not slow by any means in the way of floral work, still orchids are not an everyday occurrence, and attract some attention.

The Fifth avenue Floral Co. has just built some new houses. This firm has now 10 houses, ranging from 75 to 150 feet in length.

CARL.

Utica, N. Y.

RECORD THANKSGIVING TRADE.

The Thanksgiving trade was the best ever reported here. Flowers were plentiful and brought good prices. Violets took the lead, selling from $2.50 to $3 per 100. There was a good demand for carnations and roses. American Beauty roses were scarce but were not in great demand.

C. F. SEITZER.

Tuesday, November 27, being the 72nd. birthday of C. F. Seitzer a number of his friends in the trade were invited to his cozy home on Oswego street, to help make the day memorable. C. F. Seitzer is the grand old man of our club and has served as its treasurer since the time of its organization. The boys presented him with a handsome chain, to which gift he responded by a feeling speech of acceptance. After being treated to a bountiful German supper the boys left, wishing Mr. and Mrs. Seitzer many more happy years together. Among the out of town guests was Mrs. Wm. Wagner of Coopertown, N. Y. BUD.

Providence, R. I.

STOCK PLENTIFUL.

Thanksgiving business was good, and netted more than last year. Weather conditions were an exact repetition of 1905, Wednesday being moderate temperature with rain, and Thursday one of the brightest, coldest days experienced thus far. Violets were not in demand, strange to say, and thus disappointed those who had made extra efforts to meet a heavy call. Roses were plentiful, as also were carnations. Chrysanthemums were in good supply. Mrs. Jerome Jones, white Bonnaffon, white Eaton and Dr. Enguehard were most in evidence, with a fair sprinkling of Major Bonnaffon and yellow Eaton, John Macrea's new Yellow Dome was just right for the holiday and brought extra wholesale prices. M. M.

WHEELING, W. VA.—The recent financial difficulties of the Schreiber-Mabis Co. still has its echoes. One of the most regrettable after-results is that the veteran florist, Franz Laupp, has been compelled to cease his business career. He has been located at 1327 Market street for the past 16 years, always doing a prosperous business and making many friends. In all he was in the business, at various locations, for 40 years. His affairs will be continued to a certain extent at the Island greenhouse, at the upper end of North Front street, by his wife, Mrs. Louise Laupp.

MABELLE, New Pink Carnation for 1907

Color—A peculiar shade of lovely pink, with a faint yellowish cast; several shades lighter than the Lawson. Unlike most pinks, the brightest sun does not injure the color. Size—3 to 4 inches in diameter when established. Odor—Pleasing, but not strong. Stems—Invariably strong, but always graceful, ranging from 12 to 30 inches during the season. Habit, etc.—A very quick, active grower, making specimen plants in a short time, even from late cuttings. On account of its rapid growth, requires supporting very soon after benching. Gets away rapidly, blooms early and gives long stems right from the start. Productiveness—Prodigious is the best word we know of to use here. It is the most incessant bloomer, early and late, we have ever grown. Stock limited. Delivery January 5 to 10 and later. Price, $12.00 per 100, $100.00 per 1000.

THE H. WEBER & SONS CO., Oakland, Md.

Please mention the American Florist when writing.

To Carnation Growers:

IMPERIAL AND PINK IMPERIAL CARNATIONS.

HERE are two good ones for you; the former the beautiful variegated delicate pink ground spotted with deeper pink; the latter a Lawson shade of pink, and both fancy varieties. They are vigorous growers, no grass, and every shoot produces a flower. The supply of cuttings will be limited. You cannot well afford to be without some stock of these two excellent varieties. They should, and undoubtedly will, prove a most valuable asset to our collection of desirable commercial carnations, and growers who would be up to date must not be without them. I have watched carefully these two varieties for some time, and can fully vouch for their excellence. Enough said.

The first batch of rooted cuttings will be ready December 15, 1906. Place your orders now and be assured of supply for next season, or for further particulars regarding these two excellent commercial carnations, address

TRADE DULL.

The rainy weather of last week was in a measure to blame for the Thanksgiving business not being up to expectations. Chrysanthemums and roses were in abundance but did not move as fast as the retailers would like to have them. Only about six days of sunshine the last month made carnations very scarce. Violets, too, were in great demand and not very plentiful.

NOTES.

Preparations are actively in progress for the meeting of the State Horticultural Society, also of the Park and Forestry Association, which will be held December 11-12-13, joint meetings of the two associations being held at these times.

Secretary Wesley Greene attended the meeting of the Northeastern Iowa Horticultural Society, at Charles City, and the Southeastern Iowa Horticultural Society, at New London, a short time ago.

Miss Alice Kimey, who has been confined to her home on account of poisoned hands the past two weeks, has again resumed her position at Lozier's.

W. E. Kemble, of Oskaloosa, was in the city recently, attending the state meeting of the Y. M. C. A. association.

Vaughan's Greenhouses are cutting some very fine chrysanthemums, also some fine Ivory and Richmond roses.

Lozier's are very busy with wedding decorations; they also had the decorations at the Shriners' banquet.

Mrs. Harvey Lozier, who has been in the hospital, is at home again, much imroved in health.

The Iowa Floral Co. report a very good Thanksgiving business.

M.

Minneapolis, Minn.

GOOD THANKSGIVING TRADE.

Business was very good on and around Thanksgiving. The merchants all report good sales and an excellent supply of stock. The medium priced chrysanthemums and red roses seemed to be leaders, but carnations and all small stock sold rapidly. Stock is coming in now in good quatity and quality. Roses are prime, and carnations are bringing good prices. Lily of the valley, hyacinths and narcissi are in demand and are of excellent quality. Green stuff is not so plentiful as might be wished, but indications are that it will be better for Christmas.

NOTES.

The Minneapolis Floral Co. report a heavy business with an especially large demand for the increasingly popular Kate Moulton rose. This rose is a winner, and is bound to last.

The hostess' ball last week, held at the West hotel, furnished a source of activity for some of our leading florists, and the results were a decided credit to the craft.

Amundson and Kerchner have recently opened a very attractive floral store at 409 Hennepin avenue, and are doing a lively business.

G. H.

WINONA, MINN.—H. J. Fuhlbruegge and Miss Sara Hassinger were married December 5, and the honeymoon was spent in Chicago.

One of the Finest Gifts for the Holidays is a Beautiful Plant.

FINE, WELL-GROWN PLANTS OF OUR

Tarrytown Fern

(NEPHROLEPIS PIERSONI ELEGANTISSIMA)

Makes one of the finest plants for a holiday gift that we know of. We sell large quantities of these at retail among our local customers, and there is nothing more profitable or satisfactory for Christmas sales than a few of these nice plants.

We can offer fine selected specimens in all sizes, from medium sized plants in 6-inch pans up to immense elegant specimens in 16-inch pans, suiting all purses and all classes of trade. Order early and have the stock on hand where you can show it. You will find nothing more satisfactory or profitable. We can supply fine plants as follows:

Fine plants, 6-inch pans, 75c and $1.00 each, according to size. Fine specimen plants, 8-inch pans, $1.50 and $2.00 each, according to size. Very fine specimen plants, 10-inch pans, $3.00 each. Large specimens, 12-inch pans, $5.00 each. Extra large specimens, 14-inch pans, $7.50 each. Still larger specimens, 16-inch pans, $10.00 each. Also young stock for growing on, $12.00 per 100.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York.

THE NEW PINK ROSE "AURORA"

This rose is a seedling from Bon Silene and Souvenir de President Carnot. The flowers are large and full and are produced on strong and stiff stems, with a rich dark green foliage. The color is a beautiful pink with a deeper shading in the center. The keeping quality of the flowers is excellent, and it does not lose its brilliancy of color when kept in the cellar. The habit of growth is strong and vigorous; it has absolutely no tendency to go dormant during the winter and every shoot has a flower bud.

"AURORA" has inherited the productiveness of Bon Silene and has the free flowering qualities of this well-known prolific variety. It is easy to grow, and does not need a high temperature.

Plants from 2½-inch pots, own roots, **$30.00 per 100; $250.00 per 1000.** 50 at 500 and 100 at 1000 rate. Ready for delivery on and after March 1, 1907. Order at once if you wish to receive the early prepared stock. All orders filled in rotation.

WATCH ☛ PROSPERITY ☚ LOOK

Prepare for Christmas.

PRICES SLAUGHTERED ONE-HALF THE NORMAL.

☞ **THIS IS OUR LAST SLAUGHTER.** ☜

Is it possible to sell an Araucaria Excelsa, 4 years old, 18 to 23 inches high, 5 to 6 tiers for 75c? YES! Aschmann can do it. Read explanation below.

Prices **never** offered so low in the history of Araucaria cultivation. Why is that? For the simple reason, to obtain room to cultivate our great Easter stock. About 5,000 Araucarias, with an immense lot of Palms, Ferns, Azaleas, Rubbers, Begonia Gloire de Lorraine, etc., must be sold by Christmas.

☞ Please take notice. In all the Araucarias only spring importations are offered: raised in pots all summer, and can be shipped any distance safely without drooping

ARAUCARIA EXCELSA

There is no home complete without an Araucaria. 5½ to 6-in. pots, 18 to 23 in. high, 5 to 6 tiers, 4 years old, 75c; 6-in. pots, 23 to 25 in. high, 5, 6 to 7 tiers, 4 years old, $1.00; 6 to 7 in. pots, 25 to 30 in. high, 5, 6 to 7 tiers, 4 years old, $1.25; 7-in. pots, specimen plants, from $1.50, $1.75 to $2.00 each.

ARAUCARIA COMPACTA ROBUSTA—have several thousand of them; can supply all wants. These plants were never so fine in shape and condition as this year. The pet of the greenhouse; as broad as long. 6-in. pots, 3 tiers, 12 to 14 and 16 to 18 in. high, same wide, 3 years old, $1.00 to $1.25 each; 6 to 7 in. pots, 4 to 5 tiers, 18 to 20 and 22 to 25 in. high, same wide, 4 years old, $1.50 to $1.75 each; 7-in. pots, specimen, 6 to 7 tiers, and 25 to 30 in. high, same wide, 5 years old, $2.00 to $2.50 each.

ARAUCARIA EXCELSA GLAUCA—this variety on account of its beautiful green-bluish tiers, dwarf habit, fine compact shape gives it a striking appearance, and anybody seeing the plants must undoubtedly fall in love with them at sight. 6-in. pots, 3 tiers, 14 to 16 and 18 to 20 in. high, same wide, 3 years old, $1.00 to $1.25 each; 6 to 7 in. pots, 4 to 5 tiers, 20 to 25 and 25 to 30 in. high, same wide, 4 years old, $1.50 to $1.75 each; 7 in. pots, specimen, 5 tiers, 30 to 35 in. high, same wide, 5 years old, $2.00 to $2.50 each.

All these plants are as broad as long; the finest you have ever seen.

Aschmann's Ever-Prosperous Greenhouses Now Great Slaughter Houses.

HAVE NO MERCY, DOWN GO THE PRICES.

NO SCARCITY OF KENTIA PALMS.

Can meet all wants cheaper than ever.

KENTIA FORSTERIANA, 7-in. pots, made-up plants, 1 large size about 45 to 48 in. high in the center and 3 smaller sizes 25 x 30 in. high around, which gives them a good appearance, $2.00 to $2.50 each; 6-in. pots, single plants, 36 to 45 in. high, 5 to 6 good leaves, 4 years old, $1.25, $1.50 to $1.75 each; 6-in. pots, 32 to 36 in. high, 5 to 6 good leaves, 4 years old, $1.00 each; 5½ to 6 in. pots, 4 years old, 30 in. high, 5 good leaves, 4 years old, 75c; 4-in. pots made-up plants, 3 plants in a pot, 18, 20 to 25 in. high, 25c, 30c to 35c each.

ARECA LUTESCENS, 5-in. pots, 24 in. high, made-up with 3 plants, 35c; 4-in. pots, 20 to 24 in. high, made-up with 3 plants, 25c.

ARECA SAPIDA, just imported from Belgium, something new, very attractive, looks like Kentia, 25 in. high, 50c.

COCOS WEDDELLIANA, 15c.

ASPARAGUS PLUMOSUS NANUS, 4-in. pots, large bushy, 10c to 12c

ASPARAGUS SPRENGERI, 4-in., 10c.

FICUS ELASTICA, or **Rubber Plant,** 6 in. pots, 25 to 30 in. high, 40c to 50c each.

FERNS, all raised in pots and not on benches as follows:

NEPHROLEPIS BARROWSII, 7 in. pots, as big as a bushel basket, 75c to $1.00 each; 6-in. pots, large, ready for 7-in., 50c; 5½-in., 40c; 5-in., 35c; 4-in., 25c.

NEPHROLEPIS SCOTTII, 8-in., as big as a washtub, worth $3.00 now $1.50; 7-in., as big as a bushel basket, worth $1.50 now 75c to $1.00; 6-in., 50c; 5¼-in., 40c; 5-in., 30c to 35c; 4 in., 20c to 25c.

NEPHROLEPIS ELEGANTISSIMA, 5-in. pots, 30c.

BOSTON FERNS, 7 in., very bushy, only 75c; 6-in., 50c or $5.00 per doz.; 5-in., 30c to 35c; 4-in., 20c

FERNS—A fine assortment of Ferns for dishes, large, bushy, out of 2½-inch pots, $5.00 per 100

MAIDENHAIR FERNS, 6-inch 40c.

JERUSALEM CHERRIES, (or Solanum), 6 to 7 in. pots very bushy, full of berries, from $3.00 to $6.00 per doz.

DRACAENA BRUANTI, (imported), 30 in. high, full of green, waxy foliage from top to bottom; the only Dracaena for parlor store or house culture that can stand heat, dust and dirt; 6-in. pots, 50c, $5.00 per doz.

CHINESE PRIMROSES, 5¼-in. pots, very strong, in bloom and buds, $2.00 per doz.

HYDRANGEA OTAKSA, only pot-grown is offered, sure success for Easter forcing, 6-in. pots, 25c; 7 to 8-in., 50c.

AZALEA INDICA for Christmas **all ready forced** in bud and bloom. Deutsche Perle, double white; Simon Mardner, double pink; Vervæneana, double rose variegated, flowers very large. Prices: 75c, $1.00, $1.25 to $1.50, cash. In the small sizes mostly white. Some white must be taken with colored. Azaleas for Easter forcing in the best American varieties, pink, white or variegated: 35c, 40c, 50c, 75c, $1.00, $1.25 to $1.50, cash.

BEGONIA GLOIRE DE LORRAINE, 6-in. pots, in bloom and bud, for now and Christmas, 50c to 75c each.

BEGONIA FLAMBEAU, sells on sight, 4-in., ready for a shift into 6-in., 20c.

BEGONIA ERFORDII. New Improved, 4-in., 20c; 5¼-in., 25c.

All plants must travel on **purchaser's risk only.** CASH WITH ORDER.

When ordering, say whether the plants should be shipped in the pots or not.

American Florist Company,

Directory Department. 324 Dearborn Street, CHICAGO.

THE FOLEY VENTILATING APPARATUS.

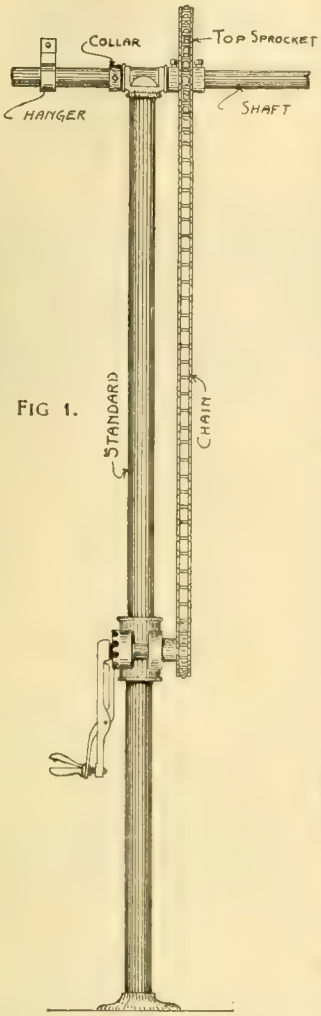

FIG 1.

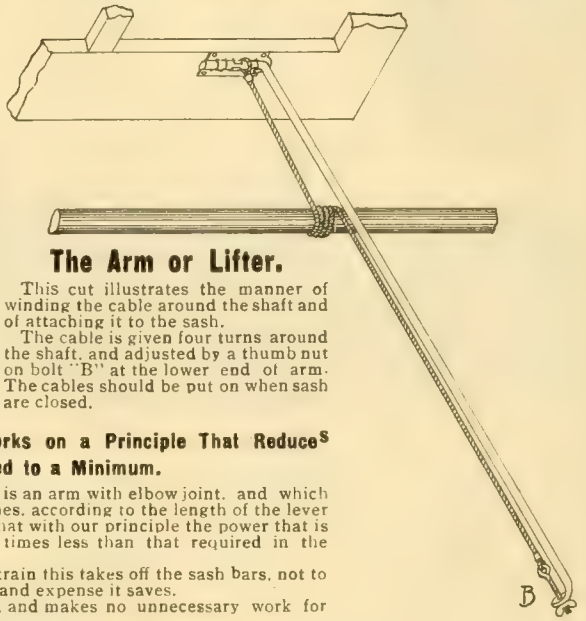
Fig. 1 Represents Our No. 1 Direct Acting Machine.

For operating sash on houses up to 175 feet long. The sash hinged either at the ridge or header.

This direct acting machine is very strong, compact and simple, and has a self-locking attachment in the handle so that when you let go the handle the machine is firmly locked.

Our No. 4 machine is the same as this only smaller with shorter handle and 1¼ inch standard. It is used for small, short houses and side sash.

Awarded First-Class Certificate of Merit by Society of American Florists.



The Arm or Lifter.

This cut illustrates the manner of winding the cable around the shaft and of attaching it to the sash.

The cable is given four turns around the shaft, and adjusted by a thumb nut on bolt "B" at the lower end of arm. The cables should be put on when sash are closed.

The Foley Ventilating Apparatus Works on a Principle That Reduces the Load to be Lifted to a Minimum.

Unlike the lever arm principle, which is an arm with elbow joint, and which increases the weight of the sash many times, according to the length of the lever portion of the lifter. It is safe to say that with our principle the power that is required to operate the sash is five to ten times less than that required in the other method with the lever arm.

It can be readily understood what a strain this takes off the sash bars, not to mention the power and consequent labor and expense it saves.

Our machine gets to business quickly, and makes no unnecessary work for itself to do.

EXPERT TESTIMONY.

"We are well pleased with them and do not hesitate to recommend them. 1. They have ample power. 2. Easy to operate and not noisy. 3. Light and neat in appearance and make very little shade. 4 Cheap.
W. N. RUDD.

FOLEY MANUFACTURING CO.

GREENHOUSE MATERIAL.

KILL YOUR SCALE.

If you want to KILL scale on your plants ABSOLUTELY there is only one preparation—

WILSON'S PLANT OIL.

Take a can of this preparation, dilute to four times its bulk with water, and wash or spray your palms, ferns, aspidistras, smilax or any plants subject to bugs or vermin and **your plants will be clean. No alkali. Nothing deleterious. Dries at once.**

READ WHAT OTHERS SAY OF IT.

RUTHERFORD, N. J., June 28, 1906.

We have thoroughly tried your Plant Oil with very striking results. We may say this is the first insecticide we have tried on our palms that will remove the scale with the first application. We would like to say this is one of the few things that the florists cannot afford to be without, especially those who are growing palms and decorative plants. After one application of your oil the plants take on an entirely new appearance. We would be pleased to have prospective buyers visit our nurseries and inspect the palms on which we have used your oil

BOBBINK & ATKINS.

NEW YORK BOTANICAL GARDEN, Bronx Park, New York City, September 5, 1906.

MR. ANDREW WILSON:—Having used your insecticide here, I can testify to its efficiency in destroying scale and other insects infesting plants.

Yours very truly, GEO. A. SKENE.

MR. ANDREW WILSON: FLORHAM FARMS, Park Department, Florham Park, N. J., Dec 8, 1906.

Dear Sir:—Your plant oil is certainly the most effective scale killer I have ever tried. Please send another five gallons.

Yours truly, A. HERRINGTON.

PRICES: In cans, ½ pint 25c; pint, 40c; quart, 75c; ½ gal., $1.25; gal., $2.00; 5 gals., $9.00.

THE LOW PRICE HEATING PLANTS

The Chicago House Wrecking Co. is in position to offer you an interesting proposition for furnishing you with a heating plant at a saving of at least 30%. Send us a sketch of your houses with preferred location of the boiler, the points of compass and the desired night temperature for zero weather, and we will gladly submit you an exact detail quotation of all material required to install the plant. We have ***heaters*** and ***boilers*** of every kind, both new and rebuilt. We have always on hand a large number of rebuilt boilers suitable for greenhouse heating. Our stock embraces ***fire box boilers, horizontal tubular boilers, Kroeschell boilers, cast iron sectional boilers, Erie City economizers*** and other types.

We can save you considerable money on ***pipe, valves*** and ***fittings;*** also on ***doors, glass, sash*** and everything needed in the construction of your buildings.

Ask for our Special Catalogue No. 47.

HERE IS AN HONEST PROPOSITION

We have sufficient confidence in the Morehead Trap that we will send one on a 30 day's trial.

If it does not demonstrate in that time that it improves your heating system, that it saves money for you by decreasing fuel bills, and is the best return trap on the market, it will cost you nothing.

THE NEW

Cyclopedia of American Horticulture.

BY PROFESSOR LIBERTY H. BAILEY.

Over 4,357 articles in all by 450 expert writers, including practically all the best botanists, nurserymen, seedsmen, florists, market gardeners and experimental station horticulturists. Occupying 2,100 pages and covering 24,434 plant names, 2,800 detailed illustrations, enormously increasing the ease of identification, and 146 beautiful full page illustrations.

Every reader of this paper who is interested in farming, in gardening, in trees, in shrubs, and all out of door matters, absolutely needs this set. It takes the place of all others combined on American gardening.

In Six Great Quarto Volumes of 2,100 Pages You Find:

Descriptions alphabetically arranged of all—over a thousand—of the native trees, plants and flowers worth cultivating, with keys enabling you to name any species, as well as to find all information regarding it. Practical articles by leading experts of the country on all phases of commercial plant production and greenhouse management—cut flowers, vegetables, etc.

Fullest cultural instructions for every flower, fruit and vegetable, tree and ornamental plant you may wish to grow.

SPECIAL OFFER.

The regular price is ***$30.00.*** For a few weeks we are able to offer this new and revised edition with the new material added at ***$22.80*** cash. This offer will be withdrawn January 1, and the price increased.

American Florist Company,
324 Dearborn Street, CHICAGO.

THE AMERICAN FLORIST

America is the Prow of the Vessel; there may be more comfort Amidships, but we are the first to touch Unknown Seas."

Vol. XXVII. CHICAGO AND NEW YORK, DECEMBER 22, 1906. No. 968

SUGGESTIONS FOR FLORISTS.

Shasta Daises and Gaillardias.

No other perennials have paid us as well for cutting in mid-summer the past two seasons as Shasta daisies and gaillardias. The easiest way to propagate them is to sow seed in June or July and this will result in well grown plants before the winter sets in. Not having enough plants last year, we made a sowing December 26 and had by the middle of April nice strong plants for the field, which gave us excellent results during the summer. The old clumps of Shasta daisies never do as well as the young stock, and so with gaillardias. Shasta daisies are also easily propagated by division but the plants don't seem to have the same life as the seedlings. Of the several kinds, Gaillardia grandiflora is the best for cut flowers.

Daffodils.

You can force Von Sion without having the bulbs outside at all. Not so with tulips or hyacinths. Three years ago, we bought 2000 daffodil bulbs December 12. They were planted in boxes and pans and placed under the benches of a violet house, where they were kept in a night temperature of about 40° and later 45°. They started to bloom a little before Easter and at Easter we had them all in bloom. I think I never saw a finer lot of flowers. Since then we plant our daffodils as early in the fall as we can get them, put them outside and bring them into the violet house in December. To have them in flower for the end of January, the boxes ought to be placed under a carnation house bench on top of the hot water returns; leave them there from the last week in December to the second week in January. Darken the place where they stand a little so that you may get better stems. Move them to the light about the middle of the month and keep in a temperature of about 55°.

This treatment applies to the bulbs you wish to force up to the end of February, after which date less heat is required to bring them into bloom. If you wish to have the best results then, don't use any bottom heat whatever, and don't give your plants a night temperature of over 50°. Give them the full sunlight in the daytime and plenty of ventilation, for a daffodil grown cool has better colored and larger flowers, which when cut will outlast those grown in a high temperature. Thousands of daffodils are dumped each season on the wholesale market, which have been forced too hard. The flowers are small, light yellow in color, and they are usually put up and shipped 25 in a bunch, which, while it will do for tulips, is not at all proper for daffodils. The petals get bruised, which is not the case when packed like roses or carnations, and by the time the flowers reach the retailer a few wilted yellow leaves on the end of the stem remain.

Vincas.

The variegated vinca heads the list of all the drooping vines we use in spring, and while window boxes or vases filled with red geraniums and English ivies have a rich effect which can not be obtained with vincas, most of your customers will only take ivies as a second choice. I can't remember a bedding season during the last 17 years where we haven't run short of vincas before the season was over. There is never an over supply of good vincas on the market. A good plant is one in a 4-inch pot with from seven to 10 branches 18 to 30 inches in length. Stock planted out last spring and taken up this fall, cut back and up to this time, stored under some light bench, should now be divided and put into three or 3½-inch pots.

Give them for the present any bench you can spare. They will not grow much for the next three to four weeks but will make new roots now, and get ready to make their new growth towards the end of January. Put the plants then in 4-inch pots and stand them along your carnation benches. If you haven't enough room you can use your rose benches as well. I don't mean to set the pots between your plants in the bench, for that would not be the proper way. Put up a little shelf, made out of hemlock boards six inches wide, alongside the benches. Use laths or other thin material on the sides to hold some sift-

ed ashes for the pots to stand on. When you transfer your plants to 4-inch pots mix an 8-inch pot of bone meal with every wheelbarrowful of your potting soil. Vincas are great feeders when growing and require plenty of water.

Easter Lilies.

Your longiflorums for Easter should for the next few weeks be in a carnation house temperature. If they are now about six inches above the pots, you have them in good shape. By six inches above the pots I don't mean growth made under a bench, but well developed leaves or growth made in full sunlight. If you have early planted lilies which have not been neglected, you ought never to have any trouble in getting them into bloom for Easter, if you can apply enough heat towards the last. Should you, however, have planted diseased or immature bulbs it is beyond your power to have satisfactory results in forcing them.

Whether you fumigate with cyanide, punk, nicofume or the old fashioned tobacco stems, don't wait until the centers of the plants are full of lice. As soon as lilies are brought into the house they ought to be fumigated regularly once a week to prevent the appearance of the insects. Fumigating will never hurt the plants. The brown tips on your lilies are not caused by it, but are due to the unnatural conditions we put the plants under by forcing them to grow and bloom in pots. You find the same brown tips on latanias, dracænas and other foliage plants. Of course, you can by an overdose of smoke make conditions worse, as there is less vitality and resisting power at the end of the leaves than at the base. If you received your lilies late, and the plants at this time are just beginning to leaf out, don't try to hurry them by putting the plants into a high temperature; it is too early: Let them come along in a 55° house for a while. They will make up later.

THE CARNATION.

American Carnation Society.

Everything is in readiness for the meeting in Toronto, Ont., January 23 and 24, excepting the flowers for the exhibition and the attendance. The display ought to be good and large, as are the premiums offered and lots of them. The flowers as soon as they enter Canada will have special care from the express company, providing the society label is used. This label can be procured by applying to the secretary and will also pass them through the customs without any delay or annoyance.

The attendance ought to be immense, as the papers to be read and the discussions that will come up are unusually interesting. The rate of a fare and a third will apply to all of the country covered by the Central, Trunk Line, New England and Canadian passenger associations.

The premium list can be had by applying to the secretary and in this connection he wants to publicly apologize to Wm. Scott of Buffalo, N. Y., for inserting the name of another in place of his for judge. The list of judges should read: W. N. Rudd, Mt. Greenwood, Ill.; Wm. Nicholson, Framingham, Mass.; Wm. Scott, Buffalo, N. Y.

January 16 is the last day for entries to reach the secretary. Intending exhibitors who have not as yet joined the society will please note and apply for a premium list at once, so as to get entry blanks and information needed in time to get their entries in before that date.

JNO. H. DUNLOP, Pres.
ALBERT M. HERR, Sec'y.

THE PREMIUM LIST.

The sixteenth annual meeting and exhibition of this society is to be held, January 23 and 24, 1907, in the assembly hall of the city hall, Toronto. The officers for the current year are as follows: John H. Dunlop, Toronto, Ont., president; W. J. Palmer, Buffalo, N. Y., vice-president; Albert M. Herr, Lancaster, Pa., secretary and Fred Dorner, Jr., Lafayette, Ind., treasurer. W. N. Rudd, Mt. Greenwood, Ill., Wm. Nicholson, Framingham, Mass., and Wm. Scott, Buffalo, N. Y. are the judges.

No entry will be accepted that does not reach the secretary by January 16 except by payment of $1 for each variety so entered. All entries, except for certificates of merit, must be staged before 1 p. m. on the first day of the show. Members of the society only are eligible to compete for prizes. Cards for labeling all varieties are supplied by the society and any varieties not so labeled or numbered will not be considered by the judges. The same vase is not allowed to compete for more than one prize excepting those entered for certificates, and where otherwise stated.

The following papers are promised:—"Are There Too Many New Carnations Introduced," by John Birnie, West Hoboken, N. J.; "Greenhouse Construction," by Mr. King, Toronto; "American Carnations and Their Prospects in Europe," by C. Englemann, Saffron Walden, England and "Carnations From a Canadian's Point of View," by Wm. Gammage, London, Ont. To be eligible for a certificate of merit a variety must have been bloomed not less than three years and at least 50 blooms must be shown, but preliminary certificates are awarded to varieties of promise, comprising two-year-old seedlings, 12 or more blooms of each, or any variety to be shown and an entry fee of $2 paid for each variety. To enter for the certificate of merit $5 is the required fee. In the general premium list there are 27 classes, first and second prizes, ranging from $10 to $1.05, being offered. Gold, silver and bronze medals for the best, second and third vases of 100 blooms, any variety, and silver and bronze special S. A. F. medals for best and second best vase of 50 blooms of a variety not yet disseminated are also offered. A first prize of $50, second of $30 and third of $20 are offered for the best general display of commercial carnations, 50 in a vase, not more than 20 vases. Silver cups for various exhibits are donated by the Canadian Horticultural Association, the Steele, Briggs Seed Co., Toronto, the Montreal Gardeners' and Florists' Club, the R. W. King Co., Toronto and N. Tonawanda, N. Y., and the Dale Estate, Brampton, Ont. In the latter case cash will be substituted for the cup should the winner prefer it. Cash prizes are also offered by John H. Dunlop, Toronto, W. Gammage, London, Ont., W. J. Lawrence, Eglinton, Ont. and Geo. Vair, Toronto.

PHOENIX ROEBELENII.
To be seen at Vaughan's Greenhouses, Western Springs, Ill.

Special shipping cards are provided by the society through the secretary, and Geo. H. Mills who will be superintendent of the exhibition will give all assistance and advice possible. The one and one-third fare on the certificate method will again be conceded by the railroad companies.

AZALEAS AT VAUGHAN'S GREENHOUSES, WESTERN SPRINGS, ILL.

Propagating Carnations.

You have still plenty of time to think about propagating varieties of which you have a large stock, but in the case of the newer sorts which you intend growing more extensively next season, get ready now. Carnation specialists differ quite a little in their opinions regarding the best time to propagate. Those who have a light soil for field culture, will, from a late struck cutting, grow a bushy plant in a few weeks, while those with a heavy soil will require well established stock for planting out in spring in order to get a fair sized plant ready for housing in August. Quite a number of carnation growers have abandoned field culture altogether. Those beautiful blooms of Aristocrat and White Perfection exhibited at the last Chicago show were cut from stock planted in the benches the first week in May, and C. W. Ward tells us that the variety Robert Craig never had field culture from the time the seedling came up.

There is no doubt that the varieties we grow today are more suited to be grown entirely inside than those of 25 years ago. For those, however, who have a bedding plant trade, and need all the space they can possibly get in April, May and part of June, field culture is necessary. For propagating, use nice, strong side shoots of the flowering stems. Select those that are uniform in size. Don't have one cutting four inches and the other two in length. By going over your stock, say every three weeks, you have no trouble in selecting cuttings of uniform size. If you take hold of the flowering stem of the plant with your left hand and with the thumb and two forefingers of your right hand get hold of the cutting in the middle, you can remove it from the plant by bending it sideways, and in most cases no trimming is necessary. Have a small box, box, say 10 x 14, with two wire hooks attached to one side to hang on the edge of the bench, to receive your cuttings, and move the box as you go along. Don't try to hold 50 cuttings in your hand before depositing them in the box. Lay your cuttings all one way; the box will hold two rows. Whenever you have, say 150 to 200 cuttings put them in the propagating bench. Use fresh sand three inches deep. Don't crowd your cuttings too much. Have them set so that you can see the sand between the rows. One and one-fourth inches in the sand is sufficient for the cuttings.

When you have a row full, press the sand firmly along both sides of the row. You can best do this with the two forefingers of both hands. If you don't press the sand firmly you will find your cuttings lying all over the sand after the first watering. During December and January little shading is required. A light spraying on sunny days will do the foliage of the cuttings good. Spraying, and the little watering the cuttings require, should be done with the can. A hose is not the thing for the cutting bench, and it takes a good man to handle it intelligently at any time. If you keep your cuttings in a night temperature of about 50° they will show roots in about 30 days. Don't let them make three to four inches of growth before taking them out of the sand.

Carnations in England.

Carnations have been put up in good form at many of the chrysanthemum shows by Cutbush & Son, London, Hugh Low & Co., London, and S. Mortimer, Farnham. The Winter Flowering Carnation Society, inaugurated in May, held its first show on December 4 in London. The following scale of points has been adopted for judging new varieties put up for certificate:

Color	5 points
Size	5 points
Fragrance	5 points
Substance	5 points
Calyx	5 points
General appearance	5 points
Length and substance of stem	5 points
Habit of plant	5 points

Thirty points are necessary to entitle a variety to a first class certificate, and twenty-five points to entitle a variety to an award of merit.

Growers are greatly annoyed over synonymous varieties advertised under two or more names, probably the result of a similar sport appearing simultaneously in two or more establishments. When new stock is bought this is not discovered until flowering time comes round. Another grievance is the low cutting prices advertised by some growers, especially in retail newspapers.

BEE.

WITH THE GROWERS

Vaughan's, Western Springs, Ill.

CHRISTMAS STOCK.

A look through the extensive and well kept greenhouses here revealed a great deal of fine stock that we may have occasion to refer to later, but just now we are more concerned with the stock for Christmas. Clean, well developed and excellently finished stock of all kinds is present, the ordinary market stock in surprisingly large numbers and rarer and more uncommon varieties well represented. Azaleas are always popular Christmas plants and a house of 800 fine specimens in full bloom and ready for immediate delivery makes a very

POINSETTIAS AT VAUGHAN'S GREENHOUSES, WESTERN SPRINGS, ILL.

pretty show. The ever popular Simon Mardner, with its showy, red, double flowers, Vervæneana, variegated, and the double white Deutsche Perle are the principal kinds grown for this trade, and by their healthy, vigorous appearance they have been brought on gradually and not unduly forced.

Baby Rambler roses are very popular and there is a large stock here, not only of the type, but of a charming white form with small and very double pure white flowers, very freely produced. This certainly is a little gem, the centers of the flowers showing no yellow stamens like other white forms we have seen. Little Alfred again is a very pretty and unusual variety. The buds are a soft apricot yellow before expanding, turning to a mixture of coppery yellow, then china pink, eventually becoming pure white as the blossoms open fully. Such a marked change and through such a variety of colors is quite unusual. Jas. S. Wilson, the manager here, says it should have been called Chameleon, and it would certainly be a descriptive name. Three of Welch's new varieties were noted, Lady Gay, Hiawatha and Etoile de France, the latter much resembling Richmond, both in habit and color, but only suitable for summer flowering according to Mr. Wilson.

Poinsettias are always popular Christmas plants and these are grown in very large numbers and of excellent quality. The sight of a large houseful with splendid bracts 12 to 13 inches across of the richest fiery red is very fine. We have never seen a better colored lot of poinsettias. Mr. Wilson attributes their color to feeding with blood manure, but the plants are in excellent health all through, the foliage a fine deep green, strong and of great substance. They are in all sizes from single dwarf plants to fine specimens five in a pot, and each one is perfect; there is not a poor plant in the lot.

Begonia Gloire de Lorraine is a fine feature here, a house full of grand plants in several different sizes being noted. They are simply covered in bloom, the foliage healthy and of fine substance, the color of the flowers also being excellent. Gloire de Sceaux, with what appeared to us to be deeper colored, more metallic like foliage than usual, was in fine order, healthy stout plants just opening their flowers. A fine batch Aucuba Japonica, the berried and the male form, was noted, but the berries were hardly colored sufficiently. Probably they will be ready by the holidays. The Christmas peppers are very fine indeed, the plants, owing to having been grown under glass right along, having kept their foliage in splendid order, a deep healthy green that shows up the rich tints of the fruit remarkably well. The strain of Jerusalem cherries grown here is an excellent one, only the largest and best colored berries from the most shapely habited plants being saved for seed, and as this selection has been going on for a number of years, the result is seen in the plants now fruiting. It is to be hoped that this selection will still be rigidly carried out, for there is already a great improvement on the ordinary forms.

Foliage plants are in excellent order here and grown in very large numbers. For instance, there are altogether about 25,000 kentias, not little bits, but many of them fine specimen plants in the finest possible health and of a deep green color. K. Forsteriana is most largely grown, but there are also a great number of K. Belmoreana, that fine decorative palm, with which no one ever seems to get over stocked. Crotons are clean and well colored and the stock of Ficus pandurata is large and of varied sizes. There is also a fine stock of Araucaria excelsa, healthy plants in all sizes and several varieties being grown. Dracæna Massangeana and D. Lindeni

Solanum Capsicastrum or Jerusalem Cherry.
At Vaughan's Greenhouses, Western Springs, Ill.

are two fine golden variegated forms largely grown, while D. terminalis, excellent in color, is also to the fore. One of the prettiest things we have seen lately is D. Pere Sheran, a new variety that is being rapidly worked up here. The leaves are wider than those of D. terminalis, the color a beautiful cerise, with deeper tinted edges. Another fine new one is D. gloriosa, while D. amabilis is present in quantity, its fine healthy

Poinsettia Pulcherrima.
At Vaughan's Greenhouses, Western Springs, Ill.

looking leaves containing white, pink and green. Large, small and medium sized plants are here of all these kinds and it would be a difficult customer to please who would not find what he wanted.

Boston ferns in all the leading new and old kinds from little fellows in small pots up to fine well feathered specimens are here by the thousand; also large batches of Ficus elastica, hard, green, healthy looking stock that would delight the retail florist. Asparagus plumosus, too, is well and largely grown, as are Pteris tremula, P. serrulata and a fine batch of P. Wilsoni, a showy crested form of great value. Cleanliness and good culture are everywhere shown and the stamp of a well managed concern is written large all over.

The Geo. Wittbold Co., Chicago.

A visit to the Buckingham Place greenhouses of the Geo. Wittbold Co. is very interesting, owing to the great variety of pot stock to be seen. All the leading decorative plants are grown in considerable quantity, and the stock of palms in all sizes is exceptionally fine just now. The houses facing Buckingham place are well filled with Boston and other ferns and decorative stock generally, and these houses are to be extended right around the block, which will greatly enhance the fine appearance of the place. Areca lutescens, with its brightly tinted stems, is a graceful palm and some fine specimens of this look well among the kentias and others in the show houses. Here everything is very clean and healthy, and the houses being cool and airy, the stock has just that hard lasting appearance that experienced decorators like.

In the growing quarters for decorative plants, the Wittbold system of watering and spraying the whole house by simply turning a valve has been installed, and the fine bright condition of the stock is its best recommendation. An arrangement of valves has been effected whereby the whole of a house, or separate portions that dry more quickly than others, can be sprinkled, an important point. The saving of labor must be very great, besides which it is not necessary to climb about among the suspended plants. Modifications of the system, to suit various types of houses and the plants grown therein, can be made. We understand from Louis Wittbold that the device is selling freely.

Among the flowering stock a very fine lot of Begonia Gloire de Lorraine was noted, the plants of medium size, very healthy and full of bloom. The Japanese Ardisia crenulata, too, is in excellent shape, the plants in fine health and profusely berried. Seedling ferns in all sizes and great variety are grown, the tiny plants in boxes and pots showing the same good health as those of specimen size. Poinsettias, both on the benches and dwarf plants in pots, are all in excellent condition, and the same is true of fine batches of young cocos, Asparagus plumosus nanus and many other foliage subjects. A house full of healthy young cyclamen, and a few benches of chrysanthemums in leading sorts are providing a lot of flower, and a large batch of cattleyas grown on flat rafts look very healthy. The stock of Araucaria excelsa is large and healthy, and consists of plants in many sizes. In the retail store a fine lot of cut blooms was being handled, the products of the firm's greenhouses at Edgebrook. Enchantress carnations and roses in all the leading favorites were represented by the best stock in considerable numbers. Besides the decorative and cut flower work the Geo. Wittbold Co. grow herbaceous and general hardy plants largely, and trade in all departments is brisk.

Begonia Gloire de Lorraine.

The illustrations herewith show some of the plants of Begonia Gloire de Lorraine as grown by Samuel Murray, Kansas City, Mo. Mr. Murray has been very successful with this begonia. He grows only one plant in a pot. The stock for the large plants was received from J. A. Valentine, Denver, Colo., in 2-inch pots April 20, and those in 4-inch and 5-inch pots from the same source July 5. The plants shown in 2-inch and 3-inch pots were top cuttings of Mr. Murray's own propagation. Mr. Murray does not believe in carrying over any old plants, and says that the plants shown here could have been grown much larger but for lack of room.

BEGONIA GLOIRE DE LORRAINE.
At Samuel Murray's, Kansas City, Mo.

The Action of Ether in Forcing Plants.

The efforts made in recent years to hasten the forcing of different plants, by subjecting them to the fumes of ether, have attracted the attention of the horticultural world, and particularly that of specialists, who see in it an improvement which will, at least in the early autumn, shorten the time necessary in the greenhouses, and permit of a more rapid succession of crops. In France, this new method is still in the experimental stage. We have made several tests, making careful notes, and give below the results.

We made our first trials with Lilac de Marly, wishing to obtain a good show of bloom in November and December, a period in which forcing is the most difficult. The first plants were placed in the greenhouse October 27, and consisted of equal portions of etherized plants, and others which had simply rested.

Before proceeding, we should describe the method by which we obtain at this season a decided rest for plants of the Marly lilac. About October 15, when the lilacs have their buds well formed, but still retain all their leaves, we dig up a certain number with the ball of earth and leave them in the open if the weather be dry; if it rains, place under a shed. In either case, all the leaves are left upon the branches. The equilibrium between leaf evaporation and root absorption being thus broken, the plants soon wilt, and in 48 hours, if exposed to the open air and sun, or at most in three or four days if under a shed, the bark begins to wrinkle. Now all the leaves must be cut off, leaving the stems, which are not easily removed. These plants are now stored seven to eight days in a dry place, then taken into the greenhouse for forcing, where they give excellent results.

For our experiments, we use a case seven feet long, which easily holds six clumps of lilacs; a larger case would be difficult to handle. This case, hermetically closed, is placed in the open air, in a temperature varying from 54° to 56° at night and from 59° to 63° by day. Following the opinion of Dr. Johannsen, we used 300 grammes of ether per cubic meter (or about 8 ozs., avoir., per cubic yard), and the duration of the process was 36 hours. The lilacs subjected to this first experiment had previously been treated to the enforced rest referred to above. The forcing process was conducted at a temperature of 72° to 77°. We noticed at once that the etherized plants had lost a portion of their buds, while those which had only been rested developed as perfectly as could be wished at this season. They bloomed November 25, doing very well indeed for plants simply rested before forcing, the etherized plants being a partial failure.

BEGONIA GLOIRE DE LORRAINE.
At Samuel Murray's, Kansas City, Mo.

Bearing in mind this first experiment, we made, 15 days later, a new etherization, reducing the quantity to about 6 ozs. per cubic yard, and the time to 24 hours. This time the buds did not suffer, and the vegetation was very good, although the time of blooming was not more than three days earlier than that of the rested, but non-etherized plants.

The third experiment was more interesting, the non-etherized plants having had but 12 days of rest, but without their foliage, which had just fallen when they were lifted. We thus placed in the greenhouse, on November 15, six clumps of Marly lilacs lifted with very large balls; then, December 2, six other plants, etherized for 24 hours, at 59° and at the rate of 6 ozs. of ether per cubic yard. The first lot did not bloom till December 27, and was very uneven. The etherized plants were in bloom December 28, and were as perfect as could be desired, thus accomplishing an advance of 18 days, with much better results and no drawbacks.

Fourth experiment.—On December 20, we placed 6 plants of Marly lilacs, having had 6 weeks of rest, and 6 plants etherized 36 hours, at the rate of 6 ozs. per cubic yard at a temperature of 77° F. On account of the inflammability of ether fumes, the cases must not be near the boilers, and we obtained this temperature by burying the case lightly in heated manure. We feared that the buds would be burned at this temperature, but the moisture set free so retarded the evaporation of the ether that it was hardly completed in 36 hours. This discovery demonstrates that etherization varies greatly in time according to the humidity or dryness of the atmosphere, and we consider this a most important element to take into account. The plants etherized in this manner bloomed perfectly on the fifteenth day of the forcing; those simply rested bloomed three days later and were also very fine. After January, etherization became entirely useless.

Fifth experiment.—On December 22,

two clumps of Lilac Charles X, which had been rested one month, were started, one had been etherized for 36 hours with 8 ozs. per cubic yard, at a temperature from 72° to 77°; the other had not. The development of the etherized plant was rapid and perfect; it seemed at first to have 10 or 12 days the start of its neighbor, but this difference decreased gradually, until the etherized plant was in full bloom January 26, and the non-etherized only six days later. Both developed all their buds perfectly, as well as a certain number of leaves.

We should add that these lilacs were forced slowly and in full light, conditions indispensable for good coloring.

We made no experiments with Charles X which were not rested, but the difference would be much greater. Pot-grown specimens also give good results, and it is by using these and etherizing them that the Germans succeed in forcing Charles X for Christmas and New Years.

Trials made with snowballs (Viburnum Opulus sterile) did not give so conclusive results as did the lilacs; with these, as with Azalea Mollis and Deutzia gracilis the advantage of etherization appeared very slight. We made also three tests of lily of the valley, but while the first growth was very rapid the blooming period was in no case hastened more than 48 hours.

We have drawn the following conclusions from the above experiments:

1.—Etherization assists greatly in the resting process, and enables the plants to be forced earlier and in a shorter time.

2.—Of all the shrubs, the lilac responds best to etherization.

3.—Etherization has no object except in use before January 1; after this time, its effects are slight. It is most useful in forcing the Marly lilac in October and November, and the Charles X, Trianon, Marie Legraye, etc., in December.

4.—The action of ether varies, according to its application to rested or non-rested plants; in the first case, it hastens the blooming period only a few days and does not increase its beauty, but in non-rested plants it reduces the forcing period by half and gives far better bloom.

5.—The quantity of ether to use cannot be arbitrarily given; at 60°, in a dry atmosphere, 3 to 4 ozs. per cubic yard is enough; in a moist atmosphere, up to 8 ozs. may be used with impunity.

6.—The duration of the process should correspond with the time necessary for a complete evaporation of the ether used; in the first instance above, 24 hours will do; in the second, 36 or even 48 hours. In a dry atmosphere, the temperature should not be over 60° to 65°, but if the air be moist, 70° to 77° is not too warm.

7.—The action of ether is felt most strongly at the beginning of the growth, and in theory a double etherization would be beneficial—but practically the young buds just developing cannot be subjected to this treatment. A case or a special room, may be used for this process—a room near the greenhouse heated by the general plant, seems to us the best.—Revue Horticole.

Prof. Zinno, who has made an exhaustive examination of the ashes cast out of Vesuvius in the recent outbreak, says that he has found them free from ingredients injurious to plant life, while containing matter helpful to the growth of grapes, grass and vegetables.—Revue Horticole.

To Be Done Now.

IN THE GREENHOUSES.

Maintain a restful temperature in the houses where palms and ferns are arranged, unless for any special purpose some are being forced.

Started in haste and thrown away at leisure is the story of more than a few plants every year.

When Mollis and Ghent azaleas are only to be forced once keep them moist at the roots at all times.

Finish giving new compost or repotting Cattleya labiata at once, before new roots form at the base of the bulbs.

At the turn of the year give the show and fancy pelargoniums a little more moisture, but nothing like a full supply as yet.

The old Bouvardia leianthe has nearly gone out of cultivation in most places, but for color and freedom of flowering it is very difficult to beat.

Frequent stirring of the surface soil where mignonette is growing, prevents the troublesome sleeping often observed in this plant in winter.

Begin feeding the roses planted in July if they have rooted and grown well. Once in two weeks is often enough to apply manure water at first.

Dry off poinsettias by degrees; never withhold water all at once, as the plants, especially young ones, cannot stand it.

IN THE STORE.

A few maidenhair ferns in pots are good property as they make a show in the windows, or may be used for cutting from.

Be very careful of the class of men sent to private houses for table and other decorative work, or a falling off in this department will soon be noted.

Always have a few freesias round the store when in season on account of their delicious perfume.

Palms, crotons and other plants with smooth foliage keep in health longer if regularly washed or sponged.

As the season advances great care in handling berried boughs is necessary or the berries drop.

Rose buds that are too tight for use may be hastened by standing in a warm place in hot water, sprinkling tepid water over them.

Endeavor in all decorative work to arrange something novel or original. Copy good work by all means but try to improve on it by some novel or distinctive feature of your own.

Good light in the window is an all important point. Very often at night, when the store is lit up, the window is in semi-darkness and it is difficult to see the flowers from outside.

OUTDOORS.

Push on with soil preparation at all spare times. Whenever a press of work comes it is well to have a good stock of soil ready for use.

Where the soil is poor on any part of the lawn give a thin top dressing of horse manure now. The litter will be a slight protection to the grass and the soil will be improved.

Look over the stock of tools and do all necessary repairs. Replace all broken or worn out with new ones to be ready when wanted.

Protect strawberry beds with a thin coat of litter or manure. This will all disappear by the time the plants are ready to fruit.

Ordinary cold will not injure echeverias unless the sun shines on them afterwards. Any rough shed does to store them in.

Any plants or trees arriving from a nursery in frosty weather must not be unpacked, but placed in the bundles or boxes in a frost proof shed and allowed to thaw out gradually.

Nothing is gained by planting large trees or shrubs for effect. Small specimens quickly take hold and soon catch up to the larger ones, that are bound to be checked more or less by removal.

Directly after a heavy fall of snow, take long sticks or rods and shake the

BEGONIA GLOIRE DE LORRAINE.

At Samuel Murray's, Kansas City, Mo.

E. C. Amling.
Financial Secretary Chicago Florists' Club.

accumulated snow from the branches of cedars and other conifers that are liable to be broken.

European Notes.

Rose Hiawatha is greatly in demand amongst British nurserymen. When first introduced it did not create a sensation. One of the first to recognize its merits was John Green, managing director of Hobbies, Ltd., Dereham, and he worked up a good stock, as did one or two others. It was not until May and June last when it was exhibited by Paul of Waltham Cross and Hobbies, Ltd., that it "caught on," now the public want it. Nurserymen who propagated it require all they have for their own retail customers, and amongst others who missed their opportunity the question goes round, "Can you tell me where I can buy Hiawatha?" Its long sprays of crimson flowers and prominent golden anthers last a very long time. If my memory does not fail me Hobbies exhibited the same plants in London last summer at successive shows, two weeks intervening, with the same trusses of flowers in full bloom. On the second occasion the flowers were of a much duller hue, but very few had dropped during the intervening period. As a decorative pot rose it has a great future and will sell well as a market plant.

Ghent horticulturists have subscribed to erect a statue to the memory of the late Comte Oswald de Kerchove, who for many years was looked up to as the leader in all matters pertaining to horticulture in Belgium. A fitting site for it has been found in the Casino gardens and no doubt horticulturists from many countries, on the occasion of the quinquennial exhibition in 1908, will visit the spot and pay respect to the memory of one who on former occasions gave them a cordial welcome and a hearty greeting to the Belgian Horticultural Society's exhibitions. The memorial will represent the Comte sitting, as if at work on one of his botanical books; around the pedestal numerous plants will be depicted.

Johannsen's process of applying ether to lilacs and other plants prior to forcing continues to make headway, although by no means rapidly. It is still very doubtful, in view of what can be accomplished by cold storage, if it will become commercially profitable. T. Jannoch, Dersingham, Eng., one of the first in Europe to erect etherizing chambers, has shown considerable enterprise in successfully surmounting all the difficulties connected with the process. He has experimented with many varieties of plants in numerous ways and although obtaining good results from lilacs and other subjects he still continues his investigations and experiments with a view to further perfecting the process. Herr Weisbach, Lambegart, Germany, also forces etherized lilacs, flowering them in from 16 to 22 days. He recommends that owing to the disposition of ether to sink rapidly to the ground level, that the chamber should be greater in width than in height and that plants should be laid therein on their sides in tiers; in this manner they occupy less space than when stood erect.

H. N. Bruns.
President-elect Chicago Florists' Club.

J. Cheal & Sons, the well-known nurserymen and landscape gardeners, Crawley, Sussex, have opened a London office in close proximity to the Houses of Parliament. They have just issued a well-printed and beautifully illustrated booklet entitled "Garden Making." J. Cheal has traveled much in Europe and carried out a number of important landscape contracts, and a few years ago visited many of the leading American parks and gardens.

Nurserymen generally are not complaining about bad trade, many of them having exceedingly good orders in hand. If they complain at all it is because they want more. Trade is exceptionally good in most of the leading British industries and capitalists have money to spare; the complaint is that more is spent in motoring for pleasure than in gardening.

BEE.

LEXINGTON, MASS.—Edward Wood has been cutting sweet peas since the middle of November.

Chicago Florists' Club.

There was a fairly good attendance at the last meeting of the Florists' Club, December 13. Harry Papworth, New Orleans, La., and Harry Bunyard, New York, were visitors. There were two proposals for membership, John Evart, 255 Des Moines avenue, and Jos. Marts, Randolph street. Reports were then received from various committees and the officers whose terms had expired. Treasurer Sanders' report showed a substantial balance on hand and it was stated that the various funds raised in aid of the widow and family of the late Jas. Hartshorne would amount to nearly $1,000.

The following were elected officers for the ensuing term: H. N. Bruns, president; Leonard Kill, vice-president; Edgar Sanders, treasurer (by rising vote); Phil Schupp, recording secretary; E. C. Amling, financial secretary; F. F. Benthey, J. F. Klimmer, C. H. Fiske, August Poehlmann and Geo. Asmus, trustees.

H. N. Bruns.

PRESIDENT CHICAGO FLORISTS' CLUB.

The busiest men are often the most useful to our various institutions, lending their time and attention where it does the most good to the greatest number. H. N. Bruns has been one of the most active and regular members of the Chicago Florists' Club, and now that the club has elected him its president he will doubtless take if possible a still greater interest in its welfare.

Mr. Bruns, who has resided in Chicago some 14 years, is a native of Germany, having been born near Hamburg in 1869. From his earliest years he has been closely connected with the culture of the lily of the valley and his knowledge of this in all its phases is probably unique. Beginning at the age of 14 he was employed in several of the more important establishments in Germany, afterwards serving some time in the French capital. Doubtless much of his cultural experience was gained while employed by E. Neubert, Wandsbek,

Philip Schupp.
Secretary Chicago Florists' Club.

Germany, this being one of the important lily of the valley farms in that district. We also find him at the establishment of Alvin Richter, Dresden, Saxony, and in Paris he gained experience in the culture of orchids, azaleas and other plants under Leon Duval.

Soon after coming to this country he was attracted to Chicago, this being about the time of the world's fair, and having become "acquaint," as the Scotch say, or located, he began to cast about for a start in business for himself. His first venture was the leasing of his former premises on West Van Buren street, and, as was to be expected, he soon made the lily of the valley his specialty. He moved some years later to his present location at 1409 West Madison street, and from that time on his progress was rapid. The secret of his success is doubtless in great measure due to the expert knowledge he possesses of the plants he handles, coupled with the fact that only the finest quality goods finds a place with him. His brother is still in Germany and is a large cultivator of lily of the valley. From him Mr. Bruns obtains a considerable portion of his stock, and between them they are able to largely control the lily of the valley interest in that neighborhood, where it is very largely grown.

Quite recently we gave particulars of the large quantities of the stock he handles, and it is unnecessary for us to again enlarge upon that, further than to say that it is now, as always, in the pink of condition. Mr. Bruns is quite a family man, a Mason and a Shriner, his family consisting of Mrs. Bruns and three children, two boys and a girl. He enters on his duties as president of the local club with the best wishes of all who know him socially or in business.

OBITUARY.

Alfred F. Conard.

Alfred F. Conard, aged 72, senior member of the well known firm of Conard & Jones, West Grove, Pa., died at his late residence there November 15, and was buried the following Tuesday in the cemetery of the old West Grove quaker meeting house. He had no children and is survived only by his wife, Lydia. Mr. Conard was born and lived all his life in Chester county near his late residence. He belonged to one of the oldest and best known quaker families of that part of the country. He was a man of very quiet and austere habits and always applied himself most diligently to his business, for which he had a very strong attachment.

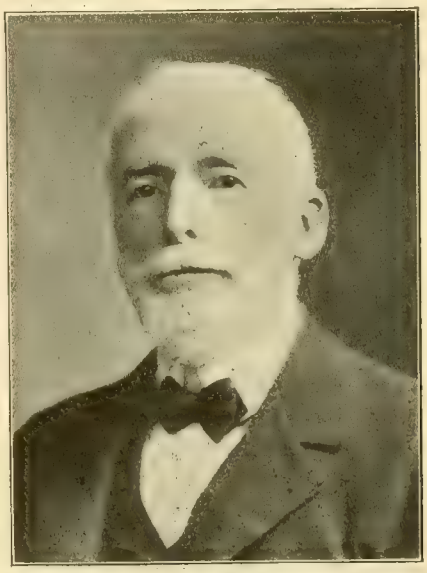
Mr. Conard was the junior member of the firm of Dingee & Conard Co. until 20 years ago, when he severed his connection with that firm, and started in business of a similar character for himself, issuing a catalogue and having the plants he offered grown at Chambersburg, Pa., while the seed and bulb department was still conducted at his West Grove office. A few years ago he formed the Conard & Jones Co., taking in partnership Simon Jones, and purchasing the greenhouse of Antoine Wintzer, who joined the company.

The firm quickly increased its business and added many houses to its establishment from year to year, and is today a conspicuous factor in the mail order business, while enjoying a fast increasing wholesale trade chiefly in roses and cannas, the firm having originated and disseminated many valuable varieties of the latter.

James Vick.

James Vick, son of the late James Vick, Rochester, N. Y., died in Philadelphia, Pa., December 3. Mr. Vick had not for years enjoyed robust health and although he had been seriously ill for some time his death was sudden and unexpected.

Mr. Vick was born May 7, 1849, and when only a lad, about seven or eight years old, assisted his father in packing seeds, making the bags for same, etc., and continued in the business until 1899, when he withdrew to publish Vick's Magazine. A few years later he disposed of the magazine and moved to Philadelphia and entered the employ of the Landreth Seed Co. Later he became interested in real estate.



The Late Alfred F. Conard.

In 1888 Mr. Vick was instrumental in securing a reduction of the postage on seeds from 16 cents to 8 cents per pound, making the fight alone at first, and later as the representative of a number of other American seed houses. The writer can well remember how his firm threatened to ship packages addressed to customers in all parts of the United States to Niagara, Ont., and there post them with Canadian postage, which was 8 cents, unless the United States postage was reduced. This was eventually done, and for a long time all the firm's mail was sent in this way until stopped by the postoffice authorities, when Mr. Vick secured an injunction against them for holding the mail and the Canadian mailing was again continued until the reduction of postage to 8 cents was secured.

Mr. Vick leaves a wife, Lucy Phillips Vick, two sons, James, of Rochester, and Albert, of New York; three daughters, Margaret, Ethel and Dorothy, of Philadelphia; three brothers, Frank H. and E. C., of New York, and Chas. H., of James Vick's Sons, Rochester, two sisters, Mrs. H. K. White, of New York, and Mrs. R. S. Wagle, of Rochester.

Albert Woltewaite.

The trade was much shocked by the death of Albert Woltewaite of Germantown, Pa., which occurred Monday morning, December 17, from heart trouble. He was 51 years of age, a hearty robust looking man, an earnest and untiring worker, thoroughly in love with his business. He had been actively engaged getting ready for the holiday trade all of the week previous with apparently no thought of sickness, and on Monday morning was found dead in a room at the rear of his store, where he had apparently laid down for a nap.

His business was established by his father about 60 years ago and carried on at his death by Mr. Woltewaite successfully for the past 25 years. It was an interesting place to visit as many things were grown not usually found on commercial places. Mr. Woltewaite was of a genial disposition and had many friends in the trade. He leaves a wife, but no children.

K.

John Winship.

John Winship died on Saturday, December 15, of old age, having rounded out his eighty-seventh year about six months ago. He was born at Newcastle-on-Tyne and came to this country when 40 years of age. His first position was with John Dick, where he at once made his mark with the splendid geraniums that grew under his care. He occupied several important positions and about 14 years ago was engaged by Robt. Craig to take charge of his cyclamens and other special plants. His cyclamens and begonias were for some years away the best in the country. He was a most skillful gardener and plantsman and much liked by his fellow employes.

K.

George H. Lamberson.

The death occurred December 4 of Geo. H. Lamberson at his residence 553 Broadway, Portland, Ore. Mr. Lamberson was secretary of the State Board of Horticulture and a native of New York. He had lived in Oregon 30 years and was 53 years of age. Cancer was the cause of death after a lingering illness and deceased leaves a widow and three children.

Edward Hunt.

Edward Hunt who died December 8 of pneumonia at his daughter's home at 123 Peshine avenue Newark, N. J., was a native of Southampton, England. He came to this country when 30 years of age, ariving in New York and settling in Newark two years later Since then he has carried on the business of florist and landscape gardener.

Orlando G. Cooper.

Pneumonia was the cause of the death of this veteran horticulturist, which took place at his home, 2200 Dean avenue, Spokane, Wash., December 6. His last illness was of short duration. Deceased was 71 years of age and leaves a widow and one daughter.

HIGHLAND, ILL.—Fred E. Hollard opened his new store in the Mosiman building November 21.

St. Louis.

SUPPLY AND DEMAND LIGHT.

The market this week may be considered as fair. There was no abundance of stock, and it is well there was not, as there was but little demand. A few private balls and other social events and a little funeral work formed the only outlet for the sale of flowers. Transient trade was dull. Carnations brought $2 to $3 and a few extra fancy reached $4. Roses have been coming in off color, especially pink. American Beauty also comes in off color, especially the shorts, which in many instances were shapeless and deformed buds. It is to be hoped that next week, being holiday week, flowers will arrive daily and that the growers will not pickle the stock, but will continue to ship daily and take advantage of daily demand, thus securing better average prices. Holly is this year in many instances poor, the foliage black, showing evidence of having been frozen. Mistletoe will arrive in bulk about December 20.

CLUB MEETING.

The Florists' Club held its meeting at Strasberger hall December 13. Prof. Irish presided, about 20 members being present. This was the last meeting to be held at the above hall. The next meeting will take place in the hall in the Burlington building on Olive street. Secretary J. J. Beneke announced that over $2,500 have been subscribed to the guarantee fund for the flower show to be held in 1907. Mr. Beneke expects to have over $7,000 by the first of the year, which should insure a successful exhibition.

NOTES.

City Forester Andrew Meyer is mailing letters to property owners on the subject of tree planting. The work will not be confined to any section of the city, but will be in localities where the forester believes that trees are desired along the streets. The law provides that where property owners for three blocks desire any particular kind of tree for planting they will be permitted to select the same within a certain time. If at the end of that time the selection is not made, it rests with the city to determine the kind of tree to be planted.

Edw. L. Loyet was very busy last week. He had a large birthday order for several dozens of red carnations. He also had a large trade in violets.

Philip Goebel, of Kirkwood, is bringing in some fine Enchantress carnations. He intends to build a new carnation house in the spring.

C. Young & Sons were busy during the past week with decorations and funeral work. They have a fine display of holiday goods.

The Schoenle Floral Co. is well stocked with orders for Christmas and they are working hard at preparations for the rush.

Wm. Kalisch & Sons, the Delmar avenue florists, have their greenhouses and store rooms well stocked with plants.

J. E. Johnson, formerly with Miss M. S. Newman and M. M. Ayers, is now with Edw. L. Loyet.

Geo. Reuter is very busy with his green and holly. George was up north gathering lycopodium.

The Ellison Floral Co. had some very elaborate decorations at various social events the past week.

Alex. Siegel was very busy with funeral and violet orders last Thursday and Sunday.

W. H. Kruse was very busy the past week. He is well stocked with orders for Christmas.

Miss Lena Carroll, formerly with Edw. L. Loyet, is now with the Eggeling Floral Co.

F. C. Weber has a most beautiful window decoration of poinsettias and azaleas.

Fred Foster has a very elaborate window decoration on Olive street.

W. F.

Baltimore.

ABNORMAL WEATHER.

The weather continues abnormal, the past week having many light showers, some frosty mornings and evenings, but the day temperature up almost to summer averages. Trade continues good and cut flowers are in moderate supply, although some days there has been a scarcity of carnations and greens. Indications point to an active Christmas business and the stores are full of bright and lovely things, the decorators vieing with each other in making their windows attractive to the throngs of shoppers. The newly introduced styles of baskets for cut flowers with concealed tins to hold water so that they need no re-arrangement by the recipients, who often lack taste in doing this, have proved a great success and left the old-time boxes of blossoms quite a thing of the past. Again the poinsettia promises to be the popular flower of the holiday season. They are not only in request for house and table decoration, but are largely used in the churches. This year the superb new altar of the cathedral, one of the most venerable and imposing church structures here, will be dressed exclusively with these gorgeous flowers, of which from present appearances, there seems hardly enough to go around. One of our Sunday papers last week in an article calculating the cost of a society wedding in this city estimates as the florists' item of expense, $100 for church decorations, $10 for bride's lily of the valley and $25 for five smaller bunches of same for her attendants. This certainly is not excessive, but probably less than the average figures for these items of a fashionable church wedding, but it is in contrast with an outfit which Mr. Perry, of the Florists' Exchange, tells about furnishing when he began business in a small retail way. It ran thus: Boutonniere for groom, 5 cents; spray for bride, 5 cents; ditto for her attendant, 5 cents—total, 15 cents.

NOTES.

Samuel Feast & Sons are occupying their new store in the 400 block of North Charles St., and have a handsome Christmas effect in the large and well-arranged window.

Thomas Vincent, reported very ill, is said to be improving.

S. B.

HAVERHILL, MASS.—H. J. Horne, who was accidentally shot recently, is recovering slowly after the operation performed November 24, by Drs. Benson and Pitcher. It is said he was shot by a stray bullet while he was working in Groveland. Just previously two men with dogs and guns were seen close by and it is thought that the bullet must have been fired by one of these.

Kansas City.

MARKET IN GOOD CONDITION.

This writing probably finds the market in better condition, and supplied with a better grade of stock than at any previous Christmas in our history. A change in the temperature in the early part of the week proved of much benefit to stock in general. Roses, in particular, had begun to show the bad effect of the warm weather of the week previous. Bride and Bridesmaid are excellent. American Beauty is good except in color. Carnations are at their best. Enchantress is in perfection and meets with a good demand. Taking everything into consideration, Enchantress is without a doubt the leading carnation of modern times. Suited for all round purposes, it never fails to meet a good, healthy demand. From a money making standpoint it has no equal. Narcissus of fairly good quality, is on the market. Stevia is plentiful. Violets fail to arrive in anything like sufficient quantities, but the quality of those at hand is good. Fine lilies were seen in one store last week. Other stock to date consists of cattleyas, lily of the valley and Roman hyacinths. Christmas greens are plentiful, and in fine condition.

NOTES.

The home of G. L. Holsinger, of Rosedale, Kans., was entered recently by thieves who carried away many valuable articles, including a quantity of silverware which Mr. Holsinger had prepared to place in safe deposit next day.

Kent Atkins, from Stuppy's, St. Joseph, Mo., was among last week's visitors. His visit to the city recalled early days when flower stores were very few. At that time Mr. Atkins conducted the only flower store in Kansas City.

Mrs. Lord, from Topeka, was in the city recently purchasing Christmas supplies. "Conditions are favorable for a big trade," declared Mrs. Lord. Wholesalers report unusually heavy booking in Christmas cut flower orders.

William Bastin has recently opened a retail flower store at the former location of Lawrence Schwager at Thirteenth street and Grand avenue.

The buildings on Walnut street occupied by the Kansas City Floral Co. are soon to be torn down to make room for another sky scraper.

A Walnut street retailer, through last week's papers, offered as specialties holly and evergreens "fresh from our greenhouses every day."

The conservatories of Samuel Murray were a grand sight last week, his annual showing of Begonia Gloire de Lorraine being in evidence.

The Rock Flower Co. reports many dinners, receptions and other social affairs during the past week.

D. Freudenthal, of Twelfth street, had a nice showing of chrysanthemum Timothy Eaton last week.

The Alpha Floral Co. inaugurated their new location with a big fern sale December 8.

Denham Kelley, of Kearny, Mo., was in the city recently.

K. C.

LONG BRANCH, N. J.—W. G. Eisle was recommended as local exhorter at the last conference at St. Luke's M. E. church by Dr. Handley, and he is to be licensed.

THE date of next Easter is March 31, two weeks earlier than Easter of the present year.

SEVERAL recently patented inventions for use on the land are noted in the current number of the Scientific American, among them being an improved potato plow, subsoil plow and a clod breaker. A new seeding device, to do away with the troublesome clutch now used is also noted.

THE Scientific American gives an interesting account of the manufacture of machine-made window glass in its issue of December 1.

WE are in receipt of the report of the twenty-second annual convention of the Society of American Florists, held at Dayton, O., last August.

OUR readers will confer a favor by sending us reports of the holiday trade in various sections, with such general trade news as may occur to them.

CARNATION ST. LOUIS was given an award of merit by the Royal Horticultural Society (Eng.), October 23. It was exhibited by Cutbush & Son of London.

ON account of the holidays which occur during the next two weeks, advertisers and correspondents will confer a favor by sending in copy as early as possible.

BUYERS and growers should note that in most cases Christmas prices of cut flowers do not go into effect until December 20, the day after we go to press this week.

CARNATION MAUVINA was figured in the Gardening World, December 8, from flowers supplied by Hugh Low & Co., of Bush Hill, Enfield. It is described as the nearest approach to mauve in color.

Important To Subscribers.

The date on the yellow address label on your copy of THE AMERICAN FLORIST will show when your subscription expires. Please renew subscription promptly on expiration to make certain of receiving your copy of each issue.

Yuletide.

By sending THE AMERICAN FLORIST to your employes every week of next year they will be given a weekly reminder of you and it will make a most appropriate and useful gift if sent to their home addresses. In many ways it will be a good investment. Send us their names and addresses now, enclosing one dollar for each subscription and we will start with our grand Christmas number and continue sending the paper every week of 1907.

Society of American Florists.

Secretary-elect P. J. Hauswirth has tendered to President Kasting his resignation as a director of the Society of American Florists, and same has been accepted. President Kasting has appointed Theodore Wirth of Minneapolis to serve as a director for Mr. Hauswirth's unexpired term of two years.

DEPARTMENT OF PLANT REGISTRATION.

Central Park Nursery, Topeka, Kansas, submits for registration Canna Magnificent. Foliage green; bloom rich scarlet of extraordinary size; height 4 feet.

WM. J. STEWART, Sec'y.

Greenhouse Glass and Present Tariff.

The printed report of the proceedings of the twenty-second annual convention of the Society of American Florists, held at Dayton, O., last August, is now out and for the benefit of those who were not present at the meeting, they will find on pages 78 to 85, the action which was taken upon the discussion of President Kasting's address, relative to the cost of glass for greenhouse work.

It will be noticed in that report that it was suggested that the first step for practical results would be to find from the committee of ways and means, what was likely to come up. The Hon. Butler Ames, one of the Massachusetts congressmen, stands as a leader and member in favor of tariff revision, and in reply to a letter addressed to him, as to what action would be likely to be taken upon revision by those who favored such course, he makes his reply as follows:

House of Representatives, Washington, D. C., December 8, 1906.

To BENJAMIN HAMMOND, Fishkill-on-Hudson, N. Y.

Congressman Ames wished me to acknowledge receipt of your letter of December 6, with its enclosures in reference to the proposed revision of the tariff, and to say in reply that this matter has not yet reached a point where the majority of this congress have indicated that they are favorable to a revision.

J. A. LEGARE, Sec'y.

It will thus be seen from the letter received from the chairman of the committee of ways and means of the house of representatives, already published, and the letter above, that there is no expectation of any real work being done at the present session of congress. What may develop during the winter, which will lead up to an extra session next year, remains yet to be seen, but there is no doubt but that if the florists as a body will stand together, their collective influence would have much weight.

BENJAMIN HAMMOND.

Buffalo.

Business the past week has been very good. Advance orders for Christmas are coming in very fast. The demand for wreaths and bells so far is good. Holly is on sale on every corner, but does not hurt the sale in the stores, as the way the ones on the corners are made is very inferior. The supply of poinsettias and other plants is much in evidence. Holly is not handled this year as extensively as heretofore, owing to its poor quality.

NOTES.

The sage of Corfu called last week. He was in town buying presents for his numerous grandchildren and expects to attend the Florists' Club election should president call a meeting for that purpose.

The retailers on the Washington Market are looking forward to a good trade. About all that is wanted now is good, cold weather, with a preference for sleighing.

Chas. Sandiford, of J. J. Albright's, has a fine lot of carnations in for Christmas. That fine place always has some choice flower in bloom at all times.

H. Keitsch & Sons have completed the alterations in their store. It is now one of the handsomest in town.

W. H. Grever, manufacturer of the Ever Ready pot covers, has had a big sale of them.

S. A. Anderson has a fine lot of Begonia Gloire de Lorraine and cyclamens.

The retailers have very attractive windows at present.

Visitors: E. A. Butler, Niagara Falls; D. J. Scott, Corfu, N. Y.

BISON.

Christmas Plants in Philadelphia.

A look among the growers of plants for the holiday trade finds them well prepared for the regular demand expected and also ready for the new customers with an extra supply and a novelty or two, although new things of merit are always scarce and often those that look promising develop features that make them unprofitable and are soon discarded.

At the Robt. Craig Co.'s establishment is offered a splendid stock of azaleas, very well budded and appearing to be timed just right for Christmas. The two houses of dwarf oranges are a grand sight. Nothing in this line was ever done better. A fine lot of cyclamens is also seen. Poinsettias in pans with ferns and asparagus are a feature, a large house being filled with them. There is a large and varied assortment of the different Boston ferns, Nephrolepis Whitmani, N. Barrowsii and N. Scottii, in all sizes. These are very well grown plants, many of them being finished in stands. Dracæna terminalis, well colored, and crotons, the best varieties, in single and made-up plants, are here in quantity. Their brilliant foliage makes a great addition to the Christmas stock. The novelty par excellence is, however, the Violin Rubber, Ficus pandurata. The brilliant luster of the broad, dark green leaves veined as they are so beautifully with a lighter shade of green, is irresistible. As grown by Mr. Craig it is a great seller. Cuttings are taken from strong growing shoots with broad leaves which give the plants a good base to start from and which in a short time are ready for sale. Florists who have not seen this plant should get busy immediately, as it will be a great seller for the next few years.

W. K. Harris is strong with Begonia Gloire de Lorraine, the light pink kind that holds its flowers. A large house of this is here in various sizes. Azaleas are also offered in quantity, very well flowered plants. A new one near the Simon Mardner color, but opening more regularly and holding its flowers better, is much liked, as it forces very easily for Christmas. A house is given up to that scarce plant, the African violet, Saintpaulia ionantha. This is a very pretty blue flower which much resembles a violet in color and shape.

A house of very well grown cyclamens is seen here which will be at their best about January. Combination plants, made up with ferns, crotons and dracænas, are very attractive and good sellers. A house of imported holly is very suggestive of the season, loaded heavily as it is with berries. A house of fancy evergreens and box trees contains a large assortment of sizes, many of them very fine specimens. All the Boston ferns are here, many of them on pedestals making very shapely plants. A house of Jerusalem cherries contains shapely plants with plenty of good foliage and berries. In foliage plants a house of very well colored Pandanus Veitchii is a leader, with crotons, well colored dracænas and some nice araucarias. New hybrid begonias are also seen here bearing large single, semi-double and double flowers of brilliant shades of scarlet. These are most showy and if they will hold their blossoms in the stores and afterward in the house they will be a great addition to our winter flowering plants.

Jacob Becker has two houses of azaleas that are as fine as the best in the market. They could not be done better at Easter. There is a good variety of colors, including the new deep pink Mrs. Patrick.

Godfrey Aschmann has a fine lot of foliage and flowering plants. Begonia Gloire de Lorraine, primulas and azaleas, in fine shape for Christmas, are selling fast. His Nephrolepis Barrowsii, N. Scottii and other Boston ferns are very salable, while his stock of araucarias, which are a specialty with him, are up to his high standard.

At the Westcott Nurseries, Begonia Gloire de Lorraine, calla lilies, poinsettias, Jerusalem cherries and stevia are leaders. The stock this season is up to the usual standard and selling well.

The H. A. Dreer Co. is doing a large business in ferns, having a choice lot of Nephrolepis Scottii and other varieties in good shape for Christmas selling. A house of Adiantum Farleyense looks well and small ferns in assortment for dishes are going out daily by the thousand. Boxwoods and bays are seen here in elegant assortment, a really splendid lot of plants.

The Hugh Graham Co. offers poinsettias in quantities, very well flowered. They are also well stocked with boxwoods and bays in the most popular sizes. All the growers seem pleased with the orders taken and think that nearly everything salable will be moved.

K.

SITUATIONS, WANTS, FOR SALE.

One Cent Per Word.

Cash with Adv.

Plant Advs. NOT admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1906 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

NEWS NOTES.

LEBANON, O.—Dr. J. Q. Mulford has about finished a new greenhouse 17x100 feet.

PHILADELPHIA, PA.—Geo. Young, of Wissinoming, has added another greenhouse to his plant.

JACKSON, MICH.—The Fuller Floral Co. intends to open a down-town store, and it will be located in the Foster block.

SHELBURNE, VT.—The new potting shed at Shelburne Farms greenhouse is completed and is a great improvement on the old one.

WALTHAM, MASS.—R. L. Goinsalvos opened his new salesroom, at 100 Chestnut street, December 8, each visitor being presented with a flower.

PASSAIC, N. J.—F. McCollon, formerly with a New York firm, is now with W. E. MacAllister & Co., 157 Main avenue, "the oldest floral shop in Passaic."

SIBLEY, IA.—A. R. Redshow is about to build a greenhouse and enter upon a general florist business here. He is confident of success, owing to the fine railway facilities and the demands of surrounding towns.

BIRMINGHAM, ALA.—The Nunally Co., proprietors of the Woodlawn greenhouses, Atlanta, Ga., have opened a candy and florist store on Ivy street. The flowers will be shipped from the greenhouses in Atlanta daily.

PITTSBURG, PA. — Geo. W. Beears has fitted up and opened recently a store at 53 South Seventh street. He has been in business in this city 15 years.

GLENS FALLS, N. Y.—Walter L. Mead has installed a Lord & Burnham heating system and generally remodeled his greenhouse on Notre Dame street, where he intends carrying on a general florist business. He will be assisted by Le Roy Fleming.

DALLAS, TEX.—The Green Floral and Nursery Co. is making arrangements for doubling the capacity of its greenhouses, which are located east of here on the Kaufman road. This represents a very large investment and will make the plant equal in equipment to any in the country.

NEWBURGH, N. Y.—The Dutchess County Horticultural Society are over $300 out of pocket on their recent flower show, but the members are loyal flower lovers and confident of ultimate success, so another show is to be held next year, and just as long as the public take any interest in them.

NEW YORK.—Richard A. Slowane, a veteran gardener of 94, advertises his body after death for $50, the price to be paid before his decease. The old man served in the civil war and, in spite of his advanced age, points with pride to records of fine produce grown by him in quite recent years. The reason for his somewhat unusual action is, that his wife shall benefit by the purchase money after he is gone.

RICE BROTHERS

WHOLESALE 113 N. 6th St.,

SHIPPERS of home grown Cut Flowers, comprising the newest varieties of blooms. Full line of supplies and decorative greens. Trial order solicited. Weekly price list issued.

MINNEAPOLIS, MINN.

CHICO, CAL.—E. Goucher has been transferred from the position of head gardener at the National Plant Introduction Garden here to Washington, D. C., where he will continue in the service of the department. Ill health led Mr. Goucher to seek this change though he has been here practically since the commencement of operations.

GENEVA, N. Y.—William Smith has offered to give to Hobart college something over $500,000, on condition that a woman's college is established in connection with this institution. Mr. Smith is well known for his philanthropy, and as he has purchased property opposite the campus it would seem his proposition has been accepted.

HUNTINGTON, N. Y.—A regular meeting of the Huntington Horticultural and Agricultural Society was held December 13, a large number of members being present. Dr. E. T. T. Marsh, Frank L. Wells and William L. Robbins were elected members. The report of the spraying committee was received, showing receipts of between $300 and $400 and a deficit of $18. William O'Hara, of Halesite, exhibited fine Queen Louise, Prosperity and Harlowarden carnations.

STOCK SCARCE.

The almost continuously dull weather of the past several weeks, together with the approach of a holiday that means the moving of great quantities of stock at high prices, has effected a shortage for the week just past. Demand has not been very heavy, but has been sufficient to take care of such stock as came in. Chrysanthemums are all but off the market, both supply and demand being very light. Roses of all sorts are very short in supply and not of A No. 1 quality, the dull, cloudy weather making them soft. The color has improved somewhat. Carnations are very good property. Enchantress, even before Christmas prices became effective, sold for as much as eight cents apiece, and Robt. Craig was much higher. Good Lawson also sold readily at very satisfactory figures. No fault can be found with either the quality or color of these. Violets are in good supply and demand. The specialties, such as bouvardia, mignonette, sweet peas, etc., are also scarce. Paper White narcissus, on the other hand, is abundant and moves slowly. Easter lilies are now seen in abundance and are meeting with a satisfactory demand. There has been no change in the situation as regards green goods, the supply remaining equal to the demand in all lines. Christmas prices go into effect December 20, and from all appearances on the local market will go higher than last year.

NOTES.

The E. F. Winterson Co. has a very attractive display of German artificial wreaths of birch, magnolia, holly, etc. These are a direct importation and certainly look fine. The firm has been receiving orders for artificial poinsettias from all over the country from Maine to California, and the shipping department is busy, all hands often being employed late into the night.

Weiland & Risch have 100,000 rooted cuttings of the Killarney rose in the sand and have already received many gratifying advance orders. John Risch says they have found this the grandest selling rose so far. This firm is showing some exceedingly fine Enchantress and Lawson carnations, also scarlet and white. The roses, too, are looking well.

The Easter lilies that the Poehlmann Bros. are showing certainly rival their prize-winning roses for beauty and perfection. A heavier call than usual at this season has developed for these fine blooms. Stevia is also an offering here that takes well with the trade.

The J. B. Deamud Co. is showing some fine cyclamen plants in full bloom, which are meeting with a very satisfactory demand. Narcissus of good quality is also seen here in abundance. Other cut flowers, especially the carnations, show up well.

Heart-shaped violet hampers, imported direct from Japan, are shown at E. H. Hunt's. These are an offering for the Valentine day trade and are exceedingly attractive. Several advance orders have already been booked.

Chas. W. McKellar is showing a fine lot of gardenias, bouvardia, orchids and other seasonable novelties, as well as the regular stock. Cypripediums seem to be the leaders in the orchid world just now.

O. J. Friedman has brought suit against the New Theater Co. for $500 for flowers he declares he has furnished at different times at "the special instance and request of the corporation's agents."

Wietor Bros. will not go short on long-stemmed American Beauty, Bride, Uncle John, Richmond or Chatenay roses unless they are flooded with orders far in excess of anticipations.

Uncle John roses, which are of a beautiful shade of light pink, are a big crop with Peter Reinberg. Richmond and Liberty too are doing unusually well. Other roses, also, are in good crop.

The Benthey-Coatsworth Co. reports that ten times the number of Killarney roses could be sold could they be secured. Mr. Coatsworth spent some days at New Castle, Ind., last week.

Leonard Kill has been ill the past week, although with his usual pluck he has been at the store when able to leave the house. It is thought he has chronic appendicitis.

Bassett & Washburn are making a specialty of Easter lilies for the Christmas trade. Lilium giganteum is an especially attractive offering.

The A. L. Randall Co. has just received some Bohemian floral vases, also some Austrian ware, that will prove attractive to the trade.

Visitors: Harry Papworth, New Orleans, La.; Harry Bunyard, New York; W. Breitmeyer, Detroit, Mich.; A. J. Miller, La Porte, Ind.; Mrs. C. W. Pike, Racine, Wis.; C. F. Rice, of Rice Bros., Minneapolis, Minn.

PRICES HIGHER THAN LAST YEAR.

At this writing all is excitement and preparation for the great rush, at least all hope it will be great, and from the orders already booked by the storemen and commission houses it has every prospect of a record breaker. Prices, it would seem, are to be a shade higher than last year. One of the prominent houses quotes American Beauty roses for Christmas delivery at $1.25 each for 30-inch stems or over. With $15 per dozen there is scarcely anything in it for the retailer, as 25 per cent of rose buyers will hardly order them at cost. The best teas are to sell for 25 to 35 cents, with Liberty and Richmond from 35 to 60 cents. Carnations will sell for from $10 to $16 for the first selection. Violets $2 per 100. Wreaths of all kinds are to be seen in profusion. Statice seems to be much favored and on Monday, 17th, there was not a pound to be purchased anywhere, the wholesale supply houses being entirely sold out. Box is also in great demand, immense quantities being made into wreaths which are deservedly popular. The high prices of cut flowers is turning the store men to the larger profits in handling plants. There appears to be a lack of some of the popular flowering sorts, such as cyclamens, which this season are late in getting in. Several large stocks containing very choice plants will not be ready before January, a great disappointment to all concerned. Begonias are also not at all up to previous seasons' supplies and will be much missed.

NOTES.

The S. S. Pennock-Meehan Co. is handling immense quantities of Christmas greens, in fact all its lines are full to overflowing. This firm never was so busy. The Leo Niessen Co. says the same thing. Its Christmas stock, both in cut flowers and greens is away above last season, but the firm feels that the question will still be to get enough for the orders.

H. Bayersdorfer & Co. had a train load of goods come over direct from an European steamer in New York in bond last Saturday. The train consisted of five express cars, the first of its kind to enter the Reading terminal station Many of the goods were already sold and there was great activity in getting them started for their destination at once.

K.

Boston.

TRADE AND STOCK GOOD.

It is usual for business to be quite dull for a week or two just before Christmas, but this year is an exception, judging from the activity displayed the past week. There seems to be no end of social affairs, teas, receptions, debutante parties, etc., and all help the trade. The demand for funeral work has been very good also, but far exceeded by cut-flower purchases. The market is short, there being no surplus of note in any variety of stock. These conditions are due in part to the poor weather and partly to the growers holding their crops for the holidays. From present appearances, however, it is safe to say there will be ample stock found to go round at the right time. The rose market has been well filled, but the demand grew to such proportions towards the end of the week that it was found necessary to cut very closely, and then the supply was short. Roses seemed to be the greatest attraction, violets following. American Beauty, Richmond, Liberty and Killarney roses occupy first positions and all are exceptionally good, the first named being rather scarce; probably they will be quite scarce next week. Besides these roses there is an excellent stock of Morgan, Ames, Safrano and Bon Silene. Violets have been short, but the carnation market is in solid condition, Manley being most prominent, with a fair supply of Victory and other varieties. In chrysanthemums there is still quite a supply of white T Eaton on the market. The demand for orchids, gardenias and lily of the valley has been exceptional this season, and the supply, it is feared, will be very short. Among the most attractive flowering plants for the holidays are azaleas, especially Firefly, cyclamen and begonias. The green goods houses, whose holiday trade comes in advance of that of the florists, report their business as greatly increased and a record season is looked for. The markets are overflowing with Christmas trees, wreaths, holly and evergreens of all kinds.

124 Tremont Street. Boylston and Fairfield Streets.

BOSTON, MASS.

NOTES.

Upon the invitation of W. H. Elliott a party of the best known tradesmen and growers of the vicinity visited his establishment at Madbury, N. H., December 13. The party, of 23, under the personal guidance of their host, left here on the 1:15 p. m. train, arriving at their destination about 3 p. m. Here two hours were spent in a thorough inspection of this new establishment, which is one of the most complete in the state and wholly devoted to roses. The greatest attraction to the visitors were the Richmonds, from which stock this able grower has produced the beautiful roses which have attracted so much admiration this fall. Refreshments having been served, the start was made at 5 p. m. for home, which was reached shortly before 7 p. m., everybody being delighted with the trip.

Hugh Grant, a well known grower, who has been employed recently at Biddeford, Me., has returned to Boston totally disabled from physical troubles, for which he is undergoing treatment at a hospital.

The Christmas bells of box wood and red immortelles, which last year were so prominent, are not being displayed so largely this season, due principally to the amount of work involved in their making.

The failure is announced of the firm of Meller & Saunders, of Lowell, Mass., who have conducted a retail store, buying most of their stock in this market.

VALUES ABNORMALLY HIGH.

While values continue abnormally high there is not a great deal of business being done. Retailers are cutting their orders, not feeling desirous of taking many chances on high-priced stock, and this course is having some effect on the cleaning up problem. The best of the roses arriving are picked over and top prices for selected stock are several points above quotations. Bride roses are in good supply and sell well. Pink roses, however, are most in demand. Many of the Bridesmaid roses coming in show signs of having been held back. American Beauty is somewhat scarce in the best grades, and as far as can be learned, will be short for the holidays. The many dark days lately experienced have had their effect on roses, and American Beauty has particularly suffered. Richmond and Liberty roses both sell well, being seasonable in color. There are quite a few chrysanthemums still coming in. Chadwick sells very well, and the other varieties all seem to go off at remunerative prices. Bulbous stock is very prominent, and with roses high in price, is taken pretty freely. Paper White narcissus in supply just about equals the demand and with Roman hyacinths are pretty firm at $2.00 per 100. Carnations are getting stronger in value, and the offerings must be very inferior in quality not to bring a point or more beyond the minimum quotation. White Perfection and Alma Ward are coming in grand shape, and command high prices. Imperial, among the variegated sorts, is a novelty now appearing and it sells well. Enchantress is to be seen in fine condition and is as popular as ever. Lilies are advancing in price as the holidays approach and may go to the 20 cent mark before the week is out, as they are none too plentiful. Violets are in good supply with values not materially changed. Gardenias are rather scarce and bring as high as $1 each. A considerable advance is expected by the end of the week, and gardenias will probably go to $1.50. Poinsettias are in demand, but the supply is not as heavy as last year. Stevia is plentiful, but cleans up well. The demand for plants is heavier than ever, and it is not difficult to prophesy a record breaking Christmas trade. Azaleas are scarce, most of the establishments being cleaned out. Araucarias seem to be going well this season, and few, if any, will be left over anywhere.

The Market, December 19.—The market continues rather slow with arrivals somewhat increased.

NOTES.

John Pereboon, representing D. Nieuwenhuis & Sons, wholesale bulb growers of Lisse, Holland, arrived in New York last week, and has taken quarters with Maltus & Ware, 14 Stone street. He will introduce a new spirea called White Queen, said to be a cross between S. Japonica and S. astilboides floribunda. The foliage is dark green and plants are said to throw twice as many flowers as S. Japonica above the foliage.

Last Tuesday was a busy morning at the New York Cut Flower Exchange. The treasurer was handing out cheques for a 10 per cent dividend on the company stock. Only about three feet of space is left for sale on the floor. Late growers to locate there are Kaiser & Rittman, of Jersey City, N. J. The annual turkey raffle will be enjoyed by the stall holders and others, on Saturday, December 22.

A. C. Dacre, the Thirtieth street retailer, says that his order book is not suffering for lack of Christmas orders. He furnished a casket cover of violets, and several large pieces for the Schwab funeral last week. He also had two large dinner decorations during the week.

R. Dreyer, of Woodside, L. I., had a grand lot of azaleas for the holiday trade, but sold them out early. He has a fine stock of araucarias which is moving fast. Aspidistras are quite a specialty with him, one of his greenhouses showing a quantity of excellent plants.

The holiday business in retail circles began in earnest on Tuesday. Holly wreaths and laurel roping are to be seen everywhere. Princess pine is very scarce, due no doubt to the early snow and cold weather.

There appears to be a shortage in the supply of Christmas bells, immortelles and one or two other florists' staples. This speaks well for the Christmas trade.

W. H. Donohoe has opened a branch store for the holidays a few doors west of his store at Twenty-ninth street and Fifth avenue.

Ficus pandurata, the new rubber plant, may be seen in use as a window plant in many Fifth avenue dwellings.

Washington.

MARKET AND RETAILERS BUSY.

The business of the past week was eminently satisfactory, so good in fact that there came near being a scarcity of stock. With weddings, dinners, coming-out parties, and numerous smaller social events, there was a ready sale for all cut stock. With Christmas preparations to attend to and decorating for the social events at the same time, most of the retailers have had their hands full. Among roses there is plenty of American Beauty to supply all demands. Golden Gate and Ivory are also in fair supply, but Bride and Bridesmaid are none too plentiful. Although several local growers are sending in limited quantities of Killarney, the bulk of the stock of this rose comes from northern growers. Richmond is fairly plentiful and is taking the place among the reds that Killarney occupies with the pinks, that is the head of the table. Though some fine lots of carnations are coming in there is a decided scarcity, which will continue till the sun begins his northward journey. Poinsettias are early this year and are being cut into so heavily that it looks as though but few will be left for Christmas. There is a good supply of Paper White narcissus and considerable stevia on the market. As a bouquet green adiantum hybridum has all the run.

NOTEWORTHY DECORATIONS.

Congressman McKinnay, of Illinois, gave a dinner to the republican congressional committee at the Raleigh hotel on December 18. The table decoration was on a groundwork map of the United States. Richmond roses predominated. The unique feature was the G. O. P. elephant drawing the band wagon with chairman Sherman as driver. Speaker Cannon and the "boys" were represented as the jolly crowd in the wagon. Other features represented the capitol in a grove of evergreens seen from Pennsylvania avenue. These decorations were by Blackistone. Another decoration of note was by Small, at the Willard, December 16, when the gold medal of the national geographical society was presented to Lieut. Peary by President Roosevelt.

For the wedding of Miss Marie Barnes to Lieut. Mark Brooks, U. S. A., at St. John's church, December 12, a very handsome decoration was executed by George Shaffer, in which Richmond roses predominated. The bridal bouquet was of white roses and lily of the valley, while each of the seven bridesmaids carried a bouquet of Richmond rose.

The decorations for the first state dinner of the season at the White House on the night of December 13, were of more than usual attractiveness. The centerpiece was of Richmond roses, that rose, with variations of white carnations and settings of Adiantum Farleynse prevailing throughout the entire scheme.

For the wedding of Miss Saidee W. Luttrell to Albert H. Cousins, of Boston, at St. John's church, December 12, Cooke also executed a fine decoration. The bridal bouquet was a shower of lily of the valley, the maid of honor and each of the six bridesmaids having Killarney roses

At the home of solicitor general and Mrs. Henry M. Hoyt, for the marriage of their daughter, Miss Eleanor M. Hoyt, to Philip Hichborn, December 12, there was a very handsome decoration by Z. D. Blackistone, in which Killarney roses were freely used.

For a dinner given by John R. and Mrs. McLean, December 15, Geo. H Cooke executed an elaborate decoration in red and green, 700 poinsettias being used.

NOTES.

F. H. Kramer is showing good Bride and Bridesmaid roses and a great stock of Paper White narcissus. His store has a fine exhibit of Christmas wreaths and bells.

In addition to a good stock of cut flowers the Gude Brothers Co. has at its greenhouses a big stock of azaleas in full bloom.

A feature of H. Cooke's store at present is the fine stock of Adiantum Farleyense. S. E.

Pittsburg.

STOCK SHORT.

The usual scarcity of stock before a holiday is now being felt. The carnations coming in do not near supply the demand. Roses are not so scarce, but there is no trouble moving the good grades. American Beauty rose was never finer and is commanding good prices. Violets have shortened in supply. Few sweet peas, daisies, etc., are to be seen, but greens are plentiful. The wholesalers may be seen all around these days, securing Christmas orders and they state that they expect this Christmas to be exceptionally good. J.

CLINTON, ME.—Sam True, of Town House hill, has established a greenhouse.

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S. Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

VISITED NEW YORK.—J. L. Farquhar, Boston, Mass.

SEED corn growers report rather light business.

ONE of the Holland bulb salesmen has already reached New York.

A CHICAGO mail order house lists onion seed at about last year's prices.

THE deaths of Alfred F. Conard and James Vick are recorded in our obituary column.

VISITED CHICAGO: Chas. N. Page, Des Moines, Ia., and A. T. Ferrell, Saginaw, Mich.

NEW YORK.—T. Mellstrom, representing Sander & Son, St. Albans, Eng., sailed for Europe December 15.

THE lithographers' strike, which is still on, may prove very serious in the delay of some catalogue covers.

PEA prices of canners' sorts are stiffening and nearly all kinds are wanted. Some of the wrinkled kinds are short.

MILWAUKEE, WIS.—Chas. N. Page, Des Moines, Ia., was a visitor this week looking after the printing of his catalogue.

THE first general retail seed trade catalogue to reach us is that of the Denver, Colo., house of the Barteldes Seed Co.

THERE is some anxiety on the part of large potato houses, prices having a downward tendency with the bottom not yet in sight.

ONION SEEDS generally are giving poor germination tests and seedsmen will do well to test carefully now and again February 15.

NOTWITHSTANDING the short pro rata of onion seed deliveries from the west there seems to be a number of odd surplus lots disposable.

CALIFORNIA onion seed growers in advancing their contract prices say that poor crops for three recent years have made this course necessary.

ONION SETS are quoted about as follows for 32 pounds fair to choice: Whites, $1.75 to $2; reds and yellows, fair to choice, $1.40 to $1.60. There are none too many really fancy sets to be had.

LOS ANGELES, CAL., December 10.—Rains are reported from all parts of the state and the rush season for seedsmen and nurserymen is on. The season at this date is about one month earlier than usual.

MILFORD, CONN.—F. H. Woodruff & Sons have more traveling representatives on the road this year than ever before. Harold F. Woodruff has just returned from a six weeks' tour of New York state and Benj. Fenn is in the west.

THE stock of French immortelles imported this year proved hardly sufficient for the demand and is about exhausted both in Chicago and New York.

ROCKFORD, ILL.—The many friends of John T. Buckbee will be pleased to learn that he was mending as rapidly as can be expected, Wednesday of this week.

ONE of the Red river valley potato growers grew a crop averaging 125 bushels per acre for 200 acres. The cost of seed, growing and harvesting was $20 per acre, average selling price 40 cents per bushel, net profit $10,000. Talk of the poor farmer!

LOS ANGELES, CAL.—The Morris & Snow Seed Co. announce January 2 as the date of opening of their new seed store at 55 South Main street. O. M. Morris has had 23 years' experience in the seed business, having worked for Vaughan's Seed Store, Germain Seed & Plant Co. and Johnson & Musser Seed Co. M. C. Snow has served several years in the nursery business. The firm intend carrying complete lines of flower, plant, vegetable and tree seeds, also florists' supplies.

INDIANAPOLIS, IND.—The Indiana Horticultural Society at its closing session scored the free seed distribution, and advised congress to use the money now so expended in the collection and distribution to the various agricultural experimental stations and colleges, of rare and valuable seeds from all parts of the world. Other business had reference to a uniform packing law and appropriations for stamping out the San Jose scale. Professor Kinsey said he thought the time would come when fruit growers would have to pass an examination before being allowed to farm any land.

European Notes.

The English clover seed crop of 1906 has given good returns, and considering the heavy yield good prices are obtainable by the farmers on account of short continental crops.

German exporters of lily of the valley crowns report that the season just closing is one of the best on record for sales and next year's markets are expected to open with an advance in prices.

BEE.

Snow in California.

San Bernardino, Cal., November 24.—For the first time in 40 years, heavy snow has fallen throughout the desert region. In the mountains near this city the ground is covered to a depth of five feet. All traffic has been suspended and several mining camps are snowbound. The snow has fallen in low levels at the foot of hills, even reaching some of the orange groves. So far no damage has been reported.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points December 15 were as follows: New York, cucumbers, No. 1, $1.50 to $2.25 per dozen. Kansas City, cucumbers, $1.50 per dozen. Cincinnati, cucumbers, $1.25 per dozen; mushrooms, 40 cents to 50 cents per pound. Cleveland, cucumbers, $11.50 per box; mushrooms, 75 cents to 80 cents per pound; lettuce, 11½ cents to 12½ cents per pound. Chicago, cucumbers, 50 cents to $1.50 per dozen; radishes, 25 cents to 75 cents per dozen bunches. Buffalo, cucumbers, 75 cents to $1.25 per dozen. Boston, cucumbers, $6 to $8 per box.

As to Free Seeds.

While the seedsmen who attended the hearing before the house committee went away encouraged, it is doubtful if any results will follow their efforts at this session of congress. It has already been pointed out in these columns that the continued revelations of graft and grab-all in public lands, transportation and other lines of public service, has made the free seed humbug appear as an innocent pastime by comparison, in the eyes of many congressmen. Possibly they feel that for the enormous sums paid the railroads for carrying the mails they should carry something to in some measure earn the money.

S. E.

Milwaukee.

NEWS NOTES AND MARKET COMMENT.

Holton & Hunkel seem to have managed cleverly in growing themselves a large stock of such plants as their regular consignors are short of. We notice in their store several improvements for facilitating the filling of orders quickly and accurately, a series of order books, 14 in all, one for each half day of the year. They also have a rubber stamp for labeling the shipping tags of each of their regular customers. These cover a large board similar to the keyboard in a hotel. Several lady clerks have been added to their force.

The Florists' Club has just had its annual election, the new officers being as follows: John I. Heitman, president; Chas. Burmeister, vice-president; C. Dallwig, secretary; Nic Zweifel, treasurer; Chris Valom, trustee for three years. The members adorned the Olympic bowling alleys by their presence a few evenings ago, but when asked for the score Herman Hunkel was the only one who displayed any willingness to give it. The others hesitated like elderly young ladies when asked their age.

Clem Pollworth says the supply of potted plants is not as large as that of last season, and nothing like what there is in demand. Imported azaleas are about the average, but cyclamens and primroses have fallen off, even Emil Welke being short of cyclamens. Holly is overdone, Mr. Pollworth says, there being 15 cars of it here this week; quality averages well. Roses are scarce, particularly American Beauty.

An effort was made during the coming session of the state legislature to have the land inclosing Devils lake and the Dells of the Wisconsin river taken for a state park. A private corporation quietly manœuvering to get control of the water power is the influence working against it. It is astonishing sometimes how few dollars may be required to overcome reason, judgment and loyalty.

W. M. Roblee, president of the Fox River Fair association, is considering ways and means to stimulate a greater interest in horticulture. A meeting of those interested will likely take place at Appleton in the near future.

August Kellner has completed an addition to his greenhouses, almost doubling their capacity. He has considerable

landscape work in hand for the coming spring, which, from all appearance, will win more laurels for him.

The State Grange of Wisconsin has just passed resolutions demanding that agriculture be one of the daily courses in rural schools of the state.

Alexander Klokner has branched out in a manner that makes him comparatively indifferent about dark weather; he is growing mushrooms.

We welcome the introduction of California pepper branches for Christmas and hope that the sweet scented eucalyptus will soon follow.

C. B. W.

ST. JOHNSBURY, VT.—The trade of James Burns, owner of the St. Johnsbury greenhouses, for Thanksgiving was 50 per cent better than last year. Maud Dean and Black Hawk chrysanthemums were good sellers. Funeral work has been plentiful. A big crop of Enchantress carnation was in grand shape for the holiday and sold well.

The Nursery Trade

American Association of Nurserymen.
Orlando Harrison, Berlin, Md., President; J. W Hill, Des Moines, Ia., Vice-President; George C. Seager, Rochester N. Y., Sec'y.
Thirty-second annual convention, Detroit, Mich., June, 1907.

SAWDUST SMUDGE.—The Storrs & Harrison Co., Painesville, O., makes a sawdust smudge every Saturday night in winter in its cold storage house. This warms up the house and aids in the extermination of fungus.

ROSE HIAWATHA.—Elsewhere in this issue one of our European correspondents calls attention to the fact that this rose has now "caught on" with the English public and the stocks in the hands of the nurserymen are very low.

LOS ANGELES, CAL.—The delegation of Oregon and Washington nurserymen, on their way to the meeting of the Californian Nurserymen's Association at Hanford, were entertained here December 3 by the chamber of commerce. They afterwards visited the home of Luther Burbank.

WILKESBARRE, PA.—H. Manning, the famous Boston landscape architect, will probably furnish the plans for the proposed city parks system. In a letter written some time ago Mr. Manning refers to the favorable natural conditions surrounding Wilkesbarre, and the amount of mountain laurel, rhododendrons and other shrubbery already existing there and needing only transplanting.

HOBOKEN, N. J.—B. Franklin Lissauer, the city horticulturist and landscape architect, has returned from his trip to Rochester, N. Y., and other places whither he had gone to inspect trees, shrubs and fertilizers for use in the parks. He is to be congratulated on his narrow escape from a railroad wreck, the train on which he was travelling at night being brought up with a round turn just in time to avoid a derailed freight train near Albany, N. Y. He has secured options on a large number of trees at a low figure and is assured that he will have the support of the city council in his endeavors to improve the parks.

REFERRING to some recent literature, C. B. Smith says that seeds of most of the species of picea, pinus, larix, tsuga, sequoia, cryptomeria and cupressus the period of germination varied from 14 to 28 days and of Pinus strobus from 30 to 40 days after placing in the germination apparatus. The same writer states that many seeds that actually germinate in germination tests should be counted out, as the germs are too weak to produce plants. Seeds that showed 95 per cent germination in the laboratory showed but 35 per cent outdoors under unfavorable conditions. We are not told what these conditions were. Other seeds which showed 60 per cent in the laboratory showed but three per cent out of doors, showing that these laboratory tests are not indicative of the true value of the seeds for outdoor sowing. The seeds germinate more quickly and vigorously in light than in darkness.

The Saskatoon Nurseries.

Under the above title John Ashworth and J. H. Holmes have commenced operations at this rapidly growing town. In addition to 10,000 feet of glass, 40 acres of nursery land are to be planted, all kinds of forest and fruit trees suitable for that section of the country being included. The new concern hopes to supply the town with early cucumbers, tomatoes and vegetables generally, also to carry all popular lines in cut flowers, pot and bedding plants.

A house is being erected for the manager, Arthur Marriott, who has been on the site for two years and has made considerable progress in the culture and sale of produce there. Doubtless with his knowledge of local requirements and the increased facilities at his command a much greater success will attend his efforts. Excavation for the houses has begun and the iron roofing and a large Kroeschell steam boiler have been shipped from Chicago. The latter is built for 10,000 feet of 4-inch pipe. Altogether 60 acres are to be broken the coming spring, but the company has more land available as this becomes necessary for extension.

Minneapolis.

FUNERAL WORK PLENTIFUL.

Business is good, but there is nothing unusual to mention. Merchants are all absorbed in plans for taking care of the Christmas trade. Funeral work the past week has been very heavy, the Glass Block especially, putting out some very fine designs. With the exception of the charity ball last week, at which some of our leading florists distinguished themselves, society is rather quiet, so we may have a short space in which to catch our breath before Christmas. The recent dark weather has hurt the stock to a marked degree. Roses, especially Bride and Bridesmaid, are very poor, while carnations are decidedly scarce. Small stock, such as violets, lily of the valley, narcissi, etc., are not good, but they do not seem to be affected as much as the larger blooms. Green stuff is very good and is in great demand, a special call being made for the wild smilax, as this is used extensively for window decorations all over the city. Unless we have a few days of good warm sunshine, indications are that prices are going to reach the top-notch during the next two weeks. G. H.

Lexington, Mo.

The establishment of the late J. P. Coen was sold December 11 to D. W. Trine, of Dooley, Va. Mr. Trine is a capable man and for the past three years he has been managing a place in Dooley. He will carry on his new business on the same lines as its former owner, growing roses, carnations, chrysanthemums and miscellaneous bedding stock.

Mr. Trine saw the advertisement of this place in THE AMERICAN FLORIST and on his arrival found the place in the pink of condition owing to Mrs. Coen's hard and unceasing work since she was left alone by the death of her husband.

Mr. Trine has the best wishes of the Kansas City craft and it is hoped that he will enjoy the continuance of a successful business.

Utica, N. Y.

PROSPECTS GOOD.

From the early sales one would form an opinion that business would be better than ever this year for the holidays. Flowers and plants of good quality are coming into the market. With favorable weather the growers of carnations and roses expect an unsually heavy cut. As usual, the man who sells his cut from day to day is ahead of the man who handles pickled stock, as it has already been found that many of the blooms they expected to keep for Christmas have gone to sleep and the plants need a daily picking over.

Roses are plentiful, but a little below par in quality for our "Rose" city. They are selling from $2.00 to $4.00 per doz., American Beauty bringing from $10 to $20.

Violets are coming from Poughkeepsie in good shape and are selling at from $3.00 to $4.50 per 100.

Chrysanthemums of good quality are still on the market, selling at from $2.50 to $3.00 per doz.

Carnations are plentiful, some fancies selling for $2.00 per doz.

NOTES.

Donald MacLean, one of our older florists, who was reported very ill last week, is much improved and has the best wishes for continued health from the trade.

Some of the stores and greenhouses have a fine display of made-up pans and baskets.

BUD.

Albany, N. Y.

NOTES.

The local retailers report business very good with a notable scarcity of desirable stock.

Josiah Young, a well-known seedsman of Troy, has purchased the establishment and 18 acres of land owned by William H. Goodrich near Watervliet. The place has from 18,000 to 20,000 square feet of glass. The purchase also included the retail store on Broadway, Troy, conducted by Mr. Goodrich. It is said that Mr. Young will build a new range of houses on his place next spring.

Henkes Bros., growers, who have an establishment outside of Watervliet, are completing a new water tower of iron and concrete 10 feet in diameter and 80 feet high. The firm is also stocking a new house 22 x 100 feet with Lilium Harrisii and Lilium longiflorum for the Easter trade. The house is equipped with a new No. 4 Kroeschell boiler.

Reinhold W. Zobel, who succeeded John Dingwall, Garbrance lane, last spring, opened a new retail store December 15 at 518 Broadway. The site is near the railroad station and adjacent to a number of large retail stores.

R. D.

ELYRIA, O.—An explosion of dynamite cartridges, that were being prepared for blowing up tree stumps, destroyed a building at the Ohio Nursery & Supply Co.'s premises recently. Presumably the building caught fire at the roof, and sparks falling ignited the dynamite, this putting an end to the building and the fire's progress. This was fortunate as otherwise the adjoining buildings would probably have caught.

PEONIES.

From our large and select stock, such as the following varieties:

Prince Charles,	Philomile,
Mons. Boquil,	Lord Salisbury.
Leonie,	Festiva,
Duchess of Sutherland,	Hypatia,
Rosea maxima,	Mons. Rousselon,

Lynchburg, Va.

STOCK SCARCE.

Under the directions of superintendent Driner, of the city park, a fine range of houses has been built, to take the place of the present small ones. A new Kroeschell boiler has been installed to heat same, also heat the aviary and offices. The weather has been fine here for past few weeks and business has been very good. Chrysanthemums are about all used up and stock is somewhat scarce.

NOTES.

Harry Brown has been getting fine roses and chrysanthemums. His carnations were checked by wet weather, but they are coming out in better shape now.

A. Brosch has had narcussus in for some time, having planted a bench of them.

A. Frommelt has had good chrysanthemums and carnations.

LYNCHBURG.

Lenox, Mass.

The regular meeting of the Lenox Horticultural Society was held December 15, President F. Heeremans in the chair. Alex. Murray of Lenox was unanimously elected a member. We also decided to hold three exhibitions this year, viz.: Rose and strawberry show in June, annual and perennial show in August and the annual chrysanthemum show in October. All committees for 1907 were appointed, viz.: Employment, essay and entertainment, schedule and judges for plants and indoor flowers, herbaceous plants and outdoor flowers and vegetables.

THE NEW

Cyclopedia of American Horticulture.

BY PROFESSOR LIBERTY H. BAILEY.

Over 4,357 articles in all by 450 expert writers, including practically all the best botanists, nurserymen, seedsmen, florists, market gardeners and experimental station horticulturists. Occupying 2,100 pages and covering 24,434 plant names, 2,800 detailed illustrations, enormously increasing the ease of identification, and 146 beautiful full page illustrations.

Every reader of this paper who is interested in farming, in gardening, in trees, in shrubs, and all out of door matters, absolutely needs this set. It takes the place of all others combined on American gardening.

In Six Great Quarto Volumes of 2,100 Pages You Find:

Descriptions alphabetically arranged of all—over a thousand—of the native trees, plants and flowers worth cultivating, with keys enabling you to name any species, as well as to find all information regarding it. Practical articles by leading experts of the country on all phases of commercial plant production and greenhouse management—cut flowers, vegetables, etc.

Fullest cultural instructions for every flower, fruit and vegetable, tree and ornamental plant you may wish to grow.

SPECIAL OFFER.

The regular price is ***$30.00.*** For a few weeks we are able to offer this new and revised edition with the new material added at ***$22.80*** cash. This offer will be withdrawn January 1, and the price increased.

BUSINESS GOOD.

Thanksgiving trade was satisfactory and business has kept up to a surprising degree since. Several large social events have helped to swell the receipts of the dealers. P. R. Quinlan & Co. had the decorations for the reception which Judge Frank H. Hiscock gave to members of the bar of Onondaga county. There was a room of American Beauty roses, a room of white Chrysanthemums and another room of yellow chrysanthemums. The hall was decorated with Richmond roses and the big ball room with southern smilax and palms. P. R. Quinlan & Co. say that everything is in good shape for Christmas trade, which they expect will be large. A source of revenue for the retailers will be the charity ball New Year's eve at the Alhambra. A similar ball was held Thanksgiving eve, to which society turned out in large numbers.

NOTES.

E. J. Wheadon, a member of the firm of the Wheadons, stopped off here last week coming from Chicago. This firm had the decorations for the Elks' memorial at the Wieting. On the stage were palms, ferns and bay trees and a large scroll made of pink and white chrysanthemums and asparagus containing the words, "Our Absent Brothers." Around the neck of an elk's head was a wreath made of white carnations, pink roses and asparagus. The Wheadons also had the decorations for the masonic banquet, consisting of Araucaria excelsa, Boston ferns and poinsettias.

P. R. Quinlan & Co. have an interesting window display of poinsettias and Begonia Gloire de Lorraine. They are cutting a splendid stock of single violets from their greenhouses.

H. R. CARLTON. Willoughby, O.
INTRODUCER and ORIGINATOR.

MABELLE, New Pink Carnation for 1907

Color—A peculiar shade of lovely pink, with a faint yellowish cast; several shades lighter than the Lawson Unlike most pinks, the brightest sun does not injure the color. Size—3 to 4 inches in diameter when established. Odor—Pleasing, but not strong. Stems—Invariably strong, but always graceful, ranging from 12 to 30 inches during the season. Habit, etc.—A very quick, active grower, making specimen plants in a short time, even from late cuttings On account of its rapid growth, requires supporting very soon after benching. Gets away rapidly, blooms early and gives long stems right from the start. Productiveness—Prodigious is the best word we know of to use here. It is the most incessant bloomer, early and late, we have ever grown. Stock limited. Delivery January 5 to 10 and later. Price, $12.00 per 100, $100.00 per 1000.

Directory Department. **324 Dearborn Street, CHICAGO.**

Newport, R. I.

At the annual meeting of this society held December 11 there was a very large attendance of members. Much interest was shown in the proceedings, especially in the report of the officers and the election of new officers. President MacLellan was in the chair and the reports of the secretaries and treasurer showed the society to be in a very prosperous condition, financially and otherwise. The work of the past year compared favorably with that of the previous years. The officers-elect are as follows: Bruce Buturton, president; Samuel Speers, first vice president; James Robertson, second vice president; David McIntosh, recording secretary; Joseph Gibson, financial secretary; Col. A. K. McMahon, treasurer and Wm. F. Smith, sergeant-at-arms. Alex. MacLellan, Dr. A. J. Anderson, W. J. Matson, John T. Allan, Jas. J. Sullivan, Andrew Christensen, Stewart Ritchie, W. F. Smith and John W. Gibson are members of the executive committee and W. S. Sisson, Thos. B. Connolly and W. H. Young are the auditors.

D. M.

SURPLUS STOCK

In Excellent Condition.

NEW YEAR, the time of balls and parties, is now on the programme. What will you use to decorate the tables and homes of your customers with? Take my advice and use (for a change) an

Araucaria Compacta Robusta or a Glauca

(the size and kind I grow). You will be surprised at the effect that it will make on the table or wherever it is placed. The plants I have are as perfect as nature could produce. The brush of an artist could not paint them any better, and prices are cheap. Just look:

6 to 7 in. pots, 4, 5 to 6 years old, 4, 5 to 6 tiers, 25 to 30 in. high and wide, $1.50, $1.75, $2.00 to $2.50 each.

EXCELSA GLAUCA, 5 years old, 7-in. pots, specimen plants, 6 to 7 tiers, 30 to 35 in. high and wide (you never saw anything better in your life than these are), $2.00, $2.50 to $3.00 each; 6-in. pots, 3 years old, 3, 4 to 5 tiers, 16 to 20 in. high and wide, $1.00 to $1.25 each.

ARAUCARIA EXCELSA, 6-in. pots, 5, 6 to 7 tiers, 4 years old, 25 to 30 in. high, $1.00, $1.25 to $1.50.

KENTIA FORSTERIANA, 7-in. pots, made-up plants, 1 large size, about 45 to 48 in. high in the center, and 3 smaller sizes, 25 x 30 in. high around, which gives them a good appearance, $2.00 to $2.50 each; 6-in. pots, single plants, 36 to 45 in. high, 5 to 6 good leaves 4 years old, $1.25, $1.50 to $1.75 each; 6-in. pots, 32 to 36 in. high, 5 to 6 good leaves, 4 years old, $1.00 each; 5½ to 6 in. pots, 4 years old, 30 in. high, 5 good leaves, 4 years old, 75c.

DRACAENA BRUANTI, (imported), 30 in. high, full of green, waxy foliage from top to bottom; the only Dracaena for parlor, store or house culture, that can stand heat, dust and dirt; 6-in. pots, 50c, $5.00 per doz.

BOSTON FERNS, 7-in., very bushy, only 75c; 6-in., 50c or $5.00 per doz.; 5-in., 30c to 35c; 4-in., 20c

NEPHROLEPIS SCOTTII, 8-in., as big as a washtub, worth $3.00, now $1.50; 7-in., as big as a bushel basket, worth $1.50, now 75c to $1.00; 6-in., 50c; 5¼-in., 40c; 5-in., 30c to 35c; 4-in., 20c to 25c.

NEPHROLEPIS BARROWSII, 7 in. pots, as big as a bushel basket, 75c to $1.00 each; 6-in. pots, large, ready for 7-in., 50c; 5½-in., 40c; 5-in., 35c; 4-in., 25c.

MAIDENHAIR FERNS, 6-in. pots, 40c.

AZALEAS, in bloom and bud, Simon Mardner, double pink; Vervæneana double rose variegated; Deutsche Perle, double white, 75c, $1.00, $1.25 to $1.50 each.

CASH WITH ORDER. All plants must travel on **purchaser's risk only.**

When ordering, say whether the plants should be shipped in the pots or not.

HERE IS AN HONEST PROPOSITION

We have sufficient confidence in the Morehead Trap that we will send one on a 30 day's trial.

If it does not demonstrate in that time that it improves your heating system, that it saves money for you by decreasing fuel bills, and is the best return trap on the market, it will cost you nothing.

THE LOW PRICE HEATING PLANTS

The Chicago House Wrecking Co. is in position to offer you an interesting proposition for furnishing you with a heating plant at a saving of at least 30%. Send us a sketch of your houses with preferred location of the boiler, the points of compass and the desired night temperature for zero weather, and we will gladly submit you an exact detail quotation of all material required to install the plant. We have ***heaters*** and ***boilers*** of every kind, both new and rebuilt. We have always ou hand a large number of rebuilt boilers suitable for greenhouse heating. Our stock embraces ***fire box boilers, horizontal tubular boilers, Kroeschell boilers, cast iron sectional boilers, Erie City economizers*** and other types

We can save you considerable money on ***pipe, valves*** and ***fittings;*** also on ***doors, glass, sash*** and everything needed in the construction of your buildings.

SUGGESTIONS FOR FLORISTS.

After Christmas.

It will pay you well now to make a few notes regarding the business you have done at Christmas. Put down the exact amount of holly, evergreen, wreathing, laurel and other greens used; you will then know what to order for the next season. It is an easy matter now to recall to your mind what has been used, and you surely will forget in a few months. You may have had occasion to telephone or telegraph at the last minute for certain plants of which you were sold out, or had a surplus of others. Mark down as near as you can the number of different varieties of flowering and foliage plants you have used, how many Roman hyacinths, lily of the valley and Paper White narcissi you have forced, how many poinsettias you grew and how many were sold. The same with roses, carnations and other cut flowers. It will only take you a few minutes to mark this all down. Should you have used an extra order or delivery book, such as I spoke of in my notes of December 8, put your notes all in it. This book will be a great help to you next season preparing your stock and will enable you to fill an order accurately which some customer wishes to have duplicated, as is often the case with holly and other greens.

Dracaena Terminalis.

I believe there have been more plants of this beautiful dracæna used this year than ever before. And few plants are more useful for Christmas, either as a single specimen or in plant arrangements of baskets, than D. terminalis, on account of its beautiful red colored foliage, as anything red, be it flowers, foliage, or berries, is in demand for Christmas. Should you wish to propagate this plant, you ought to do so now in order to have salable stock for next Christmas. Buy some of the imported canes, cut them up into 2-inch lengths; lay them rather closely on the sand bed, and cover so that after the first watering one can just see the pieces of cane. Maintain not less than 75° bottom heat, even a little higher if convenient, keep the sand moist, and in about 35 days you will be able to remove nice strong shoots. If you lay your pieces of cane in rows two inches apart you will have room enough between the rows to root these young shoots, which can be done nicely in about 14 days with 72° to 75° of bottom heat. Should you have old plants such as are not salable on account of the long naked stems, cut the top off; it will easily root in the sand bed. Cut the stems off about three inches above the root neck and treat as above described for canes. The old plant will in time break into growth again. A more expeditious plan is to cut most of the roots away and stick the plants in the propagating bench. D. terminalis thrives best in a sandy loam. Don't give it too much shade in summer. Syringing is necessary to produce nice large leaves and the plant gets along with less heat than D. fragrans, 58° to 60° in winter being about right.

Stevia.

This old standby has been grown for so many years and is so well known that it would hardly seem necessary to write about it, and yet there are a good many florists who have plenty of room to grow at least three or four dozen plants which would bring them good returns, and still they buy the cut sprays at 50 to 75 cents per bunch in the market year after year. We haven't a customer who does not ask for some sort of green or foliage to be sent along with an order of cut roses or carnations, and it is a pleasant change to use a few sprays of stevia in December and January from the usual wood fern and asparagus which the customer finds in the box through the remainder of the season. To work up a stock of stevia for next Christmas, the old plants should be cut back now to about four or five inches above the pot. Keep them in a cool house. Start to propagate from the new growth which the plants will make about April. You can either grow them in pots in summer, which

will of course require faithful watering, or you can plant the young 2½-inch stock in the field, and pot up in 6-inch to 8-inch pots in September. Keep the plants pinched back during the summer so as not to produce tall and weakly growth. Move to a cool house before frost and keep them in a temperature of about 45° at night if you wish to cut good sprays at Christmas. Later they will bloom more quickly in a higher temperature, but around the holidays is the time you want them most.

Geraniums.

Don't let your fall propagated stock suffer in small pots. Give them a shift into 3-inch or 3½-inch sizes. Pot firmly and use rather heavy soil. You can get a good cutting of most of those plants in about three weeks, but don't sacrifice the whole plant to get a cutting. Give the plants which are not large enough to allow of removing a cutting, a couple more weeks, or if you wish them to make branches, pinch out the top of the young plants. Should you be short of young plants, take such old stock plants as you may have and plant them out in benches in a carnation house temperature. The unexpected heavy frost last October caught a number of us unawares. The tops of our entire stock was killed in the field. We lifted the plants the following morning, planted them in benches inside, and are now taking the second crop of cuttings from them. Should you be short of stock plants, this is a good time to look around for good 2½-inch stock. The sooner you buy the better.

Stock Plants.

You can't expect good results from cuttings taken from stock that you have in some dark corner of your house, or under some bench. Give the stock plants sun and light. Some of them will need larger pots in order to do well. If your heliotropes, salvias or petunias have a long straggly growth, prune them into shape. They will be better for it, and in a short time the plants will give you a lot of cuttings. Should your salvias or heliotropes have a sickly yellow growth, give them a higher temperature and less water, for a low temperature and sodden soil is death to them. Coleus stock plants don't want to be in a moist atmosphere should you want to keep the mealy bug down.

Poinsettias.

Let me remind you that your stock plants of this Christmas plant should be kept in a dry, warm place. Use pot grown plants if at all possible; lay the pots on their sides and if you have them under a bench, don't allow any water to drip on them. There is nothing further to be done to the plants now. Let them rest until the time to repot next May.

TRENTON, N. J.—The thirty-second annual meeting of the New Jersey State Horticultural Society will be held here January 3 and 4.

BENTON, PA.—Harvey Ash has secured four lots here and intends using them for growing various vegetable plants. A greenhouse 40x60 feet is being erected.

CHRYSANTHEMUMS

Outdoor Culture in California.

The chrysanthemum is one of the comparatively few things that do really well out doors in the San Joaquin valley and give satisfaction for the labor and care expended upon them, for with no rain from early in May until September and possibly later, and with the mercury touching the 100° mark, and very often higher for days together during the summer months, many flowers that prove satisfactory even in other parts of California, wilt and wither away with us. There are a number of excellent books in print describing methods of culture for the chrysanthemum, but up to the present I have not found one that is of much practical value for California, or at least central California, and the man who attempts to grow fine chrysanthemums must experiment for himself till he finds the methods that suit the existing conditions of soil and climate in his particular locality.

I take cuttings about the end of February, which is early enough, for if taken earlier lanky plants result. As soon as they are well rooted I put them into 3-inch pots and allow them to remain there as long as posible without becoming potbound. They are then planted in rows in their permanent positions, about 18 inches apart, leaving sufficient space between the rows to give the necessary attention. The soil is sandy here and needs a liberal supply of cow manure which must be quite rotton, or it will burn the roots of the plants as soon as the hot weather commences. The wire fence method is best for tying them. When about one foot high they are stopped and never more than three stems allowed to grow. Most writers particularly warn growers against over-watering, but with us the difficulty is to be sure that every plant gets sufficient moisture, especially down at the lowest roots. In August it is advisable to give a light top dressing of rotten manure and towards August 25 buds will commence to appear on certain varieties. This season there came a cool week about August 20 and I secured buds on Wm. Duckham and F. S. Vallis, and obtained the finest flowers from those particular buds, but it is best not to take buds of the majority of varieties before September 1.

W. Wells, the well known English grower, gives instructions in his book on timing the flowers, but although I have tried it here I did not see that it made any difference. Such varieties as F. S. Vallis, Wm. Duckham, Timothy Eaton, Col. Appleton, Nellie Pockett, etc., do well but a good many varieties prove worthless with us although having a great reputation elsewhere. We need sturdy growing sorts and colors that do not fade badly in the sun. We have no pests to speak of, although the green lady-bird eats the petals of the flowers if not watched closely. From what I can learn, the climate of the San Joaquin valley closely resembles that of Australia and I see no reason why we should not produce new varieties equal in every way to those brought out in that country.

Cut Blooms For Various Purposes.

ED. AMERICAN FLORIST:—

Referring to the very interesting discussion in your columns, between Fred Lemon and Elmer D. Smith, in the articles, as above, I may say I am neither an importer of new varieties nor a hybridizer and introducer, but I am one of those who are constantly looking for the very best commercial varieties to grow for the wholesale and retail market, and I am naturally interested in any question bearing on that subject. I have followed the above discussion with great interest, and I will give my opinion as one of the hundreds of small commercial florists who are watching these varieties as they are introduced.

I agree with Mr. Smith that the introduction and recommending of so large a number of new varieties every year is a waste of both money and time, and

very disappointing to those who freely invest in them. I think also, it would be a good thing if the importers and introducers of these new French, English and Australian varieties would grow them and try them thoroughly for two or three years and get them acclimatized before sending them out for others to buy. Of course, I realize that it would take a lot of space, time and money to have one, two and three years' importations growing at one time, but by doing it the general trade and all the other smaller florists would be better protected from buying a lot of comparatively worthless varieties, only to discard them again in a year or two. Even if the introducers charged a little more for varieties thus tried, it would be more satisfaction to buy one or two really good ones than to buy a dozen or more, most of which would be dropped the next year. I realize that it would take probably several scores of new ones to get those one or two good ones, and I question if it would be a very profitable business for the importers, but it would certainly be a benefit to all the rest of us. In reference to the C. S. A. certificate, I do not take it for granted that a variety is especially good because it gets that, or scores high one season, but let it get the high score two or three years in succession and where it is possible let some of the judges see it at the greenhouses and there get a few ideas as to its commercial value and take that into consideration at the final scoring.

I think the chief reason why the French varieties scored so high and received the majority of certificates was because there were not many American grown varieties submitted to the principal committees and that was possibly also the reason why all the seedling prizes at the Chicago show were won by French varieties. I was there and saw all the varieties that took first prizes and I was not over impressed with them as to their commercial value. I doubt if I shall ever invest in any one of them. Why do not our American hybridists put some American grown varieties up and beat those French varieties they are talking so much about and criticising? Where was Dorner's, and Nathan Smith's latest and newest productions, if they have got the commercial varieties of American origin which are better than the French imported ones? Why do not they put them up? We would all like to see them and have a chance to compare them, and then we would better know where to invest our money. I have faithfully tried a few imported and a few home grown novelties every year and I think that if Mr. Lemon, as Mr. Smith says, can count all the French varieties which produce good flowers from late buds on the fingers of his two hands, then Mr. Smith can count on the fingers of one hand all the good commercial varieties he has sent out during the last five or six years that are still good. At least that is my experience with them and I think altogether it is a very unsatisfactory task to supply the market growers with new varieties. Sometimes, of course, it is the grower's fault if a variety does not make good, but often it is the variety that is responsible for the failure and it is in chrysanthemums, as in carnations, roses and other novelties, one must keep buying until the best are found.

GUNNAR TEILMANN.

Another Opinion.

Referring to the very interesting articles from Elmer D. Smith and Fred Lemon on the commercial value of American raised varieties and importations from foreign sources:—The illustration accompanying Mr. Smith's first article, while being a good comparison, shows, in my opinion, the very limit of extremes in both cases. The foreign variety with such a long neck is, I know, useless for commercial purposes, but on the other hand, I have also found that, for shipping and handling, a little longer neck on some American varieties would be an advantage. In summing up the cause of so many foreign varieties being discarded so quickly, I think the principal objection is on account of the colors. A very large percentage of importations are either pink, or red, or yellow, with red and bronze shadings, and we all know that, for commercial purposes, these colors can only be used in small quantities compared to white and yellow.

It is only a few years ago when a satisfactory pink chrysanthemum for any purpose was hard to find, but with the coming of Mlle. Marie Liger, Mrs. Coombes, Wm. Duckham, Mrs. Barkley and Dr. Enguehard, it seems like a deluge of pink. The same can be said of the red and bronze varieties. Most of these produce fine large flowers and are good growers, but owing to the limited use which they can be put to a very few quickly developes into a surplus. The foreign kinds almost without exception require to be more closely studied to bring them to perfection, but my experience has been that it will pay, especially if care is taken in the selection of the colors. The other day several vases of Mlle. Jeanne Nonin came under my notice in New York, but they were very poor excuses for this fine variety as I have seen it; when well done this sort will pay as well as any late white chrysanthemum.

There are, in my opinion, too many varieties imported of the same color, too much reliance placed on catalogue descriptions and, in most cases with new varieties, only a few are purchased. In a great many instances these are lost sight of during spring rushes of other important work, consequently they do not get the proper treatment or a fit place; they fail to come up to expectations and are thrown out. There are some varieties of foreign origin, not mentioned in Mr. Smith's or Mr. Lemon's articles, which have proved themselves to be money makers, notably Guy Hamilton, Cheltoni, and Nellie Pockett. These may suffer when they have to be handled in large markets, but for the best trade, when well grown, they sell readily, especially where the customer is catered to direct. C. W. JOHNSON.

CHRYSANTHEMUMS OUTDOORS IN CALIFORNIA.
Timothy Eaton.

To Be Done Now.

IN THE GREENHOUSES.

Keep the stock of pelargoniums for flowering in May and June well up to the light and water only moderately.

Remove all dry and dead leaves from the lower part of the carnation plants and keep the top soil sweet.

Prepare all hardy shrubs and plants for forcing by a few weeks sojourn in quite a cool house.

Improve the strain of your plants by selecting the best habited specimens for propagation, either by seeds or cuttings.

Dried blood is an excellent fertilizer, much used and highly spoken of by large growers of pot plants.

Cleanliness is godliness in the propagating houses and without it a good start in life for young plants is impossible.

A few pips of lily of the valley in 5-inch pots make very pretty plants, that are a nice change from those more generally grown.

Hydrangeas that have started may

have the temperature slightly raised now. Make no rapid changes however.

Where there is a large call for pansies begin seed sowing at once, in order to have good plants in succession.

IN THE STORE.

Phoenix Roebelenii is a hardier palm than Cocos Weddelliana, a better shipper and equally light and graceful.

Clear out all old Christmas stock of holly and greens and have a clean store and start for the coming trade.

A little ribbon is all right but the flowers and plants are the thing in a florist's store.

Show your best stock of all kinds, whether cut flowers or plants. It is the best goods that attracts attention.

Whenever possible harden all plants a little before showing them in the window. This will improve their lasting qualities.

Green foliage and edging plants look better, in the birch twig baskets, than those with colored leaves, like marantas and panicums.

The green Roman ware is excellent for selling plants in, the dull color showing their brighter tints to advantage.

Adiantum Farleyense is a good filler, even in small plants, its somewhat flat fronds making the most of themselves in this way.

Don't make more display than is necessary with the tools of the trade and toothpicks, wire and moss.

OUTDOORS.

Where you have room, in cellar or shed, untie all bundles of plants such as roses and shrubs before bedding them in sand or soil. This will then reach all the roots.

Keep a fire going for burning up all refuse; the charred ash is a valuable material for many purposes if collected and kept dry.

Really well developed plants for forcing, of the shrubbery order, are better for a good freezing before hand. It is the weak and unripened wood that suffers.

Loose litter is a better protection to Lilium candidum and plants that carry green leaves through the winter, than anything else. It shades the plants on bright mornings following severe frosts.

It is wrong to pick out all the straw litter when preparing mushroom manure, as a little helps to retain the heat when the beds are made up.

Most of the trouble, in reference to soils working badly in spring, is caused by treading on and handling them when wet.

Spireas, lilacs and any really hardy shrubs, may be lifted for forcing even if the ground is a little frozen.

Carefully protect specimen conifers and other trees from ground game and animals generally when there is snow on the ground.

NEWFANE, N. Y.—William Glenwood is building a greenhouse in the rear of his store.

TALLAPOOSA, GA.—Mayor Sheppard is constructing a fine greenhouse at his beautiful home on Bowden street.

PONTIAC, MICH.—The people here are wondering why A. B. Lewis christened a new yellow and white chrysanthemum Cassie Chadwick.

WITH THE GROWERS

C. K. Hoffmeyer, Carnegie, Pa.

One of the oldest growers in the Pittsburg district is C. K. Hoffmeyer of Carnegie. Coming to this country from Germany, he immediately started to put up glass. At first this was given over mostly to vegetables and bedding plants, but later cut flowers only for the Pittsburg wholesale market were grown. The place consists of ten modern houses, nearly all containing carnations. Some success was met with in Harrisii lilies, and some very fine Kaiserin roses have been cut during the past few years, but now Mr. Hoffmeyer devotes most all his time to carnations. He always relies on his own plants and always has the finest flowers on the market. Enchantress, Lawson, Harlowarden and Lady Bountiful are preferred. During the summer months much attention is given to asters and fruit.

Carnation Exhibition in London.

Since the inauguration of the British Winter-flowering Carnation Society in May last, there has been much speculation amongst growers as to what the first exhibition would be like. When the society was formed its title was a debatable point, some advocating the prefix "winter-flowering," others "perpetual flowering." The former was selected, as the object of the society is to foster the carnation as a winter-flowering subject. Unfortunately a prefix was a necessity, as we already have the National Carnation Society which devotes its attention solely to border varieties. On no account could its members—florists of the old school—be induced to take the "new-fangled flowers from America," as they termed them, under their wing. They even looked askance on all efforts made to introduce them to popular favor.

ESTABLISHMENT OF C. K. HOFFMEYER, CARNEGIE, PA.

However, the new society was duly launched and on December 4 held its first exhibition in the Royal Botanic Gardens, London. It proved a complete success, surpassing the anticipations of its promoters. The long corridor of the Royal Botanic Garden conservatories never presented a more gay and cheerful appearance than on this occasion with its tables of carnations on each side from end to end and extending to the palm houses beyond. It was indeed a brilliant spectacle such as we have never before witnessed at a December exhibition. Considerable interest centered in the exhibits not only by the growers, who are rapidly increasing in numbers, but also by the general public.

Three new varieties were placed before the floral committee and first-class certificates were voted to two of them, namely, Britannia and Mrs. H. Burnett. Britannia was exhibited by A. Smith, Enfield Highway. The flowers are very large, of good form, brilliant scarlet, the calyx faultless, and they are borne on erect, stout stems. Unfortunately the flowers have little or no fragrance, but in every other respect it is an ideal variety and sure to be in great demand. Mrs. H. Burnett was exhibited by H. Burnett, St. Margaret's Vineries, Guernsey. The flowers are of good size and form, fragrant and of a rich shade of pink, valuable for bouquets and decorative work, a charming flower in every way.

In the chief class for collections of carnations, the blue ribbon of the exhibition was awarded to C. F. Waters, Balcombs, Sussex, S. Mortimer, Farnham, Surrey, running him very hard for the coveted honor. Enchantress, Harlowarden, Mrs. Patten, President, Lady Bountiful, Robert Craig, Nelson Fisher, etc., were very meritorious in the collections. In the class for whites A. F. Dutton was first with Dutton's Improved White Lawson, a variety which originated in his nurseries and a decided advance on White Lawson as imported from America. In the class for blush or light pink Mrs. H. Burnett beat all comers, Enchantress taking second and third prizes, and in scarlets Britannia was invincible.

Non-competitive exhibits of carnations, cut blooms and plants, from several leading growers, added greatly to the effect and interest of the display and awards were made as follows: A. Smith, gold medal; H. Burnett, gold medal; W. Culbush & Sons, large silver gilt medal; Hugh Low & Co., large silver gilt medal; A. F. Dutton, silver gilt medal; Bell and Sheldon, silver medal.

In the evening a conference of trade-

growers of carnations was held and various items connected with the introduction and sale of new varieties freely discussed. Arrangements are now in hand for a second exhibition to be held in March, 1907.

BEE.

Coccolobas.

Although a fairly large genus numerically, not many of the coccolobas are at all well known as cultivated plants, the species figured being an old one introduced to cultivation many years ago from the West Indies, yet even now very little grown. Perhaps the best known kind is C. uvifera, the West Indian seaside grape, a plant which grows naturally on the shores of the West Indian islands, in an apparently sterile mixture of sea sand and shells. This produces bunches of white fragrant flowers, followed by more or less edible fruits.

C. pubescens, as will be seen by the illustration, is a plant with attractive foliage, green above and white beneath and downy as the specific name indicates. Propagation is effected by cuttings of the semi-ripened shoots, taken at a joint with the leaf kept entire, the cuttings being either placed singly close to the edge in small pots of sand, or on the propagating bench. Keep moist and warm until well rooted and grow the plants on in a moist atmosphere. C. platyclada, the well known old tapeworm plant, does not really belong to this genus at all according to modern botanists, but to muehlenbeckia.

Twenty Years Ago.

Floral umbrellas were fashionable.

The first flower show in Kansas was held at Topeka.

Marshall P. Wilder died December 16 at the ripe age of eighty-eight.

There were kicks coming to the Horticultural Society from the New York Florists, for selling flowers at their shows.

The American Beauty was becoming very popular in the New York market.

Araucaria excelsa in 4 and 5 inch pots sold readily at $4 and $5 each in California.

E. G. Hill was recommending florists to raise their rose cuttings in sunny light positions rather than shady dark ones.

Linseed oil and sugar of lead were recommended as a shading material for greenhouses.

The sale of cheap packets of seeds by the department stores was beginning.

Kerosene emulsion prepared from milk and kerosene was recommended for killing scale insects.

The lemon scented gum tree Eucalyptus citriodora was beginning to be known.

Nymphæa odorata rosea was recommended as a beautiful aquatic.

Poinsettias, Jerusalem cherries and ardisias were favorites for Christmas decoration.

Gorgeous was a favorite chrysanthemum. Have we a better yellow for color today?

The John A. Salzer Seed Co. was originated at La Crosse, Wis.

Long stemmed roses were coming into fashion showing the good taste of the American public.

The excellent qualities of the free blooming and showy Cattleya Trianæ were already well known.

White Baroness, Her Majesty and Merveille de Lyon were among the new roses.

The swindling seed traveler, with his high priced seeds and promises to buy resulting crops, was busy at Rochester, N. Y.

A wreath of Russian violets fastened with black pansies was noted as a superb funeral device.

Roses were quite out of style for wedding bouquets in New York. Orchids, gardenias and bouvardias were the rage.

W. S. Kimball grew 135 kinds of cypripediums alone in his famous collection of orchids.

The double zinnias were being greatly improved and advancing rapidly in public favor.

Foliage bouquets composed of ferns, asparagus, lycopodiums and other greens were fashionable as opera bouquets.

The staking nuisance was condemned by writers in THE AMERICAN FLORIST, a glaring example of 50 stakes in a 10-inch pot, and a plant only two feet high being noted.

Wedding boutonnieres were made very large. Camellias, two or three gardenias, 100 violets or six to ten lily of the valley spread fanwise were not at all uncommon.

Those lovely Japanese anemone flowered chrysanthemums, Fabias de Maderanaz, Soeur Dorothee Souille and Madame Cabrol were new and rare. Where are they now?

The Calendar flower bed, in which 3,000 odd plants had to be taken up and reset daily, was one of the features of the bedding in the South Chicago parks.

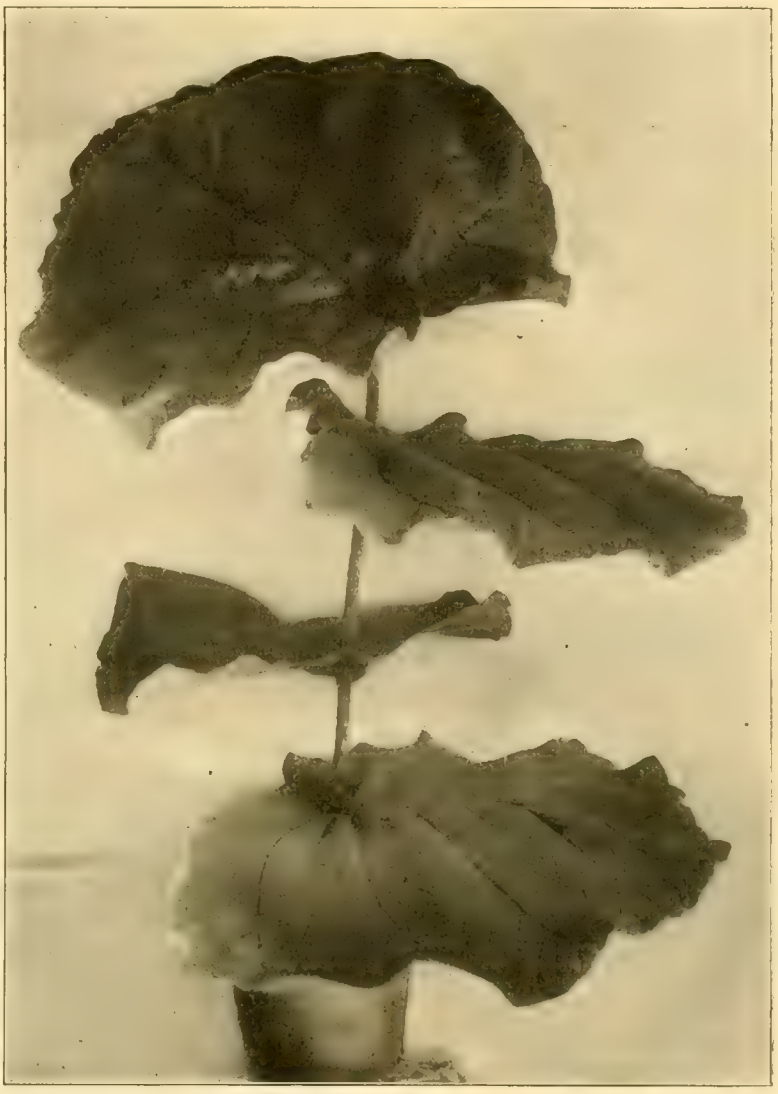
One of the finest orchid cuts to date, that of Cyripedium Morganæ, was published in THE AMERICAN FLORIST.

An enterprising New York florist was expecting to bring in a crop of chrysanthemums to flower at Easter.

John Thorpe entertained members of the Chinese embassy at his home at Queens, receiving in return for his hospitality some very beautiful embroidery pictures of flowers and birds on white satin.

Three telegraph poles, with a broken wire hanging to the base, and on the other side 30, meaning goodnight, was one of the devices used at the funeral of a telegraph operator in Washington.

It was resolved: "that the cultivation of, and the traffic in, the chrysanthemum



COCCOLOBA PUBESCENS AT THE PHILADELPHIA SHOW.

See issue of November 17, page 794.

is on the whole unprofitable to both grower and dealer" by the Philadelphia Florists' Club. John Westcott took the affirmative side of the discussion and Edwin Lonsdale the negative.

THE RETAIL TRADE

New York Florists' Windows.

The dull and rainy weather of the three days preceding Christmas week made any attempts at lavish window display fruitless, as steamed windows very generally handicapped work in this direction. On Sunday, however, many of the prominent retailers made handsome displays. Orchids seemed to find most favor and were seen more than at any time before. Ficus pandurata made its initial appearance as a decorative plant, and bedecked with wide crimson ribbon was shown to advantage. Araucarias were quite popular and were on view in a variety of trimmings, a style with narrow ribbon and small Christmas bells perhaps mostly prevailing. Oranges were not seen to the same extent as formerly, while azaleas were used everywhere. Most windows were dressed in a heavy style, and the absence of cut flowers was very noticeable. Plants seemed to be relied upon for effect in nearly every establishment. Skimmia Japonica was very prominent at Siebrecht's and could be seen side by side with Ardisia crenulata.

Charles Thorley presented a change of window display daily, and the showings were fine. On Friday he had a window full of ardisias in a tier of rows banked solidly, all in baskets, and decked with crimson ribbons. On Saturday he had a grand show of cattleyas, growing plants in orchid baskets, ribboned to match and many suspended with ribbon. The Fifth avenue store on Sunday also had a window of cattleyas and cypripediums, well-flowered plants, with ribbons to match the flowers.

Geo. M. Stumpp had a very fine window. Ficus pandurata, large specimen plants, were used for a background, and contrasted splendidly with a solid display of panned poinsettias in the foreground.

J. M. Hodgson made a good display with araucarias decorated with crimson ribbon and small red bells, with a hamper or two, and an array of miniature Japanese gardens.

Alex. McConnell had a window of oranges, with rods reaching from top to bottom of the window carrying vases filled with fruited orange sprays.

The Fleischman Floral Co., which is quite original in its styles of window dressing, at its Fifth avenue store had a show of ten shrubs in square boxes. On each shrub was a large rosy apple of a quality seldom seen outside of an exhibition. An electric fan in the rear of the window kept the foliage in constant motion, making a rather weird effect.

Thos. Young, Jr., had a fine show of orchids in the window of his Fifth avenue store, and with a few made-up baskets a pleasing effect was obtained.

Wadley & Smythe had a window of cattleya plants in orchid baskets. Ribbon hid the boxes and was also used to suspend the plants. Camellias, small oranges and Adiantum Farleyense made up the foreground.

Siebrecht & Son made up a handsome window with fancy baskets of cattleyas, cypripediums and dendrobiums, with camellias and Adiantum Farleyense to make a contrast.

At Scallen's in the Imperial Hotel building was to be seen a window made up of small baskets of ardisias and Adiantum Farleyense, arranged in alternate order. Above were strings of roping enlivened with Christmas bells in various sizes.

Myer, at Fifty-eighth street and Madison avenue, had a fine window of Gloire de Lorraine and Turnford Hall begonias, many in fancy baskets which were dressed on both sides, the rear showing a plant combination. A supporting column in the window carried princess pine roping arranged spirally with Christmas bells at intervals.

Hanft Bros. made a display of filled hambers and baskets, in a variety of combinations.

A. Warendorff at his Broadway store used his window mainly to show basket specialties, and made daily, and at times hourly changes. Anything unusual or out of season grown for the market could be seen there. Cut flowers in baskets provided with water holders were prominent and a card informed those interested that the combinations were delivered as seen.

J. H. Small & Sons used plant combinations in baskets and hampers very largely for their window displays. One or two baskets in which were centered magnificent specimens of Begonia Gloire de Lorraine attracted much attention.

Retail Holiday Trade in Chicago.

A brief visit to some of the principal retailers reveals the fact that the busiest time in some of the down town stores is just before the holidays, while other retailers have time to rest on their oars a little preparatory to the holiday rush. Perhaps the most pleasing and satisfactory point about the retail trade this year is the excellent and varied supply of Christmas plants. Not so many years ago there was great difficulty in obtaining sufficient variety in this line, but now there is abundance of good material in great variety, and at a price within the reach of all.

It is difficult to particularize among such a wealth of good things, but for really elegant decorative plants, the beautiful ardisias, that are coming from eastern growers, must be awarded the palm. Necessarily these are high in price in comparison with other stock on the market, but their lasting qualities and their bright telling appearance make them easily worth the money. At the time of writing, cut stock is high in price and difficult to obtain. Some retailers are saying hard things of the growers, claiming they are keeping stock back with a view to obtaining big prices. But possibly these do not in all cases consider the heavy demand recently made for Thanksgiving orders and the unusually dull weather recently experienced. It is so easy to blame the "other fellow" in circumstances like these.

But if good cut stock is scarce, artificial and everlasting flowers and all kinds of devices for aiding the florist to display his goods to advantage are plentiful enough. The green Roman ware is a fine idea; its dull tone and absence of any color that can clash with the plants used being all in its favor. Birch bark baskets, canoes and other devices are very pleasing and the birch twig baskets are also pretty when judiciously filled. The later shipments of holly are fine in color and well berried, looking like keeping well into the new year. The custom of using ribbon on plants is increasing and has reached a point where there is more than a little danger of overdoing the thing. A few bits of scarlet ribbon are very pretty, but when we see quite small plants of araucaria with a dozen or more bows of ribbon, one to each tiny branch, the effect is anything but good. We have no desire to teach florists their business and they should be the best judges of the public tastes, but from an artistic point of view we certainly protest against this over-display of ribbon.

J. Muir, Forty-seventh street and Grand boulevard, and 3539 Michigan avenue, has fine window displays in both places. Poinsettias, fine in color and thinly and artistically arranged, healthy looking araucarias, azaleas in full flower, and the showy Begonia Gloire de Lorraine helps the display. The ardi-

J. W. WOLFSKILL'S NEW STORE, LOS ANGELES, CAL.
An exterior view.

sias at the Michigan avenue store were certainly the finest we have seen anywhere, ranging from quite small to large plants, all finely berried, 16 to 20 bunches being counted on many of the plants. These are shown in baskets and in Roman ware vases and have a very good effect, in the latter especially. Cibotiums and an exceptionally choice showing of palms, consisting of kentias, Areca lutescens, the graceful Phoenix Roebelenii and others were also noted

W. J. Smythe, 259 Thirty-first street, has some exceptionally well arranged baskets of plants, one especially noted being simply but very effectively filled with bright cherry red cyclamens, Christmas peppers and the usual small ferns and foliage plants. The small ware articles, too, were especially attractive, fresh and thinly made up, while oblong boxes of birch bark, prettily filled with plants, are bound to sell well. All kinds of devices made of red immortelles are shown, the stars and bells being the best sellers.

C. A. Samuelson, 2129 Michigan avenue, carries a large and select lot of plants, his araucarias, ardisias and other foliage and berried stock being very fine and arranged with the good taste always shown by this clever decorator. Mr. Samuelson reports very satisfactory business all through and the orders already booked make the outlook for the whole holiday season excellent. Large lots of cut flowers in all the best varieties are being handled, a fine lot of cattleyas, among others, being seen.

P. J. Hauswirth is still confined for room in his store at the Auditorium annex, but is handling a pretty large volume of business of the very best character. He has the goods in plenty and his window is very bright with poinsettias, Begonia Gloire de Lorraine, azaleas and other seasonable plants and cut flowers. He speaks well of the state of trade and is looking forward to a continuance of the recent activity.

O. J. Friedman, 1 East Van Buren street, has a very elaborate display of plants, artistically and beautifully arranged. A fine white heath draped with pale pink chiffon is very elegant and many beautiful designs in plant baskets are seen. Wreaths of fir cones and various other materials are quite above the average in merit, while the plants of azaleas, poinsettias, begonias, cyclamens and others are much above the average. There is a big wad of money waiting here for the man who can find plenty of good American Beauty roses with long stems for O. J.'s holiday trade. He modestly puts his daily sales as twice that of any other retail house in Chicago on this particular flower and only shortage of stock is preventing him from selling many more.

John Mangel's fine store on the corner of Monroe street and Wabash avenue is always attractive, as the windows are being constantly changed and the quality and artistic arrangement of the flowers and plants is always of the best. Mr. Mangel, too, finds it difficult to get sufficient good American Beauty and other choice roses and says that just now the high price leaves little in it for the retailer. Business on cut flowers and plants is very good and the holiday outlook is of the brightest. We noted some unusually fine holly being unpacked here, while the azaleas, cyclamens, ferns and other plants were of a high order, as were the made up baskets.

A. Lange, at 40 East Madison street, is strong on all kinds of cut flower stock and in his upper floor show rooms has a fine display of all the best and most popular market plants. Poinsettias, Begonia Gloire de Lorraine, azaleas and various foliage plants are here in large numbers and of excellent quality.

The Atlas Floral Co., at 37 Randolph street, is carrying fine stocks of all classes of flowers and plants, but F. Williams, like many others, has a word to say on the high price of stock, especially the better class of cut flowers. We found him busy on a large decorative order for the opening of a Chinese restaurant for King Joy Lo. Trade has been good here, but there was a noticable falling off just previous to the holidays. Pressure of work and want of space has been the reason for omitting to mention several other important stores.

J. W. WOLFSKILL'S NEW STORE, LOS ANGELES, CAL.
An interior view.

J. W. Wolfskill's New Store.

J. W. Wolfskill, Los Angeles, Cal., moved from his old location to the new one at 218 West Fourth street, December 1, and the city can now lay claim to having one of the finest flower stores in the country. The interior of the store is of mission architecture, in appearance more like a home than a store. It has an old-fashioned fire place, also a cozy corner for ladies.

The ice box, which is 8x15 feet, is of double plate glass and the interior of the box is laid with tile. One very unique feature of the store is its lighting. It has a beamed ceiling and 500 incandescent lights throw out their brightness from the beams.

RICHMOND, IND.—E. G. Hill is making a southern trip.

QUERIES.

Natural Gas in Store.

ED. AMERICAN FLORIST:—

We would be glad to know the experience of others in using natural gas as fuel in store where plants and cut flowers are kept. We have electric lights, but use gas in closed stoves and our plants do not look as we think they should, although we do not see why the same condition should not prevail from using coal with closed burners.

H. F. C.

[Perhaps some of our readers in the gas sections can supply the desired information.—ED.]

Forcing Narcissi.

ED. AMERICAN FLORIST:—

Please state what is the earliest date at which Emperor and Empress narcissi can be brought in from the outside and successfully forced, the bulbs having been put in flats about October 15.

DONTNO.

Both of those beautiful varieties belong to the large Trumpet section of narcissi and for forcing require the same treatment as the ordinary daffodils. "Dontno" should read "Suggestions for Florists," which appeared in THE AMERICAN FLORIST of December 22. He will find an instructive article on the handling of daffodils.

Spireas And Lilacs For Easter.

ED. AMERICAN FLORIST:—

What treatment is required to force spireas and lilacs for Easter blooming and what are the best varieties for the purpose? J. W. S.

Spireas and lilacs for Easter blooming require about the same treatment. It will take about five weeks to get them into bloom for Easter 1907, and it may be well to allow a few more days to

harden them off a little. Start the plants in a 45° temperature increasing to 55° and 60°, or even higher if necessary, but you will have better flowers if they are not forced too hard. Spirea Van Houttei, S. prunifolia, S. opulifolia and S. Thunbergii head the list of those best adapted for forcing. The plants should be potted up in fall and treated similar to hybrid roses, with the exception that no pruning should be done, as flowering wood would thereby be sacrificed.

In lilacs Charles X heads the list followed by Marie Legraye, Mme. Lemoine and Mme. C. Perier, pot grown plants of which are now offered out of 8-inch pots, at $6 to $8 per dozen.

Hollyhocks—Dielytras—Spireas.

ED. AMERICAN FLORIST:—

Will hollyhock seedlings, just transplanted to flats, bloom next season if kept growing without check? What are the best commercial chrysanthemums to grow for market in white, pink, yellow and maroon? What would you follow these up with independent of bedding plants? Will it pay to grow Dielytra spectabilis for Easter, for cut flowers, and Spirea Japonica?

C. U.

To the first query, yes. October Frost, Timothy Eaton and White Bonnaffon are good white varieties of chrysanthemums; Yellow Eaton, Monrovia and Golden Wedding are good yellows; Lady Harriot, Mdle. Marie Liger and Dr. Enguehard are good pinks. Maroon and purple varieties are not very popular for market, but Damio, Alfriston and W. R. Church are occasionally seen. After the benches are cleared of chrysanthemums they can be used for propagating, forcing bulbs, sweet peas, ferns, asparagus, smilax and many other crops, also for the spireas and dielytras you enquire about. Sometimes the early benches can be cleared in time for the later batches of violets, but it needs hustling. Dielytra spectabilis is grown by some florists for cutting and Spirea Japonica for plants, by many. If there was not money in them their culture would soon be discontinued. G.

Times For Seed Sowing

ED. AMERICAN FLORIST:—

Please give the most suitable time to sow the following seeds, to have them at their best in June, July and August, or to be ready to bed out the last two weeks in May. Would a temperature of 60° be suitable?—Alyssum Little Gem, Begonia Vulcan, coleus, Lobelia Crystal Palace Gem, Salvia Clara Bedman, Nasturtium Dwarf Variegated and Marigold Single French.

J. W.

The alyssum is usually sown in late summer for flowering in the spring bedding. If you decide to try it for summer, sow at once. The begonia, coleus, salvia and lobelia should be sown in late January or early February. Sow the other seeds named in March. The temperature named will suit them all, but you must take especial care with the begonia and lobelia seeds which are very small. Sow all thinly and cover with sheets of glass or place in a propagating frame until germination takes place.

G.

Swainsonas Losing Their Leaves.

ED. AMERICAN FLORIST:—

The leaves of my swainsonas have all been eaten, or at least have disappeared within the last two weeks. Can you tell me what is the matter? I have looked for slugs, etc., but have not found anything to account for it. The ends of the branches are sometimes pinched also.

L. C. S.

Your swainsonas have probably been eaten by the grub of the cabbage moth, or some similar insect. These are often so near the color of the leaves that they are very difficult to see, but you should persevere in looking for them, or other plants may be attacked. They may often be found closely clasping the stems of the plants they are eating and are usually on the side farthest from the light.

Kansas City.

CHRISTMAS TRADE GOOD.

From every source in this locality comes the report of a very satisfactory trade for Christmas. A concensus of opinion, among the craft in general, denotes an increase of fully 25 per cent in volume of trade over last year. Conditions lent themselves favorably in almost every instance. The weather was ideal, which was a great help in bringing stock out in fine condition. The quality of stock was good, and deliveries were handled with little difficulty. The sales in green goods were large. Holly as usual was in most demand, and the quality was somewhat above the average. Splendid shipments of mistletoe were received from Indian Territory and Oklahoma. California pepper was much in demand. One store made a specialty of fancy wreaths of boxwood, which proved to be a popular innovation. The cut of flowers was larger than expected, with top notch prices. Carnations were scarce. Roses were well up to the standard, and were fairly plentiful. The high prices of American Beauty retarded any very brisk demand. They ranged from $3 to $25 per dozen. The supply of violets was inadequate. Orchids sold fairly well. Potted plants met with the usual good demand.

NOTES.

The Missouri Valley Horticultural Society's regular meting occurred December 15 in the club rooms of the Coates house. The most important business transacted was the election of officers. The present officers of the society were re-elected for the coming year. They are W. S. Gano, Parkville, Mo., president; Asa Chandler, Randolph, Mo., vice-president; A. V. Wilson, Muncie, Kans., secretary; and Daniel Lowmiller, Parkville, Mo., treasurer. The officers and many members of the society attended the meeting of the Kansas State Horticultural Society held at Topeka, Kans., this week.

The first report of work done by the park board since 1893, was made public at a meeting held December 4. It shows that since 1894 there has been expended on the parks and boulevards in the city $7,005,095.54. At the beginning of the fiscal year, April 16, a balance of $100,722.90 was on hand. Accompanying the report was a statement from Geo. Kessler, landscape architect, recommending a more complete system of boulevards, connecting the different playgrounds, and the establishment of another park somewhere east of the present city limits.

Work is to begin on a 20-story office building at the southeast corner of Tenth and Walnut streets. The buildings on the property are occupied at present by The Owl florist, which means a move for that concern.

Bulb salesmen are making their rounds early this season, among last week's callers were J. Telgelaar, representing Guldemond & Son, and Chas. Schwake of C. F. Meyer, New York.

H. Hulse, of Topeka, Kans., was in the city last week. He reported a large amount of funeral work for the late Eugene Hagan.

Ed. Day, formerly with the Rock Flower Co., paid the boys a very welcome visit last week.

R. S. Brown was absent from his place last week on account of sickness.

C. E. Heite has been kept away from his duties on account of sickness.

Ed. Ellsworth made a trip to Pleasant Hill Sunday.

K. C.

Montreal

STOCK SCARCE.

Prospects for Christmas are very bright among the retailers, the greatest preparations being in progress everywhere; the stores are already stocked to their full capacity with holiday plants and Christmas prices already prevail. The supply of flowering plants will be rather short. Azaleas are very slow coming along and the same may be said of cyclamens and double poinsettias. There is a fair lot of good Begonia Gloire de Lorraine and single poinsettias on the market, but taking it all round there is hardly as much stock shown as last year. For cut flowers the local market almost entirely depends on the west and judging by the price lists good stiff prices are the general rule, with the supply limited, notably on red stock. Lily of the valley and Paper White narcissus are plentiful. One establishment rates single daffodills. In greens the market is well supplied, some extra good holly arriving in case lots. The past few weeks have been very cloudy, with snow and very cold, 22° below zero, the glass being mostly covered with ice and snow making the houses dark and cold and retarding the growth of plants and flowers.

LOCAL SOCIETY MEETINGS.

The annual meeting of the Montreal Gardeners' and Florists' Club was held on December 3. The secretary-treasurer's report was satisfactory, there being 66 members of good standing, and $195.47 stands to the credit of the club in the bank. G. H. Ewing of Woodstock, Ont., who acted as judge in the essay competition sent down his awards as follows: First, J. Pewtress; second, G. A. Robinson; third, G. Vreugde. It was decided to hold a chrysanthemum show in November, 1907. The election of officers resulted as follows: A. Walker, president; J. Pidduck, first vice-president; J. C. Eddy, second vice-president; W. H. Horobin, secretary-treasurer; H. J. Eddy, assistant secretary; G. A. Robinson, A. C. Wilshire,

G. Pascoe, G. Vreugde, G. Trussel and J. Luck, committee; Messrs. Petty, Prescott and Watts, games committee.

The following essays have been read during the year: "Ferns From Spores," by G. A. Robinson; "Trees and Shrubs," by J. Walsh; "Orchids for Beginners," by Thos. Pewtress; "Thorns and Thistles," by G. Vreugde; "Summer Cut Flowers," by A. C. Wilshire; "Hardy Perennials." by G. Trussel; "Notes on Trip to England," by E. J. Hayward and "Notes on Trip to the Pacific Coast," by J. C. Eddy. A cerificate of merit was awarded to C. Craig for specimen cyclamens.

The club mourns the loss of H. Brown, who died last week of heart failure; he was one of our most sociable members, being always of a humorous disposition and we shall miss him very much; he leaves a wife and four children. On Monday the annual turkey euchre took place, G. Trussel and J. Eddy being the lucky winners, who decided to send their winnings to the widow of our late member, H. Brown.

The annual meeting of the Montreal Horticultural Society and Fruit Growers' Association was held in the Guardian building. The secretary's report referred to the success of the exhibition held in June and the comparative failure of the September show. The treasurer reported a balance of $159 on the wrong side. R. Wilson Smith, president of the society, suggested that the best remedy for the financial position would not lie in reducing expenses, but rather in judicious outlay in advertisement and the provision of greater attractions at the exhibitions. It was also mentioned that while the Toronto society receives a grant from the government of $1,000 the Montreal society gets only $500. The following officers were elected: Senator Mackay, president; L. J. Forget, first vice-president; W. M. Ramsay, second vice-president; A. J. Bowles, secretary-treasurer; R. Wilson Smith, J. Morgan, C. Meredith, J. Brown, A. E. Ogilvie, A. Joyce, J. B. Sparrow, J. R. Wilson, A. J. Hooper, D. Williamson, H. Graham, J. Stewart, A. J. Dawes, T. A. Dawes and Mayor Ekers, directors; W. J. Wilshire, Geo. Trussel, W. O. Roy, L. Rubenstein, A. Pinoteau, F. C. Smith, J. Bennett, C. A. Smith, Geo. A. Robinson, H. W. Mayer and J. Henderson, executive committee. LUCK.

NEWS NOTES.

BARKER, N. Y.—J. R. Spafford & Son have completed their new greenhouse on East street and have a very fine display of carnations now on.

COLUMBUS, O.—A commission of landscape gardeners is to prepare plans for beautifying this city, by park and boulevard additions. Correspondence has already begun with a number of landscape men and $6,000 has been appropriated for the work.

WACO, TEX.—The first meeting, since the annual show, of the Texas State Horticultural Society was held December 1 in the parlors of the first national bank. A good financial state was revealed by the report and a plan to erect a society building discussed.

EDWARD H. STEWART FLORAL CO.

A tastily arranged bouquet of cut flowers is always an acceptable gift. The giver is at once considered of artistic temperament, a lover of nature and hence a possessor of sweet sentiments. Aside, therefore, from the pleasure in accepting flowers for their own sake's sake, the recipient of the gift invariably admires the donor. Plants, ferns palms and other house plants always make acceptable presents. Edward H. Stewart Floral Co., 661 Third-st, have an excellent stock on hand from which to choose.

W. C. ZIMMERMAN.

It would be hard to imagine what gift would be daintier or more acceptable than a nice bouquet of flowers or a beautiful house plant. There is not a woman living but would prize such a gift from relative or dear friend. A beautiful idea that will be carried out by many in Milwaukee at Xmas time is to trim the home with floral decorations. Mr. Zimmerman, 330 Grand-av, Alhambra building, is excellently equipped to meet any demands. Phone Grand 2583.

MILWAUKEE ADVERTISING.

Reproduced from Milwaukee paper.

CLEVELAND, O.—J. M. Gasser was released from the Cincinnati sanitarium recently, where he had been confined on a plaint laid by his wife that he was insane. Mr. Gasser proposes taking a trip to Burmuda in March to see the lilies in flower.

ALLEGHENY, PA.—Chas. Erhardt and Clarence E. Swartz announce that they have opened a new floral establishment in the center aisle of the Allegheny market, where they will be pleased to meet their friends and patrons. Mr. Erhardt was formerly connected with E. C. Ludwig. The firm name is Erhardt & Swartz.

NEW YORK.—Plans have been filed for an addition of eight new greenhouses and a palm house to the Central park horticultural gardens. The greenhouses are each to be 65x121 feet arranged in two groups of four, close to the present houses opposite 105th street. They are to be of brick trimmed with lime stone, and the total outlay will be $38,275.

COLUMBHS, O.—Notwithstanding reports to the contrary, the work of remodelling and reglazing of the Franklin park greenhouses is said to be proceeding according to specifications. Much remains to be done, including the installation of two 60 horse power boilers of the Scotch marine type. A chrysanthemum show was held the last week in November by superintendent James Underwood.

MOBILE, ALA.—G. P. Mahood, superintendent of Pine Crest cemetery, a new institution just started here by Chicago capitalists, says that the late storm played havoc with the fine trees on the place, some of them centuries old. Some steamers were landed a mile from the bay in the pine woods and will be totally lost. Mr. Mahood is getting the place again into shape and hopes to have it in order soon.

ALEXANDRIA, VA.—J. Louis Loose entered an action against the Southern Railway Co., claiming $20,000 as damage done to his greenhouses and crops by cinders and smoke from the defendant's engines. The case has been in progress in the circuit court, Judge Nicol presiding, but on November 10 the jury at the final hearing was unable to reach a verdict and was discharged by Judge Barley. A witness from Chicago gave evidence on behalf of the railway company.

OBITUARY.

Robert M. McCracken.

R. M. McCracken died at his home, 727 North Lawrence avenue, Wichita, Kans., December 9. Deceased was 76 years of age and came to Wichita 14 years ago, where he carried on a nursery business. He leaves a wife and five daughters.

Mrs. Rose Taylor Burton.

Mrs. Rose Taylor Burton, wife of Geo. Burton and daughter-in-law of John Burton, Philadelphia, died Christmas day of tuberculosis. Mrs. Burton, who leaves her husband and two daughters to mourn her loss, was greatly beloved by all who knew her.

Mrs. W. L. Morris.

Mrs. Morris, wife of W. L. Morris, Des Moines, Ia., died December 22 at the Mercy hospital from an operation after an illness of four days. Mr. Morris and a daughter, Ruth, survive her.

READERS are requested to favor us with reports of the holiday trade in their various sections, and to send such other general trade news as may occur to them.

ON account of the holiday next week, advertisers and correspondents will confer a favor by sending in copy as early as possible.

WM. F. KASTING, Buffalo, N. Y., is sending his customers holiday souvenirs in the form of thermometers and attractive blotters.

IN the fiscal year ending June 30, 1906, the United States exported canned fruits to the value of $2,348,064 and canned vegetables valued at $658,739.

W. G. MATTHEWS, Dayton, O., is enclosing with his remittances a neatly printed card as follows: "The four sweetest words in the English language are 'Enclosed please find check.'"

THE culture of lily of the valley pips takes a very little out of the soil or sand in which they are planted. Successful growers tell us that the older and finer the sand is in which they are planted the better, as it packs closer to the roots and stems, preventing any possibility of their drying out.

RAFFIA is preferable to cotton twine for binding on rose grafts. It is easier to handle and if slightly damped before use fits very closely to the bark and effectually keeps out the air. Another strong point is that after the stock and scion are united and the resulting plants are in position the raffia decays in the soil, while unless the cotton is cut from each individual plant it remains and sometimes strangles it by cutting into the bark.

THERE are many seeds that are best sown at regular distances apart by hand, and although at first this would seem to be a tedious job, really the time needed is not very great and is well repaid. For instance cyclamen should remain in the seed boxes until they are quite strong plants with the second leaves appearing, and if these are thickly sown or sown indiscrimately many will be too crowded to so remain. Of course the ultra-busy man who never has time for anything will not find this method to his taste, but it is the best notwithstanding. The seed boxes should be filled and given a thorough soaking of water, allowed to dry off a little and a small blunt pointed stick used to make the holes for the seeds. A thin surfacing of dry soil finishes the operation.

Important To Subscribers.

The date on the yellow address label on your copy of THE AMERICAN FLORIST will show when your subscription expires. Please renew subscription promptly on expiration to make certain of receiving your copy of each issue.

For Your Employes.

By sending THE AMERICAN FLORIST to your employes every week of next year they will be given a weekly reminder of you and it will make a most appropriate and useful gift if sent to their home addresses. In many ways it will be a good investment. Send us their names and addresses now, enclosing one dollar for each subscription and we will start with our grand Christmas number and continue sending the paper every week of 1907.

Florists' Booklets.

The People's Floral Co., Kansas City, Mo., have issued a "Book of ready reference for flower lovers." It is a beautifully printed elegant little book, containing finely reproduced photographs of the firm's greenhouses, offices and down town stores as well as many chaste floral designs of a very varied character. The letterpress is interesting, descriptive of flowers, and useful hints as to the care of house palms, ferns and other plants are given.

The Iowa Floral Co., Des Moines, Ia., publish a pretty booklet called "Flowers," containing charming illustrations of wedding and other decorations and a large number of set designs of a varied character. One of the firm's carnation houses is also illustrated, as well as the men comprising the company.

The Pittsburg Cut Flower Co. send out a little book entitled "Christmas decorations," containing a list of all classes of goods likely to be needed by decorators at the festive season.

Rust and Mildew on Verbenas.

ED. AMERICAN FLORIST:—

Please give the best method of propagating and caring for verbenas to avoid rust and mildew.

E. H.

The best method of propagating verbenas is from seeds, sown in March. All colors now come quite true from seed and it is much less expensive to raise seedlings than cuttings. There is now little need of laboriously working up a stock of verbenas from cuttings which invariably is more or less affected with rust and very poor as compared with seedlings, which are always vigorous and never show the least trace of rust. Moderation in watering and sprinkling, a temperature of not higher than 45°, cleanliness and plenty of fresh air will, to a great extent, keep away mildew and rust from verbenas propagated from cuttings. E.

Diseased Geraniums.

ED. AMERICAN FLORIST:—

Herewith find some diseased geranium leaves. Please give cause and remedy.

J. A. B.

Michigan.

The cause of the spotting can not be determined from the specimens at hand. Although there are no insects present, it is possible that the spots may have developed from punctures of some sucking insect, or it may be that the spots were produced by some injurious material coming in contact with the leaves. For instance, if the plants were grown in an atmosphere where there was a slight trace of coal gas and drops of water were present upon the leaves, a spotting would result where the drops were present, even though the amount of gas might not be sufficient to otherwise injure the leaves.

Without a full statement as to the conditions under which the plants are growing, it is impracticable to give any further information. All applicants for information regarding diseased material should take pains to state fully the conditions under which the disease appears; otherwise intelligent directions can seldom be given.

G.

Meetings Next Week.

Dayton, O.—Dayton Florists' Club, 112 South Main street, December 31.

Des Moines, Ia.—Des Moines Florists' Club, Iowa Seed Co.'s store, January 1, at 8 p. m.

Atlee Burpee & Co., Philadelphia, Pa., wholesale list of seeds.

SITUATIONS, WANTS, FOR SALE.

One Cent Per Word.

Cash with Adv.

Plant Advs. NOT admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1906 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—As working foreman or grower on roses: have years of experience with the best of Chicago growers; good propagator. Address Key 856, care American Florist.

Situation Wanted—By all-around florist; first-class references; married; 20 years' experience on private and commercial places. State particulars and wages in first letter. Address Key 853, care American Florist.

Situation Wanted—In rose and carnation houses, by reliable, steady man; experienced and recommended. Apply, stating wages, to E. REED, Detroit Cut Flower Supply House, 6 Adams St. West, Detroit, Mich.

Situation Wanted—By January 25 or February 1, as working foreman, German; 31 years old with 17 years' experience in growing cut flowers and general stock; thoroughly sober and reliable; south or middle states preferred. Address CH. H., P. O. box 41, Aldrich, Ala.

Situation Wanted—By a hustling, up-to date grower as foreman or assistant; roses and carnations a specialty; 16 years' experience, 31 years of age, single; best of references furnished; good wages expected. Would like a place west of Missouri. Address Key 851, care American Florist.

Help Wanted—On private place by a first-class grower of plants, fruits and vegetables under glass single man preferred. Address Key 859, care American Florist.

Help Wanted—Experienced man by retail florist. Must know how to make up funeral work and wait on store: age, 25 to 35. Address CHAS. H. FOX, 21st St. and Columbia Ave., Philadelpeia, Pa.

Wanted—Best opening in the country for practical, capable seedsman. If there is an employe in any seed house who wants to become a proprietor and has the necessary executive ability, I want to hear from him at once. J. A. EVERITT, Indianapolis, Ind.

Help Wanted—Man for general greenhouse work, one who can take charge of 15,000 square feet of glass if wanted. Middle age, German prefered; $30.00 per month, board and room. Address Key 860, care American Florist.

Help Wanted—Assistant gardener and vegetable greenhouse man; must have had some experience in these lines; permanent position for the right man; $25, board and laundry. E. C. SMITH, Steward, Eastern Michigan Asylum, Pontiac, Mich.

Help Wanted—Carnation grower; must be a No. 1 man, strictly sober and reliable; wages $30 per month with board and washing; state experience and references. Address Key 844, care American Florist.

Wanted to Rent—About 15,000 sq. ft. of glass near Philadelphia, Pa.; must be in good repair. Will take place in spring. Address EMIL WOHLERT, Bala, Pa.

Wanted—A top florists' delivery wagon for one horse. Address, with price HAZELWOOD GREENHOUSES, Grinnell, Iowa.

Wanted—Applications of reliable and capable men as salesmen, decorators, or designers, or assistants thereto. A. W. SMITH, 345 Sixth Ave., Pittsburg, Pa.

For Sale—Nine greenhouses, dwelling house and barn, 3½ acres of ground. For particulars address P. O. Box 109, Newtown, Bucks Co., Pa.

For Sale—A1 down-town retail store for sale; established 10 years; bargain. Enquire VAUGHAN & SPERRY, 60 Wabash Ave., Chicago.

For Sale—A No. 686 McCray refrigerator, good as new, for flowers. Going out of business. Cheap. Address SALVESON & CO., 426 E. Monroe St., Springfield, Ill.

For Sale—Ice box, used four months, 16 ft. long, 7 ft. wide, 8½ ft. high; accomodations for a commercial or wholesale florist. Will sell at a sacrifice. Address CHAS. MILLANG, 50 West 29th St., New York.

For Sale—4,000 feet of glass; thriving town of 4,000; 24 express trains daily. No competition; 50 miles from large greenhouses. New; bargain; easy terms. Investigate immediately. Address Key 858, care American Florist.

For Sale—Retail florist business in Washington, D. C. established seven years; good chance for hustler; owner wishes to retire from business. For full particulars address RETAIL, care American Florist, 1133 Broadway, New York.

FOR SALE.

Old established retail florist's store. Reason for selling, going west. For particulars, write to

F. K., 700 N. 5th St., Philadelphia, Pa

FOR SALE—Greenhouse Pipe

4-in. boiler tubes, second-hand, in fine condition, absolutely free from scale and with ends cut square. Sample and prices on application. KROESCHELL BROS. CO., 45 Erie St., Chicago.

FOR SALE.

COLORADO SPRINGS, COLO.

Wholesale and retail business, well located, 34 greenhouses, 13 acres of land, 4 boilers, 16-60; 2 dwellings. For terms address

WM. CLARK.

FOR SALE.

Des Moines, Iowa, wholesale and retail greenhouse establishment, 29,000 feet of glass, three acres of ground, well located, all in good order, with good wholesale and retail trade. Price, about $8,400; terms reasonable.

WHOLESALE FLORIST,
51 Wabash Ave., CHICAGO.
ROOTED CUTTINGS | CUT FLOWERS

Madison, N. J.

The Morris Co., N. J., Gardeners' and Florists' Society's December meeting was a well attended one. It was the occasion of the annual election of officers and we wanted to hear C. H. Totty talk of the new chrysanthemums. The election resulted as follows: Richard Vince, president; Percy Herbert, vice-president; E. Reagan, secretary, Wm. Duckham, treasurer. The executive committee are as follows: A. Herrington, A. McKendry, Thos. Stokes, J. Heeremans, A. R. Kennedy, Ernest Wild, C. H. Totty, Alex. Brown, O. Koch, R. M. Schultz, Wm. Muhlmichel and H. B. Vyse. J. Heeremans, the retiring president, received a rising vote of thanks for his efficient services during his two terms, to which he responded feelingly. The newly elected officers accepted the responsibilities of office in neat speeches, each promising to do his best. An unusual amount of good fellowship was shown, and everybody seemed satisfied. Three new members were elected; Thos. Wilson, Wm. McKenzie, and Frank Esheson.

After preparations for the eleventh annual smoker were made Mr. Totty spoke extemporaneously of the new chrysanthemums and how they showed up at the exhibitions this fall. He spoke of Miss Clay Frick (white Duckham) as the best of the whites and Miriam Hankey the same in the pinks. The stem, foliage and flower, together with the shipping qualities, should make them popular for a long time. Mrs. Geo. Hunt, Mrs. Henry Barnes, Kathleen Stoop, Mrs. A. T. Miller, A. H. Lee and May Godfrey were able to work out their own salvation if given a show to do so. The new single varieties he believes have a future, being artistic, decorative and relieving. The new French varieties came in for consideration; Pres. Loubet, Sergeant Levy, and Mlle. L. H. Cochet were amongst those he mentioned. Nathan Smith's efforts as a hybridizer received high praise and many of his introductions were well spoken of. The speaker received a hearty vote of thanks for his able effort, after answering many questions. Wm. Duckham, A. Herrington, C. H. Totty and R. M. Schultz were chosen as a committee on smoker which takes place January 9.

John E. Haines sent his new carnations, Imperial and Pink Imperial, to be shown at the meeting. Pink Imperial showed up in fine shape and received a certificate of merit. Imperial suffered in transit and the committee would like to see it again. Our treasurer, Wm. Charlton, has been ill for a long time and the deepest sympathy is felt for him. He has been treasurer 11 years, since our beginning, and has been able, energetic and faithful. He has declined to be renominated and it will be hard to fill his place. E. R.

Des Moines, Ia.

THE MARKET.

Business the first of last week was anything but encouraging. The last two days the sun came out, however, which made trade a little more brisk, and things looked a little brighter. Carnations are still very scarce, and roses are not any too plentiful. Chrysanthemums are about gone. Bouquet green and mistletoe are on the market, but very scarce. Holly is very good and plentiful.

STATE HORTICULTURAL SOCIETY.

The meeting of the State Horticultural Society was held last week at the state house. The following officers were elected: W. A. Burnap, Clear Lake, president; W. M. Bomberger, Harlan, vice-president; Wesley Greene, Des Moines, Ia., secretary; Elmer M. Reeves, Waverly, treasurer; C. G. Blodgett, Mt. Pleasant; J. W. Murphy, Glenwood; W. O. Willard, Grinnell; W. B. Chapman, Washta; G. A. Ivins, Iowa Falls; C. F. Gardner, Osage; John Foster, Albia; Wm. Laughan, Cedar Rapids; W. J. Graham, C. H. True, Edgewood; L. A. Clemons, Storm Lake; Eugene Secor, Forest City, directors.

In the evening Secretary Wesley Greene tendered the members of the organization a most enjoyable banquet at the Savery house, over 300 members enjoying the bountiful hospitality. After an elaborate course dinner a programme of toasts was given, in which Mr. Greene came in for the lion's share of the compliments.

NOTES.

Gus Pappos, of the Alpha Floral Co., who underwent an operation at Mercy hospital last week, is doing nicely and expects to be out again in a couple of weeks.

Miss Teresa Lambert has accepted a position with the Alpha Floral Co. during the holiday rush.

Vaughan's Greenhouses had the decorations at the recent State Horticultural Society banquet.

The Iowa Floral Co. is showing some fine poinsettias in its window this week.

Chas. Gay is the father of a new girl, which arrived a short time ago.

L. F. Springer, Indianola, was a recent visitor. M.

Burlingame, Cal.

TRADE NOTES.

Flowers were never so scarce as they are at present and they will be scarce all through the holidays. The florists are all begging for stock, and it is really too bad that they should be under such enormous rents in San Francisco with the scarcity of flowers. Next season will find retailers and growers forgetting that there ever was a disaster. There are no outside flowers going into market owing to a recent rain and a long spell of frost, and it is very cold at the present writing.

P. C. Meyer, who is at present sojourning in the south, had the pleasure of seeing two of his own seedling carnations take first prize at the Los Angeles flower show a few weeks ago. One is a pure white, much larger than Enchantress, about the same style of flower and plant. The other is the finest dark red, I think, in existence, a flower, as large as Enchantress with stem from two to four feet long. They will be sent out next season or the following one at latest.

P. C. Meyer & Co. are in first class shape. They are cutting some fine carnations in large quantities, but not large enough to meet the demand. The rose stock, too, is excellent, fine American Beauty, Liberty, Bride and Bridesmaid being on cut now.

H. B.

Indianapolis.

Business in Tomlinson hall market is reported very slow, which must be very slow indeed, as two-thirds of the stands are unoccupied at present. Excepting the market, business has been brisk, owing to a good deal of funeral work. Christmas greens and berries are in good demand. Of smilax there is more than enough at present, but the Haughville violet crop is short this season.

Thujas, retinosporas and boxwoods are much used in lawn vases and for porch decorations this winter. There is no need of using established pot-grown stock, as one winter in the city atmosphere will kill them anyhow.

John Bertermann spent a day in Richmond last week. Everything looks fine, he says, but when it comes to a real A 1, up-to-date heating apparatus he has them all beaten.

Martin Nelson will have a batch of tulips ready for the holidays, and John Heidenreich will be in line with azaleas and a bench of chrysanthemums.

Several of the cult, who intended to visit New Castle last Sunday, had to give it up on account of a rush of funeral work.

Spirea japonica, in bloom for Christmas, is something new introduced by Bertermann Bros. Co.

H. W. Rieman will plant a house of La France and Kaiserin roses for summer blooming.

John Heidenreich has under construction a house 30x136 feet for summer roses.

John Hartje is harvesting a fine crop of "after chrysanthemum" lettuce.

Visitors: W. W. Coles and Thomas Knipe of Kokomo, Mr. Jones of the Advance Co., Richmond, and C. Baur, Knoxville, Tenn. J.

BRITISH GARDENERS' ASSOCIATION.—The Earl of Plymouth has kindly consented to become president of the British Gardeners' Association. From the first his lordship has expressed sympathy with the objects of the association. He is a large employer of professional gardeners, and owns the fine old castle of St. Fagan's, just outside Cardiff, as well as other seats in Worcestershire and Shropshire.

Azaleas For Forcing

We can still furnish a fine lot of well budded plants at import prices for immediate delivery. We offer a full assortment of standard varieties.

	Per doz.	Per 100		Per doz.	Per 100
8 to 10-inch crowns	$3 25	$25.00	12 to 14-inch crowns	$ 6.00	$45.00

TRADE ACTIVE.

Trade remains very active, mainly due to the many social functions, as funeral work lately has been very irregular. Zero weather with lots of snow has not been favorable to the rose crop and there have been only enough to fill orders. Orchids and lily of the valley have had a large demand and though violets have been very scarce, the high prices at which they are held have lessened their popularity. Chrysanthemums continue plentiful and there will be a large quantity for the Christmas trade. Flowering plants are much in evidence, also well berried holly trees in tubs; the latter are very fine and help the stores in their holiday garb. Carnations are plentiful enough to meet demand, with promises for a very heavy cut. Christmas prices will take effect December 18 and in a few instances are higher than in recent years. The prices per 100 will be: Roses, American Beauty; fancy, $100, select, $75, No. 1, $50, No. 2, $35; Richmond, McArthur, and Killarney, $25; Meteor, $20; Mme. Chatenay and Bridesmaid, $18; Bride, Deegan, Morgan and Queen, $15; carnations, $6 to $12; sweet peas, $2 to $4; violets, Princess, $3; double, $2; lily of the valley, $3 to $5; lilies, $12 to $15; mignonette, $4 to $6; poinsettias, $15 to $35; orchids, 15c to 50c each.

NOTES.

D. J. Sinclair has had a heavy run on supplies, the demand for baskets almost clearing him out; shipments to distant points have been heavy. There is a good demand for cut stock, of which he has quantities and he has experienced a large run on sweet peas, American Beauty roses and carnations. Chrysanthemums are still plentiful with him.

Our patients are fast improving; Mrs. Chas. Grobba and Mrs. Thos. Plumb are recovering from typhoid, and Wm. Jay, Jr., is again coming round.

W. J. Lawrence, Eglinton, has the sympathy and condolence of the trade in the loss of his only son, an infant of about two years of age.

White Perfection carnations as seen at J. H. Dunlop's is all that the name implies, the blooms for size and symmetry being immense.

Jno. Cotteril, Bracondale, is cutting quantities of good asparagus and his violets are better than for several seasons.

Good American Beauty roses in quantity are coming from Geo. Allen, of Toronto Junction.

The Georgetown Floral Co. has a heavy cut of roses, its McArthur being very fine.

Visitors: P. A. Ivey, Jr., Brantford, Ont. Ralph M. Ward, New York.

H. G. D.

Davenport, Ia.

The Tri-City Florists' Club met at the greenhouses of Harry M. Bills on North Brown street December 15 and an interesting session was held. As usual, nearly every member was present. The advisability of organizing a horticultural society was discussed, and it was the opinion of the members that such a society would be a great benefit to many. The subjects up for discussion for the meeting were "Roses and their Propagation," and "The Most Profitable Bulbs and Their Culture." It was decided to adopt a question box for the next year. The programme committee reported and gave the outline of the programme for every month of the ensuing year. After the usual routine business, a fine luncheon was served by the host and a hour of sociability enjoyed.

Supt. Boehm, of Davenport parks, may be justly proud of the fine Begonia Gloire de Lorraine he has on exhibition, some measuring three feet across. John Temple, ex-judge of the Chicago show, says they are the finest he ever saw. The new greenhouse, costing $11,000, at Fejervary park, is finished and planted. Extensive improvements are being made in this park.

Theo. L. Ewoldt, president-elect, Iowa Florists' Society, has been confined to his bed for three weeks with Brights disease. He has been unable to do a thing since November 15.

Three clear days out of 20 makes things look rather shaky for Christmas.

Merry Christmas to all.

BEST CHRISTMAS EVER EXPERIENCED.

Christmas prices went into effect December 20, but even before that market values were very high, due to the great scarcity of stock. At first it was feared that stock would remain as scarce as last year, but sunshine on Sunday opened up buds for an extra cut or two. But even at that prices far exceeded those expected, and held remarkably steady right up to Christmas morning. In fact it may be summed up as the best Christmas trade on the market. Extra select long-stemmed American Beauty roses went as high as $18 per dozen, and Richmond, in a few instances, was of a quality that readily brought $50 per 100. Killarney brought as much in some special lots, and it was no uncommon thing to see it sold at $35. Chatenay was also an excellent seller as was, indeed, anything in the line of colored roses. Bridesmaid roses were somewhat behind other varieties in quality and color, and Uncle John, though of a lighter shade, was in heavy demand to fill the gap. Red carnations readily sold at $12 per 100, $15 being offered at times. Lawson and Enchantress also were in heavy demand, the best grades readily bringing from $8 to $10 and sometimes going to $12. White carnations, on Monday, became a drug on the market, some even going as low at $2, though $4 to $6 were the figures more generally obtained and some fancy lots going at much higher prices. Violets were in good supply with a very satisfactory demand. Poinsettias, the Christmas flower par excellence, were in over-supply on Monday, prices falling from $4 and $5 per dozen to $2.50 and some grades even going as low as $1. Easter lilies were an excellent property all the week, readily bringing regular holiday prices. Paper White narcissus, Roman hyacinths, mignonette and stevia were in abundant supply with no very great demand. Sweet peas were also offered and found a satisfactory outlet. On Christmas morning, the regular trade having been supplied, prices were naturally shaded a bit on all classes of stock. The plant trade was a notable feature of this year's Christmas business, the high prices of roses and carnations causing customers to turn largely to azalea, cyclamen and other plants. A greater number of these were sold than ever before.

NOTES.

Geo. Cadogan Gardner, of Hinsdale, aged 58 years, passed away December 20 and was buried two days later. Mr. Gardner was a director of the Horticultural Society and prominent in the early flower shows both as an exhibitor and official. He was a good man, well liked and took a real interest in horticulture. Ill health for the past five years, however, has prevented his taking any prominent part in the local society's affairs.

Bassett & Washburn had an unprecedented Christmas trade and owing to the great scarcity of stock were obliged to refuse a great number of orders. They filled all orders in full that were promised but on late orders some items were not entirely filled. They adhered to their advertised prices and sold out everything they could possibly cut.

R. Mayer, of Schmidt & Mayer, of Riverside, has purchased the interest of A. J. Schmidt and will continue the business as heretofore under the name of the Riverside Floral Co. Mr. Mayer has a plant of about 25,000 square feet and grows a general stock. Mr. Schmidt has just started an independent business in the same town and already has three new modern houses.

The Poehlmann Bros. Co. this past week had some of the finest Richmond roses yet seen on this market, closely rivaling American Beauty in size of bloom and length of stem and leaving nothing to be desired in color. This firm showed the first daffodils of the season on Saturday.

The A. L. Randall Co. certainly had its share of Christmas business judging from the appearance of the store all the week before. Both the cut flowers and supply departments were drawn on very heavily both by regular customers and those who had special orders to fill.

Wietor Bros. report having had fine cuts of American Beauty and red roses for Christmas. Richmond, Liberty, Chatenay and Uncle John were their best sellers in the order named. N. J. Wietor says he has every reason to feel satisfied with the outcome.

Chas. Morton, 3626 Cottage Grove avenue, reports having disposed of 72 cases of holly and 16 cases of Christmas green. This branch of his work necessitated temporarily opening a branch store on Cottage Grove avenue near Forty-third street.

Peter Reinberg had a very satisfactory Christmas trade, and more stock could have been sold at the rates prevailing had it been available. Leonard Kill says that prices ranged higher than ever in the history of the market.

John Weiland, of Evanston, formally opened his new store at 1614 Sherman avenue last Monday and Tuesday. There was a splendid display of Christmas plants and cut flowers, and souvenirs were given all visitors.

The Benthey-Coatsworth Co. reported a big demand for all sorts and grades of roses. Killarney lived up to its reputation as a big seller. As grown by this firm, it had a demand fully equal to the best reds.

The Fleischman Floral Co. is busy with plans for doubling its floor space. By May 1 the firm expects to be occupying the store to the west of the present location as well as the one they are now in.

Weiland & Risch report one-third more business this year than last. This firm was exceedingly fortunate in having large crops on and were able to fill all out-of-town orders.

Zech & Mann report a large increase in business this year over that of Christmas a year ago. This firm had a big call for poinsettias which were extra fine.

Chas. McKellar's orchids were in good demand for Christmas. These included Cattleya Trianæ, C. Percivaliana, lælias, cypripediums and a few dendrobiums.

The J. B. Deamud Co. reports a large increase in Christmas business over all former years. This firm has on hand a very fine lot of sweet peas.

The best Christmas ever experienced in the history of the house, is the report from E. H. Hunt's.

A. Lange and C. A. Samuelson are running some large advertisements in the daily papers.

The E. F. Winterson Co. reports the largest Christmas business on record with that firm.

"Rushed to death," was the report regarding the Christmas business at J. A. Budlong's.

E. C. Amling received 5,000 sweet peas Monday for the Christmas trade.

Visitors: F. J. Foster, St. Louis, Mo.; Joseph Finnigan of the Youngstown Floral Co., Youngstown, O.; Harvey Lozier, Des Moines, Ia.; C. H. Woolsey and J. J. Soper, Rockford.

EXCEPTIONALLY GOOD HOLIDAY TRADE.

At this writing we are in the center of the Christmas rush and this is already considered an exceptionally good holiday and with two more days, the busiest, yet remaining, results are sure to more strongly emphasize this fact. It is to be regretted that the market is not in a more favorable condition to give better satisfaction to the flower-buying public. The rose supply is seriously short at present, but not necessarily poor, as some of the best varieties are remarkably good. The continued dark weather has greatly hampered the growers who have hoped for a few sunny days, but without these they have utilized every means known to meet the market with satisfactory stock. American Beauty roses appear scarce but with a grade of Richmond superior in size to any yet seen to support them the scarcity will not be as noticeable as otherwise might be the case. There is only a limited supply of Killarney, Chatenay, Wellesley and Bridesmaid to be seen, with plenty of white roses. Violets and lily of the valley are abundant and promise to receive much of the favoritism formerly given to roses. They are both excellent and fairly reasonable. Carnations are as usual very high in price, although not exceedingly scarce. A large number of varieties are being cut, Fair Maid and Lawson being most prominent. Varieties of red, which are the favorite for the occasion, are quite scarce and to be had at prices forbidding the idea of any profit for the retailer.

NOTES.

It is most significant this Christmas to note in the different windows of shopkeepers the lack of novelties to the display of which the most prominent positions are usually given. However, there appears throughout the city but little to attract the eye of an experienced flower buyer, the dealers seeming to tend only to the usual varieties of stock, chiefly because they are most profitible.

The first signs of spring, although not consistent in the least with our present weather, are seen in the large number of jonquils which shine forth from their stalls in the markets.They are considered at present very choice, as they really are until the market becomes swamped with them.

Thos. F. Galvin furnished the decorations for the Christmas dinner of the Beacon Society at the Algonquin club December 22. Poinsettias and evergreens were tastily arranged, a most appropriate combination.

Sydney Hoffman decorated the large ballroom of the Algonquin club for the assembly December 21. Great quantities of evergreens were used to advantage in transforming the room to a veritable woodland.

BOSTON, MASS.

W. H. Elliott is cutting from his Madbury conservatories Richmond roses which are the envy of rose growers, large blooms on stems four and five feet long, equaling in many features the American Beauty.

The Mishawan Greenhouses have been in the Christmas market with a good supply of excellent white and yellow chrysanthemums, as valuable a stock as any and easily salable.

M. B. Dallachie is cutting the first of the tasty little English primroses, which stock he controls until well into the season.

H. Delansky, of Lynn, is sending to market a stock of fine white sweet peas.

B.

Orange, N. J.

The regular monthly meeting of the New Jersey Floricultural Society took place December 7. Final reports were presented upon the recent fall show, from the secretary and treasurer, showing a deficit of $125, which will have to come out of the treasury of the society or be paid by one or more of the society's patrons. The annual election resulted in the following officers for the ensuing year: W. J. Bennett, president; Arthur T. Caparn, vice-president; Henry Halbig, secretary and William Reid, treasurer. A. T. Caparn and William Reid were re-elected.

The annual competition for the monthly floral display was closed, and the following winners' names, hitherto designated by numbers, were announced:

General display.—First, Peter Duff, average, 92 points; second, William Reid, average, 88 points.

Special orchid.—First, Arthur Bodwell, average, 90 points; second, Lager & Hurrell, average, for ten months, 92 points.

Special for gardeners without glass.—First, Arthur T. Caparn, average 85 points.

Attention was called by the secretary to the fact of Lager & Hurrell having entered after the competition was under way, the average for 10 months only, running but 15 points behind their competitor.

J. B. D.

EXETER, N. H.—Edgar Prescott is building a greenhouse, and with his son will start up in business. The young Prescott had been for some time in the employ of the late J. T. Smyth.

SUMMIT, N. J.—The East India Mango Co. has been incorporated, with a capital of $10,000. L. D. Wishard, J. L. Leeper and M. Leitch are the incorporators, and the company will cultivate mangoes, trees, plants, shrubs, etc.

WASHINGTON, D. C.—A cluster of American Beauty roses with card inscribed "From your sincere admirer, Joseph W. Babcock," greeted Senator La Follette when he returned from Wisconsin recently. At our last hearing the senator was still wondering whether this was a genuine offering from his late foe or the work of a wag.

THE

Rose Pink Enchantress

Is the best and the most profitable pink carnation in sight. If ever you had a good thing on your bench you will be sure to find one in the

Rose Pink Enchantress

Ask me who has it in your neighborhood, and I will unhesitatingly refer you to your own neighbor. It is **THE** carnation to grow.

Price:—Strong rooted cuttings, $7.00 per 100; $60.00 per 1000. Address

PLANTS GROWING IN FAVOR.

The tension of the few days preceding Christmas is passed and the market is settling down. Monday was a busy day among the retailers, but there was very little business in cut flower circles until late in the evening, when the demand became quite lively. American Beauty roses in special grades brought $1.50 each and the supply was not heavy even at this price. Bride and Bridesmaid roses brought 35 cents in top grades. Violets went to $2 per 100 but did not stay long at that point. Carnations dragged somewhat but fancy grades did very well and growers will hardly complain of low prices. The quality in general was high and quite in conformity with the maimum prices. Alma Ward in the white class and Mrs. C. W. Ward among the pinks were conspicuous and Beacon made its first appearance at a holiday season, fine in point of size but somewhat bricky in its crimson tone. Enchantress was good in almost every shipment, but in a few cases had been held too long. Lilies were somewhat scarce and brought easily 20 cents per flower. Gardenias were in fairly good supply, but did not bring fancy prices, at least not such as were expected, the dollar mark being exceeded only in a few instances. There was a great demand for orchids and few remained unsold. As was expected, the plantsmen got the best returns from the holiday trade. From Wednesday forward the business in plants strongly asserted itself and consumers readily acceded to the persuasions of the retailer to take a flowering plant or a combination basket instead of cut flowers. The high price of cut flowers helped the situation very materially. With American Beauty roses at $36 per dozen at retail the task was not hard. Azaleas were almost as popular as at Easter and sold well. Crotons, ardisias, araucarias and ericas were all in good demand, both as individual stock and as basket fillers. Small ferns cleaned up well and Boston and Scottii ferns had a good run. Poinsettias sold well, both cut and in growing form. Nice pans of these plants were largely used as table centerpieces and could hardly be beaten in popularity for this purpose. Geraniums, crimson flowered of course, were very largely used for hamper combinations and took readily with the trade. Cyclamens, primroses and daisies also figured in the demand for flowering stock.

The Market, December 26.—The market is slow to-day and reactionary in tone, prices in staple lines nearing normal.

NOTES.

Chas, H. Grant has returned from Chicago and is now filling his old position at Small & Sons.

C. W. Johnson, formerly of Seattle, Wash., sailed for Europe on the S. S. Baltic December 19.

Arthur Merritt, recently of the Merritt Floral Co., has joined the Thorley staff.

Siebrecht & Son made up 150 fancy baskets of orchid plants and they sold well.

Baltimore.

BUSINESS GOOD.

Sunday night a sudden and sharp change brought the weather conditions pretty close to zero, and Monday was clear and bright but so cold as to be uncomfortable for shoppers. The delivery of plants and flowers was attended with labor and trouble enough, all the wagon stoves being brought into requisition, and double wrappings as protection against the keen wind and freezing temperature. Notwithstanding the drawbacks the stores were full of customers. Stock of all kinds was abundant and all conditions pointed to a satisfactory holiday trade. Baskets of all sizes, shapes and materials seem ta have had the call and the bright colored foliage and flowering plants were much in request. Poinsettias, which a week or two ago were thought to be scarce, appeared suddenly in quantities large enough to more than satisfy all demands. Carnations were not in good supply. Violets did not reach the old-time proportions. Some chrysanthemums are still on the market, and roses are more abaundant in quantity, except American Beauty, than superior in quality, the weather not having been favorable in this regard. S. B.

Milwaukee.

STOCK AND PRICES WERE GOOD.

The marked features of the Christmas business this season as compared with the past are, first, the stock averaged very good; in fact, the bulk of it has been what was called fancy stock but a short time ago. Second, prices were high and held firm to the end; very little unexpected stock came in to cause a slump at the close. Third, the weather was ideal, not only on Christmas day but for several days previous.

At Holton & Hunkle Co.'s, where enormous quantities of flowers were distributed, there was no display of flowers whatever, owing to their system and the manner in which they have their growers trained. The flowers were counted out and repacked for delivery as fast as received. We know of 18,000 of Loeffler's violets arriving and being billed at $2.50 per 100, and they were out of sight in 30 minutes. In roses they had all the Liberty and Bridesmaid required but were short of Bride and American Beauty. Their fine stock of poinsettias was never shown in their store, all having been sold long before Christmas. Their success in growing plants to meet the special needs of patrons, where ordinary growers have been remiss, has been accorded well deserved appreciation.

Pollworth's trade was large, the biggest ever, as Joe put it. This firm ran short of roses, particularly red, but were able to make up with red carnations. Customers asked for poinsettias more than heretofore, indicating what must be provided for another year. When moved from the old plant to the new next summer, there will be provisions for a few houses of pot plants so as to meet this demand.

Miss Ryan, with J. M. Fox & Son, reports very satisfactory business. Although prices were high the quality was good and everything went smoothly. More violets could have been used to advantage. We notice here a continuous supply of good bouvardia grown by Stapes. It is gratifying to note that the good qualities of this old flower are again being appreciated by the public.

At McKenney's the situation was quite satisfactory. Mrs. Davis says the demand for poinsettias and violets was quite a feature. Poinsettia plants sold before they had time to arrange or label them. Mrs. Davis says that the prejudice against everything but red for Christmas is fading away. In this beautiful display we noticed some very fine sweet peas and good cypripediums.

At Currie Bros.', who also report increased business, we were pleased to note a lot of the old Begonia incarnata, a beautiful and serviceable pot plant. Wm. Currie says they were particularly well supplied with Liberty and Richmond roses that sold at $10 per dozen. Carnations were $2, the best American Beauty, $24, and violets, $5 per 100.

Zimmerman's trade was large, particularly in plants. His force worked all night Sunday and had all the orders out on time and in good shape.

We regret to learn that W. A. Kennedy is suffering with a severe cold.

C. B. W.

NEW YORK.—A second attempt to kill Pasquale Deodado by throwing a bomb in his store has been made, it is supposed by members of the "black hand" fraternity. Threatening letters demanding money had been received by him and his brother, who assists him in running his store. The house was badly shaken and the front of the store and several windows blown out, but no one seems to have been hurt.

VICTORY HAS MADE GOOD.

Place your orders early for Rooted Cuttings. Prices: $6.00 per 100; $50.00 per 1000.

ALL vegetable and agricultural seeds, with the exception of peas, beans, rape and cotton, have to pay a duty of 15 per cent ad valorem to enter Japan. Varying duties from .20 to .45 Japanese yen ($0.498) per kin (1.32277 pounds) are levied upon those mentioned.

AN INTERESTING article entitled "The Seed Business as a Mail Order Proposition" appears in the December issue of Agricultural Advertising. It has special reference to the seed testing and nursery department of Vaughan's Seed Store at Western Springs, Ill., and is illustrated from photographs taken there.

SEEDS taken to Fort Conger, about 490 miles from the North Pole, by the Greeley expedition in 1883 were found in 1899 by the Peary party and sent home to the United States. These remained unplanted until the spring of 1905 when a package each of lettuce and radish were sown. The lettuce failed to germinate but about half of the radish seeds grew and reproduced seed.

NEW YORK.—The value of seeds received at this port during the week ending December 15 was as follows: Anise, $1,087; canary, $1,705; caraway, $6,244; cardamon, $622; castor, $3,019; clover, $762; coriander, $1,050; cummin, $3,292; fennel, $475; grass, $1,762; hemp, $1,873; millet, $2,130; mustard, $11,068; poppy, $406; rape, $148; sugar beet, $10,985; other, $10,825.

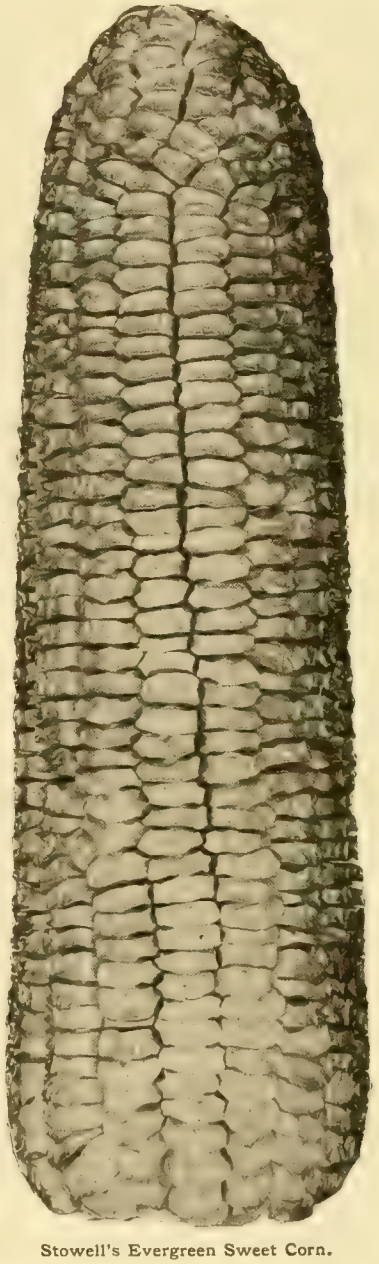
Stowell's Evergreen Corn.

The illustration herewith shows Stowell's Evergreen sweet corn as it is being developed by the Nebraska seed corn growers for the canners' trade. It will be noted that this type has a moderate sized butt, the ear holding its diameter well toward the tip.

The ear illustrated was 8¾ inches long and 8¼ inches in circumference at the widest part.

Samoan Copra Crop Curtailed.

Consul George Heimrod, of Apia, writes that the exports of copra from Samoa in 1905 amounted to 8,600 tons, of which 5,000 tons were sun dried and 3,600 tons cured by the hot air process. The copra produced by hot air is used exclusively by manufacturers of confectionery, and brings from 10 to 20 per cent more than the sun dried article. The flow of lava from the volcano of Savaii has covered over 40,000 acres of productive soil, on which many thousand cocoanut bearing trees were planted. The loss of copra from this source is figured at 500 tons.



Stowell's Evergreen Sweet Corn.

Indoor Fruits and Vegetables.

The prices of indoor fruits and vegetables at Chicago December 22 were as follows: Grapes, imported, Black Hamburg, $2.50 per pound; Muscats, $3 per pound; cucumbers, $1.25 to $1.75 per dozen; lettuce, 35 to 50 cents per box; tomatoes, 12 cents to 15 cents per pound; muchrooms, 40 cents to 60 cents per pound; asparagus, 25 cents to 35 cents per pound; rhubarb, 10 cents to 12½ cents per pound; radishes, 35 cents to 50 cents per dozen bunches.

Ants in a Greenhouse.

ED. AMERICAN FLORIST:—

How can I get rid of ants in the pots and carnation bed of a small greenhouse without injury to the plants?

J. H. F.

I have found a very simple and thorough remedy in Paris green and sugar. Add just enough Paris green to white granulated sugar to turn it to a light green color, then dust it lightly among the pots on and under the benches, and the greenhouse will be rid of ants in a very short time. One should be careful not to put any into the pots or on a bench containing soil, as the Paris green is liable to damage the plants.

As to ants being a benefit in the greenhouse in ridding it of other insects, I prefer to get rid of ants by all means, as they are an eyesore to any one working among them. Paris green will rid the house of sow bugs as well as ants. I also believe that ants are dangerous around a greenhouse. We had a lot of kentias in a greenhouse. On one bench the plants were perfectly clean, while on another bench we noticed that a few of the palms had scale. A lot of ants got into these palms and in a short time every palm in the house was infested with scale. It may be, as Mr. Roman says, that ants may be of some benefit, but it is my opinion that if such is the case they would have cleaned the palms of scale. I really think that instead of cleaning plants of scale, ants carry scale from one plant to another. This being my opinion, I mixed some Paris green and sugar one afternoon and dusted it on and under the benches. The next morning there was not a sign of an ant anywhere, and there has been none since.

A quart of sugar, with a little Paris green mixed through it, is enough for a house 25x100 feet. We also use this for sow bugs, finding it much more easily handled than when mixed with oatmeal, and much more effective. It also does away with a lot of mouldy oatmeal scattered through the greenhouses. EDWARD H. SCHWERIN.

MILWAUKEE, WIS.—It is stated that Charlotte, daughter of Frank P. Dilger, and Chas. Bundee, of Kewanee, Ill., are to be married soon.

The Nursery Trade

American Association of Nurserymen.
Orlando Harrison, Berlin, Md., President; J. W Hill, Des Moines, Ia., Vice-President; George C. Seager, Rochester N. Y., Sec'y.
Thirty-second annual convention, Detroit, Mich., June, 1907.

NEW YORK.—Trees and plants to the value of $20,666 were received at this port during the week ending December 15.

MT. CARROLL, ILL.—J. L. Wood, of Sunny Ridge, met with a serious accident recently. While cutting down a tree he was struck on the head by a falling limb, a large scalp wound being caused that took several stitches to close.

AN ARTICLE entitled "Strawberry Plants as a Mail Order Proposition" by W. M. Burke appears in Agricultural Advertising for December. The text is interesting and views of the breeding beds and packing rooms of the R. M. Kellogg Co., Three Rivers, Mich., to whose nursery the article refers, are given.

PLANTS of the rose acacia grafted standard high are commonly sent out and are very suitable for forming graceful drooping plants quickly, but there is always a danger of the heads being blown off in exposed positions. Naturally grown specimens are better but in any case the wood is rather brittle and easily broken.

FRUITS FOR CALIFORNIA.—Yellow Newtown Pippin, Yellow Bellefleur, White Winter Pearmain, Gravenstein and Red Astrachan apples, Royal apricot, Napoleon Bigarreau (locally known as Royal Ann) Cherry, Bartlett pear and Wickson plum are the varieties to grow for Californian trade, these being the most generally cultivated of the hardy fruits there.

HEDGES of hornbeam or beech are fine as a protection to nursery quarters. Both trees stand the somewhat close, clipping necessary to keep them in track and either forms an excellent wind screen. Sometimes they show their dislike to soil or situation by retaining the old leaves until spring, but though this would be unsightly in the dressed grounds, it is rather an advantage than otherwise when used for the purpose indicated.

BEAUTIFUL as are some of the hardy herbaceous plants of a spreading habit of growth some of them are dangerous to plant in positions where it is desirable to keep each in its alloted space. The fine Japanese anemone for instance is one of the most beautiful plants in existence, but its roots run all over the garden if allowed to, each little bit of root growing and rapidly elbowing others out of existence. Harpalium rigidum is far worse. Once planted in good soil the plant becomes a perfect pest, pushing through turf, gravel walks, or drives with great persistence. Yet it is a fine showy plant and of real merit if only it could be kept in place.

SANTA BARBARA, CAL. — The Santa Barbara Nursery Co. has been incorporated with a capital of $50,000 and Jos. Sexton, president. The other members of the firm are Wm. J. Pettingell, Louis F. Horner, Thos. Compton and Ernst Sexton. This concern will do a general nursery and bulb growing business.

LULA, MISS.—A rose and shrub farm is to be started on Gov. Alcorns old cotton plantation, about four miles north of here, on the Yazoo pass. At least 1,000 acres are to be planted by a northern corporation and the produce is to be shipped to the north and west. The soil is well fitted for the purpose, being a black sandy loam.

THE Iowa Park and Forestry Association at its recent annual meeting elected the following officers for the coming year: L. H. Pammel, Ames, president; W. A. Burnap, Clear Lake, vice-president; T. H. McBride, Iowa City, secretary; H. F. Wickham, Iowa City, treasurer; H. T. Baker, Ames, Eugene Secor, Forest City, and Miss E. McGee, Farley, executive board.

FAIRMONT, MINN.—McKisson's Fairmont Nurseries have purchased the residence and farm of John Johnson in the southern portion of the city limits, on Budd lake. It is understood that G. D. McKisson paid $10,000 for this property, and will remove his plant thereto, about a mile from the present location. It is an ideal property, with fine, commodious buildings, and in every way convenient for that business as well as the making of a fine home.

Thomas Meehan Horticultural Society.

At the regular semi-monthly meeting of the Thomas Meehan Horticultural Society held in the plan room of the landscape department's offices, the following officers were chosen for the ensuing year: Samuel Baxter, president; William Lamb, vice-president; Henry A. Illman, secretary.

After an interesting and optimistic address by the retiring president, Warren Chandler, the subject for the evening, "The Winter Storage of Vegetables, Fruits and Plants," was discussed from several points of view. S. Mendelson Meehan gave an address on the storage and preservation of fritus, while the practical methods of the winter storage of vegetables, flowers, trees and roots were treated in the order named by Messrs. Illman, Hemming, Lamb and Baxter.

The discussion following the address was participated in by nearly all the members present and an interest manifested in the society which the firm of Thomas Meehan & Sons, Inc., encourages for reasons both educational and practical.

Large Orders For Forest Trees.

W. F. Schell, of the Wichita Nursery, Wichita, Kans., has just received orders for 250,000 trees to be used for planting forest reserves. Underwood and Viels, of Hutchinson, Kans., purchased 150,000 Catalpa speciosa and R. V. Convis, of Cheyenne, Okla., 100,000 of this and Robina pseudacacia, the black locust. Previous to this R. Convis had purchased 210,000 trees from the same nurseryman and it was the superior quality and hardiness of the former lot that led to the more recent purchase. These trees are to be planted about 1,200 to the acre so that from these orders more than 200 acres of land will be turned into forest. Both these species are valuable timber trees and quick growing, so a valuable crop should result.

Nurserymen Landscape Despoilers.

ED. AMERICAN FLORIST:—

Referring to your review of article appearing in Country Life of America under the above heading (see issue of December 8, page 958), no doubt many a party who is anxious to do some garden planting is imposed upon as well as being the victim of the well-enough meaning but ignorant practitioner of the gardening art and will continue to be just so long as the buyer is easy and willing to believe all he is told without due information as to responsibility and ability of the one imparting it.

Landscape gardening is a fine art and naturally has as many pretenders as any of the other fine arts which offer a livelihood to these followers. Just now when the country is awakening to the possibilities of gardening and practically everybody who has any land at all about their home is anxious to make it as attractive as possible, there arises a demand for expert advice on such matters and a class of competent men to furnish such advice. Some of these from the ranks of nurserymen, find this a profitable field for their endeavors and are furnishing a valuable service to their country.

Likewise there is no end of pretenders from various walks of life who think they see in this new activity a golden opportunity to make money and with a dangerous combination of ignorance, presumption and unscrupulousness in varying combinations prey upon the would-be buyer's ignorance. Would a man think of trusting the making of plans for a house to anybody who might present himself and offer to do a lot of something for nothing? That is practically what the buyer does who is persuaded to accept a planting plan from an unknown party, the party's object usually being to dispose of as much material as possible.

To those familiar with such matters it is a source of perpetual wonder why so many who use better sense in other matters fall such easy victims to this designing, or ignorant class, but so long as good game abounds there will be plenty of hunters in the field. Let the party who has a landscape problem to work out consult with those who have demonstrated by their work that they are competent to advise, be he a nurseryman or otherwise. If they are judged by what they are doing and have a reputation for fair dealing, the purchaser will be protected from imposition.

E. F. C.

GRAFTON, MASS. — Thomas Hesky & Sons, who leased the Norcross & Stratton greenhouses, South street, finished filling them, October 24, with carnations. The houses were built two years ago by the latter firm, but this fall they vacated them, and went back to Denver.

PEONIES.

From our large and select stock, such as the following varieties:

Prince Charles,	Philomile,
Mons. Boquil,	Lord Salisbury,
Leonie,	Festiva,
Duchess of Sutherland,	Hypatia,

FLOWERS IN SHORT SUPPLY.

Florists are all complaining about poor quality and shortage of nearly all flowers. Only the inside stuff is worth using owing to the long-continued cold weather that came very early this year. Following this very cold weather, we have had some fine rains, that will start the seed business nearly or quite a month earlier this season than usual. All the seedsmen report brisk business already. A continued rain has been falling for nearly a week, a sort of an Oregon drizzle.

NOTES.

Frank Lichtenberg, formerly of Bertermann Bros. Co., Indianapolis, Ind., has accepted a position as assistant with J. W. Wolfskill. S. R. Lundy, decorator for the same firm, made a flying business trip to San Francisco and he reports stock of all kinds for holiday trade very scarce there.

The Rising, Dunscomb Co., wholesale florists and general nurserymen, who recently incorporated, as noted in a previous issue, have opened a wholesale floral store at 205 North Broadway, from which depot they are now distributing their entire cut flower output.

Stock at the present is very scarce, as wind, rain and frost have about put the outside flowers out of business. Poinsettias are not up to the standard this year and it will keep the florists busy to make a good Christmas showing. O.

TERRYVILLE, CONN.—Edward Fenn, of High street, is dangerously ill at his home.

THE NEW

Cyclopedia of American Horticulture.

BY PROFESSOR LIBERTY H. BAILEY.

Over 4,357 articles in all by 450 expert writers, including practically all the best botanists, nurserymen, seedsmen, florists, market gardeners and experimental station horticulturists. Occupying 2,100 pages and covering 24,434 plant names, 2,800 detailed illustrations, enormously increasing the ease of identification, and 146 beautiful full page illustrations.

Every reader of this paper who is interested in farming, in gardening, in trees, in shrubs, and all out of door matters, absolutely needs this set. It takes the place of all others combined on American gardening.

In Six Great Quarto Volumes of 2,100 Pages You Find:

Descriptions alphabetically arranged of all—over a thousand—of the native trees, plants and flowers worth cultivating, with keys enabling you to name any species, as well as to find all information regarding it. Practical articles by leading experts of the country on all phases of commercial plant production and greenhouse management—cut flowers, vegetables, etc.

Fullest cultural instructions for every flower, fruit and vegetable, tree and ornamental plant you may wish to grow.

SPECIAL OFFER.

The regular price is ***$30.00.*** For a few weeks we are able to offer this new and revised edition with the new material added at ***$22.80*** cash. This offer will be withdrawn January 1, and the price increased.

Rooted Cuttings of this Most Prolific White Carnation

Will be ready for delivery in January.

Price: $5.00 per 100; $40.00 per 1000.
250 at 1000 rate.
5 per cent discount for cash with order.

RUDOLPH FISCHER
Great Neck, L. I., N. Y.

MABELLE, New Pink Carnation for 1907.

Color—A peculiar shade of lovely pink, with a faint yellowish cast; several shades lighter than the Lawson Unlike most pinks, the brightest sun does not injure the color. Size—3 to 4 inches in diameter when established. Odor—Pleasing, but not strong. Stems—Invariably strong, but always graceful, ranging from 12 to 30 inches during the season. Habit, etc.—A very quick, active grower, making specimen plants in a short time, even from late cuttings On account of its rapid growth, requires supporting very soon after benching. Gets away rapidly, blooms early and gives long stems right from the start. Productiveness—Prodigious is the best word we know of to use here. It is the most incessant bloomer, early and late, we have ever grown. Stock limited. Delivery January 5 to 10 and later. Price, $12.00 per 100, $100.00 per 1000.

THE H. WEBER & SONS CO., Oakland, Md.

SCOTTII FERNS.

We still have a fine stock of this beautiful fern to offer. Fine big plants for 4-in. pots 10c; 5-in., 15c; 6-in., 25c. This is a fair sample of the many letters received daily: SAN ANTONIO, TEX.

W. W. Coles:—I was very much pleased with my shipment of ferns from you and their condition, so I send another order. F. C. SUCHEY.

Order quick. We need the room. Cash.

FLORISTS' CLUB MEETING.

H. Kope, in his practical and comprehensive paper, read at the last meeting of the Florists' Club, paid a high tribute to the originators of the valuable new varieties brought out from year to year. He thought the growers could well be guided in the selection of the varieties most suitable to grow, by the judgment of the flower buying public, as indicated by their choice when buying, or viewing them on exhibition. He cautioned growers against over production, and deprecated the present surplus of flowers, upon the market, especially of the poorer grades. A reduction in the number of varieties from the long list now grown by some was suggested, and the following were recommended for extended culture: George Kolb, Polly-Rose, Ivory, Adelia, Arline, Majestic, Jerome Jones, Maud Dean, A. J. Balfour, Wm. Duckham, Dr. Enguehard, R. Halliday, H. Hurrell, Major Bonnaffon, G. Pitcher, Yellow Jones, Nagoya and Golden Chadwick. At the conclusion of the reading of the paper the essayist was given a vote of thanks and a general discussion of the subject was taken up. Another member was added to the club's roll and the application of still another, to be voted upon at the next meeting, received.

At the show in the rooms of the Michigan Cut Flower Exchange, the principal exhibitors were as follows:—

The Park & Boulevard Commission of Detroit: A large collection of chrysanthemums and foliage plants; J. Breitmeyer's Sons: Thirty varieties of chrysanthemums, all of them splendid specimens. Exhibit of roses including Killarney, Liberty, American Beauty, Bride, Bridesmaid and Richmond; Harry Smith, gardener to Mrs. John S. Newberry, Grosse Pointe: Vase of chrysanthemums, 12 varieties; Robert Klagge, Mt. Clemens: La Detroit, Bridesmaid and Richmond roses; B. Schroeter: new carnation rose pink Enchantress; A. Von Boeselager, Mt. Clemens: Carnation Moonlight, vase of light rose pink sport of Lawson, and vase of seedling carnations, prominent among them being a large cerise pink and a good crimson; A. B. Louis, Pontiac, Michigan: Chrysanthemums, 15 varieties; Fred Pautke, Grosse Pointe, Michigan: Vase of 25 varieties chrysanthemums and vase of Enchantress carnations; Shore & Haigh, Evart, Michigan: Marie Louise violets; A. J. Stohelin, Sand Hill, Michigan: Collection of chrysanthemums including Dr. Enguehard, Arline and Mrs. Weeks: J. E. Smith, Wyandotte, Michigan: White seedling carnation Moonlight, chrysanthemums of his own production, also sweet peas; Chicago Carnation Co., Joliet, Ill.: Carnations, Aristocrat and Red Ridinghood; J. M. Dickson, Northville, Mich.: Chrysanthemums Chadwick and Bonnaffon; J. J. De Carteret: Vase of Chrysanthemums; Beard Bros.: Three vases chrysanthemums; The E. G. Hill Co., Richmond, Ind.: Chrysanthemums Golden Dome and a sport from Yellow Eaton, Mlle. Jeanne Rosette, a large pink, maturing best at Thanksgiving; and J. F. Sullivan: Collection of chrysanthemums.

SURPLUS STOCK

In Excellent Condition.

NEW YEAR, the time of balls and parties, is now on the programme. What will you use to decorate the tables and homes of your customers with? Take my advice and use (for a change) an

Araucaria Compacta Robusta or a Glauca

(the size and kind I grow). You will be surprised at the effect that it will make on the table or wherever it is placed. The plants I have are as perfect as nature could produce. The brush of an artist could not paint them any better, and prices are cheap. Just look:

6 to 7 in. pots, 4, 5 to 6 years old, 4, 5 to 6 tiers, 25 to 30 in. high and wide, $1.50, $1.75, $2.00 to $2.50 each.

EXCELSA GLAUCA, 5 years old, 7-in. pots, specimen plants, 6 to 7 tiers, 30 to 35 in. high and wide (you never saw anything better in your life than these are), $2.00, $2.50 to $3.00 each; 6-in. pots, 3 years old, 3, 4 to 5 tiers, 16 to 20 in. high and wide, $1.00 to $1.25 each.

ARAUCARIA EXCELSA, 6-in. pots, 5, 6 to 7 tiers, 4 years old, 25 to 30 in. high, $1.00, $1.25 to $1.50.

KENTIA FORSTERIANA, 7-in. pots, made-up plants, 1 large size, about 45 to 48 in. high in the center, and 3 smaller sizes, 25 x 30 in. high around, which gives them a good appearance, $2.00 to $2.50 each; 6-in. pots, single plants, 36 to 45 in. high, 5 to 6 good leaves, 4 years old, $1.25, $1.50 to $1.75 each; 6-in. pots, 32 to 36 in. high, 5 to 6 good leaves, 4 years old, $1.00 each; 5½ to 6 in. pots, 4 years old, 30 in. high, 5 good leaves, 4 years old, 75c.

DRACAENA BRUANTI, (imported), 30 in. high, full of green, waxy foliage from top to bottom: the only Dracaena for parlor, store or house culture, that can stand heat, dust and dirt; 6-in. pots, 50c, $5.00 per doz.

BOSTON FERNS, 7-in., very bushy, only 75c; 6-in., 50c or $5.00 per doz.; 5-in., 30c to 35c; 4-in., 20c

NEPHROLEPIS SCOTTII, 8-in., as big as a washtub, worth $3.00, now $1.50; 7-in., as big as a bushel basket, worth $1.50, now 75c to $1.00; 6-in., 50c; 5¼-in., 40c; 5-in., 30c to 35c; 4-in., 20c to 25c.

NEPHROLEPIS BARROWSII, 7 in. pots, as big as a bushel basket, 75c to $1.00 each; 6-in. pots, large, ready for 7-in., 50c; 5½-in., 40c; 5-in., 35c; 4-in., 25c.

MAIDENHAIR FERNS, 6-in. pots, 40c.

AZALEAS, in bloom and bud, Simon Mardner, double pink; Vervæneana double rose variegated; Deutsche Perle, double white, 75c, $1.00, $1.25 to $1.50 each.

CASH WITH ORDER. All plants must travel on **purchaser's risk only.**

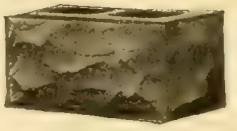
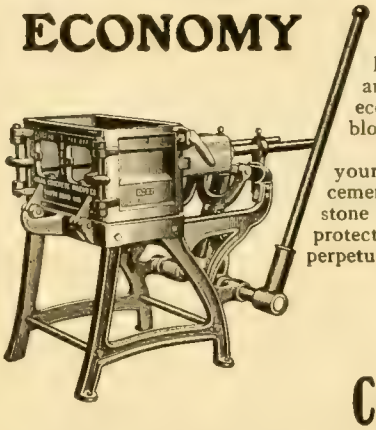
FROST-PROOF ECONOMY





Ideal Hollow Concrete Block construction will protect your greenhouse from frost and secure greatest economy in fuel. The illustration of hollow block explains it's resistance to frost.

With the Ideal Concrete Machine you can yourself make these blocks from sand, gravel and cement at little cost—far below the cost of brick, stone or lumber. Ideal Blocks not only give frost protection, but are absolutely fire-proof, and effect a perpetual saving in insurance.

IDEAL Concrete Machines

May be operated by any man without previous experience. The process of making blocks is simple as making mortar, Blocks for every building purpose, with plain, tooled, ornamental face or natural stone effect made with the same machine. Simple, durable and adaptable to any size block within capacity.

Our catalogue will show you how to secure frost protection and fuel economy, as well as initial saving over cost of other materials. Write for it and it's freely yours.

BOOKS FOR Fflorists.

The time is coming along when these are needed and opportunity at hand for reading them. Every one of the following should be in your library.

Send prices quoted and we send the books.

PRACTICAL FLORICULTURE (Peter Henderson).—A guide to the successful propagation and cultivation of florists' plants. Illustrated. 325 pages. $1.50.

FUMIGATION METHODS (Johnson).—A practical treatise on cheap and effective means of destroying insect pests. Handsomely bound and profusely illustrated. 250 pages. $1.00.

STEAM HEATING FOR BUILDERS (Baldwin).—Contains valuable data and hints for steam fitters and those who employ this method of heating. The 350 pages are fully illustrated. $2.50.

MANUAL OF THE TREES OF NORTH AMERICA (Sargent).—The most complete and authentic work on the subject. The pages number 826, with over 600 illustrations. $6.00.

DWARF FRUIT TREES (F. A. Waugh).—Their propagation, pruning and general management, adapted to the United States and Canada. It has 45 illustrations and 123 pages. 50 cents.

CHRYSANTHEMUM MANUAL (Smith).—By an expert who has given his undivided attention for twenty years to the improvement of the chrysanthemum and its culture in detail. Profusely illustrated. 40 cents.

GREENHOUSE CONSTRUCTION (Taft).—It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 118 illustrations. $1.50.

HEDGES, WINDBREAKS, ETC. (Powell).—A treatise on the planting, growth and management of hedge plants for country and suburban homes. A volume of 140 pages, with twenty-two illustrations. 50 cents.

THE BOOK OF CUT FLOWERS (R. P. Brotherston). — A complete guide to the preparing, arranging and preserving of flowers for decorative purposes. Handsomely illustrated. 300 pages. $1.50.

SUCCESS IN MARKET GARDENING (Rawson).—Written by one of the most prominent and successful market gardeners in the country, and who has the large t glasshouses for forcing vegetables for market in America. Outdoor and indoor crops are treated. Illustrated, $1.00.

THE VEGETABLE GARDEN (Vilmorin-Andrieux).—The best and most complete book on vegetables ever published. There are 782 pages and hundreds of illustrations in this English edition, edited by Wm. Robinson, the noted English horticultural writer. **$4.50**

GINSENG (Kains).—At the present time, when so much interest is taken in ginseng, it will be interesting to peruse this volume, which tells all about the plant in a way that all may understand. The 144 pages are freely illustrated. 50 cents.

THE BOOK OF MARKET GARDENING (R. Lewis Castle).—One of a series of handbooks of practical gardening. Shows the methods adopted by many growers who have made commercial gardening a highly successful business, based upon experience and observation in Great Britain and Europe. Illustrated. $1.

THE CULTURE OF WATER LILIES AND AQUATIC PLANTS (Henderson).—Growers of hardy and tender water lilies and other aquatics will find this an excellent guide in cultural and descriptive matters. The lists of varieties have been very carefully prepared. Handsomely illustrated. 50 cents.

LANDSCAPE GARDENING (Maynard).—The development of landscape art within the past few years compels the wide awake florist to keep posted on this branch of the business. The many suggestions of this book will be found helpful every business day. It contains 338 pages, 165 illustrations. $1.50.

THE ORCHARD AND FRUIT GARDEN (Powell).—One of the most complete works we have seen on this subject for a considerable period. It is divided into three parts, the orchard, the fruit garden and cultural directions. The volume is well illustrated and the author is a practical man who knows his subject. The book contains 321 pages. $1.50.

LANDSCAPE GARDENING (Waugh).—This is a very useful little book on the art of landscape gardening. It will be found exceptionally valuable to amateurs, as it covers in detail the numerous problems that come to the owners of small gardens. It is freely illustrated and the pictures have been chosen with a view to informing the reader rather than decorating the book. 50 cents.

Louisville.

TRADE BRISK.

Business last week was unusually good all the way through and the supply of stock was about equal to the demand. Roses of good quality are in fair supply and have a heavy demand. Carnations move exceptionally well and the quality and supply are both satisfactory. The demand for violets has been a little slow. The supply and quality are very good. Lily of the valley is good in supply and quality and the demand is satisfactory. A few lilies are on the market, but it takes a fancy price to touch them. Stevia is used in great quantities, and green goods are in fair supply. There will be a fine line of blooming plants in for Christmas, but cut flowers will be somewhat scarce.

NOTES.

Jacob Schulz has his usual fine lot of Begonia Gloire de Lorraine.

William Walker has some very fine adiantums. F. L. S.

Columbus, O.

PREPARING FOR CONVENTION.

Preparations are being made for the joint convention of agricultural interests to be held here January 15-18. Four organizations, namely: The Ohio Horticultural Society; the National Breeders' Association; the State Agricultural Association and the Farmers' Central Institute will be in session. The day sessions will probably be held in the agricultural department building at Ohio state university, and at night the board of trade auditorium will be used. W. W. Farnsworth, secretary of the State Horticultural Society, has now a desk in the rooms in the statehouse occupied by the board of agriculture. He will make Columbus his headquarters for the winter. CARL.

ELMIRA, N. Y. — Louis Solden has leased a store at the corner of West Water street and College avenue, which he intends opening shortly as a florist and seed store. He has had considerable experience in various European countries and is an expert linguist.

Small Flower Shows.

The second annual show given by the Waxahachie, Tex., Daughters of the Confederacy closed November 17, by the distribution of the prizes taking place in the evening.

Bad weather spoiled the attendance at the South park conservatories on the occasion of the chrysanthemum show at West Seneca, N. Y., November 11.

The sixth annual show of the Dobbs Ferry, N. Y., Horticultural Society was held November 9 and 10, with the pleasing result that $300 were added to the hospital fund.

Durant, Miss., was en fete for the chrysanthemum show November 17. Fine flowers and plants were shown at the City hall.

The flower show given under the auspices of the Lesche Club at Natchitoches, La., November 17 was a great success.

Music and a candy store were added to the delights of the chrysanthemum show at Victoria, B. C., November 13 and 14, the proceeds going to the Orphan's Home.

The twelfth annual flower show was held at Crystal Springs, La., November 10 and 11. Prizes for 30 blooms downwards and specimen chrysanthemums, ferns and others brought out a fine competition.

Under the auspices of the Hazelhurst, La., Floral Club a fine show was held November 15, thousands of fine flowers being shown.

About $50 was raised toward the funds for the Confederate monument at Bamberg, S. C., by the aid of a chrysanthemum show, which proved very popular.

A chrysanthemum show and supper was given at the Montgomery House, Newberry, S. C., November 9, by the ladies of the Aveleigh Presbyterian church. The display of flowers was the best seen in the town.

The Denison, Tex., civic improvement league held their first annual flower show November 9, when a fine display was forthcoming.

A very successful show of the autumn queen was held at Atlanta, Ga., in the women's club rooms at the Grand hotel.

Spartanburg, S. C., held its first flower show November 7, a ten dollar palm, a cut glass bowl and an artistic vase being among the prizes.

Flowers and babies were the attractions at Greenville, Tex., November 8. The display of roses and chrysanthemums is said to have been fine.

Good prizes were given at the chrysanthemum show held at Savannah, Ga., many local florists exhibiting.

The thirteenth annual chrysanthemum show and fair of the Omro, Wis., Horticultural Society was held at the opera house November 21-23, a speaking contest and other attractions being furnished.

The Best Way to Collect an Account

is to place it with the

NATIONAL FLORISTS' BOARD OF TRADE, 56 Pine St., New York.

Why? Because many debtors will pay the Board, fearing otherwise a bad rating in our Credit List. Full information as to methods and rates given on application.

Christmas Trade Reports.

AGAIN we have to chronicle a decided improvement in holiday business for 1906. In almost every report from our correspondents an increase of trade is reported, a very small proportion, indeed, being of a contrary character. Some show an increase of quite a phenomenal nature, while the majority tend to reassure fellow craftsmen of the stability and importance of the trade throughout the country. In many sections the dull weather, occurring for a month before Christmas, led to a falling off in quality of stock, possibly in quantity also, but in a few more favored locations this was not felt. A pleasing feature is the increase of sales of small amounts to persons of moderate means, such trade being usually indicative of general prosperity. Plants in pots for decoration showed quite a remarkable increase, but satisfactory as this must be, there is a growing opinion among retailers that in part at any rate this is occasioned by the high price of cut flowers. Times of exceptional demand, coupled with unfavorable climatic conditions do unquestionably account in a great measure for high prices and growers naturally have to make the best harvest they can. Artificial inflation of values has not been complained of as much as in former holidays, a healthful sign we hope to see continue. Regarding bulbous stock there is no special increase to record and naturally growers will not look on this as an unmixed evil. Reports from our correspondents follow:

WILMINGTON, DEL.—H. P. Potter reports a falling off in trade of about 20 per cent, though the quality of the flowers was better than last year. The supply was just about equal to the demand.

ATLANTIC, IA.—The Atlantic Greenhouses sold about 25 per cent more than last year at better prices, and at this could not fill all orders. Roses were not as good in quality as usual, but carnations and violets were good, with a heavy demand. Flowering plants, holly, mistletoe and greens generally sold better than for years previously.

GRAND FORKS, N. D.—Trade must have been exceptionally good here, 25 to 30 per cent being Frank V. Kent's estimate of the increase in the total sales. Prices too were higher and the supply on the market was insufficient except in the case of bulbous flowers, for which the demand was slight. Roses were the flowers principally in demand.

NORWALK, CONN.—R. G. Handford reports that more first class stock could have been sold were it forthcoming, the sales and prices being about as usual. Bulbous flowers were not in great demand and the quality of the flowers was below par owing to the dull weather experienced. Red carnations, Richmond roses, pot poinsettias and ardisias were in special demand.

AUBURN, ME.—Geo. M. Roake writes that the high prices of holiday cut stock checks trade and reports an increase in the sale of plants. The supply of all flowers was equal to the demand and the quality was better than last year. Carnations were in special demand.

AURORA, ILL.—Cut flower sales were better and the sales of pot plants 20 per cent better, says Peter Freeman. Bulbous and ordinary stock was in fine demand and the supply was good, the prices being about the same as last year. Carnations sold best of all but the violet sales were rather disappointing.

HALIFAX, N. S.—A 15 per cent increase in sales at slightly higher prices, is the report of F. K. Killam. The flowers were of better quality and not sufficient to meet the demand. Bulbous stock was good and sold well, but carnations and roses led. Plants all round were in increased demand, especially primulas and made up pans of ferns and foliage plants.

FREDERICTON, N. B.—Some 25 per cent increase in sales at higher prices than last year, write John Beddington & Son. Carnations were short in supply and but few roses were left, the quality of the latter not being as good as that of the former. Plants of primulas, azaleas, poinsettias and others sold well and there was an increased demand for Boston ferns and holly.

GARDNER, MASS.—F. W. Murdock notes a considerable increase in business over last year and better prices. The quality of the flowers was up to the average and the supply about equal to the demand. Azaleas, cyclamens, primulas and other flowering plants were in great demand.

MEXICO, MO.—C. C. Sonneman reports sales as 25 per cent better than last year and the prices 25 per cent higher. The supply of flowers was not equal to the demand and the quality, especially of carnations, was better. Carnations and flowering plants were in great demand, also all kinds of decorative material of an artificial nature.

WINONA, MINN.—About 20 per cent increase over last year is the report on sales from Fuhlbruegge Bros., with prices 30 per cent higher, although the supply was about equal to the demand. Red roses were especially asked for and the quality was better in all cases than last year. Flowering plants met with an excellent demand.

DENISON, TEX.—The sales were about 15 per cent less than last year, according to the Denison Greenhouses, yet the supply of flowers was not up to the demand, neither were they of as good quality, the dull wet growing season being the cause of this. Plants met with a good demand, but there was nothing exceptional in any phase of the market.

BEATRICE, NEB.—The Dole Floral Co. report better sales than last year with prices about the same, except on carnations which brought more money. The supply of flowers was not equal to the demand, but what there was showed better quality. Carnations of good class are the flowers to grow, while there is an increased demand for flowering plants in pots.

BRIDGEPORT, CONN.—Sales were greater than those of last year and prices higher, according to Fred Jackson, with the supply about equal to the demand. In bulbous stock Paper White narcissus was the only thing in demand. Roses were in some cases better than last year. Palms did not sell as well as ferns, but there was a great call for wreathing and greenery.

JACKSONVILLE, FLA.—A. E. Singleton reports an increase of 10 per cent in the volume of business, with prices much better than last year. Carnations were not equal to the demand, but bulbous flowers were plentiful. The quality in all cases was better than last year. Narcissus and callas were in special demand and holly was more extensively used than ever before in cemeteries, etc.

PORTLAND, ME.—Higher prices for roses and a general increase in sales of 25 per cent, is the report from L. C. Goddard. The supply was short on violets, carnations and roses, but bulbous stock was plentiful, with a little better demand. The pickling process was indulged in with roses and the quality was not up to the usual standard. Carnations and pot plants had a greatly increased demand.

PEORIA, ILL.—There was a great increase in sales over last year, according to Jas. C. Murray, but there was a good supply, while the supply of and demand for bulbous stock was encouraging. Carnations were exceptionally good and the demand for pot plants was excellent. Greens were not much called for, but Merry Christmas chrysanthemums and carnations were even better in demand than roses.

GALESBURG, ILL.—Prices and sales were practically the same as last year, according to H. F. Drury, but there were not enough flowers of the leading kinds to meet the demand. Bulbous flowers were not very plentiful, but the demand was not heavy. There was an increasing call for azaleas and for poinsettias in pans, while the quality was about up to the average.

ELMIRA, N. Y.—E. Orvis reports that he could easily have sold 100 per cent more carnations had they been forthcoming. The total sales were 10 per cent higher than last year, at prices about the same average. The demand for bulbous flowers was not very great, and the quality of flowers generally was not up to the usual standard. A pleasing point noted was the increase in cash over credit sales and the demand for flowering plants was exceptionally heavy.

Alfred J. Loveless.
President Chrysanthemum Society of America.

BRANDON, MAN.—The trade is evidently booming in the Canadian Northwest, the A. E. McKenzie Co. reporting the supply of all kinds of flowers as unequal to the demand, notwithstanding an increase of 100 per cent in the total sales and a 10 per cent rise in prices. A great demand was noted for holly and mistletoe, also for geraniums as pot plants, while the quality in all cases was good. There was a fair demand for, and supply of, bulbous flowers.

GALT, ONT.—Hugh Armstrong says that the total sales were higher by about 25 per cent than those of last year, while there was no great difference in the retail prices. The supply of roses, carnations and violets were not nearly equal to the demand, but both supply and demand for bulbous stock were good. Boston ferns and flowering plants were in increased demand but the quality of the flowers on the market was about the same as usual.

GRAND RAPIDS, MICH.—Cornelius Kunst says that there was an increase of 10 per cent in sales, the prices of last year being well maintained. He also notes that people want self-colored flowers and plants. Roses and azaleas that are half red and half white are not wanted. Straight colors, or none at all. The supply of flowers was not equal to the demand, though larger than last year. Red flowers were especially inquired for and there was an increase of 20 per cent in the sales of pot plants.

ROCKFORD, ILL.—The supply of roses, carnations and violets was not equal to the demand here, according to J. J. Soper; the prices obtained were higher and there was a gain of 25 per cent in the sales. Bulbous flowers were not in great demand but the supply was about equal. Lily of the valley and violets were especially called for but the quality of all stock was not as good as last year. There was an increased demand for decorated plants, also foliage plants, but artificials and greens were not much wanted except for churches.

BENNINGTON, VT.—There was a rise of 20 per cent in L. C. Holton's sales and in no case was the supply equal to the demand. Violets brought higher prices, but other stock was about the same as last year. The chief demand in bulbous stock was for hyacinths in six to ten-inch pots. Fewer flowers of better quality was the local condition and a considerable increase in the demand for palms ferns and flowering plants was noted. Sales as a rule were smaller and there were fewer large sales, showing an increased demand for flowers by persons of limited income, a healthy sign when taken in conjunction with the increased totals mentioned above.

SIOUX FALLS, S. D.—The sales here were about the same as last year according to Mudd & Thomas, but the prices obtained were 20 per cent higher. Roses, carnations and violets were sold clean out and of bulbous flowers Paper White narcissus was the only kind in demand. The quality of the home grown flowers was up to the average, but stock purchased outside showed a falling off in quality. The demand for chrysanthemums was exceptionally great, as was that for Boston ferns and Christmas peppers. The demand for American Beauty roses was exceptionally good and there was not nearly enough to go round, while a better grade of pot plants of all kinds than usual was asked for.

COLORADO SPRINGS, COL.—About 20 per cent increase in sales, with prices practically the same as last year, is the report of the Pike's Peak Floral Co. Roman hyacinths and Paper White narcissus were plentiful but there was not nearly enough roses, carnations or violets to meet the demand. With the single exception of roses all stock was of good quality, which was fortunate, as there is constantly increasing demand in the west for the very best grades of stock and all must grow the best if they wish to do business. With regard to plant sales there was no noticeable difference, but poinsettias and the better grade of American Beauty roses had a greatly increased call.

MOUNDSVILLE, W. VA.—G. A. Miller has opened up an additional cut flower store on Lafayette avenue, where it is expected he will be successful.

THE THREE NEW DIRECTORS OF THE SOCIETY OF AMERICAN FLORISTS.

Samuel Murray. Theodore Wirth. J. K. M L. Farquhar.

Society of American Florists.

THE NEW DIRECTORS.

The new directors of the Society of American Florists need no introduction to our readers. Theo. Wirth, park superintendent of Minneapolis, formerly for many years in a similar capacity at Hartford, Conn., was appointed by President Wm. F. Kasting to fill the unexpired term of P. J. Hauswirth, who takes office as secretary. Samuel Murray, the well known Kansas City florist, and J. K. M. L. Farquhar, the Boston seedsman, were appointed by President Stewart.

Alfred J. Loveless.

Alfred J. Loveless, who this week assumes the presidency of the Chrysanthemum Society of America, was born September 26, 1866, at Langford, Somerset, Eng. He commenced his gardening career at 12 years of age in the Langford House gardens. At 19 years of age he held his first position as head gardener. After serving in a similar capacity on several of the show places in England and Ireland he came to the United States in March, 1889. Immediately on his arrival he secured a position at W. B. Dinsmore's, Staatsburg, N. Y., which at that time was one of the best places on the Hudson river, noted for its fine collections of orchids and stove plants. Mr. Loveless was later employed as gardener for S. W. Robbins, Wethersfield, Conn., and in 1895 was appointed superintendent of the Wynhurst Gardens, Lenox, Mass., his present position.

Mr. Loveless is a great lover of chrysanthemums, having always made them a specialty and well developed flowers are constantly in evidence at his place during the season. He has been a very successful exhibitor and his first interest in chrysanthemums dates back to the introduction of Mrs. Dixon, Mrs. Geo. Glenny, Hero of Stoke Newington, Gluck, Meg Merrilees, John Salter, and Fair Maid of Guernsey, which compared with the varieties of today are mere pigmies, as Mr. Loveless expresses it.

SUGGESTIONS FOR FLORISTS.

The Sowing of Seeds.

The first thing the man who is not successful with the sowing of seeds will generally do is to put the blame on the seedsman and only too often it is entirely his own fault. There is no doubt but that nearly half of the seeds sold in the country every year is wasted, on account of lack of knowledge as well as carelessness on the part of the planter and only a small percentage of loss can be charged to unfavorable climatic conditions and soil, outdoor planted seeds especially. Every reliable seedsman of today is doing his utmost to give the planter the best value for his money, and it is left for the grower to intelligently and carefully make use of the seeds in order to be successful with them.

For small seeds, such as begonia, lobelia, petunia and others, 12-inch bulb pans are best. Put a handful of crocks in the bottom of the pan; cover these with about one inch of coarse soil; fill up the pan to one inch of the top with finer soil; press the soil down well along the edge of the pan, even the entire surface, and give a thorough soaking with warm water, after which sift over the whole enough fine soil, consisting of a mixture of loam, leaf mold and sand to make a perfectly smooth surface; then use your Scollay sprinkler and moisten the surface. You're ready now for seeding, and as much seed as you can hold between your thumb and forefinger is sufficient for one pan. It will take from eight to 10 movements of the hand across the pan to distribute the seed evenly. Water gently again with the sprinkler. Cover the pan with a piece of whitewashed glass and write on the outside rim of the pan the name of the seeds sown, and the date. Lift the glass every day to see that the surface is kept moist, always using a Scollay sprinkler. Don't use water as it comes out of the hydrant, but water a few degrees warmer than the temperature of the house.

As soon as the seeds begin to germinate raise the glass on one side to allow air to get to the seedlings; remove the glass entirely before the young plants begin to get drawn, and don't expose them to the full sunlight too soon. I might mention that for fine seeds which require longer than 15 days to germinate, and especially with fern spores, it is well to expose the soil which is to be used for the top layer to fire heat for a few minutes in order to kill the weed and moss germs which usually causes trouble during the time the seeds are germinating. For larger seeds such as asters, verbenas, pansies and others, the operation of sowing is simpler. Use boxes of convenient size, say 16x20 inches, or such as will best fit your benches. Use three inches of porous soil and press down well along the edge of the boxes. Sow thinly, cover only enough to leave the seeds invisible after watering, and don't let the young plants suffer in the hot sun for the want of watering.

Regarding the proper temperature, it is not advisable to let the seeds, whether of cold or warm house plants, remain too long in a low temperature. The sooner they come up the better. So a gentle bottom heat is best. All seedlings will stand a much higher temperature than the young plants will require afterwards.

The Propagating Bench.

The ideal location for a propagating bench in your greenhouse is a spot which is well ventilated and light, and yet protected againt the rays of the sun. By well ventilated I do not mean a constant draught, but a place where the sand of the bench is exposed to pure air. It is always best to have sufficient hot water returns below the bench, as a gentle bottom heat is beneficial to all cuttings that are usually propagated by the average florist. Wherever more heat is re-

quired, as is the case with Begonia Gloire de Lorraine, heliotrope and others, the sides of the bench will have to be enclosed. Three inches of sand is in most cases depth enough for the bench. It matters little what kind of sand is used. The main point is to have it clean. One reason why sand is used in propagating is that it contains no decomposed vegetable matter, which if present is likely to cause trouble with the cuttings. It is therefore best to use fresh sand after one batch of cuttings is rooted.

Some say that this is too expensive. I am sure, however, that if there are no other unnecessary expenses attached to the running of the business, the renewing of the sand will only be a small item. The old sand can always be used in more ways than one. No matter how careful you are with your cuttings, in most cases decayed pieces of cuttings that did not root, or leaves, will remain in the sand after your rooted stock has been taken out, which will quicker than anything else produce fungus and the damping off of soft-wooded cuttings. Before the sand is put into the bench all cracks and corners should be thoroughly cleaned out with the hose followed by a coat of fresh hot whitewash. Don't use six-months-old stuff, smearing the benches an inch thick, but have it fresh and apply as thin as possible. Cover every bit of the bottom and sides of the benches as well as the edge. Insects and snails do not like to crawl over the whitewashed edge of the bench. To spray the sand with an ammoniacal solution, or to dip the cuttings in it, is a good thing, but to prevent the appearance of fungus and other pests by cleanliness is better. The sand should be pounded down well before receiving the cuttings. If dry it should be watered. Use a lath to get your rows straight and square with the edge of the bench. It is an easy matter to make five to ten rows straight by the eye, but not so when it comes to hundreds of them. Always start to put your cuttings in from one end of the rows, in case you have named varieties of one class of plants. Where labels are used this course will prevent serious mistakes. When one row is filled press the sand firmly along each side so the cuttings are in solid and upright; no direct air should get to their lower end. One to 1½ inches in the sand is deep enough for most cuttings.

While some cuttings will stand quite a little sun, it is best, should you have your bench in a sunny place, to keep it away. Newspapers spread over them are unsightly and liable to blow away on hot, windy days, when the cuttings most need shade. It should be an easy matter to devise some means by which you can use thin muslin or cheap cloth that will best suit your bench. Do not place it on the cuttings, but at such elevation as permits of a good circulation of air. Nor is darkness of night desirable, but just such protection against the rays of the sun as will prevent the drying up or wilting of the cuttings. While the first water the bench gets after the cuttings are in should be a thorough soaking, usually no more watering is needed for a few days. Don't keep the sand soaking wet, but keep it moist, and it is not proper to keep your sand, say at 58° and use water at 35°. A light spraying will keep the foliage of the cuttings fresh and can be applied daily, except in damp cloudy weather. A properly arranged and well filled propagating bench is a pleasure to look at, and one can tell at a glance what prospects there are for later results with the young stock, for the man who starts right is more likely to succeed than the one who doesn't.

Marguerites.

The marguerite (Chrysanthemum frutescens) is a most useful plant with a lot of us, and this is a good time to propagate. Small plants from January struck cuttings will make, if left in 2½-inch pots, excellent material for made-up pans and dishes for Easter. You don't want to pinch the young plants back for this purpose. Let them grow and branch out as they like. They will do best in a heavy soil, as they are not liable to make as rank a growth in heavy as in light compost. In a temperature of about 48° a good many of the young plants will be full of buds by the middle of March. Put 10 to 14 plants in a 10-inch or 12-inch bulb pan and give them a little more heat and you will have them in full bloom by Easter. Those pans trimmed with white waterproof crepe paper will sell from $1.50 to $2 each. If you have never tried this, do so this season. Your customer will prefer them to the stock usually offered, which requires two feet of paper around the lower part of the plant to hide an unsightly stem. The plants which are not showing buds by March 15 ought to go into the 3½-inch pots and those that are not sold at Easter should be carefully taken out of the pans and given 4-inch pots. They will make fine stock for spring sales. Marguerites are not by any means to be called perfect vase or window box plants, yet a vase filled with S. A. Nutt geraniums and marguerites, all in bloom, with a good Dracæna indivisa in the center, and the edges of the vase covered with bushy vincas, is a great temptation to your lady customer, and she seems to forget that her daisies last year did not bloom all summer, were unsightly, or the flowers they produced were small and short stemmed in July and August.

Begonia Erfordii.

This charming bedding begonia isn't by any means a new introduction. It has been grown for years, and while almost every park in the larger cities has a few beds of it, which are always admired by the public, few plants are seen at the smaller commercial places where the growing of bedding plants is a specialty. Your customer who will ask for the newer varieties of carnations, roses or chrysanthemums is just as anxious in spring to see something different from the old varieties of geranium, salvia, coleus or canna which she has had for years in the same beds. There is quite a number of varieties of plants for bedding purposes that can be grown in parks, or private places where good gardeners have charge; but when you have to fill the beds in spring and then leave them to the mercy of the man who is expected to do everything which needs doing in the house and stable, who will while washing the porch occasionally "sprinkle the flowers," as he calls it, you have only a few varieties of plants which will with such treatment look half-way decent. Begonia Erfordii is one of them and it is an everbloomer.

VANDA COERULEA.

We remove the little pink flowers from the cuttings in January, and in ten days the propagating bench is a mass of pink. Plants in 3½-inch pots retail in May at 15 cents each, take less room and trouble than geraniums, will do as well in the shade as in the sun, grow in light or heavy soil and a bed or border of them will be admired from the day it is planted until frost. Don't make the mistake of propagating from the old flowering stems. While these root readily they will not branch out, but just make one straight shoot which will be of no use to you. Cut the old plants down, and use the young growth from below for propagating. If you make cuttings now you will have nice little plants in 2½-inch pots by the middle of March. You can use some of the plants for dishes at Easter and you will find call for quite a number of them.

Lobelia.

This is another of those plants which, while it gives out before the summer is over, is indispensable for the filling of vases and boxes. We have as yet nothing of its color that could take its place. The best way to propagate it is from cuttings which, if you are short of stock plants, ought to be started now, for this young stock will in February and March give you a lot of cuttings. If you have no stock plants, sow seed at once. The varieties Crystal Palace and Emperor William are both good. Every seed will come up, so don't sow too thickly. The little seedlings are so small that it is best to take five or six at a time when transplanting them for the first time. Don't have the young plants standing too closely in April; they are liable to lose their lower leaves and grow spindly; give them room. Along the edge of the bench, where they can hang over, is a good place for them. Nice bushy plants, just coming into bloom in 3-inch pots, are what you want for May. Should you grow your plants from seed this year, see to it next spring that one dozen of the best colored plants are set aside for stock, as even the best of seed will produce a number of different shades of blue.

ALLENTOWN, PA.—E. M. Young is building a greenhouse at his residence, Fifteenth and Hamilton streets. Concrete construction, as far as possible, is being used.

BOWDOINHAM, ME.—E. B. Sprague of Bay road is making extensive repairs and additions to his greenhouses in order to bring them into line with his growing business.

ROCK ISLAND, ILL.—L. Stapp has just closed an order with the Standard Pump & Engine Co., of Cleveland, O., for one of its latest models of combination pumping engines.

DAYTON, O.—The National Cash Register Co., employing 5,000 people with a pay roll of $4,000,000 yearly, wants to move to a city with a population of 200,000, north of Dayton and Pittsburg.

ROTHESAY, N. B.—P. E. Campbell makes a great specialty of carnations in his greenhouses here and he has a gorgeous display. Smilax, sweet peas, pot plants and roses are also in excellent condition.

PHALÆNOPSIS GRANDIFLORA RIMESTADIANA.

ORCHID NOTES.

CALANTHES of the vestita section are such beautiful and easily grown orchids and so suitable for decoration withal, that an effort should be made to increase their popularity. Compared with many other species they are cheap, and once a few stock plants are procured these may be increased very readily. We have frequently cut up a single bulb into a dozen and more pieces and placed these upon pans of sphagnum moss. Every piece will break strongly and by the end of the second season they are fine plants, carrying large spikes. The kind used was the hybrid C. Veitchii, the popular rosy pink, but the true vestita varieties may be treated in the same way, only the bulbs being usually smaller do not make so many cuttings or sets.

Vanda Coerulea.

Beginners in orchid culture will not find this a difficult species to manage provided they do not over water it or give it too large a pot. All vandas, and indeed, all orchids of the single stemmed tribe with distichous leaves, must have a firm hold on the home of their adoption if they are to be healthy and as the roots of V. coerulea are not as freely produced as those of the larger growing kinds like V. suavis or V. tricolor, the receptacle in which they are grown must be somewhat small. What in other plants would be termed a pot bound condition is just the condition V. coerulea likes, and nothing but clean crocks, charcoal and sphagnum moss is needed as a compost.

If newly imported plants are purchased, lay these out on a moist stage or bench in order to plump up a little before potting them up. Or if more convenient, pot them up right away in clean crocks only, watering them twice daily. V. cœrulea is a native of India, where it grows at considerable altitude, and where frosts are of frequent occurence. For this reason very hot moist conditions, such as suit the tropical kinds, generally are not needed, are injurious in fact. Plenty of light and air with an atmosphere nicely balanced for moisture suits it well. The color of the flowers in the best forms is a beautiful intense blue, but unfortunately these are not as common as the paler forms, and still more unfortunately the better forms are weaker and more difficult to grow than the pale, poor colored ones.

Phalaenopsis Grandiflora.

This fine species of moth orchid does not differ very materially from the popular P. amabilis, either in form, manner of growth or cultural needs; nor are the flowers very different to a casual observer, though botanists think it necessary to give it specific rank.

Phalænopsids like abundance of heat, their natural habitats being well within the tropics, but heat alone is not what is necessary. The growth needs to be gently stimulated in early spring and maintained during the summer months. In late summer and autumn the growth already made needs to be consolidated by exposure to a little extra light, a little less moisture being at the same time maintained. Winter practically is a resting season, but this must not be understood as recommending a time of drought, for this would be probably followed by the loss of all the best leaves made during the summer.

The transition from growth to rest and from rest to growth again must be brought about not suddenly but slowly and in a natural manner, one season merging into another as it were with no hard and fast line between them. Then the plant feels no check but continues in health right along. No strict rules need be laid down for temperature either; the minimum night temperature in winter may be placed at 60° but the grower need not be alarmed for his plants if this falls or rises a few degrees. Dull days ought to show only a very slight raise but when bright from 70° to 80° will be suitable. In summer 65° to 70° is a good night temperature rising by day with sun to 90° or so. It will be necessary to shade almost continuously in summer, but get rid of the blinds as early as possible in the fall, consolidating the growth and rendering it capable of withstanding any slight changes of temperature that will occur in winter even with our best care. Root moisture is an important point and must be in a manner supplied somewhat in ratio with heat. But always keep in mind that no orchid was ever hurt by being kept waiting a day for water, but more plants have been killed by a constantly wet state than by any other detail of mistaken culture.

An Abnormal Cattleya.

On November 24, p. 844, we figured and noted an abnormal spike of Cattleya labiata. According to the Gardeners' Chronicle, December 1, the same thing has occured in England in the collection of Richard Nisbet of Burton on Trent.

Could a complete history of sports be written it would surprise many to see in what a number of instances the same or a similar sport has occured in widely separated locations at or about the same time. In orchids it seems to us that this triplicating of the lip is progressive. In many species, such as the little known Paxtonia rosea the lip is practically the same as the other two petals and the sepals, and presumably this was, generations ago, the normal orchid flower. The lip itself in its evolved or progressive form is really abnormal, and has been evolved in order to attract insects, for the purpose of fertilization, by its unusually bright colors, the lines of color leading to the sexual and nectar secreting portions of the flower also tending in the same direction. The best known instance of "Trilabellia," as Reichenbach called this peculiar sporting, is Dendrobium nobile Cooksonianum, a fine garden orchid with the bright purple tint of the ordinary nobile lip repeated on each petal.

Mignonette Culture.

For some reasons more cultivators fail with mignonette than with most other crops, yet it is by no means a difficult one to grow if gone about properly. Doubtless there are occasional failures owing to sowing bad stocks of seed, for there are many weedy varieties about that never would produce good flowers, no matter how well they were grown. But this is the fault of the florist, for there are plenty of good kinds on the market and if for the sake of a little difference in price a rubbishy kind is obtained then it is only another case of false economy.

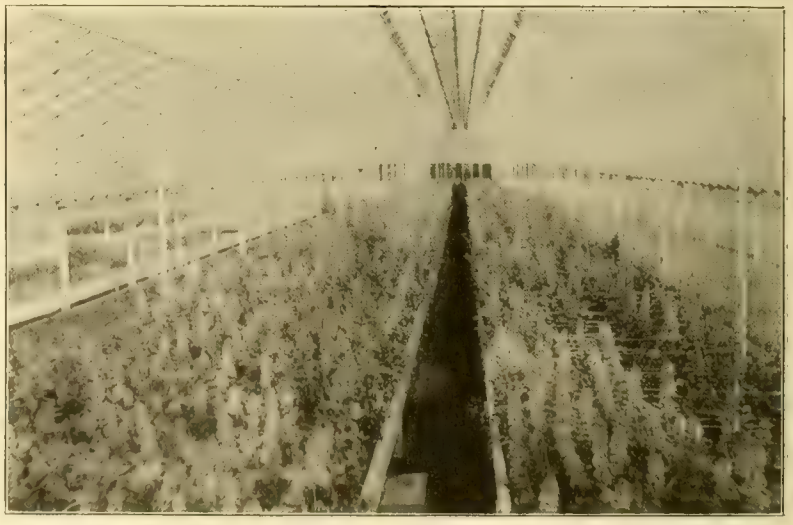
To produce flowers in December the seed should be sown in early August, with later batches at intervals of a week or longer, according to the demand, up to the end of September. The seed should be sown in small pots. These must be filled with light soil made firm and about three seeds should be sown in the center of each after giving the pots a thorough soaking of water. Cover the pots with mats or paper to keep out the light, and in a few days the seed will germinate. Be sure that the covering is not left on after the seeds begin to sprout, or they will be spoiled in a few hours. From the first the pots are to be stood in a clear light as close to the glass as possible. The one good watering given will in most cases serve them until the seedlings are getting the rough leaf, but daily light spraying, or twice when bright, will be required. Many otherwise correctly grown lots of mignonette are ruined by over-watering in the early stages.

When it is easily seen which are the best plants, thin them down to one in each pot. Never neglect this, for upon the production of good strong leaves at first much depends, as will be seen. It is useless to say, keep the plants cool, for as a rule in August, if fully exposed to the sun as they should be, they can't be kept very cool. But let them have all the air possible day and night, and while not allowing them to suffer, avoid over-watering both at the roots and overhead.

CUT FLOWERS.

Mignonette for cut flowers is usually grown on benches or solid beds. Either are suitable if well drained. Six inches of good soil is ample; let it be firmly placed to induce a solid rather than an over rapid growth, and in a nice condition as regards moisture, not wet, but not so dry that water will be needed just after planting. The right time to plant is just as the roots reach the side of the pot. If the plants have been grown as noted, in airy light quarters, the leaves will be also hanging over the edges of the pot, though the plants are only about two inches high. Plant firmly about 15 inches apart each way, or as near this as the size of the bench will allow. Many growers leave a hollow space around the plants as they think this facilitates watering, but it is not really necessary. If the ball of the plant breaks and injures the roots throw it away, for it is very important that all the plants are near as possible the same size, and when the roots are broken it will surely injure that individual plant. Use the greatest care then in planting, and firm the plants well, for it will be well repaid by the increased health of the plants.

As far as possible plant in the afternoon, as this gives the plants a night to recover. But if gently watered to settle the soil around them, and lightly sprayed several times daily when bright, they will hardly feel the removal, but keep growing right along. Here it should be noted that the common white butterfly is one of the worst possible enemies of the mignonette grower. It comes through the ventilators and lays its eggs upon the young plants, and in an uncommonly short space of time these hatch into the well known green caterpillars. So rapidly do these grow and so voracious are they, that in an incredibly short space of time they ruin the plants. The insects too, it is well to note, are so nearly the same color as the leaves and stems that it is very difficult to see them, hand picking being almost useless. The only safe way is to cover the ventilators with netting, and so keep the butterflies out, and this



HOUSE OF MIGNONETTE AT POEHLMANN BROS., MORTON GROVE, ILL.

should be done in all cases before planting, for it is remarkable how quickly these flies find mignonette.

As soon as the plants are re-established, the point should be pinched out of each. By this time the plants should have 10 or more good flat leaves, and if the point only of the plant is taken each of the eyes at the base of these leaves will break, and a stout plant with eight to ten strong shoots will result. As a rule the upper shoots are the weakest, owing to the leaves not being as fully developed as the lower ones, so the grower will now see the advantage of beginning well and laying a good foundation of strong, healthy leaves. Six to eight of the best shoots may be left and before they are long enough to fall over a central stake should be put to each plant and the side shoots loosely looped up to this. All through the growing season mignonette should be lightly and frequently sprayed, heavy douches that saturate the soil leading to badly colored foliage and weak growth. The roots too, must be judiciously moistened, not always kept moist but allowed to dry out fairly well and then given a thorough soaking. Light feeding is necessary but this too requires care, and it is better to leave it alone altogether than to overdose it in the least. In cutting the first crops do not go too low down as the hard wood does not break so readily as that which is about half ripened.

POT PLANTS.

The culture of mignonette in pots is practically the same up to the time the plants are pinched, but, of course, the plants are potted on instead of being planted out. Good soil is absolutely necessary in pot culture. The basis is good fibry loam, and some half rotten manure or leaf soil should be added in proportion as the soil is heavy or light. A sprinkling of a good fertilizer should be added, and of course, when the plants are getting potbound, feeding with liquid manure should be more liberal than with the benched plants. In either case cool, airy and comparatively dry quarters are best for mignonette. A dwarf variety is best for pot plants, such as a good form of Machet, but some of the taller forms such as large flowering Pyramidal or New York Market are best for cutting, owing to the longer stems produced. If judiciously fed, fine plants 15 inches high and the same through with eight to ten spikes on each can be reared in 5-inch pots.

ASPARAGUS DUCHENI AT THE PHILADELPHIA SHOW.

See issue of November 17, page 794.

To Be Done Now.

IN THE GREENHOUSE.

Pot grown hydrangeas, now largely imported, are the best stock for forcing for Easter.

Keep palms well on the dry side, especially where the temperature rules a little low.

The best place for newly imported roses and other semi-hardy stock is a quite cool house, a degree or two of frost not being so detrimental to them as heat.

Push the stock plants of bouvardias a little to induce them to break freely. Plenty of stem cuttings are useful if stock is scarce.

Select carnation cuttings so that all that are planted together are as near the same length as possible.

Avoid placing plants, on which there is any suspicion of insects, in the propagating house, or anywhere near young growing stock.

Keep Cypripedium insigne growing freely after the flowers are over. A check now will mean weak flowers next season.

Dracæna seedlings should be given just enough water to keep them moving gently. Keep the surface soil sweet by occasional stirring.

Select the clearest colored flowers of the Rose Pink Enchantress carnation and propagate freely from the plants carrying them.

IN THE STORE.

Heaths are soon killed by being allowed to dry, their roots being very fine and unable to stand any check such as this entails.

Store all brightly tinted ribbons in dark drawers or cupboards, or any place out of the reach of dust and light.

Keep track of all holiday sales with a view of knowing how to prepare for next season.

When trade is quiet and you have breathing time, think out ideas to make your windows and store attractive to the public.

The long stemmed kinds of orchids, like Laelia anceps and many oncidiums, do not last as well when cut as those with shorter stems.

Dracæna terminalis, if hardened a little before placing in the window, is a good and lasting subject.

Flowers with hard woody stems cannot absorb water so freely as those of a softer texture.

Dull tinted vases of compressed paper are excellent for showing cut flowers in, being light and harmonizing with the color of the flowers.

The customer who asks questions about flowers is not always a crank. Nothing is lost by civility even though a sale is not always effected.

OUTDOORS.

Rubbish is only useful matter in the wrong place. Look out the right place for it and put it there.

Have sufficient herbaceous plants taken up and stored to fill any orders that have to be executed by given dates.

Cover the roots of all trees in sheds or cellars and keep them covered

Draughty dry conditions are almost as injurious to them as frost.

Look over the labels on the herbaceous plants; note all that are decayed or indistinct and prepare new ones.

That half burned coal on the ash pile should not be wasted. Get it sifted out.

Where there is room keep the peat stack low, as the air gets through more freely than when a very large pile is made.

Should dull unseasonable weather continue, do everything possible in the way of ventilating at night, to keep dormant stock from starting into growth.

Side up the potting and tool sheds on wet days; get the tools in order and clear out all old forcing material where it has been used. Be ready for whatever is coming to you.

Campanulas in Pots.

Campanulas are not only very showy and useful for outdoor planting in borders and beds, but they can also be grown into large specimen plants in pots or tubs to be used either for inside decoration or for placing in exposed places on piazzas or porches, or anywhere that temporary effect in plants in bloom may be desired. They are suitable for that kind of work, not alone because of their appearance which is rich and of a flourishing character, but also because they will stand more exposure to wind, rain and a low temperature or a high one than anything else that could be used advantageously.

Campanula seed, for plants to be grown in pots, should be sown in shallow flats early in the fall if possible and when the seeds are large enough to handle either pricked off into other flats or potted into very small pots and repotted until they are in 3½ or 4-inch pots before winter, in which condition they may be wintered over in a cold frame. In early spring they will require shifting until they are in the required size of pots or tubs.

Campanulas are exceedingly gross feeders; for that reason the potting material should be very rich, using a liberal portion of decayed cow manure for the compost. They will also stand feeding with liquid manure freely when coming into bloom. M.

European Notes.

The Riviera flower growers finding their usual commission salesman unable to handle their flowers advantageously have instituted a new system and are now sending them to salesrooms, especially in Germany and Belgium, to be sold at auction. Naturally this does not meet with the approval of the wholesale florists and commission salesmen. Prices of course are no better in the auction rooms. When the present glut is over markets will resume their normal conditions and commission salesmen again open wide their doors for consignments. Some of the auctioneers, however, once in the business may succeed in diverting supplies. The prospects are favorable for the Riviera growers having a good time from Christmas onward, as all other flowers for late December and January will be over. Carnation growers are not enamored with present prices, but their turn will also come when the chrysanthemums are out of the way. Eighty tons of mistletoe despatched from Normandy a day or two ago is now due in Covent Garden; supplies of mistletoe and holly are plentiful.

Under the auspices of the National Sweet Pea Society, London, trials of sweet peas will be conducted at the University college, Reading, next season. Not only does the society invite British growers to send new varieties for trial, but extends the invitation to continental and American growers. The seeds must be sent to the superintendent, Chas. Foster, as soon as possible. Each variety is grown under a number and in July the trials are inspected and reported upon by the society's floral committee. Hundreds of people visit the trials on their own account and compare notes.

At the society's exhibitions last summer the following awards were made: First-class certificate to Audrey Crier (C. W. Breadmore, Winchester).

Campanula Rosea.

Grown by W. G Posting, gardener to Mrs. Winthrop Chandler, Newport, R. I.

Awards of merit to Horace Wright, Maud Guest, Princess Maud of Wales (Henry Eckford, Wem); Elsie Herbert, Etta Dyke, Mrs. Collier (C. W. Breadmore); Queen of Norway, Tom Bolton (R. Bolton, Carnforth; Mrs. Rothera (T. Rothera & Co.); The Marquis (Dobbie & Co., Rothesay); Queen of Spain (Hurst & Son, London). Evidently there is money in sweet peas; Horace J. Wright, late secretary of the society, lecturer, journalist, etc., is commencing business as a sweet pea specialist at Wandsworth, near London.

BEE.

PITTSBURG, PA.—Randolph & McClements have bought the business of P. Siebert, including the greenhouses on Stanton avenue, and the lease on the Baum and Beatty streets building. As the lease is a long one the firm intends building on the lot and will remove its store there next spring.

Brother Jim's Plain Talks.

THE MAN WITH A SECRET.

Isn't it just about time that this hoary old fraud disappeared for ever? He certainly is a hardy perennial. Go where you will you meet him. He was and he is and he probably is to come. In the old days he used to lock himself up in the potting shed while he performed his mystic rites of orchid potting. Today he is found in all kinds of places, from the truck lot to the big growing plants. When I go from here my knowledge goes with me, was the proud boast of one of the many possessors of the little knowledge that is proverbially dangerous. The one would probably be as little missed as the other if he did go and take his knowledge with him.

The man who is afraid of imparting to others any knowledge he obtains by reading or practice, never attains any great proficiency in his calling. In a manner he shuts himself in from sympathy with his fellows, whereas by comparing his views with those of others whom he meets, his own horizon is widened and he finds there are others whose opinions and ideas, though they may differ from his own, are worthy of a hearing. There are men of course who rush to the other extreme. When they get a new idea in their head, they are never satisfied until they have advertised it to their little world of acquaintances, with the result that they are looked upon more or less as cranks. Still these are greatly to be preferred to the hidebound individual mentioned above. He is like an old hen sitting on a door knob, while others are scratching around for a living.

Is there such a thing as a secret in plant growing? No, sir. All there is to it may be learnt by anyone of average intelligence in a short experience with the plants themselves. I once heard a good old gardener say, that the plants are the best teachers, and this is as true now as ever it was. The man who has the real wish to succeed as a cultivator, watches his plants very closely in his daily rounds; he is quick to notice the first signs of a backset and immediately sets to work to put right whatever is wrong. He will never stop to find out the secret the other man is so careful to hide, but goes right to the point and finds out in the only natural and proper way.

Don't be taken in then by the man who keeps his knowledge up his sleeve. He is about as useful to the general community as the individual who offers $5. in a purse for a quarter, at country fairs, and is infinitely less amusing. The excellent cultural notes given in the horticultural press, combined with actual work about the plants as object lessons will enable those anxious to learn to do so quickly and thoroughly.

Rawson's Dahlias.

Of late years W. W. Rawson & Co., Boston, Mass., has been giving increasing attention to the raising, importing and distributing of new and choice varieties of dahlias and other flowers. Some of the novelties are exceedingly fine and a few are illustrated herewith.

Governor Guild is of the show class and is a round, finely built, snowy white flower with beautiful fluted petals. Al-

TWO OF RAWSON'S NEW DAHLIAS.

W. W. Rawson. Fireburst.

though large it is not at all coarse and there is no tint of any color either in the center or at the tips of the petals.

Edward Le Favour is also of the show class, its large flowers being a deep rose, shading to pink. It is said to be very free flowering and the individual flowers are deep and perfectly globular.

Mrs. Gordon Abbott is a very large flower of the fancy class, measuring 5½ inches across. The blossoms are solid and full of petals, the color a deep golden yellow, striped and blotched with bright intense scarlet.

W. W. Rawson is of the decorative class, a graceful and beautifully tinted flower, white, overlaid with a faint blue tint that is very charming when seen at a little distance. It is a solid well built flower, yet not stiff in the least, the petals exquisitely fluted and regular in outline.

Mrs. Stuyvesant Fish is very distinct in color, a rich deep amber, and is of the decorative section. It is very large, perfect in form, the petals of medium width and graceful. It is a medium grower, producing flowers early in the season.

The North Shore is also of the decorative class, with petals broad at the base but pointed. The color is a rich maroon, with a distinct shade of scarlet at the tips of the petals.

Fireburst is one of the largest decorative dahlias in existence, with flowers over eight inches across. The color is scarlet, with a distinct orange shade.

Warren W. Rawson, the senior member of the firm, is a very interesting personalty, as he seems to combine in a very marked degree all the good points of a successful business man, a man of education and a holder of important public offices. Added to this he has a great love of home, as his fine estate abundantly testifies. He has been governor's councilor for two years and has also held the highest office that the town of Arlington can bestow, that is the head of its selectmen. In spite of the many calls made on his time Mr. Rawson is also a very prominent associate in the Masonic and Odd Fellows organizations.

CHRYSANTHEMUMS

Out of 49 varieties of chrysanthemums certificated by the Royal Horticultural Society and the National Chrysanthemum Society, both of England, the number bearing single flowers was 20, quite an unusual number, according to the Journal of Horticulture.

Chrysanthemum Sports.

This article was written last November but has been crowded out from time to time owing to pressure on our space.

The word sport, in connection with chrysanthemums, refers to varieties which originate by bud variation. The idea has been advanced that nature makes these changes with a desire to attract the attention of some insect, possibly a new one, and thus promote fertilization and reproduction from seed, a condition which seldom occurs under our present system of cultivation, save where artificial pollination is resorted to. This, like many of nature's ways, are too deep for us to fathom and so we must be content with the facts which are apparent, viz., that such changes take place, and as far as we know without a fixed law to govern them.

We have just noticed a white seedling pompon flowering this, its first season, which shows a few yellow petals in one of the flowers, thus demonstrating it may be possible for them to sport the first year from seed. We have known of several varieties which have taken up this peculiar form of diversion the second year but generally it does not take place until several years have elapsed and then often simultaneously in widely separated localities.

Of those originating in this manner and appearing on the Chrysanthemum Society records, are 100 varieties, which include those introduced in this country since 1888 as well as those imported since that time. Of the 100 varieties, 43 originated from those of the various shades of pink, 40 from white, 10 from yellow, six from bronze and one from red. Of the 43 sporting from the pink section, seven are yellow, four a darker shade of pink, 10 rosy cerise and bronze, and 23 white. Of the 40 from white parentage, seven are pink, 22 light yellow, 10 bright yellow and two violet. The 10 yellows have given five of a darker, and five of lighter shade than those of the varieties from which they sported. The six bronze have changed to four yellows and two pinks. The one red sported to a darker shade.

From these figures we find that pink varieties have been most frequent in sporting, closely followed by the white. We also learn that the pinks have a decided tendency to change to white

and the white to light yellow, while the yellows do not afford as many changes, nor are they as radical or decided. It is worthy of note that many varieties have changed their color several times while others that are now many years in commerce have not shown any inclination in this direction. The most marked and interesting example among those which have given us several colors, is the hairy variety, Louis Boehmer, which was imported from Japan and disseminated by Peter Henderson & Co., in 1891.

Under French cultivation, L'Enfant des Deux Mondes (child of two worlds) was originated by M. Crozy and distributed by the E. G. Hill Co. in 1893, which gave us a white Boehmer. With M. Quitier, another French grower, this white Boehmer sported to yellow, and was named Leocadie Gentiles, which variety Nathan Smith & Son distributed in 1899. In addition to the foregoing, Peter Henderson & Co., sent out Wm. Falconer, a rosy blush, in 1892 and in 1896, Mrs. C. B. Freeman, a bronzy yellow came from Thos. H. Spaulding. Beauty of Truro, a purplish bronze of English origin was offered in 1897 by Nathan Smith & Son, thus the fickleness of Louis Boehmer has placed on our records five distinct varieties which otherwise would have been unknown.

To perpetuate the new color of a plant, the method generally followed is to cut out the leaves on the flowering wood with a heel or portion of the stem, and place these under a bell glass or in a closed case to encourage them to root. The next season they are carefully watched and those which do not show the new color are discarded. In this way the new color is established or fixed as it is termed, and it is then at the disposal of its possessor. Evidently there is more attention paid to the sports in England than in this country, as their growers far surpass us in the number they have fixed. The want of knowledge on this subject often misleads, particularly those who do not keep constantly in touch with the sports disseminated.

A sport is occasionally offered under two or more names. The writer has two cases in mind where sports have been disseminated and described as sporting from certain varieties and both of these when better known proved to be kinds which originated from seed and had been previously sent out. The condition under which chrysanthemums are grown and the date the bud is selected has much to do with the color as well as the form of the flower. Some contend chrysanthemums sport in form as well as color but this has not been our experience. All the sports that have come under our observation are identical with the parent in every particular except the color.

When attention is called to an exceptionally meritorious new commer and is exploited, or the illustration shows it, as having sported in color, time of flowering, form and style of foliage, it will be wise to take this in small doses. Such descriptions arouse our suspicion and lead to the following conclusion: Sporting in time of flowering is probably due to certain conditions under which the plant is grown. If its form has changed, possibly the date of the bud is the cause. If the foliage is distinct from its parent, doubtless it is another kind and very likely an old variety with which the grower is unacquainted.

It is certainly very easy to be mistaken regarding the source of origin of sport variety, and it behooves all interested to be careful not to redistribute an old variety under a new name.

ELMER D. SMITH.

Since writing above article, I have received sample blooms purported to be sports from a well known tall white variety but the instant they were brought to view, we were looking at medium sized blooms of Mrs. Jerome Jones.

This is simply to show how easy it is to be mistaken especially if not familiar with the older sorts.

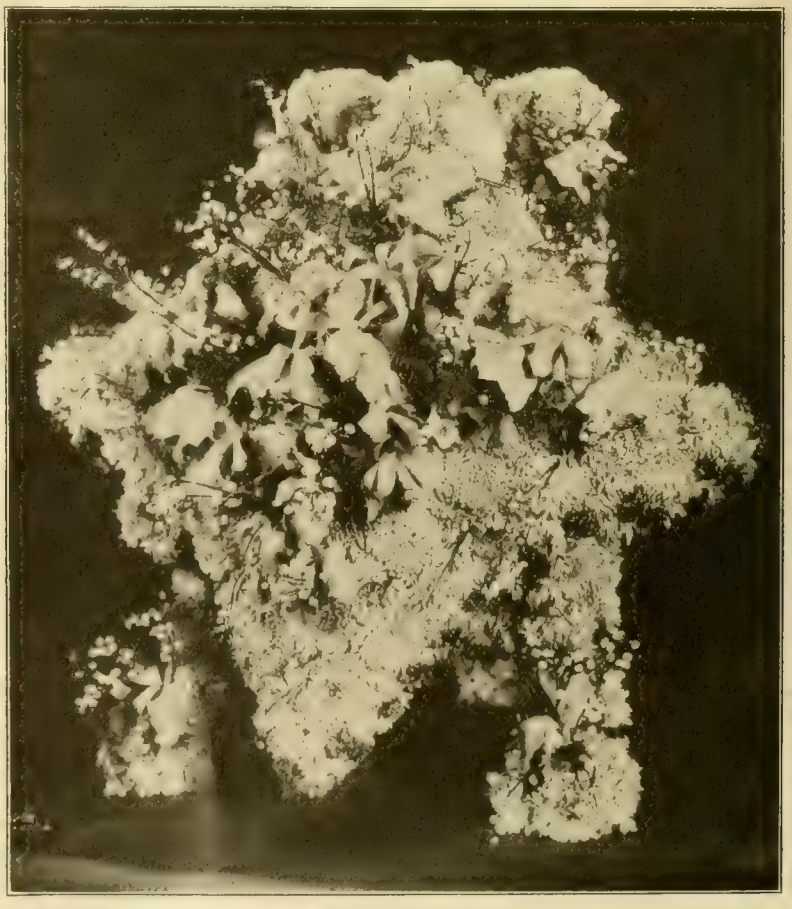
ELMER D. SMITH.

Our Credit System: Its Uses and Abuses.

A paper by S. S. Skidelsky, read before the Phila. Florists' Club of Philadelphia, January 1, 1907.

I deem it an honor as well as a privilege to address you upon a subject that, it seems to me, has never received the consideration it merits, either at the hands of our numerous florists' clubs or of our national society. At the very outset, however, and before I approach the subject proper, I wish to premise my remarks by paying a brief tribute to the members of our craft, scattered throughout this great American continent. It is no exaggeration to assert that there is no body of men more honorable, more honest and straightforward than our brother florists.

It is a noteworthy fact, one scarcely requiring any proof, that during the panic of 1893, when business conditions were most deplorable, when the stringency of the money market and the general stagnation and business depression were most appalling in their consequences, when the professional calamity howlers and the unscrupulous demagogues aired their theories to their heart's content, thereby adding fresh oil to the already kindled fire of fear and discontent, when the so-called "first laws" of self preservation began to assert themselves in a manner that brought disaster and financial ruin to many a business house, our brother florists as a body, be it said to their everlasting glory and credit, put their shoulders to the wheel that much the harder, never thinking of joining the procession of bankrupts. It is an actual fact, and I challenge anybody to disprove it, that there were less failures in proportion among the florists, either compulsory or otherwise, than among any other body of business men. I could easily name a number of florists who, during those memorable dark days, saw fit to deprive themselves and their families of things generally considered as absolute necessities in order to meet their obligations. Men capable of such self-sacrifice, men possessed of such moral stamina, such business integrity and honesty of purpose, need not hesitate to inscribe their names upon the roll of honor. Perhaps Pope had some gardener in view when



PRIZE DESIGN BY J. S. SIMMONS, TORONTO, CANADA.

he said that "an honest man is the noblest work of God."

Of course, there are exceptions, but of these later. That much for our honesty and business integrity. Can we claim as much for our business methods or, to be more exact, for our credit system, as compared with that of other progressive business men? Hardly. While it is true that we are keeping pace with the times in many other respects, while we are advancing steadily and uninterruptedly along lines of general progress, increasing our facilities, modernizing our stores and our greenhouses, improving our products, while we have been exchanging views and opinions as to the best methods of marketing our products, going even so far as to touch upon the ideal employer and employe, it has never occurred to us to consider seriously the means and ways and the best methods of modernizing our credit system. A question of momentous importance to our own interests, strange to say, seems to have escaped our attention. Viewed from whatever standpoint and whatever arguments we may bring to bear upon the subject, it is undeniably true that our credit system is in its primitive state, lacking those sound fundamental business principles which are at the base of every sound financial or industrial institution. It is said of the late Marshall Field, the merchant prince of two generations, that his first step at the very outset of his brilliant business career was to establish a sound credit system. A rule from which he never deviated and which perhaps more than any other factor was responsible for and contributed so largely toward his colossal fortune, was to collect his outstanding accounts and to meet his own obligations upon maturity. What is true of Marshall Field, the merchant prince, holds equally true of John Smith, once upon a time the struggling market gardener, whom we now see making rapid strides along the highway of progress. The reason? Easily explained: "I pay as I go," says Mr. Smith, "and in order to be able to do this, I collect my own accounts promptly."

Simple enough in itself, yet a rule of this sort seems to constitute the corner stone, the very foundation of one's success. "To pay as one goes" does not imply, however, spot cash transactions. Such a modus operandi is no longer tenable under our present business conditions. Nor is credit as such to be despised or condemned on general principles. On the contrary, credit well regulated and judiciously used is a blessing and a privilege that can scarcely be overestimated. Were it not for this privilege I venture to say there are many among us to-day who would have never achieved the success they enjoy. How often do we hear of the man who in years gone by had made his first start in life by building his first little greenhouse on a paltry few dollars borrowed from either friend or shark, stocking it with a few geraniums and other truck obtained on credit from some reputable establishment or other? If we trace the history of the successful florist of to-day we can see at a glance that credit has in a large measure contributed toward his success. I say "in a large measure" advisedly, because other qualifications, such as hard work, perseverance, will power and energy were of equal importance as a means to his successful business career. I reiterate, credit is a privilege that is not to be despised by any business man, no matter how conservative in his enterprises or how determined to steer clear of debt.

A LAUREL WREATH.
By John Mangel, Chicago.

Broadly speaking it is credit, inspired by confidence and backed by enterprise, that is responsible for the remarkable development of our natural resources, the wonder of the world. It is credit inspired by confidence that is accountable for the prosperity which we enjoy to-day. Credit has been the means of launching many a successful industry, giving employment to hundreds and thousands of men; credit has been the means of enabling many an individual to stem the tide of adversity and to rise to affluence and wealth. The struggling market gardener of a few years ago would have never perhaps become the successful grower of to-day if it were not for that blessed privilege—credit. I will go further and say that credit has been the means whereby most of our modern mammoth greenhouse establishments have come into existence.

Credit coupled with hard work, energy and business integrity has made it possible for the enterprising man of to-day to achieve his success in much less time than it took the florist of a generation ago by the slow "pay as you go" process in its literal sense. We are progressing, so to speak, in a geometrical ratio, by leaps and bounds, no longer satisfied to let "well enough alone," no longer content like the immortal Micawber to wait until something turns up. We must create our own opportunities and we are doing it to our heart's content, thanks to that blessed privilege—credit.

If there is anything to be turned up we are generally inclined to take a hand in the turning process ourselves. We seem to realize that faint heart never won success, hence fear and hesitation no longer keep us in check. If we are determined to "get there" it is seldom indeed that we fail in our object. But all good things have their limitations and what is beneficial or wholesome in some cases often produces the contrary effect in others.

Assuming that credit, well regulated and judiciously used, is a privilege that the strictly honorable and enterprising business man cannot fail but make the most of, it becomes an absolute menace—and often to a business community at large—when placed at the disposal of the unscrupulous trickster. To illustrate my idea: I know of a florist in the west doing a thriving business who seems to take especial delight in defrauding his creditors. He buys everything in or out of sight, in Holland, Belgium or New Jersey, throwing his goods on the market at prices compared with which those of his legitimate competitors seem prohibitory.

Here is a case of credit misapplied, the result proving detrimental not only to the man sustaining a direct loss but to the florists in the immediate vicinity as well. I will cite another case. There is a florist in one of the middle states who makes it a practice to order every new seedling carnation in sight. Unlike the careful, ultra-conservative grower who pays his bills and who, as a matter of course, wants to know something about the variety offered, the man I speak of orders indiscriminately on the principle of "something to gain and nothing to lose," never paying for the stock.

The season following he offers rooted

cuttings at a reduced price, underselling the very man he victimized, thus doing him a double injury. And yet, despite such instances (I could cite many others), despite the fact that tricksters, under the assumed name of florists, are encroaching upon the legitimate trade in a manner most injurious to our common interests, in our anxiety to outdo our competitors, to swell our volume of business we are inclined to take chances, we fail to discriminate, to draw the line most vigorously as it needs be drawn, between those worthy of our confidence and those who should be blacklisted in letters so large and conspicuous that he who runs may read.

And right here I wish it to be understood that I am in no wise reflecting upon the honor of those who through no fault of their own but owing to adverse business conditions or unforseen circumstances, were compelled to liquidate their affairs as best they could, in other words, to fail in their business. Such men deserve our sincere sympathy and it behooves us as men and as members of a "noble craft" to do all within our power to aid them. It is the scamp, not the unfortunate victim of circumstances, the man (God save the name) who lays his trap for the unsuspecting Hollander, who scans the trade papers and picks his victims as he sees fit to suit his own nefarious designs, it is a fellow of this sort, I say, that deserves our unqualified censure and our uttermost condemnation. Aside from the moral element involved, aside from the fact that scoundrelism should be discouraged on general principles, we must view the situation from the standpoint of self interest, of self protection. It is a duty which we owe to ourselves, to our fellow members, to the community at large to turn the rascals down and out. It is high time, indeed, that we realize the situation as it affects our common interests. Often the misdeeds of one miscreant will reflect upon the honor of the innocent. It is but human nature to profit by experience. If John has victimized us it is not likely that we will place our implicit trust and confidence in Tom, notwithstanding the fact that the latter means us no harm.

It is in instances of this sort where credit not only ceases to be a blessing and a privilege, but it becomes an absolute curse and the sooner we realize it, the sooner we devise some means and ways whereby to put an end to such abominable practices the better for all concerned. Our trade papers can and should help us to accomplish this worthy object, for there is no means more effective, there is no weapon more powerful than the press. Under the glare of its far-reaching searchlight human rats invariably go under cover. If credit is a privilege that privilege must not be abused.

Fortunately, however, such men, the black sheep in our fold, are but in the minority and need not be considered in connection with our credit system as practiced by the rank and file, the men, whose honesty and honorable intentions are beyond reproach, who meet their obligations in the long run. A few weeks ago I happened to meet a fellow traveler representing a western crockery concern, who in the course of our conversation remarked to me that "the florists are awfully slow pay, that while other business men will either pay upon maturity or else will write to the house and ask for an extension of time, the florists as a rule do neither; that statements, letters and drafts seem to have no effect upon them. Eventually, of course, they pay, but they do so to suit their own convenience, regardless of conditions or terms."

I need hardly add that there is a deal of truth in these remarks and that the man knew whereof he spoke. As a matter of fact, and I say it without any fear or reservation, in the majority of cases terms are honored more in the breach than in the observance. To be sure the average florist means well, he means to pay his bills sometime; he has good intentions, but (and here comes the rub) good intentions never were and never will be a negotiable asset; good intentions can never pay an account. A book full of "good intentions" is no more effective and can no more sustain the stability of a business house than a prayer of Dowie, for example, can stay the ravages of an incurable disease. Like prayer, good intentions are good enough in their place, but in this matter-of-fact world unless backed by something tangible, something negotiable, good intentions are of no particular consequence.

It seems to me, and again I say it without any fear or reservation, that some of the best men in our business have but a mistaken idea as to the duties and obligations they owe to a business house. Just because they see fit to patronize a business house it does not necessarily follow that they have the right to ignore the business terms as laid down by that house. I do not mean to convey the idea that I am an advocate of ironclad rules, that none but strict conditions should govern all business transactions transpiring between buyer and seller. On the contrary, I believe in liberal business methods; I believe in liberal business terms. I hold that any man worthy of credit is entitled to all due consideration and liberal treatment, but I likewise believe that privileges of this sort should not be abused unnecessarily.

Assuming for the sake of argument that such a thing as a committee of credit men, appointed by and acting under the direct supervision of the Society of American Florists were possible, assuming furthermore that such a committee had the power to act, to pass judgment and to lay down rules and regulations in all matters pertaining to our business or credit system, would it not appeal to each and every one of us if this committee saw fit to pass a resolution something of the following order:

First.—Resolved, That no business house is worthy of patronage unless it manifests a liberal spirit towards its patrons.

Second.—Resolved, That no business house need or dare expect the good will of any florist in good standing, unless it shows consideration for and a good will of its own towards its patrons.

Third.—Resolved, That no florist is entitled to credit and to all the advantages accruing thereto, unless he realizes the need of paying heed to statements, of answering business letters, and of honoring drafts.

Fourth.—Resolved, That any florist of good standing reserves the right to exact the most liberal terms possible, but, when once agreed upon, such terms are to be honored, not in the breach, but in the observance, and

Fifth.—Be it further resolved, That if any florist finds himself in strained circumstances and is not able to meet his obligations in due time, such florist is obliged to write and explain matters to his creditors, said creditors to make all due allowances and to show all due consideration as the case might warrant.

One of our greatest shortcomings in the regulation of our credit system, it seems to me, lies in the fact of our very loose methods in dealing with the "four hundreds" of our towns. It is a matter of record that "society folks," while in nowise backward in following the dictates of fashion, are decidedly so in paying their flower bills. It is not unusual to hear that Mr. Soandso, a prominent man about town, occupying a magnificent mansion, driving fast horses or a $5,000 automobile, has not paid his flower bill since "June a year ago."

Nor is it out of the ordinary to learn that Madam Blank, who gave Mr. Florist a carte blanche order some ten months ago, has left for the seashore, the mountains or for Europe without giving her flower bill the least thought. "Of course," Mr. Florist tells us, "the money is good" and that it won't do at all to send a second bill, much less to press for a settlement." Mr. Soandso or Madam Blank might feel offended. No, it won't do at all. Then there is another reason to be considered. There is a competitor around the corner who is just looking for the chance of carrying such accounts on his books for one or two years.

That our credit system is defective, antiquated and out of accord with our present business conditions is self evident and need not be dwelt upon at greater length here. Nor is it my object to suggest any new methods to you or to point out the remedy. I submit this question to your own good judgment and sincerely hope that you may give it your earnest and serious consideration. It is a question that concerns us all alike, the wholesaler as well as the retailer, the man who has already made his start in life as well as the young man who bends all his energies and all his ingenuity towards that end.

Philadelphia, the horticultural center of the United States, a city whence so many good things have sprung in the past, is pre-eminently fit to take up the work of reform. And this is a most opportune time to undertake a work of this sort. Our national society meets here in August. There are many good things in store for us, we may be sure of that. Some may tell us something about the ideal gardener or employer, some about conducting our stores, others about operating our greenhouses with profit. Let us hope that some good soul may tell us how to bring about the much-needed reform in our credit system, a subject well worthy of the earnest consideration of the best men in our society.

GUTHRIE, OKLA.—E. H. Furrow, E. E. Furrow and J. W. Furrow are incorporated as Furrow & Co., florists, with a capital of $15,000.

GADSDEN, ALA.—A coal oil stove exploded in Mrs. M. A. Stock's greenhouse December 18, doing considerable damage both to the structure and the plants.

RIVERSIDE, ILL.—The partnership, formerly existing between Anton J. Schmidt and R. Meyer, was dissolved by mutual consent, December 19, 1907. A. Schmidt retires from the old firm to take charge at once of his new range of glass on Herrick and Herbert roads.

St. Louis.

THE CHRISTMAS TRADE.

Christmas morning a light snow with moderate temperature found the florists in general good humor. Retailers generally report good business with heavy sales in plants and palms. Many florists predict that if high prices of cut flowers at holiday times continue the future will see plants sales in the majority and a considerable falling off both in demand and sales of cut flowers. At the wholesale houses stock was high and very scarce. Roses, especially red, were scarce. Almost any price could have been obtained for good Richmond, also for American Beauty. Good Bride and Bridesmaid brought $6 to $15. Second grades in lots brought $4. Carnations of the best grade sold for $6 to $8; second, $4 to $5. California violets with long stems brought $2 per 100, shorter stems $1.50. Roman hyacinths, $2 to $3; narcissus, $3 to $4. Stevia was very plentiful. The wholesalers were all happy as they sold out at good prices.

The week between Christmas and New Year has been a very busy one especially with the west end florists. Receptions, balls and all kinds of entertainments caused a big demand for flowers. Roses and carnations of good quality held a stiff price. Dark weather has prevailed which has caused a scarcity of stock. From all sides we hear about the increased demand for plants which should make our local growers here get a move and have a fine supply for Easter. Violets took a tumble to $1 per 100. With bright weather it is expected a big supply will be forthcoming. Quite a lot of stevia was left over from Christmas. Greens of all kinds were plentiful.

NOTES.

Amiel Elroy, 66 years old, who has sold roses and carnations in the streets, died Saturday morning on a cot while watching at the greenhouse of Carl A. Yuengel. He was found cold and stiff by Mr. Yuengel early Saturday morning while making the rounds of his greenhouses.

Geo. Ostertag, superintendent of parks, was cheated out of a Christmas offering from a friend in the country whom he drove about town in his buggy. When the case was opened only a display of ladies' articles was presented to view. George is still wondering.

Mrs. Ellison, of the Ellison Floral Co., had a grand display of plants. Her plants were made doubly attractive by the beautiful arrangement and attractive pot covers.

Alex Siegel disposed of over 20 cases of holly, also handled some extra fine mistletoe. Alex disposed of several hundred white carnations at 60 cents per dozen.

The Mullanphy Flower Co., opened up a pretty store at 2439 N. Grand avenue. Wm. A. Seeger, Jr., is the manager. They had a good trade for Christmas.

Geo. Angermueller was very busy. He received heavy consignments all the week and he was ably assisted by Fred Alves, who is very popular with the ladies.

Miss Alice Scott, who has been in the employ of Young & Sons for over 14 years, met with a sad loss in the death of her mother, Mrs. Eleanore Scott.

Miss Alice Ellison, daughter of W. Ellison of the Ellison Floral Co., will be married to Harry Wardy January 8. The couple will live in Chicago.

The Ayres Floral Co. had an enormous trade. Mrs. Ayres stayed at the store all night, assisted by Walter Retzer, who is a hustler.

Henry Ostertag was very busy the past week. The firm's sales of plants was immense. Henry is ably assisted by Frank Bucksart.

The Townsend Floral Co. had some very large decorations during the past week. They used a large quantity of red carnations.

Miss Lottie Schiess is to be married January 21 to a well known local doctor. Miss Lottie is at present with the Easton Florists.

The Bentzen Floral Co. sold a fine lot of poinsettias. This firm also had a fine lot of Begonia Gloire de Lorraine.

Chas. Kuehn had a big supply of flowers but found roses very scarce, especially reds and American Beauty.

Joe Hauser is bringing in some extra fine long-stemmed violets and expects to have some fine sweet peas.

Young & Sons were very busy for Christmas. They had a great trade in plants, also in cut flowers.

Miss Newman was very busy throughout the holidays with her large plant and flower trade.

Geo. Waldbart had a grand display of flowers and blooming plants which were sold out clean.

Joseph Kaiser and Henry Emmons, of Belleville, Ill., were buyers here last week.

The Foster Floral Co. had a grand window display and sold out everything.

H. G. Berning and Chas. Kuehn disposed of everything at good prices.

W. C. Smith & Co. had heavy sales of carnations, roses and violets.

Miss Krug, of Alton, Ill., was a heavy buyer during the past week.

Will Adele is no longer in the employ of the Ayres Floral Co.

F. H. Weber was almost entirely sold out by noon, Tuesday.

F. C. Weber reports a good trade.

W. F.

Washington.

THE CHRISTMAS TRADE.

All the retailers made a fine showing in Christmas plants. Azaleas were exceptionally plentiful and of a fine quality of bloom, selling well. The berried plants, aucubas, ardisias and imported hollies were also much in evidence. There was a fair supply of heather, used largely in combination baskets and hampers. The crotons and Adiantum Farleyense were also effectively used in combinations. Poinsettias in pots sold well and were also used with good effect in window decorations. Cyclamens and primroses were very good and sold well. There was an exceptional showing in handsome wreaths. Perhaps the dry-work men are to some extent responsible for this, for they are sending out very fine wreaths and it takes a good home-made one to compete with some of their's. Boxwood was very largely used in wreaths, immortelles being in some instances used as decorative features, while sprigs of holly and heather were used for the same purpose. The cut flower situation was unsatisfactory to both retailers and customers. Said a leading retailer: "We cannot sell the higher grades of cut flowers and make a profit at the wholesale prices we are paying." Another complained that while he had received a very steep bill for a small lot of cut stock, the stock had not arrived and he had no means of knowing when it would. Such conditions are always incidental to a great demand and a short supply. With best wishes for all branches of the trade, I believe it to be a fact that there should be a reasonable limit to holiday prices. There are many rich people who will not pay what they consider extravagant prices. To be absolutely fair, there does, however, seem to be reasonable excuse for the dealers trying to get all they can out of the holiday trade. Many of them have passed through a long dull season and must try in some way to make good. But considering the entire situation, I think there will, on the whole, be general satisfaction with results. The Christmas trade began early, both Friday and Saturday being good days. A fierce blast of cold weather, beginning Saturday night, made delivery a very serious matter, both plants and cut stock being in some instances frozen. The weather did not chill the ardor of the buyers.

THE DAYS AFTER CHRISTMAS.

Having had time to think it all over, the retailers agree that it was a record-breaking Christmas trade and, in the general song of rejoicing, a few jarring notes pass unnoticed. Among the plants time does not wither, nor custom stale, the popularity of the azaleas. There never was a better showing of them here for the Christmas trade and all the good and passable ones sold. It may be stated as a fact that a fine large and well flowered azalea at $8 to $10 or even $12 is a more saleable proposition than a dozen American Beauty roses at $24. Combinations were not much in demand and the leading dealers, anticipating this from past experience, were less lavish in their making up. Heather did not seem to go as well as formerly, the main reason being that the price was too high. For a similar reason, and from a doubt as to its keeping quality, Begonia Gloire de Lorraine was not a fast seller. If there are any lessons to be learned, one is: Have plenty of small and medium sized flowering plants for Christmas. Azaleas, primroses, cyclamens or anything with a good bunch of bloom goes. Try to keep prices as reasonable as possible. Many a customer pays the Christmas price and cherishes a grudge for the other 364 days; therefore it pays to be reasonable.

NOTES.

The upper Fourteenth street dealers profited by the blizzard, as they corraled trade that would have gone down town in better weather. At Thomas Circle, W. W. Kimmel had a regular monopoly in Christmas trees and holly wreaths, while Mayberry & Hoover, C. E. Brooks and Philipps all did a rushing business.

Pres. Loose, of the Washington Florists' Co., said, with a smile that was childlike and bland: "We did very well indeed." We rather guess they did. On the best corner in town and with such a decorater as Fred Wolfe, trade just gravitated toward their store.

If they had not made good advance sales the Center Market men would have been hard hit by the cold snap, but as it was they came off lucky. A. B. Garden, F. H. Kramer, C. Schellhorn and Robert Bowdler, all had very attractive displays and good business.

If a novelty is to be had Geo. H. Cooke can be relied on to show it. It may not be so in all the busy marts of the flower trade but here the Euphorbia Jacquiniæflora is a decided novelty. Cooke had it.

It was a cold day, but it is an extremely cold day when W. F. Gude gets left. His exhibit of azaleas, decorated araucarias, ferns and cut flowers was fine and everybody was on the jump.

The Connecticut avenue florists, Cooke, Robertson and Pfister, lead a peaceful valley life in summer but at the holidays they are fierce hustlers, which accounts for their heavy sales.

J. H. Small & Sons' window decorations of large bells, poinsettias and other Christmas plants caused the pedestrians to risk pneumonia standing to admire.

J. R. Freeman had a very nice stock of aucubas, Otaheite oranges, azaleas and various smaller plants which made his store appear well.

Pity the woes of the street man! Cut flowers were so scarce that he could not get any, and it was too cold any way.

To the cut flower, plant, and dry work men, a Happy New Year. You have earned it.

S. E.

Baltimore.

GOOD RETAIL TRADE.

The promise of pronounced cold on Christmas eve was fully borne out on the day of the great holiday, but the purchases and delivery of flowers and plants were practically completed in the very early hours of the morning. Everyone seems to have had an abundant trade, if exception be made of the market men who had perishable stock. This could not be exposed at all. The stores profited by this misfortune of their competitors, for buyers took refuge from the frosty air under shelter and bought quickly that they might soon get home again. There was a sufficiency of all sorts of flowers except carnations, which were probably scarcer and higher than ever known before in this market. Violets have become in this latitude so uncertain a crop that little dependence is put on them, and they cut much less of a figure than formerly in the bulk of holiday sales. Roses were fairly abundant, with too small a proportion of high grades and the growers generally realized lower prices than usual. Poinsettias were over done and kept on coming into the market for the entire week. There was practically no Lilium Harrisii at the Florists' Exchange, and callas have come down a peg in popular estimation. As usual at Christmas a great many baskets were sold, but there was no marked change in the prevailing favorites of other years for filling them. Dracæna terminalis was offered in large quantities and took well, though this can hardly be counted a novelty. Since Christmas there has been almost uninterrupted rains, fogs and soft weather, roads and walks being almost impassable for mud, outdoor occupations and sports being tabooed.

NOTES.

The park board promises to enlarge Patterson park, one of the most frequented of our public pleasure grounds, by the addition of land contained in 14 city blocks. The courts have given a decision in favor of the city's title to 12 acres of land known as Canton park, and that will also be included. The board has $1,000,000 that is available for park extension, the amount to be applied equally in the four sections of the city.

The plan of operations of the board for the coming year includes the extension of Gwynn's Falls park and the establishment of boulevards which will connect all the parks. This involves a large expenditure for the land required, labor and material, trees, shrubbery, etc.

M. Perry, of the Florists' Exchange, reports a large increase in the volume of business done, and that the storage room and vault for keeping flowers in the new building proved admirably adapted to that purpose.

S. B.

San Francisco.

CHRISTMAS BUSINESS.

Christmas has come and gone, and never in the history of the flower business has there been such a shortness of cut flowers of all kinds as this year. There were several reasons for this. First of all was the earthquake and fire in the early part of the year. Most of the growers never thought once that the city would rebuild and rehabilitate in such a short time, but unlimited resources and grit have done the thing. With plenty of money and work in view, San Francisco, as a whole, has had as busy a Christmas as has ever been recorded. Those growers that started after July 1 with very small stock on hand had no flowers worth mentioning for sale. The second reason is that many growers, that continued growing their stock, had not much market in this city all summer and fall and shipped to outside places, Oregon and Washington getting the bulk of the stock. These parties kept their newly made customers through the holidays. A third reason is that just two weeks ago a storm blowing at the rate of from 60 to 70 miles an hour came along and knocked at least 2,500 boxes of glass out of commission and strange to say, those that had a fair crop on and were dealing with the city got the worst end of it. Among those who suffered most were Schwerin Bros., very badly wrecked, Ferrari Bros. and Demoto Bros. All other growers suffered a loss of from 10 to 50 boxes of glass. There were more flower stores in San Francisco in running order by Christmas than there were before the fire, many new places having started up in November and December. These new places were the ones that suffered most for want of flowers and had to do the best they could by selling plants and berries, enough of which at seasonable prices could be furnished.

NOTES.

A scarcity of fuel, both coal and oil, has struck us. Most of the growers are burning oil, as the price of coal is almost out of the question for them, but the railroads are in no hurry to deliver the orders and quite a few had to do without firing for several nights, others doing without firing altogether. Now for a good New Year, and all is well that end's well.

The weather was not what we generally have, being raining for almost a week, no sun and all clouds, but very warm. Still the streets were crowded with shoppers right along.

H. Platt had a fine lot of fancy ferns, cut, in pans, pots and baskets. Platt's ferns could be seen all over this town and for that matter all along the coast.

Chas. F. Fick was in with a beautiful crop of Enchantress and Prosperity carnations and other varieties in proportion.

F. Aby had about the finest crop of C. Testout and American Beauty roses on that could be found east or west.

Meyer's, in San Mateo, had a fine lot of American Beauty roses.

GOLDEN GATE.

QUERIES.

Flowers for Decoration Day.

ED. AMERICAN FLORIST:—

I have two beds, 5x56 feet, from which I have taken my chrysanthemum stock. What would you advise putting in to bring blooms for Decoration day? Would hyacinths, Narcissus Golden Spur or tulips bloom in time if they were put in flats about January 15 or February 1?

A. H. MACD.

Only the latest flowering narcissi, such as N. poeticus will be suitable for flowering as late as Decoration day. If you decide to grow them put them in flats immediately and place the flats outside, covering them with ashes. Introduce them to the house about three weeks before needed in flower. Azaleas, cannas, callas, Easter lilies, sweet peas (sown at once) and mignonette are a few of the many flowers grown for cutting at the time named, but previous preparation of the plants is necessary. If you are unacquainted with the culture of these and other plants, follow carefully the cultural notes that appear in THE AMERICAN FLORIST.

G.

Bedding Plants From Seed.

ED. AMERICAN FLORIST:—

Please give the names of a few bedding plants that may be raised from seed and dates for sowing?

J. W.

Ageratum, blue and white, asters in variety, ornamental foliaged beets, Celosia pyramidalis, annual chrysanthemums, fever few (Pyrethrum aureum), godetias, bedding lobelias, mignonette, nasturtiums (dwarf), Nicotiana affinis and varieties, petunias, ricinus (castor oil plant), salpiglossis, scabious, ten week stocks, verbenas and zinnias are all good plants for different styles of bedding. Late February and March are the best times for sowing, choosing the earlier date if you have plenty of convenience for attending to the resulting young plants.

Heating a Greenhouse.

ED. AMERICAN FLORIST:—

I have a greenhouse I wish to heat to 50° at least in zero weather, 18 by 43 feet, height at ridge 10 feet, sides five feet with two feet of glass. The walls are 1-inch cypress boards, paper and three layers of shingle. I have two 4-inch pipes to carry the water from boiler, these running through another house. How many 2-inch hot water pipes should be in the house described?

C. D.

For a house standing alone, and exposed on each side, as yours presumably

is, not less than 12 runs of 2-inch pipe should be used, spreading them at suitable points in the house and arranging them as near the floor line as possible.

G.

Poinsettias Drooping—Smilax Troubles.

ED. AMERICAN FLORIST:—

How can I keep poinsettias fresh? Mine droop very quickly after cutting. I have also troubles with black fly on my smilax. Have tried tobacco dust, but this does not clean them out. What is the best thing to use? H. B.

Poinsettias do not usually last very well after cutting. Try placing the stems in dry sand to prevent bleeding, keeping them afterwards in a cool place in water. For the black fly on the smilax, fumigate lightly on three successive evenings and you will be rid of them. G.

NEWS NOTES.

WESTFIELD, MASS.—Louis Coleman has opened a store at 244 Elm street.

MADISON, WIS.—The annual convention of the State Horticultural Society will be held in this city February 5-7.

OAKLAND, R. I.—Amos Darling, who recently completed a large greenhouse, is now installing a hot water apparatus.

READING, PA.—Sealed proposals will be received by the board of water commissioners, on or before 4 p. m., January 8, for floral decorations at reservoir and filter grounds.

FARGO, N. D.—Professors Waldron and Worst, of the Agricultural college, are anxious to have two greenhouses built there and they are said to be going after the legislature with this end in view.

NEW YORK.—Lillian Russell is interested in an expedition which George Baldwin, of Chicago, has organized to go up country in New Zealand in search of orchids. He is backed in his enterprise by Conrad Seipp, a brewer, and Joseph Ryerson, of Chicago.

BOSTON, MASS.—For the third time the annual prize of $50 offered by the Boston & Maine railroad for the most beautiful flower garden at any station of the road has gone to James A. Keenan, station agent at the Hill crossing at Belmont. This year he has had 25 feet additional lawn, three more beds and a new design on the west side of the station.

SOUTH ROYALTON, VT.—H. M. Totman, who started in business here seven years ago, has constantly increased his growing plant, until now, it is said, he is the largest grower of cut flowers in Vermont, his wholesale trade extending over the whole of the state and much of his stock going to Boston market. A new Kroeschell boiler was a recent addition, installed to heat the whole of the plant.

ALLENTOWN, PA.—Extensive park planting is to be done this season, 170 varieties correctly labeled for educational purposes having been ordered from Thomas Meehan & Sons of Philadelphia. Altogether 204 deciduous trees, 179 evergreens and close on 1000 shrubs are to be planted. Plans for grading, laying curbing and 3000 square yards of walks, with drinking fountains and bandstand are included in the proposed improvements.

BOISE, IDAHO.—Carl Imes, the forest ranger in charge of the Boise River district of the Sawtooth reserve, was here recently. He states that the government will establish a nursery in the spring for the purpose of experimenting with the artificial propagation of native trees to replenish the forests. Large seedbeds will be sown this season and five or six native forest trees are to be grown from seed gathered in the fall of 1906.

SPOKANE, WASH.—This district is looking up from a gardening point of view. Just recently three separate purchases of land have been made, and all with a view to use them for growing truck and other produce. C. M. Triplett, of Moscow, Idaho, purchased two and one-half acres for $750; William E. Brown of Westlake, Idaho, has purchased five acres for $1,500, and Morgan Wilhite of the same place has secured ten acres for $3,000.

The Late E. W. Wood.
See obituary.

SOUTH BEND, IND.—On account of the phenomenal growth and development of the business of the Ideal Concrete Machinery Co., it has been found necessary to vacate the present factory building, and lease the plant formerly occupied by the Bissel Plow Co., which will give the firm three times its present floor space, and other facilities which will materially assist in promptly taking care of the ever increasing demand for concrete machines.

WILLIAMSPORT, PA.—A very serious fire occurred at the Evenden Bros.' lower greenhouses, early in the morning of December 24. The outbreak was discovered, by the watchman, in a pile of coal in the boiler house, and, despite the efforts of two companies of firemen, as well as the staff on the place, the fire spread until the boiler house and the woodwork of the ice house was destroyed. A corn crib, containing 400 bushels of corn, and the end of one of the greenhouses was also burnt out. The contents of five greenhouses were injured by frost before temporary connections with the boilers could be made, but fortunately all the Christmas flowers had been taken to the upper greenhouses previously, and so escaped destruction. The work of installing a temporary heating plant was begun at once and a new one is to be installed as early as possible.

OBITUARY.

D. L. Viets.

D. L. Viets, of Warren, O., died at Massillon hospital December 20. He had been in failing health for more than a year and his death was attributed to paresis. Deceased was for a number of years engaged in business at Warren as a nurseryman and leaves a widow and four sons.

Jerome Bock.

Jerome Bock, the veteran nurseryman, died at his home, 2600 Madison avenue, Burlington, Ia., on December 26. He had been ailing for some time past, since last summer in fact, when he met with an accident which left him weak.

Jerome Bock was born at Schleger, Prussia, in 1822, where he learned his trade, moving to London 22 years afterwards, where he stayed seven years. To Montreal was his next move, where he took charge of a private garden and conservatory, and in 1851 he moved again to Boston. He came to Burlington in 1856 joining the firm of Neally Bros. Locating on his present ground 12 years later Mr. Bock took an active interest in public affairs but was not an office seeker. He has been a widower for 13 years, and three daughters and a son survive him.

E. W. Wood.

Elijah W. Wood died at his home in West Newton, Mass., December 31. Mr. Wood has for many years been closely allied to the horticultural interests of New England, having served for 25 years as chairman of the fruit committee of the Massachusetts Horticultural Society, for several terms as the society's representative on the state board of agriculture, and for nearly 20 years a trustee of the State Agricultural college.

He was born in Upton, a suburb of Worcester, June 4, 1826, and passed his eightieth anniversary this last June. He was educated in the schools of his native town and Westfield academy. Fifty-five years ago he moved to Boston where he followed commercial interests until 1876, when he retired to his suburban home in Newton and has since devoted himself entirely to horticultural and pomological pursuits

Mr. Wood was a familiar figure among the horticulturalists of Boston, there having been very few of the weekly or special exhibitions of the state society, to which he was so closely attached, that he has not attended since he joined the organization 37 years ago.

He leaves three sons, all following horticultural lines, and a daughter. His wife, who had been an active participant in the work of the state and local horticultural organizations, passed away but a few months ago.

THE AMERICAN FLORIST

TWENTY-SECOND YEAR.

Subscription, $1.00 a year. To Europe, $2.00 Subscriptions accepted only from those in the trade.

Advertisements, on all except cover pages, 10 Cents a Line Agate: $1 00 per inch. Cash with Order.

No Special Position Guaranteed.

Discounts are allowed **only on consecutive insertions**, as follows—6 times, 5 per cent: 13 times, 10 per cent; 26 times, 20 per cent: 52 times, 30 per cent.

Space on front pages and back cover page sold only on yearly contract at $1.00 per inch, net.

The AMERICAN FLORIST Advertising Department is for florists, seedsmen and nurserymen and dealers in wares pertaining to those lines only.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Monday to secure insertion in the issue of the same week. Address

AN effort is being made to increase the appropriation for the Illinois state entomologist.

WE are in receipt of a copy of Benj. Hammond's pocket diary and calendar combined, containing much valuable data and tabular matter.

THE famous collection of mosses formed by the late William Mitten, of England, has been purchased by the United States government.

"INQUIRER" will find all the information he needs on the propagation of plants in Fuller's book on that subject, which we can supply on receipt of the price, $1.50.

SPEAKING of the American carnations an English amateur, when asked at an exhibition of these flowers why he was not showing, made the suggestive reply that "the flowers are too valuable at home just now."

MUCH of the trouble in keeping caladiums in good order arises from their being kept dust dry for several months. It is quite right to dry them off and they need a good rest, but to put them away as is often done close to the steam pipes and never look at them, is quite wrong. No wonder so many refuse to start again, while even those vigorous kinds that do survive are weakened.

Important To Subscribers.

The date on the yellow address label on your copy of THE AMERICAN FLORIST will show when your subscription expires. Please renew subscription promptly on expiration to make certain of receiving your copy of each issue.

For Your Employes.

By sending THE AMERICAN FLORIST to your employes every week of next year they will be given a weekly reminder of you and it will make a most appropriate and useful gift if sent to their home addresses. In many ways it will be a good investment. Send us their names and addresses now, enclosing one dollar for each subscription and we will start with our grand Christmas number and continue sending the paper every week of 1907.

Correction.

In our obituary notice of the late Alfred F. Conard some errors were made which we wish to correct. Besides his wife he is survived by one brother, Pennington Conard of Langdon, Pa., and one sister, Mrs. Geo. Satterthwaite, of Kennett Square, Pa. Mr. Conard was president of the Dingee & Conard Company from the time of its incorporation in 1870 until 1892, when he severed his connection with that firm. In July, 1897, he formed the Conard & Jones Co. with S. Morris Jones and purchased the greenhouses and 35½ acres of land of Antoine Wintzer, who joined the company. The firm also bought the stock and interest of A. B. Blanc & Co., Philadelphia, Pa.

An Ullrich Memorial.

A fitting tribute to the memory of the late Lewis Ullrich, of Tiffin, Ohio, has been paid by a friend of his of many years' standing, David J. Stalter. The memorial takes the form of a gift to the city of a piece of land of triangular shape at the intersection of and between Clinton avenue and Hunter street. This is bequeathed in trust and is to be known forever as "Ullrich Place." The ground contains a fine grove of maple trees and is conveniently located for transforming into quite a beauty spot in the city.

The donor wishes the improvement and beautifying of the site to be placed under the direction of the Present Day Club, an institution with which the late Mr. Ullrich was closely connected. No one did more for the beautifying of the city, or had this more at heart than he had, and this makes the memorial particularly appropriate. The late Mr. Ullrich was a man widely known in his business and was a candidate for the presidency of the Society of American Florists in 1904. Public spirited and ready at all times to take a hand in anything tending to the welfare and the beautifying of the city it is pleasing to know that his memory is to be kept green in so suitable a way and Mr. Stalter is to be thanked and at the same time congratulated for his willingness and on his ability, to so appropriately honor the name of a deserving citizen.

Cornell Gets Plant Expert.

Washington, December 27.—Herbert J. Webber of the bureau of plant industry, has resigned from the government service to accept a professorship at Cornell University. Dr. Webber has been in charge of the plant breeding experiments of the Agricultural Department. He entered the government service in 1892.

He has produced new varieties of long staple, upland cotton, regarded as a valuable contribution to scientific agriculture. He also has developed a hardy orange capable of withstanding a severe frost. When this result was obtained, however, instead of being a hardy orange, it was found to be a composite fruit with the combined characteristics of the orange, the lemon and the tangerine.

Dr. Webber will not take up his duties at Cornell until next spring, when he will take charge of a new department of the university, to be known as the department of experimental plant biology.

A Good Baltimore Advertisement.

Many a reader has been betrayed into perusing a somewhat interesting newspaper story in ordinary type to find at the end that he has wasted his time, eye-sight and attention on an advertisement of some talcum powder or catarrh remedy and given voice to his chagrin in words not current in gatherings of the Y. M. C. A. But the accompanying is, so far as we can recall, the only instance of the adoption of this "reader" style of advertisement by the florists' trade, and if not worthy of imitation it is certainly deserving of perusal, for the matter is well gotten up as to literary expression, correct as to sentiment, new in form and novel in the advertising methods—in Baltimore, at least—of our craft. It appeared some time ago in a Baltimore paper.

"Harbingers of Heaven."

"Flowers are the harbingers of Heaven.

"The ancients used them to subdue temper, to soothe and make passive the passion waves which so often en-

circle the anatomy. It is written that Mary brought sweet perfume to the sepulcher of her Lord. Flowers have been used from time immemorial to denote love's tender passion. They have been used as tokens of fond remembrances often when thousands of miles spanned the distances between loved ones. The delicate rose bud and the modest forget-me-not have traversed the Atlantic and the Pacific, the burning plains of Africa and the frozen paths of the frigid zone carrying messages in their silent way which have spoken volumes to the recipients, telling them of the loving hearts that still beat in unison with their own.

"As civilization and Christianity make progress flowers become more and more a living evidence of a never dying love and affection held together through the laws of affinity which tempers our powers with moderation and subdues our passions to precepts of mercy.

"Flowers are welcome visitors at all seasons and in all places. Music has charms but it must be heard; flowers have their silent messages of peace on earth, good will toward men.

"The lilies of the fields have been pointed out as subjects of purity which far outrival Solomon in all his glory.

"It seems that the guiding hand of a divine Providence takes care of the flowers and pleasant it is to know that in the midst of turmoil and strife of the world we can turn away from them and mingle with the harmless, sweet, innocent flowers, the harbingers of all that is pure and beautiful.

"In the sick room no visitor is more welcome and the bridal wreath is one of the first consideration. A wedding would be insipid without the association of flowers. When the wedding bells have closed their lips; when the disease has done its deadly work; amid the sighs and sobs of the sorrowing, we turn again to the innocent flower.

"When the sod has been laid over the forms of our loved ones, we lay above their bosoms the floral wreath which tells in words more pathetic than tongue can articulate the story of our earthly affection.

"Whether it be a bridal wreath to decorate the brow of youth and beauty, a modest bouquet to cheer an invalid in a hospital, or the funeral wreath to rest upon our treasured earth your wants can be amply supplied in the new floral palace just finished and opened to the public by Charles E. Smith and Company, 121 North Liberty street. The old place has been transformed from the cocoon into the butterfly."

Meetings Next Week.

Buffalo, N. Y.—Buffalo Florists' Club, 383 Ellicott street, Buffalo, N. Y., January 8, at 8 p. m.

SITUATIONS, WANTS, FOR SALE.

One Cent Per Word.

Cash with Adv.

Plant Advs. NOT admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1906 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—By a young man, age 26; married, no family; 13 years' experience in roses, carnations, pot plants, and all bedding plants, fruits and vegetables; best of references. Address T. G. C., 53 Lonsdale St., Dorchester, Boston, Mass.

Situation Wanted—As foreman by a first-class grower of cut flowers and plants, to take entire charge of a large modern plant; has had a life experience in the management of help, etc.; first-class references. Address Key 866, care American Florist.

Situation Wanted—By a bustling, up-to date grower as foreman or assistant; roses and carnations a specialty; 16 years' experience 31 years of age, single; best of references furnished; good wages expected. Would like a place west of Missouri. Address Key 851, care American Florist.

Help Wanted—Young man to work in flower store. Address E. KITZINGER, 595 W. Fullerton Ave., Chicago.

Help Wanted—A good designer and maker-up; must be able to wait on trade; give age and references. Address Key 863, care American Florist.

Help Wanted—A first-class plant man, potter and salesman; state experience, nationality and wages expected. Address STUPPY FLORAL CO., St. Joseph, Mo.

Help Wanted—Gardener and greenhouse man to take charge of private place; must be sober and industrious; single man preferred. Address BOX 474, Montgomery, Ala.

Help Wanted—Man to look after 7,000 feet of glass, general stock for retail trade grown. State wages expected in first letter; single man prefered. Address CLEVELAND NURSERY Waco Tex.

Help Wanted—Strong active, young man for carnation growing and general greenhouse work. State references and wages wanted with board per month. Address Key 865, care American Florist.

Help Wanted—Experienced man by retail florist. Must know how to make up funeral work and wait on store; age, 25 to 35. Address CHAS. H. FOX, 21st St. and Columbia Ave., Philadelphia, Pa.

Help Wanted—Carnation grower; must be a No. 1 man, strictly sober and reliable; wages $30 per month with board and washing; state experience and references. Address Key 844, care American Florist.

Help Wanted—A general greenhouse man for palms, ferns and a general line of blooming plants in pots; permanent position. Please state age and wages required FLORAL HILL GREENHOUSES, 30th and Kingman Blvd., Des Moines, Ia.

Wanted to Rent—About 15,000 sq. ft. of glass near Philadelphia, Pa.; must be in good repair. Will take place in spring. Address EMIL WOHLERT, Bala, Pa.

Wanted to Rent or Lease—Florist business, 6,000 feet or more of glass, in thriving city in Kentucky, Ohio or Indiana; possession April or May. Address Key 864, care American Florist.

Wanted—Applications of reliable and capable men as salesmen, decorators, or designers, or assistants thereto. A. W. SMITH, 345 Sixth Ave., Pittsburg, Pa.

For Sale—Nine greenhouses, dwelling house and barn, 3½ acres of ground. For particulars address P. O. Box 109, Newtown, Bucks Co., Pa.

For Sale—A1 down-town retail store for sale; established 10 years; bargain. Enquire VAUGHAN & SPERRY, 60 Wabash Ave., Chicago.

For Sale—Store, doing a good retail business. Must sell on account of sickness. Cheap. Address 48TH AVE. FLORAL CO., No. 1, So. 48th Ave., Cor. Lake St., Chicago.

For Sale—Ice box, used four months, 16 ft. long, 7 ft. wide, 8½ ft. high; accomodations for a commercial or wholesale florist. Will sell at a sacrifice. Address CHAS. MILLANG, 50 West 29th St., New York.

For Sale—Modern greenhouse, 3,000 feet of glass; best of trade; good reasons for selling. Anyone with money can clear $1,500 to $2,000 a year. It will stand close investigation. Address Key 867, care American Florist.

For Sale—Retail florist business in Washington, D. C. established seven years; good chance for hustler; owner wishes to retire from business. For full particulars address RETAIL, care American Florist, 1133 Broadway, New York.

For Sale—Eleven greenhouses, Kroeschell boilers and one steam boiler, in one of the best suburbs 14 miles north of Chicago, on North Shore; will sell with or without two acres of land, or give long lease with privilege of buying; owner too old, reason of sale; big bargain. Key 861, care American Florist.

For Sale—A No. 1 establishment, store and 10,000 feet of glass with dwelling, 14 miles north of Chicago in best North Shore locality; first-class condition; over 15,000 bedding plants sold retail yearly. Hustler can make big money. Reason of sale; owner has throat trouble and had to go into other business. Place worth $12,000; will sell for less and on easy terms. Key 862, care American Florist.

FOR SALE.

Old established retail florist's store. Reason for selling, going west. For particulars, write to **F. K., 700 N. 5th St., Philadelphia, Pa**

FOR SALE—Greenhouse Pipe

4-in. boiler tubes, second-hand, in fine condition, absolutely free from scale and with ends cut square. Sample and prices on application. KROESCHELL BROS. CO., 45 Erie St., Chicago.

FOR SALE.

I offer for sale my entire greenhouse specialty business, which includes my Trap Duplex Gutters and Ventilating machinery. My business is thoroughly established. No firm has a better acquaintance with the florists. My health is not good and I am compelled to sell out in order to retire.

E. HIPPARD, Youngstown, Ohio.

VAUGHAN'S SEED STORE
CHICAGO.

NOTICE.

Notice is hereby given that the co-partnership heretofore existing between John Frederick Anderson and Thomas Peter Christenson, under the firm name of Anderson & Christenson, in the business of florists, at Short Hills, N. J., has this day been dissolved, the said John Frederick Anderson having purchased the interest of said Thomas Peter Christenson and assumed all the firm's indebtedness.

Dated Dec. 29, 1906.

The houses are all stocked with good reliable plants in first class condition, and the business will be continued as if no change had taken place, and all and everybody is guaranteed the same fair treatment as in the past. Respectfully,

J. F. ANDERSON, Successor to Anderson & Christenson. **Short Hills, N. J.**

HEAVY CHRISTMAS TRADE.

The Christmas business was decidedly the heaviest ever experienced in this section. Prices by the growers were pushed up to the top notch, the retailers responding accordingly; the stock, when it reached the patrons, realized very good prices. The weather preceding Christmas was very dark and the stock was consequently short in most lines. Had there been a few days more sun there would have been an abundance of stock to meet all ordinary demands. In the better stores American Beauty roses of the best grade were bringing $25, Richmond and Killarney $7.50, Bride, Meteor, Bridesmaid and Mme. Chatenay $5 per dozen; Carnations $2 to $3, cut poinsettias $5 to $10 per dozen; violets $6 per 100; lily of the valley $1 to $1.50 per dozen. At these prices everything was cleaned out and many more could have been sold. The plant men had an exceptionally heavy time. Azaleas were grown in double quantities to what they had been in other years and all sorts of made-up arrangements found a ready sale. The work of getting out the stock was the heaviest and most trying ever experienced. The weather was around zero with a cold cutting wind and it was impossible to have all stock properly protected. As it was there was a number of complaints with regard to frozen stock. Since Christmas business continues fair. The prices still continue so abnormally high that a good many people leave the stores disappointed. The weather conditions are very favorable and stock is coming in very plentifully. Violets, which were recently almost impossible to get, are now promised in large quantities.

NOTES.

Grobba & Wandrey, of Mimico, were the only firm who had any luck with their imported holly trees. What they had arrived in good shape and found ready sale.

T. Manton had some very fine orchids, both cattleyas and cypripediums. He also had some very fine pans of poinsettias and red begonias which found a ready sale.

G. Manton was very fortunate with his American Beauty roses. His place is small, but, in proportion to the plants, he had the largest cut of any in this section.

John H. Dunlop had quite a run on Killarney and Richmond roses. Had the season been three days earlier the cut would have been twice as heavy.

W. J. Gammage, of London, had fine long stemmed poinsettias with large double flowers, and these were the best ever seen in this section.

The Steele Briggs Co. had a large number of primulas. These were of very good strain and were fine for made up arrangements.

Lily of the valley, very well grown, came from the Dale Estate, Brampton, by thousands and was very much in demand.

R. Jennings, of Brampton, had some very fine carnations. His blooms were the most select of any seen in the city.

Holly, in most instances, was a disappointment, although several firms had very fine well berried stock.

Southern smilax was much in demand, E. J. Sinclair selling out entirely.

H. G. D.

CHRISTMAS TRADE GOOD.

Christmas trade is reported as good by everyone, but not quite up to expectations. Stock brought high figures but many did not have a clean up. This is especially true of everything white. American Beauty roses were very plentiful and brought $15 per dozen for specials. Everything red sold at fancy prices. Bridesmaid sold well, 20 cents being the price for best stock. Bride roses were overplentiful with a limited demand. All colored carnations cleaned up, but everyone had lots of white ones to carry over. Paper White narcissus cleaned up but Roman hyacinths did not move. Lilies were very scarce. Violets were plentiful. A few chrysanthemums were for sale but did not bring prices expected of them. All greens were plentiful. Just after the Christmas rush stock became plentiful, especially roses. American Beauty sold as low as $6 per dozen and were slow sale. Carnations are moving nicely. Tulips are being received in quantities. Lilies are scarce.

Geo. A. McWilliams, of Natrona, left for a fortnight's hunting trip in North Carolina.

TRADE CONDITIONS.

For the three days immediately following Christmas trade was unusually dull. There was a somewhat better supply of stock than in former years, but the demand fell off a bit more sharply. This was explained as being partly due to the fact that many local retailers had become alarmed at the pre-Christmas scarcity and had actually over stocked. However this may be the market was quiet to a marked degree. Wholesalers showed a disposition to hold to holiday quotations, but prices were shaded. The shipping trade was in better condition, the demand being more normal for the time of year. On Saturday the market toned up considerably. Monday saw a continuation of the Saturday activity, in fact it was a "better Saturday" in the view of most. New Year's morning also saw a very active market. Roses and carnations were of very fair quality, though there were quantities of the latter of very inferior grade. Bridesmaid roses showed a decided improvement in the past week. American Beauty and other roses continued scarce though prices fell off somewhat. Violets held up to holiday prices. These were in great demand, and the supply was not equal to it. These realized $2.00 per 100. There are quantities of bulb stock on the market. Greens, too, with the possible exception of adiantum, are plentiful.

NOTES.

The records of the weather bureau located here show some extraordinary conditions for the year just closed. Never before was the range of temperature as small as for 1906, never having gone below zero nor above 100°. The average temperature was 51.1°. This record was equaled in 1880, and exceeded but once, in 1878, reaching 51.9°. There have been fewer clear days than usual, numbering only 102, while there were 135 days that were cloudy and 128 partly cloudy. For seven months there was a deficit of from 5 to 15 per cent of sun. The rainfall lacked 2.59 inches of being normal. Another interesting item is the fact that the total snowfall was 20.9 inches while the normal is 36.1 inches.

The Chicago Rose Co. is receiving some very fine Richmond, Bride, Bridesmaid and Killarney roses from its Libertyville plant. The holiday trade was exceptionally good with this firm, including the sale of Christmas greens and wreaths. The loss of John Ziska's Thirty-second degree Masonic charm recalls the fact that Mr. Ziska is still the youngest man in the market to have attained his high degree. John W. Starrett severed his connection with this firm Saturday.

Philip Kirchner, who is in charge of E. M. Barton's place, 4629 Greenwood avenue, has a beautiful pure white sport of Chrysanthemum Dr. Enguehard, which originated with him the past season. It has been been given the name of Mrs. Enos M. Barton and Mr. Kirchner thinks so well of it that he will propagate all the stock possible for next season.

T. E. Waters, formerly with the Central Floral Co., has entered the wholesale business with Vaughan & Sperry as salesman, having had some 15 years' experience with some of the largest wholesale houses in the east. A. L. Vaughan reports an extraordinary call for violets for the New Year's trade. Monday was the biggest day of the year except Christmas with this firm.

Secretary A. Vanderpoel of the Gardeners' and Florists' Union, No. 10615, reports unusual activity in that organization this winter. Eighteen new members were initiated at the last meeting. The three park boards of the city have been petitioned to increase the wages of gardeners in their employ to $75 per month.

Bassett & Washburn, during the past two weeks, have had the assistance of E. B. Washburn, a sophomore in the Agriculture College of the University of Wisconsin. Mr. Washburn, who is home for the holidays, is studying horticulture, specializing in greenhouse work.

Five tons of waxed paper in rolls (over a carload in bulk) have recently been received at E. H. Hunt's and two tons more are to follow shortly. This firm sells nearly a ton a month of this commodity.

E. F. Winterson was the recipient of a magnificent New Year's gift from intimate friends and "the boys" in the retail trade. It consisted of a pair of gold cuff buttons, each set with a large diamond.

Wietor Bros. report cutting a grade of long-stemmed American Beauty roses far superior to that usual at this time of year. All other varieties grown here are reported in similarly good crop.

The mother of Albert T. Hay, of Springfield, Ill., aged 75 years, journeyed alone from England to the home of her son, where she expects to reside the balance of her life.

Mrs. E. A. Anderson, of The Fernery, 14 Colorado avenue, reports a large increase in her business this holiday season over that of past years.

Percy Jones expects to have yellow Chadwick and Jeanne Nonin chrysanthemums until about January 15.

Chas. Benesh, formerly with the E. F. Winterson Co., was married December 31 to Miss Josephine Heil.

Secretary Hauswirth, of the S. A. F., expects to go east this week to take over the paraphernalia of office.

H. R. Hughes has issued "Another Fish Story," a folder advertising his gold fish.

Weiland & Risch are cutting Killarney roses with stems as long as 36 inches.

The florists and gardeners in the public parks of the city are seeking higher wages.

E. C. Amling is showing some early jonquils.

CHRISTMAS TRADE GOOD.

Growers as well as retailers are highly pleased with this year's Christmas trade. Quite a number of clear days preceding the holidays brought out all kinds of stock in fine shape. Some retailers pronounce this year's holiday trade equal to that of last year, others report an increase of 5 to 25 per cent. Of roses, carnations, lily of the valley and violets, the supply was not equal to the demand. Lilies, Roman hyacinths, Paper White narcissi and poinsettias were nearly cleared up. Sales of blooming plants were enormous. Begonia Gloire de Lorraine and azaleas were most in demand as specimen plants. For baskets and hampers, poinsettias of all sizes were very popular, besides small azaleas, begonias, and cyclamens and of course small ferns of all kinds. There was very little demand for foliage plants, including the different varieties of Boston ferns.

NOTES.

Smith & Young Co. had a fine crop of Bride and Bridesmaid roses; their violets were few in number but of very good quality.

Don't forget about the meeting, Tuesday, January 8; dinner, exhibits, election of officers and other important business.

Bertermann Bros. Co. had an unprecedented demand for blooming plants.

A. Wiegand & Sons report the best Christmas they ever had.

Baur & Smith sold all their carnations at good prices.

F. Hukriede's azaleas sold like hot cakes.

EVERYBODY KEPT HUSTLING.

The Christmas business of 1906 it is safe to say was about 10 per cent above that of last season. Wholesalers had all they could do and it is now difficult to see how the orders would have gotten out on time but for the breathing spell afforded on December 23. The extreme cold weather, the thermometer ranging from 8° to 12° December 24 and 25, made delivery of plants very difficult. Everything had to be carefully and abundantly wrapped and then sent out in heated wagons. This entailed so much extra work that there was little chance for rest from Sunday a. m. until the work was all out. There were a great many plants sold, all the standard favorites such as azaleas, poinsettias, cyclamens and begonias being much in demand. Cyclamens were very scarce, crops as a rule being from two weeks to a month late. Crotons, Boston and Scottii ferns and dracænas sold well, in fact all choice stock was well cleaned up. All the retailers handled plant baskets, Pennock Bros. making a specialty of these creations. They used a bark covered basket on a wooden foundation, colored in shades of red, that was unique and very pretty. There was quite a variety of shapes and the display of these when arranged and decked with their fancy ribbons was certainly stunning. Cut flowers were about as high as usual. There was not much pickled stock. Each season the quantity grows less, as the growers find it doesn't pay. There were quantities of American Beauty roses but they all sold, as on Christmas day there was not a good flower left. Carnations also sold well, as did violets. Two dollars was the top price for the doubles, while much of the New York stock sold for $1.50. The wholesale men had a great time with their out-of-town orders, there being the usual delay with the express companies. In some instances stock very well packed was frozen, thus entailing great loss on some. The cold weather, luckily for the growers, did not set in until Saturday, after most of the out-of-town shipping was done.

The New Year demand was extremely light when one considers the importance of the holiday. The time was when "duplicate the order for Christmas" was the good word for the commission man, but now all is changed and little more than a good day's business is expected.

NOTES.

The growing of American Beauty roses on a large scale is to be the mission of a company incorporated under the title of The Florex Gardens. D. Faerstenberg, Henry Geiger and Eugene Bernheimer are the officers and owners of the company. They have purchased 50 acres of choice land at North Wales, Pa., and will erect at once a propagating house 32 x 150 feet and an American Beauty house 150 x 450 feet. About one and three-quarter acres will be enclosed within the walls of the house, which is to be of but one span supported on five posts by truss construction. The heating will be almost entirely overhead, taking 25,000 feet of 1¼-inch pipe. Mr. Faerstenberg, who is also the proprietor of the Floral Exchange Nurseries at Edgely, Pa., says that these large single span houses are the most practical in almost every respect, being more easily kept warm and appear to let more light into the plants, as returns from stock planted in this style of house are always much better than are obtained from the same amount of space covered by a succession of low roofs. The ridge pole of this new house will be about 30 feet in height. One thousand eight hundred boxes of 16 x 24 glass, set the 24 way, will be used in the roof. Forty thousand American Beauty roses set in 27 ground beds running the full length of the house will be the capacity of this, surely the largest of its kind in the country. Next season it is planned to erect one 150 x 625 feet and in the near future another. All the glass is to be used to force American Beauty only. Geo. Samtman, late of the firm of Myers & Samtman, noted for their success with this rose, is to have charge of the greenhouses and it goes without saying that the products of these gardens rank high in the rose market.

The Robt. Craig Co. report breaking all records for them, packing over 1,000 boxes for various out-of-town points the three weeks before Christmas.

Frank McDonald, aged 20, a bright and popular young worker late of the Edward Reid force, died last week.

W. K. Harris had a large shipping trade and a splendid Christmas.

New York.

A RETROSPECT.

With New Year's eve, closed one of the most successful years experienced in the New York flower market. While of course at times business has lagged, no one appears to have suffered when the aggregate is considered. Seldom has the market been in over supply, that is glutted, rose growers once or twice being victims in this respect. One point to be emphasized is, that good stock has sold well at all times. Such sacrifices as have been made seldom affected fine grades, although, in the course of the market, prices may have been borne down. Growers of roses, carnations, chrysanthemums, and indeed everything else, should aim to grow the best stock only, and assure themselves that the buying public do not want trash any more than they would want it themselves. The inferior grades of chrysanthemums which came into the market this fall proved a serious reflection upon the capabilities of the growers. Glass area is, or should be, valuable, and with the many good varieties available it is hard to believe anyone possessed of common sense would utilize it to grow trash. The orchid supply was, last fall, increased by the entrance into the commercial field of a firm of growers hitherto catering largely to private demand, but the market easily absorbed their product. The average demand for orchids is excellent, and there is little danger of this line of business being overdone at present. Carnations have done well throughout the year and the blooms offered showed an improvement in quality over the arrivals of the previous year. This is undoubtedly due to the discarding of a lot of old varieties and the adoption of many of the newer. The large handsome flowers of some of the recent introductions have increased the popularity of the carnation. The small volume of business done in the few days previous to the New Year's holiday, and on the holiday eve, was in marked contrast to the excellent trade done at Christmas. Stock hung fire all along the line, and the absence of buyers generally was marked. Roses were just as plentiful as they were short the previous week and prices drooped considerably. Red roses were naturally in the greatest demand and sold pretty well, but at figures near the normal. American Beauty was taken freely, but could not be pushed up to the fancy prices of last week. Carnations are fairly plentiful and move well at quoted prices, very little stock being obtainable at figures below the minimum. Enchantress is arriving in splendid form and is taken almost before it can be displayed on the counters. Winsor, the new pink, is coming from the Pierson establishment at the rate of nearly 1000 a day and is proving an excellent seller. Crimson varieties move very quickly, and are scarce after an early hour in the morning. Poinsettias are not as plentiful as they were last year, but are in sufficient quantity to go around. Gardenias are in somewhat shorter supply after the Christmas cut, and prices have receded materially. Violets are not in what might be termed heavy supply, and do not move readily. About 180 boxes came down the Hudson on New Year's eve, and many remained unsold. Quite a few white violets are ariving, but the prices asked for them do not accelerate their movement; as high as $3 per 100 is being asked. Cattleyas are on the scarce side but prices are normal for the time of year. Lily of the valley is in somewhat heavy supply and although it moves off eventually it drags at times. Lilies are not much wanted and arrivals are light. Callas sell fairly well and on some days are scarce. Bulbous stock is coming in quantities. Paper White narcissus bringing 20 to 25 cents per bunch, Roman hyacinths 1½ to 2 cents per spray. Smilax and asparagus are in good demand, but the latter arrives in too large quantities at times and the prices waver a little. Stevia sells well and cleaned out early on New Year's eve.

The Market, January 2.—The market is dull today with arrivals light. The business on New Year's day was very disappointing.

NOTES.

Myer, the florist of 609 Madison avenue, has just installed an additional ice box in his basement. It is as large as many wholesalers' boxes, but he kept it filled during the holidays. To accommodate his holiday trade he rented four stores on Park avenue and used them as store depots.

Rudolph Fischer, of Great Neck, will leave for his Californian home shortly after Easter and expects to lease his greenhouses before he departs. He reports his carnation Abundance as heavily in crop.

Andrew Wilson, of Summit, N. J., is a frequent visitor to this city in the interests of his plant oil business. He has already worked up a nice trade and the florists who use the oil speak very highly of it.

John Scott of Flatbush, fulfilled his prediction that he would have gardenias with three foot stems for Christmas. A grand lot of them were at the store of John Young and brought easily $1.50 each.

A. C. Dacre had the decorations for the New Year dinner of the Freundschaft society. The table decorations included seventy made-up centre pieces, some of them quite large.

F. R. Pierson Co., of Tarrytown, had a grand crop of new carnation Winsor at Christmas. The cut averaged over a thousand a day. The blooms sold well at good prices.

Chas. Boehe, of Tompkinsville, has five houses of carnations and is sending excellent grades of Enchantress, Lawson and Boston Market to Ford Bros.

Traendly & Schenck have had liberal shipments of Bride, Bridesmaid, Mme. Chatenay and Golden Gate roses throughout the holiday season.

Charles Ruff, of West New Brighton, S. I., had a busy Christmas season. He has a good retail store, and grows a general line of stock.

E. Schrader, of New Springville, is shipping some fine White Enchantress carnations to Walter F. Sheridan.

Jos. S. Fenrich is receiving daily shipments of white violets.

New Orleans.

The social season is now fairly on and the retailers are kept quite busy furnishing cut flowers and decorations for entertainments of all kinds, which will be kept up until Mardi Gras, which falls this year on February 12.

NOTES.

The Society of Southern Florists and Ornamental Horticulturists contemplate holding a convention here on February 14, 15 and 16, 1907, for the discussion and exhibition of plants, etc. The prospects are very good for a large gathering, as the railroads are all giving one fare for the round trip. The several committees have been appointed and everything points to a very successful session. The cold weather has now set in, quite a change from the warm sultry weather of the last five weeks.

H. A. Despommier, Jr., has taken charge of the Blair place, one of the handsomest gardens on St. Charles avenue.

J. Fonta has been reappointed superintendent of Audubon Park in place of E. Baker, resigned.

Geo. Thomas has quite a lot of sweet peas, which are not usually plentiful at this season.

John Rinck has the parks in his division of the I. C. R. R. in the finest of condition.

Wm. Rehm and U. J. Virgin have each a fine lot of plants in the greenhouses.

Robt. Reinecke has added 1,000 feet of glass and a hot water system to his plant.

Francois Gruza has all he can do, making decorations, etc. D.

Buffalo.

GOOD HOLIDAY BUSINESS.

Christmas trade was the largest in the florists' history. The supply of stock was equal to all demands and the quality good. Carnations, roses, violets and lily of the valley sold well. American Beauty roses, owing to their price, were not called for very much. Orchids were very much in demand, as were gardenias. Holly, pine and mistletoe sold well as usual, the quality of the holly wreaths being superior to other years. The plant trade was far in excess of other years. The number grown was never larger. Poinsettias, always the best sellers, were finer than ever before, Begonia Gloire de Lorraine, azaleas, cyclamens, heather and primroses being the others on sale. The weather was ideal for Christmas, but hard on the florist, for on Saturday plants could be carried open, while on Sunday it was about 8° above zero, continuing in that neighborhood until after Wednesday and making it very hard to deliver with any degree of safety. However, by hard work and plenty of paper the complaints were not very numerous. W. J. Palmer & Son, the Wm. Scott Co., and S. A. Anderson had a fine lot of plants. The stores were well decorated, especially Palmer's and Anderson's, the latter's many window changes being especially noted in all the papers. From all reports every florist and grower is more than happy. Money seemed plentiful and everyone wanted flowers. The after Christmas receptions and weddings were many and floral decorations good.

John Meyers, who is associated with his son-in-law, L. H. Neubeck, lost his wife on Christmas day. Mrs. Meyers was a very estimable lady and will be greatly missed. She had only one child, Mrs. L. H. Neubeck, from whose home the funeral took place Saturday.

Wm. F. Kasting sent out thermometers to his friends and customers for Christmas. BISON.

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S. Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

VISITED CHICAGO: C. Reno Root, representing the Barteldes Seed Co., Denver, Col.

A somewhat belated consular report shows that the Irish exports of clover and grass seed in 1904 totaled $823,612.

LOS ANGELES, CAL.—John C. Bodger is starting on an eastern trip representing John Bodger & Sons, seed growers of Gardena.

C. C. MORSE & Co., seed growers of San Francisco, Cal., report that their representative will not make an eastern contracting trip this season and that conditions do not encourage them to fix contract onion seed prices now.

THE PLANTERS' SEED Co., Springfield, Mo., has secured a patent on its Ideal seed cabinet. This is a glass front bulk seed display cabinet with outlet for seed in the rear. The firm made shipments recently of some of its cabinets to Mexico and California.

IT is currently reported that a California onion seed grower who guaranteed full delivery on his 1906 contract was held up by an enterprising western dealer to the tune of several thousand dollars of perfectly good money when short delivery was tendered him.

MITCHELL, S. D.—The Dakota Improved Seed Co. which was organized here several weeks ago made the first step towards establishing a place on which to do business December 22. The company made the purchase of a valuable quarter section of land lying a half a mile southwest of the university which will be utilized in growing seeds.

Gladiolus Praecox.

Frederick Roemer, the German seed grower, is offering Gladiolus Præcox this season. Mr. Roemer claims this strain will bloom the first season if the seeds are sown early in spring. He gives it the common name of the annual gladiolus and claims that one-year-old bulbs produce from two to three flower spikes, the strongest of which bear from six to 12 open flowers at the same time.

W. W. Rawson & Co.'s New Store.

The new store of W. W. Rawson & Co., Boston, Mass., is a very fine one and quite originally arranged. All the arrangements are very homelike and the comfort of customers is studied in every possible way. There are fine reception and reading rooms, with a complete library of all the most up-to-date books. All the horticultural magazines of any note are filed and a very complete lot of flower photographs are collected, in albums, for the use of visitors. Having discarded florists' supplies, the firm bends all its energies to seeds, bulbs and plants, and it has probably the finest and most up-to-date store, as well as the most distinct and original in the country.

Seedsmen's Premiums.

ED. AMERICAN FLORIST:—

For some time, the writer has been seeing in the several trade papers, comment by the various seed houses on the use of premiums, etc., to draw trade. We have never, at any time in the history of our business, made a practice of offering $1 worth of seed for 40 cents; neither have we ever used the privilege of selecting $1.25 worth, or perhaps more, for $1. Our prices are plainly carried out and we have found this by far the best means of handling the trade.

We have made quality the first consideration and we think our customers appreciate this for the reason that we have gathered together the most critical gardeners, into our list of buyers, from Florida to Boston. We have, however, for our mail order trade, tried the booklet this year for the first time. It is our intention, if it makes good, to use a series of booklets as a follow-up. It occurs to us that the booklet has been used with unvarying success in other businesses and we are at present having excellent returns from its use. It is only intended as a means of establishing interest and gathering new names which it is accomplishing to our entire satisfaction. We would like your comment on the idea, and would appreciate any additional ideas you may furnish us.

J. F. NOLL & Co.

[The booklet contains some comment designed to interest farmers and gardeners and an unstamped postal card with spaces for names and addresses of persons desiring catalogues. The booklet is not costly and as it serves its purpose, the publishers are to be congratulated.—ED.]

Imports.

During the week ending December 29 imports were received as follows:

New York.—C. C. Abel, 50 cases plants; Busk & Jevons, one case plants; S. D. Crosby Co., 10 bags garden seeds; F. H. Darrow, four boxes trees, four cases plants, six barrels and three bags seeds; H. Bayersdorfer & Co., three cases moss wreaths; R. J. Godwin's Sons, 152 packages agricultural seeds; C. A. Haynes & Co., five cases palm seeds; Heidelbach, Ickelheimer & Co., 150 bags poppy seed; A. Herrman, 28 cases artificial flowers; Kennedy & Moon, 10 bags seeds; Johnson & Co., seven cases flowers; Aug. Rolker & Sons, 55 cases plants; C. F. Meyer & Co., two cases bulbs; Elizabeth Nursery Co., one case plants; P. Henderson & Co., four barrels, 250 bags, one case and five packages seeds, one case cauliflower seed and eight bags cabbage seed; Maltus & Ware, 18 bags seeds, 25 cases plants, nine cases plants and bulbs, 13 cases flowers and four cases roots; McHutchison & Co., 16 cases plants and 10 cases lily of the valley pips; P. W. Ouwerkerk, 12 cases trees; Vaughan's Seed Store, two cases bulbous roots, four cases seeds; J. M. Thorburn & Co., one case seeds, 35 cases lily of the valley pips. Yokahama Nursery Co., two cases cabbage seed; Stumpp & Walter Co., 45 barrels grass seed; International Despatch, one case plants; C. F. Meyer, two cases bulbs; Henry Nungesser & Co., 150 bags clover seed; J. Roehrs Co., 16 cases trees; C. B. Richard & Co., five cases plants; Lazard Freres, 250 bags poppy seed; Schulz & Ruckgaber, 105 cases lily of the valley pips; W. Taat, two cases lily of the valley pips; Towns & James, 10 barrels seeds; W. Smallwood & Co., one case rose plants.

Naples Seed Lists.

We are accustomed to hear of short supplies of seeds owing to unpropitious seasons, but it is not so common to hear of a deficiency from volcanic action. The heavy and prolonged rain of ashes which fell in April last during the outbreak of Mount Vesuvius destroyed many crops around the volcano and supplies of vegetable and flower seeds will in consequence be deficient.—Gardeners' Chronicle.

The Prevention of Corruption Act.

We are afraid some of our readers will almost begin to tire of the numerous references to this subject which we have made of late, but it is one of such immense importance, not only in our business, but to the whole commercial word, that we feel it our duty to keep the trade thoroughly posted in each fresh point as it arises. H. Morgan Veitch has very kindly drawn our attention to an aspect of the case which has up to the present received very little attention, the nature of which renders it extremely unadvisable to ventilate in the public press; we refer to the

READING AND SHOW ROOM OF W. W. RAWSON & CO.'S NEW STORE.

liability to civil action incurred by those who give anything in the nature of discount or commission to an agent.

It cannot be too strongly impressed upon members of the trade that in addition to the criminal risks they will incur after January, they are even now liable to civil action by any customer for the repayment to him of all sums which they may have paid to his gardener or agent as commission. We need scarcely indicate to any intelligent reader that this is a view of the case which it would not be wise to discuss in the ears of the public but it should receive its proper share of consideration among ourselves. How real the risk is will be judged from the following notes of a case in which he was himself engaged, very kindly supplied to us by Mr. Veitch:

"A tobacco manufacturer, whom we will call A, sold very largely to a firm we may here refer to as B & Co. It came to the knowledge of B & Co. that at Christmas time, and also about the period of the summer holidays, A gave B & Co.'s buyers presents by check for substantial amounts, and there was reason to believe that this represented a percentage on their total purchases made from A. The latter practically admitted that this was the case, but urged that he had no fraudulent intention whatever in making these gifts, being influenced solely by the fear that if he abstained from giving such presents, other tobacco manufacturers might lead orders away from him, by allowing these secret discounts to his customers' buyers. His experience will no doubt coincide in this respect with that of many traders in other branches of business."

"B & Co. sued A for damages, and amongst other pleas they brought a charge of fraudulent conspiracy and claimed damages to the extent of over £1,000. The action came on trial before a judge of the high court with a special jury, and A succeeded in proving to the satisfaction of the jury that he had taken no improper advantage of the influence which the secret discounts might have had on the minds of the buyers in question; accordingly the jury wholly rejected the suggestion that there had been any fraudulent conspiracy, between A on the one hand and the buyers on the other, for the purpose of cheating B & Co., and in fact A proved that having regard to the large bulk of trade which he did with B & Co., he had actually charged them lower prices for the goods supplied than it was his habit to do in the case of any other customers. Accordingly the jury awarded B & Co. damages to the extent of one farthing only, and as the judge took the view that this amounted to an intimation that the action should not have been brought, he entered up judgment for A, and directed B & Co. to bear the costs of both sides."

"B & Co. appealed, with the result that the court of appeal set aside the verdict of the jury, and held that, in addition to bearing all the costs, A was liable to pay to B & Co. an amount equivalent to the total sums which had been paid to the latter's buyers, and the Court stated that in their view where such a state of affairs was allowed to exist, it would be right to assume that the amounts paid to the buyers had in fact been added or 'loaded' on to the price charged to B & Co. for goods supplied. In other words that had it not been for these secret discounts the customers would have been charged an even lower price than what they had paid. It will be noticed that the effect of this case was

Stokes Seed Store.

219 Market Street, PHILADELPHIA, PA.

quite distinct from the rule of law which enables the principal to recover from his agent any secret profit made by the latter. In the action in question the principal was held to be entitled to the amount of secret discount from the person who had already paid it to the agent, though nothing fraudulent in the business transactions themselves had occurred."

In his communication to us, Mr. Veitch summarizes the risks to be run by those who disregard the Act after January 1st next; these are:

"1. Blackmail by any party who has once received secret discount, and who may threaten to turn King's evidence; and also, of course, by any traveler or agent employed to give discount, or who is cognizant of same having been given.

"2. If it were sought to checkmate threats of blackmail by a flat denial (there being presumably no actual evidence of the transaction in existence), the denial to be of any use might have to be repeated on oath at a later stage, with possibly a prosecution for perjury to follow.

"3. The financial liability to refund to the buyer's employer at least the amount of total secret discounts allowed during past years (this liability already exists).

"4. Criminal liability under the prevention of corruption act.

"5. Damage to commercial reputation even in the event of a criminal action proving abortive."—From the Horticultural Advertiser, of England.

Tacoma, Wash.

STOCK SHORT.

The amount of business this year at Christmas was about equal to that of last year, but only because there were no more flowers to be had. I find after talking with several retailers that the call was at least twice as heavy with no larger supply of cut flowers and not as many suitable pot plants to be had. Cut flowers of all kinds have been in short supply all over the coast this season and prices have ruled high. I believe everyone, who handles cut flowers, tried to buy from everyone else, all the way from San Francisco to Victoria, B. C. Just a few of these had business courtesy enough to reply, and say "I will not have enough and am trying to buy for myself." Such a great number of eastern people have come to the coast that we cannot keep the supply up to the demand. So much of the glass in this section is used for lettuce and vegetable growing that we have more greens than flowers.

S. L. H.

Columbus, O.

Local retailers have had an unusually busy holiday trade. High prices did not seem to lessen the demand in the least. Stock in general was very good and not as scarce as in some former years. The poinsettia is rapidly becoming more and more the Christmas flower. Each year sees it growing in popularity. This season there was a splendid demand for them, prices ranging from $2.50 to $3.00 per dozen. Red carnations and violets also had their turn this year, and most of them were very good stock. New Year's is causing somewhat increased activity on the market, but nothing unusual.

CARL.

SPRINGFIELD, MO.—The Planters Seed Co. reports that its Christmas trade in holly and wreathing was double that of last year and nearly as large on trees. Stock in general seemed better cleaned up with everyone than last year.

Milwaukee.

NOTES AND COMMENTS.

The florists' and gardeners' pioneer landmark has lately been abandoned. The old stamping ground so long known as the East Division Market, which was controlled for 40 years by a gardeners' association and was at one time a prominent feature in our city, has outlived its usefulness. The growth of commission houses in vegetables, enabling growers in all localities to compete, and later our wholesale flower centers, have defeated the original object of the association. Among those who were the last to abandon the stand were J. Arnold, J. C. Rost and C. F. Kitzrow, each of whom have fitted up very creditable flower stores. There is one feature of the business which they still retain and it is one which the modern store, which has only the wholesale commission house to depend on, is in need of; that is the cooperation of a greenhouse, in serving the many requirements of customers which cannot be gratified without it. There is a lucrative breach here for some one original and enterprising enough to step into. Who will it be?

Residents of Chippewa Falls are gratified in becoming joint owners of a 163 acre park, extending north on both sides of the creek from Bridgewater avenue to the Glenn Mills property. It is a beautiful tract and has been named Irvine Park, Wm. Irvine having donated the major part of the land; donations were also made by L. C. Stanley and the Chippewa Lumber & Boom Co. of which F. Weyerhaeuser is president.

The gentlemen who make up the park commission are M. S. Bailey, president, Edward Reister, John Hackenbrock, Henry Casper and John Theriault. A landscape gardener has been consulted and if he does not spoil what nature has already accomplished, one of the most beautiful parks in northern Wisconsin will result.

La Crosse, Wis., has received from Alderman N. C. Bachellor 43 acres of land, to be used for a park: the land lies in an ideal location along the Mississippi river and no conditions are attached to the gift. There being no park commission, the matter will be referred to the council committee on grounds.

Geo. J. Kellogg, of Lake Mills, is calling his neighbors together to talk horticulture; these talks will be conducted under the auspices of Lake Mills Horticultural Society, for the purpose of disseminating ideas among the residents for the care of all outdoor subjects.

The Algoma Horticultural Society has elected Mr. Atheran, president, T. A. Cook, vice president; H. C. Christiansen, secretary; C. Philipsen, treasurer. The society is thriving and full of enthusiasm.

Wm. Edlefsen has this week a light blue window, a color scheme which is praiseworthy and should be used by florists more generally than it is.

C. B. W.

ELIZABETH, N. J.—Hitchings and Co. are now erecting a large factory here for the manufacture of greenhouses.

NOROTON HEIGHTS, CONN.—At the soldiers' home the greenhouses are in fine condition just now, Golden Gate, Bridesmaid and General McArthur roses being especially good, also the carnations.

Cleveland.

HEAVY CHRISTMAS TRADE.

The dark cloudy weather that has prevailed for the last month, naturally caused a great scarcity in all cut flowers, and, as was to have been expected, stock was high in price. It was evident that growers in this section have learned that it does not pay to hold two week's cut and dump it on the open market at the last minute, as there was no pickled stock to be found. This of course does not always give the retailer all the stock wanted, but what he does get is good and he is not afraid to ask good prices. Carnations were a little short in supply which was a natural consequence when one considers their popularity. Roses were not as eagerly sought, the high prices causing the buyers to think it over a long time before making the purchase. Violets could not have sold better. This of course was caused by so many being worn for Christmas dinners. Poinsettia went a trifle slow which was largely due to the use of artificial ones, which were used in this city by the thousand. Pansies, sweet peas and narcissi all sold equally well. Stevia went a trifle slow. The Gov. Herrick violet came in fine and were all picked up early.

NOTES.

The volume of business done by Smith & Fetters Christmas week was something enormous, it being impossible to get all the orders out until Christmas night.

The double violets handled by the Cleveland Cut Flower Co. for Christmas were the finest seen here in a long time.

Simon Anderson is sending in an extra fine cut of Roman hyancinths. His carnations are also hard to beat.

A. Graham & Son were showing a fine window of poinsettias the past week, both cut and in pans.

The James Eadie Co. had a very fine window of ferns, bells, and red wreaths Christmas week.

W. F. Kramer, of Rocky River, sent in a fine cut of carnations for the holidays.

F. W. Griffin had a very attractive window display of Christmas novelties.

C. M. Wagner reports holiday trade all that he could possibly handle.

OHIO.

FREEPORT, ME.—John Burr has shipped 15,000 chrysanthemums this season.

SHELBURNE, VT.—Work on the new potting houses at the Farms greenhouses is rapidly progressing.

LYNN, MASS. — Brooding over his brother's death and the loss of a lot of plants by frost, caused J. F. Marble to attempt suicide by inhaling gas. He is now at the Lynn hospital, where it is thought he will recover.

NOROTON HEIGHTS, CONN.—Enchantress, Red, Pink and White Lawson, and Lady Bountiful carnations have done well at Ezra Hartwright's greenhouse, but Prosperity has been a failure here, and with other local growers.

LYNN, MASS.—The Lynn school garden managers have been very successful during the past season, having won $12 from the Massachusetts Horticultural Society and valuable prizes from the Houghton Horticultural Society.

JAMES VICK'S SONS
ROCHESTER, N. Y.

The Leading Specialists and Largest Growers of High-Grade Asters in the World.

Five New Varieties for 1907

VICK'S SUNSET—Companion to Daybreak and Purity, in color a delicate pink shading to a deep rich pink in center. Profuse bloomer. Price per packet 25 cts., 2 pkts. 40 cts.

VICK'S UPRIGHT—Long graceful stems, branch out at the ground and grow directly upwards. Flowers are symmetrical, double and full to the center. Splendid for cutting. Especially valuable for shipping. Price per packet 25 cts., 2 pkts. 40 cts.

VICK'S ROYAL PURPLE—An offshoot from the Branching. Unlike its parent it sends out stems close to the ground. A medium early variety but lasting until late in Fall. Nearly every stem produces specimen flowers. Price per packet 20 cts , 2 pkts. 35 cts.

VICK'S BRANCHING ROSY CARMINE—A new color in the Branching Class. Leading florists pronounce it a shade which will be popular with the trade. Price per packet 25 cts., 2 pkts. 40 cts.

VICK'S CARDINAL—The best bedding Aster ever introduced. A good one for cutting. With its profusion of flowers and brilliant coloring it makes a handsome showing. Price per packet 25 cts., 2 pkts. 40 cts.

The Nursery Trade

American Association of Nurserymen.
Orlando Harrison, Berlin, Md., President; J. W Hill, Des Moines, Ia., Vice-President; George C. Seager, Rochester. N. Y., Sec'y.
Thirty-second annual convention, Detroit, Mich., June, 1907.

VISITED CHICAGO: Nelson Bogue, of Batavia, N. Y., and L. C. Chase, of Rochester, N. Y., enroute to Japan.

THE Department of Agriculture has issued an exhaustive new bulletin on the San Jose scale, by C. L. Marlatt of the bureau of entomology.

NEW YORK.—Orlando Harrison, president of the National Association of Nurserymen, E. Albertson, Bridgeport, Ind., and Prof. John Craig, of Cornell University, Ithaca, N. Y., were visitors December 29, attending the conference of economic entomologists.

ALONG the road sides in Hanover, Germany, there are 175,794 fruit trees, largely apples, under government control. It is an old custom in Germany and other European countries. In the province in question the yearly income from the trees has sometimes been nearly $40,000.

ELIZABETH, N. J.—E. P. Beebe, who has 19 acres devoted to shade trees, roses, shrubs and herbaceous plants, has sold his ground for building purposes and will retire as soon as his stock is disposed of or at the end of 1907. Mr. Beebe is 74 years of age and has been in the nursery business since 1869.

EUROPEAN parasites of the gipsy and brown tailed moths have been successfully introduced to this country. This and many other services to cultivators have been rendered by the Bureau of Entomology, U. S. Department of Agriculture, in correspondence and conjunction with similar institutions abroad.

GREENFIELD, IND.—Dr. Will P. Card has bought the interest in the Crown Hill nurseries, until recently owned by T. J. Wilson. The new firm will be known as Card & Card, and a greatly increased business in forest tree seedlings is anticipated. The nursery is located on the farm of Capt. P. O. Card, Dr. Card's father and the senior partner in the business.

IN a moist soil the Japanese irises, varieties of I. Kæmpferi, thrive splendidly and their lovely flowers are not surpassed by those of any species in this extensive genus. The somewhat flat arrangement of the segments of the flowers shows up with fine effect their soft and beautiful colors. These are wonderfully varied and the plants flower later than those of most other irises.

MANKATO, MINN.—The Blue Earth County Nursery, recently organized, promises to be an important factor in the commercial interests of the city. Ole Andengaard is president and treasurer and M. L. Gjestrum is manager. The company owns or has leased 62 acres of land bordering on East Main street and will engage extensively in the culture and sale of trees of all kinds. Both president and manager are practical men and there should be a good field here for their energies.

The Profession of Forestry.

In every station of life are born men and women who have a natural taste for wandering in the fields and woods. They are keen observers, with an instinctive tact for getting along with birds and animals and for dealing with plants and trees. The hampered amusements of indoor life are tedious to them, and whenever the opportunity presents itself the greatest treat in the world is the privilege of a tramp in the country. The road may be rough and the scenery without special interest to an artist, the pastures may be barren lands and the woodlands degraded with weeds and scraggy underbrush, yet to them it is the open out of doors, the tent of the sky overhead and the free wind of heaven fanning their brows with a great silence all around save where the crooning voices of nature are heard.

To men and to women with this mental outlook the profession of forestry has attractions. It is a field of employment that has risen to the grade of a scientific profession and one that carries honors and pleasures with it. Several of the state universities have schools of forestry, and skilled students are never lacking employment.

The permanent field force of the forest reserves now contains the grades of forest inspector, assistant inspector, forest supervisor, deputy supervisor, forest assistant, forest ranger, deputy ranger, assistant ranger, and forest guard.

To be eligible as a ranger of any sort the applicant must be sound and capable of enduring hardships, and of performing severe labor under trying conditions. No one should enter for examination who is not prepared to take care of himself and his horse in remote regions. He must be able to deal tactfully with all sorts of people, build trails, roads, cabins, and to shoot, ride and pack. And he should have a fair knowledge of surveying, estimating and scaling lumber, land laws, mining and live stock business.

At examination time the aspiring ranger must show that he can actually do these things, and he is put to the actual test. Where boats, saddle horses or pack mules are required, the ranger must own and take care of them. He must be on the go all the time, here, there, and everywhere, perhaps on the patrol to prevent fires or trespassers, now estimating, surveying and marketing lumber, and supervising cuttings and similar work.

It is a fascinating career for the man with a taste for a wild life; and while it has its hardships, it has its compensations as well. The interests are varied and full of excitement. In the little known reserves and unexplored sections there is always the element of adventure and discovery and a touch of romance along with the practical technical side.

Examinations for these positions are held in each state and teritory in which forest reserves are situated. Applicants for the positions of ranger or supervisor must be legal residents between the ages of 21 and 40. The salaries of inspector and his assistant will depend on varying circumstances, but the pay of other positions is not bad. When promotions are earned they will follow. Hence the forest supervisor may begin on $1,800 a year and climb to $2,500. His deputy may commence on $1,500 and reach $1,700. A ranger has $1,200 to $1,400 and his deputy $1,000 to $1,100. An assistant will get $800 to $900 and a forest guard from $600 to $720.

The post of a forest supervisor is gained by the promotion of experienced rangers or assistants. The forest supervisors must have a familiarity with reserve problems and show efficiency in the conduct of a reserve business. They inspect the territory and report on existing conditions and recommend changes for the better in both technical and business management. They deal with the public in business connected with the sale of lumber, control of grazing, issuing of permits, etc.

The assistants of supervisors must have had technical training of a high order. They must be competent to handle working and planting plans, the investigation of the sylvics, and uses of commercial trees, the study of wood preservation, and all the duties of a trained forester. Forest assistants are required to keep horses of their own.

FIELD OF PHLOX AT MARTIN KOHANKIE'S NURSERY, PAINSVILLE, O.

PEONIES.

From our large and select stock, such as the following varieties:

Prince Charles.	Philomile.

Peoria, Ill.

Christmas business was good here, at least 25 per cent better than last year. Everything brought good prices. Carnations and roses were scarce, we having had cloudy weather since December 1. Azaleas brought good prices, but there was enough for everybody. Poinsettias in pots were in great demand.

NOTES.

M. Sitcowitz, foreman for J. C. Murray, has the houses and stock in good shape, in consequence of which a fine holiday trade was done.

B. Juerjens made quite a hit by decorating his flower pots with waxpaper and ribbon.

Nelson & Klopfer had a large demand for pot plants, all stock being sold out.

Cole Bros., as usual, did a large Christmas business.

Chas. Loveridge did a fine holiday trade.

SALT LAKE CITY, UTAH.—C. S. Martin has purchased the floral establishment in Schramm's drug store in the McCornick building, this city with Miss Mae Berry as manager. Telephones Bell 1011 and Ind. 442.

CARNATION CUTTINGS NOW READY

Our cuttings are strong, healthy and well-rooted. Unrooted cuttings at half price. Enchantress $2.00 per 100; $20.00 per 1000. Crusader, $1.75 per 100: $12 50 per 1000. Boston Market, Mrs. T. Lawson, Mrs. A. Nelson, $1.50 psr 100; $12.00 per 1000. Variegated Lawson, $4 00 per 100; $35.00 per 1000. Candace, $5.00 per 100: $40.00 per 1000. Also a fine lot of **Chrysanthemum Cuttings** like Garza, Diana, Gallis, Daisy 'Mums, with many other varieties for the season at low prices.

SCHEIDEN & SCHOOS,
60 Wabash Avenue, CHICAGO.

San Rafael, Cal.

The gardeners, florists and nurserymen of Marin county met in convention at Peterson's hall, December 5, and formed a society to be known as the Marin County Horticultural Society. Permanent organization was effected December 19 and the following officers were elected: John T. Jack, president; J. Hetherington, vice president; Thos. P. Redmayne, Hotel Rafael, San Rafael, Cal., secretary, and Richard Lohrmann, treasurer. As the name of the society indicates, all those actively engaged in any branch of horticulture are eligible for membership and a majority of the local profession have already enrolled. From the spirit manifested a bright future is looked to, especially as a horticultural exhibition, exceeding anything heretofore undertaken locally, is contemplated. T. P. R.

ROOTED CARNATION CUTTINGS READY NOW.

THE NEW
Cyclopedia of American Horticulture.

BY PROFESSOR LIBERTY H. BAILEY.

Over 4,357 articles in all by 450 expert writers, including practically all the best botanists, nurserymen, seedsmen, florists, market gardeners and experimental station horticulturists. Occupying 2,100 pages and covering 24,434 plant names, 2,800 detailed illustrations, enormously increasing the ease of identification, and 146 beautiful full page illustrations.

Every reader of this paper who is interested in farming, in gardening, in trees, in shrubs, and all out of door matters, absolutely needs this set. It takes the place of all others combined on American gardening.

In Six Great Quarto Volumes of 2,100 Pages You Find:

Descriptions alphabetically arranged of all—over a thousand—of the native trees, plants and flowers worth cultivating, with keys enabling you to name any species, as well as to find all information regarding it. Practical articles by leading experts of the country on all phases of commercial plant production and greenhouse management—cut flowers, vegetables, etc.

Fullest cultural instructions for every flower, fruit and vegetable, tree and ornamental plant you may wish to grow.

SPECIAL OFFER.

The regular price is ***$30.00.*** For a few weeks we are able to offer this new and revised edition with the new material added at ***$25.00*** cash. This offer will be withdrawn after a time.

FINE HOLIDAY TRADE.

Everyone was surprised and delighted at the volume of business during the holidays. Great preparations were made for the trade, and when it came on with a rush there was no lack of supply to meet the demand. There were azaleas, hyacinths, narcissi, Begonia Gloire de Lorraine, red and white, poinsettias, cut and in pots, and many other plants, all of which were readily taken. Prices were somewhat in advance of last year, but no one seemed to mind the advance, the plants were so attractive and beautiful. One of the features of the holiday trade was the beautiful double violets, handsomer than usual at this season and bringing a fancy price.

NOTES.

Geny Bros. had, on the morning of December 24, one of the most artistically arranged windows ever seen in this city, white lilies and starring masses of pink azaleas, the whole fringed with white hyacinths. Inside the store was an apparently inexhaustible supply of all the season's finest plants. By evening of the same day the window looked as if a cyclone had hit it and the shelving in the store was nearly stripped of its treasures. But the face of the genial proprietor glowed with satisfaction and he said: "The very best trade we have ever had." The weather was extremely cold and some fine potted plants were injured in delivery.

Joy & Son had a most gorgeous display, and the richest or the poorest could be supplied with a plant. Beautiful green baskets were artistically adorned with blooming poinsettias, many blossoms arranged together and bright ribbon on the handles. There was also a plentiful stock of roses and other cut flowers. American Beauty, Kaiserin, Golden Gate, Richmond and many other roses were sent out in handsome boxes. The firm changed its location on January 1, moving across the street from their present stand. Their new number is 601 Church street.

Miss Eda Birn reports a fine trade, mostly in cut flowers, though she had a nice supply of plants. She moved on January 1 to 107 Eight avenue, N.

SURPLUS STOCK

In Excellent Condition.

NEW YEAR, the time of balls and parties, is now on the programme. What will you use to decorate the tables and homes of your customers with? Take my advice and use (for a change) an

Araucaria Compacta Robusta or A. E. Glauca

(the size and kind I grow). You will be surprised at the effect that it will make on the table or wherever it is placed. The plants I have are as perfect as nature could produce. The brush of an artist could not paint them any better, and prices are cheap. Just look:

6 to 7 in. pots, 4, 5 to 6 years old, 4, 5 to 6 tiers, 25 to 30 in. high and wide, $1.50, $1.75, $2.00 to $2.50 each.

EXCELSA GLAUCA, 5 years old, 7-in. pots, specimen plants, 6 to 7 tiers, 30 to 35 in. high and wide (you never saw anything better in your life than these are), $2.00, $2.50 to $3.00 each; 6-in. pots, 3 years old, 3, 4 to 5 tiers, 16 to 20 in. high and wide, $1.00 to $1.25 each.

ARAUCARIA EXCELSA, 6-in. pots, 5, 6 to 7 tiers, 4 years old, 25 to 30 in. high, $1.00, $1.25 to $1.50.

KENTIA FORSTERIANA, 7-in. pots, made-up plants, 1 large size, about 45 to 48 in. high in the center, and 3 smaller sizes, 25 x 30 in. high around, which gives them a good appearance, $2.00 to $2.50 each; 6-in. pots, single plants, 36 to 45 in. high, 5 to 6 good leaves, 4 years old, $1.25, $1.50 to $1.75 each; 6-in. pots, 32 to 36 in. high, 5 to 6 good leaves, 4 years old, $1.00 each; 5½ to 6 in. pots, 4 years old, 30 in. high, 5 good leaves, 4 years old, 75c.

DRACAENA BRUANTI, (imported), 30 in. high, full of green, waxy foliage from top to bottom; the only Dracaena for parlor, store or house culture, that can stand heat, dust and dirt; 6-in. pots, 50c, $5.00 per doz.

BOSTON FERNS, 7-in., very bushy, only 75c; 6-in., 50c or $5.00 per doz.; 5-in., 30c to 35c; 4-in., 20c

NEPHROLEPIS SCOTTII, 8-in., as big as a washtub, worth $3.00, now $1.50; 7-in., as big as a bushel basket, worth $1.50, now 75c to $1.00; 6-in., 50c; 5¼-in., 40c; 5-in., 30c to 35c; 4-in., 20c to 25c.

NEPHROLEPIS BARROWSII, 7 in. pots, as big as a bushel basket, 75c to $1.00 each; 6-in. pots, large, ready for 7-in., 50c; 5½-in., 40c; 5-in., 35c; 4-in., 25c.

MAIDENHAIR FERNS, 6-in. pots,, 40c.

AZALEAS, in bloom and bud, Simon Mardner, double pink; Vervæneana double rose variegated; Deutsche Perle, double white, 75c, $1.00, $1.25 to $1.50 each.

HEAVY TRADE IN PLANTS.

Christmas trade was by common consent the best ever experienced here. The weather was favorable for deliveries, and at no time was the temperature so low as to require any extraordinary precautions for the safe handling of stock. A feature of the trade which was most beneficial to the retailers was the general tendency of customers making their selections during the whole of the previous week, the daily sales increasing in this line to the day before Christmas, when the height of the activity was reached. The growers had prepared a big stock of flowering plants consisting of begonias, cyclamens, poinsettias, azaleas, Jerusalem cherries, ardisias and peppers and the retailers pushed the sale of these to the extent of the most complete exhaustion of all such stock that had even fair merit. Boston ferns sold well, and araucarias and palms completed the list of the plant stock. The supply of roses was limited during the whole of the week, and Monday found the scarcity more pronounced than probably ever before in this city, and certainly the wholesale prices never before reached so high a figure. The retail prices however were not maintained in the same proportion and only the usual Christmas prices prevailed in most cases. Carnations were in fairly good supply but deep colors, so desirable at this time, were conspicuously scarce. Violets by the local growers were very scarce, but the eastern product was quite plentiful, no shortage being reported. Rhinebeck stock was utterly devoid of fragrance, but the immense size and splendid color of the flowers commended them to the public, and many thousands were disposed of. Paper White narcissi and Roman hyacinths met with meager demand and quite a surplus was noted. The retailers were well prepared with large assortments of combination plant baskets that are finding much favor with those seeking appropriate floral gifts. These were made up in great variety of shapes and sizes, and some quite elaborate effects were seen; flowering plants were mostly used, though many were made up with a combination of foliage plants, very tastefully trimmed with appropriate ribbons. New Year's trade failed to develop the anticipated spirited demand though a fairly good business was done and in a few cases an increase over the same day's trade a year ago was reported.

NOTES.

E. A. Fetters, 275 Woodward avenue, has sold his business to Murray Patterson, who will hereafter carry on the business there. Mr. Fetters will take a rest and will probably visit Europe in the spring.

Thos. and Geo. Browne, Greenfield, suffered the loss of their sister, Amelia G. Ford, who died December 29, and was buried New Year's day. The sympathy of the trade is extended.

The sympathy of the trade is given to Robt. Flowerday whose daughter, aged 14 years, died on Christmas day and was buried on Friday, many florists attending the funeral.

I. F. S.

REDDING, CONN.—The metal frame for the large greenhouse now being built for L. O. Peck is in position, John Gough being the contractor.

Grand Rapids, Mich.

GOOD HOLIDAY TRADE.

As near as can be ascertained the Christmas trade was fully one-fourth greater than that of 1905. There was a material increase in the demand for plants, particularly well grown specimens in bloom or berry. That plants are being used more and more is evident; the demand is increasing more rapidly than that for cut flowers. Prices were good in all lines, no over charging, but a good stable amount for Christmas flowers, with plenty to go around. Some firms could have supplied more orders for carnations were they desired but all other flowers were cleaned up in good shape. Considerable difficulty was experienced in delivering plants and flowers owing to the extreme cold. At 7 a. m. the thermometer registered four above zero, with a very cold north wind. In many cases the flowers were frozen so badly that it was found necessary to refill the orders. In the berried stock, holly went ahead of everything else but taking it as a whole every one is well satisfied.

NOTES.

Eli Cross reports his first Christmas in a down-town store as very satisfactory. He sold 25 cases of holly. Plants sold best and plenty of stock to go around. One of his new delivery wagons broke down early in the day, which hampered him for a short time.

Christmas trade out at Reed's Lake was good, everything moving along quietly. The Reed's Lake Floral Co. is busy shipping carnations and roses and propagating quite a fine lot of carnations.

The Grand Rapids Floral Co. says everything cleaned up. There were plenty of flowers to go around but the firm ran short on plants. Its trade is slowly increasing in all lines.

The Wealthy Avenue Floral Co. reports Christmas trade the best it ever had, with an increased demand in all lines. It has just come out with a fine new covered wagon.

Chas. Chadwick says it was the greatest Christmas he ever had; everything went; plenty to go around; a little short on carnations, but taking it as a whole he is well satisfied.

Jas. Schols is the violet king this season; his violets are certainly beautiful. California, Princess of Wales, M. Louise and Lady Hume Campbell are the varieties grown.

Crabb & Hunter says, "the best Christmas we ever had." There was an extra call for violets, with a good supply on hand. Plants seemed to go much better than usual.

C. A. Creelman, who has been with Chas. Chadwick for the past four years, has left for San Diego, Cal., taking his family with him. He will locate there.

George Hopp is still hopping and growing roses and violets. George does not say very much but saws wood; his stock is fine.

Miss Hartnett, in the Pythian temple, says all she could wish for, with an increased demand for poinsettias and berried plants.

Henry Smith says his trade was fully one-third larger than last year, azaleas, ferns, palms and berried plants leading.

Cunningham & Scott reports everything very satisfactory with trade about one-fourth above that of last year.

N. B.

Kansas City.

TRADE GOOD.

The market has fully revived the Christmas strain and stock is more plentiful than last noted. With but few exceptions, prices remain firm. At this time we are enjoying the best of growing weather with just enough snap in the atmosphere to make things pleasant. Generally speaking trade is good in every regard. Funeral work is plentiful. Entertainments, weddings, receptions and the like are much in evidence. The scarcity in violets is not so noticeable as of late. Dealers have learned that violets may be shipped successfully from the east, which has relieved the situation slightly. A good many fine ones were disposed of for the Christmas demand. Those grown in this locality, especially the singles, are fine. Other seasonable items are in full supply. A noticeable feature this season was the heavy call for green goods. Several stores had booked orders for after-Christmas entertainments which called for holly, wreathing, etc. Last week found the store men scurrying about for material to fill orders.

NOTES.

Edward Ellsworth, manager of Geo. M. Kellogg's, reports that the volume of Christmas business they transacted broke all previous records. Their roses were particularly fine, especially American Beauty, which was in good crop and of splendid color. Mr. Ellsworth has just resigned his position here, but we trust that he will stay with us. He has been associated with Mr. Kellogg for the past three years and during that time has gained a wide circle of friends, who would regret much to see him leave.

The State Horticultural Society, at its meeting December 28 in Topeka, elected the following officers: Edwin Taylor, Edwardsville, president; E. Snyder, Oskaloosa, vice president; E. H. Hoover, Wichita, treasurer; Walter Wellhouse, Topeka, secretary. There was a large atendance of horticulturists from all parts of the state and a fine exhibit was arranged in the corridors of the statehouse.

We are still watching for the appearance of the Rosary Conservatories. For the past six months a sign board at the corner of Armour boulevard and Main street has conveyed the probable establishment of conservatories at that place. However, the rosary does not seem to materialize with any degree of swiftness.

The windows of the Wm. Rock Flower Co. held a nice showing of plants and cut flower boxes for New Year's. Mr. Rock says that Christmas business was about all that could be handled with the present facilities. The showing of ardisias and poinsettias was creditable indeed, and met with a very good demand.

Samuel Murray, as usual, had an excellent lot of Begonia Gloire de Lorraine, poinsettias, and azaleas. He also sold many beautiful basket arrangements.

The Alpha Floral Co. reports a big business during the holidays. Its extensive new quarters were none too large to accommodate the increased Christmas trade.

ABUNDANCE

Rooted Cuttings of this Most Prolific White Carnation

Will be ready for delivery in January.

Price: $5.00 per 100; $40.00 per 1000.
250 at 1000 rate.
5 per cent discount for cash with order.

RUDOLPH FISCHER
Great Neck, L. I., N. Y.

MABELLE, New Pink Carnation for 1907.

Color—A peculiar shade of lovely pink, with a faint yellowish cast; several shades lighter than the Lawson Unlike most pinks, the brightest sun does not injure the color. Size—3 to 4 inches in diameter when established. Odor—Pleasing, but not strong. Stems—Invariably strong, but always graceful, ranging from 12 to 30 inches during the season. Habit, etc.—A very quick, active grower, making specimen plants in a short time, even from late cuttings On account of its rapid growth, requires supporting very soon after benching. Gets away rapidly, blooms early and gives long stems right from the start. Productiveness—Prodigious is the best word we know of to use here. It is the most incessant bloomer, early and late, we have ever grown. Stock limited. Delivery January 5 to 10 and later. Price, $12.00 per 100, $100.00 per 1000.

THE H. WEBER & SONS CO., Oakland, Md.

Please mention the American Florist when writing.

SCOTTII FERNS.

We still have a fine stock of this beautiful fern to offer. Fine big plants for 4-in. pots 10c; 5-in., 15c; 6-in., 25c. This is a fair sample of the many letters received daily: SAN ANTONIO, TEX.

W. W. Coles:—I was very much pleased with my shipment of ferns from you and their condition, so I send another order. F. C. SUCHEY.

Order quick. We need the room. Cash.

A. F. KOHR, 1521-23.25 N.Leavitt St., **Chicago.**

If you do not find what you need in our Ready Reference Department, write us about it.

Providence R. I.

THE CHRISTMAS TRADE.

Prices for Christmas were forced high on account of wholesale figures. Carnations went at $3, $5 and $8 per 100, and retailed for $1 to $1.50 per dozen. This was unusually high for Christmas in this section and created a sentiment of public disfavor, but in spite of this almost everything was cleaned out by Christmas afternoon. Roses did not advance in such a spectacular manner as carnations, wholesaling at $6 to $15 per 100 and doubling up at retail figures. Violets were a pleasant surprise at $1 per 100 wholesale and twice that sum at retail; the quality was excellent, the cut very large, and cleaned out to the last flower with satisfaction to storemen and purchasers alike. Princess was mostly in evidence, with a fair sprinkling of double English. Every grower had good flowers of the single varieties, and the one price of $1 per 100 held good in all directions. The week before the holidays some of the growers struggled to build up a frightened call on violets at $1.50 per 100, but it was of no avail, as some of the best greenhouses offered their stock at 50c less, the market soon finding its level, and not too late to encourage a public demand. A few Roman hyacinths and a goodly supply of Paper White narcissus helped out the shortage of carnations. The weather for the week preceding was a poor start and continued cloudy up to the last minute, so that the rush came all at once. Business was brisk while it lasted, but will not net last year's receipts, chiefly on account of carnations running scarce and high, thereby cutting off a general public support and causing a drop in receipts. The one noticeable feature was the awful slump in paper bells. Last year was very busy in this direction.

M. M.

Scranton, Pa.

Christmas is past, but not the effects of the extra work it entailed on the trade, yet all are rejoicing, having had better business and obtained higher prices than ever before. Cut flowers were in fair supply, prices ranging well above the ordinary. Poinsettias, ferns, and other pot plants, if good stock, were easily sold at fancy prices and large quantities were disposed of in this city and the surrounding towns. Christmas trees looked like a glut, but before trade closed there was a shortage and not a tree for sale. Holly of good quality and ground pine, were sold in large lots at fair prices.

Next meeting of the Florists' Club, January 18; after that for Toronto to see the fancy carnations and hear the introducers of new varieties talk, wise or otherwise, about the very best carnation produced.

The extreme cold, 5° to 10° above zero the day before and on Christmas day, caused a large amount of extra labor, but this is soon forgotten in the satisfaction of having had a good trade.

Wm. McDonald, of Moosic, reports a complete cleaning up in plants and cut flowers, about the same report coming from G. L. Dillon Estate and David Bros., of Bloomsburg. E. M.

OAKLAND, R. I.—Amos Darling recently completed another greenhouse and is now installing a hot water heating system.

Minneapolis.

The Christmas trade here this year was better than ever before. The merchants report a 25 per cent increase over last year, showing a remarkably good business. Prices were exceedingly high, but this seemed to make no difference, for, even with an extra force of clerks, everybody was taxed to the limit in waiting on the customers. Roses seemed to be most in demand, prices for the best grades reaching $36 per dozen. Poinsettias brought $12 per dozen. Carnations were plentiful, but a little soft on account of recent dark weather. Violets sold from $4 to $6 per 100, and were entirely cleaned out. Narcissi, Roman hyacinths and other small stock were good and went rapidly. Christmas greens were entirely sold out leaving nothing for after-Christmas parties.

NOTES.

H. Barsch, of Sixth avenue, N., had quite an unfortunate accident last week. The city water pipe burst, causing about $300 worth of damage to his house and seriously crippling his trade for some time.

The Minneapolis Floral Co.'s greenhouses are empty of everything in the way of blooms and winter plants.

Donaldson's Glass Block reports a heavy trade with a special demand for poinsettias.

G. H.

Louisville.

Christmas business averaged probably 20 per cent over last year. Everybody seemed to have all they could handle, and although stock was in good supply, the unusually heavy demand caused it to become very scarce. Roses had a very heavy demand, and the supply was about equal to it. The quality of some was very good. Carnations had an unusually heavy demand, and became very scarce towards the last. There were some unusually fine ones on the market. Violets, both single and double, had an excellent demand, and the supply and quality were good. Lily of the valley had a fair demand, and the supply was good. Narcissus and Roman hyacinths were received in great quantities, and found a satisfactory demand. A few lilies were on the market, and brought high prices. In the way of plants, we had a fine lot of Begonia Gloire de Lorraine, cyclamens, azaleas, rhododendrons, etc., and they found a steady demand.

F. L. S.

Portland, Ore.

A number of citizens interested in forestry met last night at the Imperial hotel, to lay plans for forming an organization to be known as the State Forestry and Protective Association, in which it is proposed to interest the principal owners of timber land throughout the state. An effort will be made to interest people in the east who own timber here. Prof. Edward R. Lake, of the Oregon Agricultural College, was elected chairman for the evening, and Edmund P. Sheldon, secretary of the Oregon lumber manufacturers' association, acted as secretary. Short speeches were given, on the need of an association of this kind, looking to the preservation of the forests of Oregon against wilful abuse or neglect. Committees were appointed to formulate a constitution and by-laws, also to nominate permanent officers. Those present were: Prof. E. R. Lake, Edmund P. Sheldon, Arthur D. Monteith, Supt. of Parks, D. D. Bronson, W. S. Forest, supervisor Cascade range, Prof. A. S. Forest, Shamokowa, Wash., John Ward, A. E. Cahoon, U. S. Forest Service, L. H. Stowe, Oregon Agricultural College, John Minto, Salem, Ore., George Cornwall, and M. W. Gorman.

The Best Way to Collect an Account

is to place it with the

NATIONAL FLORISTS' BOARD OF TRADE, 56 Pine St., New York.

Why? Because many debtors will pay the Board, fearing otherwise a bad rating in our Credit List. Full information as to methods and rates given on application.

THE LOW PRICE HEATING PLANTS

The Chicago House Wrecking Co. is in position to offer you an interesting proposition for furnishing you with a heating plant at a saving of at least 30%. Send us a sketch of your houses with preferred location of the boiler, the points of compass and the desired night temperature for zero weather, and we will gladly submit you an exact detail quotation of all material required to install the plant. We have ***heaters*** and ***boilers*** of every kind, both new and rebuilt. We have always ou hand a large number of rebuilt boilers suitable for greenhouse heating. Our stock embraces ***fire box boilers, horizontal tubular boilers, Kroeschell boilers, cast iron sectional boilers, Erie City economizers*** and other types.

We can save you considerable money on ***pipe, valves*** and ***fittings;*** also on ***doors, glass, sash*** and everything needed in the construction of your buildings.

SUGGESTIONS FOR FLORISTS.

Seeds.

I notice in the advertising columns of our last few issues that the seed firms are offering the new crop of flower seeds. Don't hold your order until the last minute. Look over the advertisements and send for what you need. Have them ready at hand for sowing at the right time.

Verbenas, thunbergias, maurandias, Centaurea gymnocarpa, bellis, salvias can not be secured too early for the first sowing. Don't try your luck with a lot of old seed that has been lying a whole year on some shelf. The cost of the seeds you now buy is so small that it does not pay to sow old seeds.

Begonia Vernon should be sown at once. A little package goes a long way. You may not have had any last year and you probably had call for them, so have a few hundred plants this season. If you don't sell them, bed them out yourself.

How about your pansies? You can still put in some seeds which will make nice plants if not stunted by not being transplanted when ready or by neglect in watering.

Hybrid Perpetual Roses.

Hybrids intended for Easter should for the present be kept at a temperature of 40°. They will make roots now and will be ready by the end of the month to stand more heat. Don't leave too much wood on the plants. So often one sees at Easter plants which, while they may have beautiful tops, show 18 inches of bare stems below. If you cut the heavy wood of last year's growth back to three eyes, and the lighter to two and one, the plants will be about right. Don't neglect to syringe them; they need it every day while under glass.

Spireas.

Plants for Easter blooming are still under the benches, and they may be left there for some time; but see to it that they are removed as soon as they commence to make growth. The way to force this plant successfully is to remember that it lives practically on water during this process, so don't neglect to give it plenty. The grower should be particular also about fumigating, as the spireas do not like much smoke. Cover the plants with thin cloth or paper when you fumigate the house they are in.

Hydrangeas.

Don't crowd the plants that you wish to have in bloom for Easter. Give them plenty of bench room. Let them come along slowly now and increase the temperature towards the end of the month. Forty-five degrees is all they require now and 60° later on. As soon as the plants begin to grow they will need a lot of water, yet it should be seen to that no water is allowed to stand in the pots, for if this occurs yellow leaves will be the result in a few days.

Azaleas.

It takes a few minutes to go over your azaleas once a week to remove that young growth, which from this time forward appears below the buds. Keep the plants intended for Easter at 40° to 45°. There are always some more advanced than others, but let them come along as they will; no doubt there will be call for them right along now. If you have azaleas left over from Christmas remove the old flowers and place the plants in a light cool house. If not neglected they will make good plants for next year.

Cytisus.

Many of us know this plant better under the name of genista. It is very beautiful when loaded down with its golden flowers, and while it does not make a good house plant, many are sold at Easter. The cytisuses are of the easiest culture, and while it is too early to make cuttings, I will remind those who have plants intended for Easter to keep them in a 40° house. Place them, if you find they are backward, in a higher temperature by March 10, but most likely they will come in all right without any forcing.

Metrosideros.

The more varieties of plants you have to offer at Easter the better, for there

are always customers wishing something new. One of the plants which is just a little out of the ordinary is the bottle brush (metrosideros). Most of the plants seen at Easter come from Holland or Belgium. We can grow them just as well here, but as long as there is only a small number of them used it is cheaper to import them with your regular importation of other stock. Should you have plants on hand you can let them come along in a 45° temperature until February; increase the temperature during that month to 65° and you will have them in bloom for your Easter trade.

Deutzias.

A well grown deutzia always makes a good selling plant for Easter, and, while it is yet too early to begin hurrying the plants into bloom for that festival, it is well to say a few words about it now. The second week in February will be time enough to start them from their resting place. While they will stand any amount of heat if watered and syringed properly, they will be better in every way if allowed to come along in a 55° temperature. There are several deutzias, all beautiful, that can be successfully forced, but the best known and most used for this purpose is D. gracilis. It has been forced by our grandfathers, and it will take a good novelty to make us discard it.

Bedding Season Preparations.

While we cannot neglect anything that ought to be done now in order to be in good shape with a stock of plants and cut flowers for Easter, each coming day will bring new duties to perform toward getting ready for the bedding season. As the past Christmas season was the best we've ever had, so may we expect the coming Easter to be ahead of those preceding, and a greater demand for bedding plants at better prices will be the outlook for the spring of 1907. Better grown plants will bring higher prices than ever before and the grower who produces cheap plants will only be able to sell them when the good stock is completely sold out.

Dahlias.

If you have only a few field grown clumps of a certain sort that you wish to propagate, you may get ready now to start the tubers. Plant them in a warm place and you will soon have cuttings ready for the bench; these will root early and make fine plants for this summer's blooming. To those varieties of which you have sufficient stock, nothing need be done but to keep them dry under the benches, as otherwise they will be covered with young growth in a few weeks. Don't delay in ordering stock of such varieties as you intend adding to your list. You will not buy them any cheaper later on.

Cannas.

Have you looked at your cannas lately? If not, you should do so at once. If they have been standing under some carnation bench as you brought them in last fall, and have been protected against too much drip, it will not hurt to spray them a little. The roots can be started in a few days, but it is still rather early. Should you be short of certain varieties, this is the time to buy. Don't wait until all the best varieties and strongest plants are sold.

FLORISTS' FORCING BULBS AND ROOTS.

Copyright 1906 by the American Florist Company.

X.—Spireas.

The Japanese spirea has been known and grown by gardeners for generations. It easily won and firmly held a prominent place among hardy plants eminently fitted for indoor culture. Its merits rest upon its adaptibility for pot culture and forcing, its free flowering and long lasting qualities, the ease with which it is grown and in its utter freedom from insests or disease of any kind. As a market plant for an early spring and holiday trade it is much favored by growers and buyers, and its fine trusses of milk-white, feathery bloom are most serviceable as a chaste and durable cut material.

There are several varieties in this class of spirea, or astilbe, as perhaps now more aptly named. The old, well favored Astilbe Japonica, however, has so far not lost perceptibly in prestige by the constant introduction of newer varieties. It still holds its own as a splendid sort for forcing and as a great producer of fine, evenly flowered sprays. Its sub-variety, A. Japonica compacta multiflora, is a compact, dwarf, very bushy plant, excellent as a well grown pot specimen with flower trusses less numerous but much larger than those produced by the original type.

There are also several distinct forms of A. Japonica with varigated foliage, of which aurea reticulata is probably the finest and well worth a place in any greenhouse or conservatory. The freest flowering but by no means the prettiest of the newer sorts is astilboides floribunda. It is good for cutting, the flowers being long-stemmed and of a purer white than those of most other varieties, though a trifle slower in opening. Perhaps the finest of the newly introduced varieties is Gladstone, which has met with freely extended favor from all commercial growers who have tried it. The flowers are of a fine white and are most freely produced, and the plants, although forming densely set, well rounded bushes, do not lack the elements of grace and elegance, at least they are iess rigidly stiff in appearance than most other sorts.

The culture of spireas is exceedingly simple. When the plants, usually good sized clumps with a firm ball of roots, arrive in November, they should be plunged in a frame and be covered with straw, hay or some such material, which will prevent a solidifying of the whole mass by frost, most awkward when the plants are to be brought in. They could also be potted up immediately after their arrival and then be placed in frames and covered, but very little is gained thereby.

If spireas are potted up and placed in a temperature of from 50° to 55° in the first half of February, they will be in fine shape for Easter, generally needing but little pushing or holding back to have them just right for that holiday, whether early or late. The grower can figure on a week or two less than three months from start to finish. Forcing spireas for the late plant trade will take little more than two months, for the later forcing begins, the faster will be the process.

It is well to expose the plants, before potting them up, to a night's good freezing, by laying them out in the cold. They should then be dipped in water and be put in pots not much larger than the ball of roots. When they have made a start, water must be given and be increased in quantity from day to day as growth progresses. When drawing near the finishing stage a feeding with liquid manure will prove helpful. Tobacco fumigation will ruin the foliage of indoor grown spireas and they should therefore never be exposed to it.

XI.—Gladioli.

The many varieties of gladioli, as offered at the present time, show a marvelous improvement over any of the sorts grown in years gone by. Entirely new types originated in recent years, unique forms and rare shades were called into existence and hybrids of wonderful beauty have been introduced by specialists, whose zeal and tireless labors have awakened a wide-spread interest in this charming and most useful class of flowering bulbs.

Gladioli now are an all-important item with commercial florists. Extensive cultivation of the finest and most desirable market sorts has proven a source of considerable profit to growers of high grade cut material in late years. From a side line of little consequence the growing of gladioli as florists' stock has evolved into a feature of some importance, gaining steadily in extent. As an all-summer crop in the open, or a

NEW RANGE OF BERTERMANN BROS'., INDIANAPOLIS, IND.

highly prized indoor product for early spring, gladioli never fail to do well, their culture being the easiest and most simple of anything grown by florists.

Several crops of bloom in succession may be had outdoors from early in the season until late fall by making a planting every week or two from about the middle of April until the end of June. Although gladioli can be grown in almost any kind of soil and situation, they gratefully respond to good culture, and exceptionally fine spikes are cut from bulbs planted in well exposed, liberally enriched and deeply plowed garden land.

CARNATIONS AT BERTERMANN BROS'., INDIANAPOLIS, IND.

The bulbs should be laid three inches below the surface of the soil, about six inches apart in rows with space enough between rows, double rows or narrow beds to afford the needed room for cultivation and cutting. Gladioli may also to advantage be raised among other crops or on beds and borders stocked with other plants, but separate, thorough culture will give best results. In the fall the bulbs are dug up, spread out to dry and are then stored away for the winter in any cold place where moisture and frost cannot reach them.

Some of the varieties of gladioli, and all of them, are excellent for indoor forcing. Well known sorts, most tractable and easily managed, are Peach Blossom, Pink Perfection, Colvillei alba, rosea and rubra, Crimson Queen and Blushing Bride. The latter variety, belonging to the light shades, of which the Bride, or G. Colvillei alba, is the leading pure white, can be had in bloom earlier than any other sort, sometimes at Easter should luck favor the grower. There is no difficulty in the raising of fine blooms for a ready demand in May and June and up to the time when outdoor gladioli begin to flower.

The bulbs may successfully be grown as a between-crop among carnations, snapdragons, mignonette and the like, but usually bring spikes of greater substance and brighter color when planted by themselves either in well lighted benches or in deep trays, which latter allow of their being moved about on benches or shelves as deemed advisable. A good grade of composted soil should be used in growing gladioli under glass. Plenty of water and light, a moderate temperature, staking and tying if necessary and a feeding with liquid fertilizer, when fairly started and well supplied with roots, will lead up to a harvest of finely colored and large flowered spikes. When room in the houses becomes scarce in late spring, the flats of gladioli can be removed to some sheltered frame outdoors.

E.

WITH THE GROWERS

Bertermann Bros Co., Indianapolis.

The illustrations show a partial outside and inside view of the new range of Bertermann Bros. Co. of Indianapolis. The houses are situated on the firm's 100-acre farm on National road, seven miles east of the city. Although new and of the best of material and workmanship the houses are not constructed after the latest pattern. When it comes to building, John Bertermann has ideas of his own, and in many important details of construction he prefers the older style. As the stock is up to the top notch of perfection he certainly has the best of the argument.

The houses are 250 feet long and about 25 feet wide, each accommodating three five foot benches and four walks. They have wooden gutters, supported seven feet six inches above the ground by 4-inch cedar posts. The roof consists of 2-inch bars, 12 inches apart, continuous ventilation on one side of ridge, wooden purlins resting on 2-inch pipe supports and 12x16 single strength glass. The benches are built of pecky cypress for six inches of soil, with return pipes underneath. The heating apparatus and the waterworks are the latest out. The range is heated by steam, the boilers above ground, in a roomy, airy, light and dry house, with Morehead traps to return condensation. The waterworks consist of a 15,000 gallon tank on a 52-foot steel tower, four h. p. gasoline engine and a 4-inch well down to the limestone.

The third illustration shows a bench in one of the houses of the old range, with Spirea Gladstone ready for Christmas and poinsettias in the background. Enough of the latter are in the picture to show that the Bertermanns know how to keep them from losing their leaves.

J.

European Notes.

The Roosevelt pear is one of the novelties of Baltet, of France. It is described as being of large size and excellent quality, maturing in October.

E. H. Wilson, who returned to England from China last year, after several years' engagement with James Veitch & Sons, Ltd., London, as plant collector, sailed again on December 5 to resume plant collecting in China under the auspices of Prof. Sargent, of the Arnold Arboretum, Boston, Mass.

Edinburgh seed trade assistants dined recently under the presidency of D. W. Thomson, seed merchant, and made merry o'er the haggis and other "soncy fare" followed by an excellent programme of toasts and musical selections. Dublin assistants fraternized at a similar function with A. J. Sinclair (Hogg & Robertson) in the chair.

The event of the week in London was

SPIREA GLADSTONE AND POINSETTIAS AT BERTERMANN BROS'., INDIANAPOLIS.

the Smithfield show of fat cattle in the Agricultural hall at which his majesty the king was a leading prize winner. Seedsmen were in evidence from all corners of the kingdom. The farmers had much to interest them in the fine examples of mangels, swedes, carrots, cabbages, potatoes, etc., arranged in imposing pyramidal and other forms, surrounded by sacks of peas, beans, oats, wheat, barley, etc., from Sutton & Sons, Reading, J. Carter & Co., London, E. Webb & Sons, Wordsley, Harrison & Sons, Leicester, E. W. King & Co., Coggeshall, and John K. King & Sons, Coggeshall, all prominent seed growers and merchants.

The National Potato Society held its annual exhibition on December 14 and 15, but alas, enthusiasm in the exhibition seems to have perished with the boom which we experienced two or three years ago when novelties were selling for their weight in gold. Seed merchants rejoice in the fact that the inflated prices are now in oblivion and normal prices again rule. A few good tubers were on view but the number of exhibitors and exhibits were a long way behind previous years. Unfortunately potato disease is rampant and farmers and seed potato merchants are much concerned.

The annual show of market chrysanthemums held in London on December 12 was a grand success. Prizes are competed for by market growers only and all plants and blooms exhibited are such as are offered for sale in Covent Garden. The judges are Covent Garden salesmen who give the awards from a salesman's point of view. In some classes the prizes are for the best packed boxes of blooms for market, in others for market bunches, flowers disbudded and undisbudded, cut blooms in vases, plants in 5-inch and 6-inch pots, etc., also for novelties useful for market work. Very few of the latter were in evidence. The plants in pots from Butler Bros. were marvels of cultural skill, dwarf plants in 5-inch and 6-inch pots carrying six or more blooms, charming miniatures for decorative work. The principal prize takers for cut blooms included some of our best known growers who are regularly in Covent Garden with the same class of blooms as exhibited, all highly creditable and reckoned the cream of the market, such as Philip Ladds & Son, Swanley, Cragg, Harrison & Cragg, Heston, Butler Bros., Bexley Heath, and G. Prichett, Tottenham, one of the oldest growers and one of the original members of the National Chrysanthemum Society.

BEE.

AMERICAN BEAUTY ROSES AT POEHLMANN BROS., MORTON GROVE, ILL.

Two-year-old stock planted in August, photographed in October.

THE ROSE.

Notes in Season.

No time should be lost in propagating roses for next season's stock. If only one batch is to be struck it should be done now. In the whole process of rose growing the "Do it now" idea is one of the most important factors. By this I mean, if roses need feed give it to them at once before they suffer; if they need tying up then tie them before they become damaged. If you view this as a business proposition you will find that it costs a little more to get things done up to date to start with, but that it costs really less to keep them up to date than to keep them 30 days behind, and you know from experience that the former method is likely to add to the profit from the crop. So I say start with that idea in mind. Root rose cuttings now.

In making the cuttings use only the best and healthiest wood. If you cannot get sufficient good wood, or if the parent stock is not healthy enough to make good cuttings, do not make a bad matter worse by using the poor stuff. Buy what you need from some reliable grower. Many growers make a business of changing their stock as soon as it falls below standard. Start right. If you buy cuttings buy good ones. If you propagate your own, propagate good ones.

So much has been said in these columns from time to time about the best methods of propagating that I will not dwell on the subject at this time. However, it will not be amiss to say that I believe many of the failures in rooting rose cuttings are caused by insufficient watering during the first two weeks they are in the sand. Don't be afraid to give them a good watering every day, provided you have good drainage. Many a fine batch of American Beauty has been lost by insufficient watering. We used to shade our propagating benches with paper laid directly on the cuttings. But lately we have been using a better method. We make light wooden frames the width of the bench and a convenient length to handle and cover them with muslin. These frames when in use are elevated from three to six inches above the cuttings. As soon as the cuttings begin to root, which is usually in about three weeks, the shades can be dispensed with.

The dark, sunless days we have experienced during the last six weeks have been anything but encouraging to the rose grower. Care must be taken to keep other conditions as much in harmony with this kind of weather as possible. The temperature must not be allowed to run too high, or soft spindly growth will result. When the temperature outdoors is higher than 40° it will pay to have a little ventilation day and night. Below this it is a question whether or not you can afford the extra fuel it will take. Remember, the more ventilation the better. While you may consider it too expensive to ventilate much in cold weather, do not neglect the opportunity when it is warmer and does not cost so much.

Then there is the possibility of overwatering. The plants do not need and will not stand much water these short dark days, but those that are doing

PERLE DES JARDINS ROSES AT PETER REINBERG'S, CHICAGO.

nicely and growing well now will be benefited by a top dressing of cow manure. If cow manure is not obtainable good, rotten stable manure will do. Keep the plants tied up and all the dead leaves picked off. Tidiness and cleanliness are important factors in good rose growing.

If there is grafting to be done no time should be lost in getting the manetti stocks potted, well watered and in a cool house, slightly shaded from the sun until they start to break. Do not allow the stocks to get dry. You will find that they will break better and stronger if the tops are sprinkled about three times a day. In my next notes I will have more to say about grafting.

W. W. COLES.

Cultural Notes.

The application of some otherwise excellent fertilizers leaves a scaly deposit on the soil of the rose benches, rendering the surface impervious to air and being injurious to the health of the plants for this reason. As fertilizers are freely applied late in the year with a view to securing extra quantities of and quality in the flowers at Christmas there may be many benches in this condition now. Where they are, allow them to get a little on the dry side and prick the surface over lightly, breaking the crust. Avoid more injury than necessary to any surface roots that may be present, but break the crust, so that air and moisture will pass freely. A thin top dressing of soil will be an advantage afterwards if roots are at all freely discovered, but not otherwise. If ap plied, give a light watering to settle it and the disturbed roots.

With a view to cutting long stems, the plants of the tea scented varieties are often somewhat ruthlessly cut, some even going so far as not to leave any eyes past the point where the plants were pinched or cut back to in October. Needless to say this is a great strain on the plants, especially when a heavy cut has been taken, as is usual at holiday times. Many plants are so checked by this that they fail to start into growth again and a serious loss to the spring cut is caused. With a hazy idea of remedying matters some growers go to work and water heavily and continuously, but this only makes matters worse by still further checking the roots. The proper thing to do is to watch the plants narrowly, keeping the roots a little on the dry side, but spraying them as frequently as weather circumstances will allow. Under these conditions the roots will have a chance to make good and this root action will soon be further strengthened by the formation of healthy young wood. When this attains a few inches in length the correct balance between root and branch is again set up and with the increasing light of the lengthening days they will be safe. It is easy to overdo the spraying now, especially with plants carrying a fairly heavy head of foliage. Never spray at all when the weather is dull.

There may be cases in which it is advisable to rest certain benches or portions of benches now, and the check given by the heavy cuts of the last few weeks predisposes the plants to a restful state. But in a general way the grower will prefer to take another couple of crops from his plants before the heat of summer comes on, then to cut them out and replant or else prune them back to be carried over for autumn flowering. In the latter case a slight rise of temperature is advisable now, but 62° to 64° is sufficient, ventilating at the latter figure. Richmond does not so easily recover from a check to growth as does Bride, Bridesmaid, Chatenay and Killarney but a lot depends upon the previous health of the plants. If this has been good they will quickly recover; if they were weak before hand they will be longer in recuperating. As the young shoots develop any small and useless spray may be cut out, but the knife or secateurs must be only moderately used as yet. Keep in mind too the need of young wood for propagating and don't cut this away.

The ordinary wood bench with brick bottom is as good as any for propagating from cuttings. Prepare this by placing about 3½ inches of sand in which to insert the cuttings. Some growers use less sand but this is a good medium. The best kind of wood to use for cuttings is semi-ripened shoots that have not borne flowers. Heavy pithy shoots and hard well ripened wood are both useless for cuttings. Short jointed wood is best, especially when treating American Beauty and other roses having a considerable distance between the leaves. They may be cut from four to five inches in length about half of this being buried in the sand. Arrange if possible to have the bottom heat in the sand a little higher than the temperature of the house, 62° and 58° being the limit in each case. Keep up a moist atmosphere, shade from bright sunshine and never allow the sand to dry. The cuttings will be sufficiently rooted for potting in about four or five weeks. If grafting is to be gone into early place the manettis in a cool house at once and lightly syringe them daily when the weather is bright. They are in fit condition for use as stocks when a few inches of growth has been made. If pot plants of hybrid perpetuals are to be grown on from imported plants lose no time now in getting them cut back and potted, keeping them for the present, in quite a cool and airy house.

G.

PAUL NIEHOFF'S NEW PINK ROSE AURORA.

The New Rose Aurora.

The new pink rose Aurora is said to be the result of a cross between Bon Silene and Souv. du Pres. Carnot, and it has inherited the free flowering qualities of the former and the strong growing habit of the latter. The flowers are large and full and are produced on strong and stiff stems, with a rich dark green foliage. The color is a beautiful dark pink and wherever shown attracted much attention. The keeping quality of the flowers is excellent. Aurora is easy to grow and does not need a high temperature.

Best Grafted Roses.

ED. AMERICAN FLORIST:—

Please advise me what forcing roses do best when grafted. X.

Bride, Bridesmaid, Golden Gate, Chatenay, Killarney, Richmond and Kaiserin do well grafted, and I very much prefer American Beauty grafted if the soil is rather light. E.

THE CARNATION.

Split Carnation Flowers.

Improved methods in growing carnations and the introduction of improved varieties, though having made great progress in the last decade or two, have not as yet mitigated to any great degree the provoking habit of the divine flower of producing a large percentage of malformed blooms, commonly termed splits. How to mend these flowers so as to enable the dealer to obtain as high a price for them as possible has no doubt engaged the best thought of not a few carnation specialists. Split carnations are a product of every carnation growing establishment which we are safe to say will be with us for some years to come at least, and what careful cultural methods fail to accomplish while the blooms are developing on the plants must be provided for after they are cut.

As yet but little progress has been made in the introduction of appliances calculated to turn these flowers into a product worthy of recognition in commerce or on exhibition tables. The clumsy method of applying a rubber band around the calyx is about the best we have found in this line, but at its best leaves room for serious objection. The flower buyer, upon detecting these bands around the flowers, very naturally jumps to the conclusion that they are old and ready to fall to pieces, that he has been buncoed, and that the sole object of placing the bands around them was the averting of the possibility of the disaster mentioned. What else would he think? Would not we think the same as he does were we not familiar with the facts? It remains for us, then, to find some means of fastening the calyx and petals in their natural position, that is either entirely invisible, or if detected leaves no room for any objection. A little device, recently invented, and upon which a patent has been applied for by the inventor, A. J. Baur, of this city, we believe gives us something that not only does the work required of it to perfection, but is practically invisible and leaves no possible room for objection from even the most particular customer; for instead of passing around or through the flower, the little wire clip used serves simply to hold together the broken edges of the split calyx, holding it in its natural position and bringing the petals into exactly the position that they would have occupied had the calyx not been split. So well is this accomplished that the flowers, after being thus mended, have been regularly sold with the highest grade at the highest price of fancy blooms, and thus far not a single objection has been heard.

The accompanying illustrations give a good idea of the work done by the device mentioned. The first two illustrations are from photos as nearly true to life as an expert photographer was able to make them. They were taken from the same flower of Mrs. Thos. W. Lawson, before and after mending. The small portion of the clip used to mend the break that shows outside the calyx may be seen in the illustration if carefully looked for. No effort was made to conceal anything in taking and finishing the pictures, the photographer being instructed to bring out the details as nearly true to life as possible. The wire clip, being made of galvanized wire, is almost absolutely invisible against the color of carnation foliage. In the illustration showing the mended flower a slight malformation may be seen in the arrangement of the petals. This is due to the difficulty of having been compelled to put on the clip with a common pair of pinchers, the brass model being in the hands of the manufacturer at the time of taking the pictures. One of the guard petals was destroyed in the operation, giving a portion of the flower an empty appearance. The third picture shows the pinchers that are used in applying the clips. It was taken from a wooden model, for the same reason as that above mentioned—that the brass model was in the hands of the manufacturer. It was not possible to show the smaller details in the instrument on this account, but the pictures give a good idea of the general construction of the pinchers. The jaws are shaped so that the wire clips can be easily and quickly picked up. The front end of the pinchers is provided with two prongs, by means of which the stray petals are pushed up into their natural position with one movement, the act of catching the two broken edges of the calyx and pressing down the teeth of the clip completes the operation—all done in much less time than it takes to tell it. The fourth illustration shows the exact shape and size of the wire clip and how much of it is visible after being applied to the flower. The clip used at present and shown in the second picture is made of No. 22 wire, but a smaller size will be used in the manufacture of those that will be offered for sale, namely, No. 25.

Maxfield & Dimond's Artificial Carnation Calyx.

The inventor anticipated a great demand for the device, and with that in view has given a large order for its manufacture. He will be at the convention of the American Carnation Society to be held at Toronto this month, where his invention and the work done by it will pass under the critical scrutiny of the foremost carnation men of the country, and he expects soon thereafter to have the article ready to offer to the trade. BAUR FLORAL CO.

Artificial Carnation Calyx.

The illustration herewith shows an artificial carnation calyx which is being offered by Maxfield & Dimond, Warren, R. I. The manufacturers claim that this has been thoroughly tested and meets the needs of the growers, adding that men who are willing to consume time, energy and capital in raising split carnations are daily decreasing in number and that it is merely a question of time that its use will be universal. The manufacturers make the following claims for this device:

1.—It is simple to apply and remove. The grower can select the buds which are liable to split and apply the calyx, thus enabling him to harvest his entire crop.

2.—It is constructed of spring brass which will last forever, the first cost the only cost.

3.—It is capable of repeated use during the same season and as a business proposition the grower can not afford to be without it.

DIRECTIONS.

Apply the artificial calyx to the bud in the following manner: Place the calyx around the stem and lock, then push upward until the flexible arms embrace the calyx as shown in cut.

[We have examined this artificial calyx and consider it the simplest and most feasible device of this character that we have seen. ED.]

The American Carnation Society.

President Dunlop has authorized me to announce through the trade papers that exhibits for the show to be held in Toronto, Ont., January 23 and 24, will have to be staged by 2 p. m. January 23 instead of 1 p. m. as announced in the premium list. This addition of one hour to the time for staging was thought advisable on account of the fact that some of the trains do not get in until 10:30 a. m. and if they should be a bit late it would not give exhibitors time to get their flowers staged by 1 p. m. Kindly remember that entries are to reach the secretary not later than Wednesday, January 16. Entries made at the show cost $1 each and if they do not reach here before January 16 there is danger of their coming in after I have left for Toronto.

ALBERT M. HERR, Sec'y.

LABELS FOR EXHIBITS.

Toronto, January 9.—Those who intend to exhibit at the coming carnation show should use on their shipments the special labels provided by the society, which can be had on application to Secretary Albert M. Herr, Lancaster, Pa. Arrangements have been made whereby the Canadian customs officials will recognize these labels and prevent delay.

PALMS AND FERNS.

Looking Backward.

At the beginning of a new year a retrospective glance at the conditions that have been experienced during the past season, in the department of foliage plants, may not be entirely without interest. In the first place it may safely be said that the stock offered by the wholesale growers during 1906 has in general been of the best grade that has thus far been presented by the American trade. This is a logical result, from the fact that the plant buying public becomes more alive to its own requirements from year to year, with the natural consequence that the growers must either keep up with the procession, or rather lead it, or else step out and make place for someone more progressive.

There is still, and doubtless there always will be, a certain class that demands cheap plants, on much the same principle that it insists on having cheap food, regardless of its quality, and such a class has its uses in disposing of the remnants of stock, but the majority of plant buyers grow more discriminating as they gain experience. This is proved by the fact that well grown plants seldom fail to bring a fair price, and that in many instances the question of price does not enter into the transaction to nearly the same degree as the question of good finish and general good quality. The business prosperity of our country naturally influences the florists' trade to a marked degree, for, unless the general public feels that prosperity, it is not likely to go out of its way to hunt for luxuries such as are dispensed by the florists. The extreme values placed upon cut flowers during the past holiday season have also been productive of some good to the plant growers, a frequently recurring condition that is anticipated by the preparation of large stocks of plants for these special occasions. The Christmas reports published in the trade journals have brought several crumbs of comfort to the plant men, for they find that in many cities there is a strong demand for their wares, both in the form of flowering plants and those prized for foliage alone.

But to return to foliage plants, and to palms and ferns in particular: there is one condition that always confronts us, namely, the lack of novelty; this is a problem that comes up every season. There seems to be a perennial outgrowth of sports from the Boston fern, many of which are very beautiful, and some of which have proved to be very profitable to their introducers and growers, but still they all belong to one family, and soon become common on account of their ready propagation. Dicksonia Schiedei, better known as Cibotium Schiedei, has been brought forward to a much greater extent during the past five years than formerly and has proved its value as a house plant, but is not at all likely to become a rival to the various nephrolepises, as it is less easily produced in quantity and requires considerable space for its proper development. This fine plant finds another use in the hands of a floral artist, the fronds being cut and used for a backing in certain floral arrangements, but the fronds that are used in this manner should be thoroughly developed and well hardened to ensure their durability. The use of Adiantum Farleyense has much increased and larger stocks of well grown plants of various sizes have been presented in various parts of the country during the past year. This is doubtless the aristocrat of ferns among the trade growers, and while it is naturally of a perishable character, yet its keeping qualities are much improved by careful handling.

BAUR'S CARNATION MENDER.

The Bird's Nest fern, Asplenium Nidus-Avis, has been offered in very well grown young plants in four, five, and six inch pots in quantity, at quite moderate prices, its singular, pale green, simple leaves attracting much attention and arousing some doubts in the minds of those unfamiliar with the plant, when informed that it really is a fern. But it is questionable whether this will ever become one of the everyday ferns for the trade. Among the small ferns for filling pans little novelty has been noted; half a dozen varieties of pteris, a few nephrodiums, some cyrtomiums and adiantums, and the list of most growers is completed. A novelty that is not yet in general circulation is a nicely crested form of Nephrodium or Aspidium Tsussimense that has appeared in Boston, the plant being apparently as good in form and growth as the type, but having each frond nicely crested. This variety comes true from spores and seems to be a most promising addition to the fern list, its parent being one of the best.

Regarding the experience of the season in the palm trade, it may be said that the demand seemed to be for kentias, then for more kentias, and finally for a few kentias for the sake of variety. Perhaps that statement ought to be modified to some extent by saying that the customers bought kentias in various sizes, and then added a few other palms for variety. Then there was a little scare as to a possible shortage of seed for succeeding seasons, and also about a probable shortage of certain sizes of plants, and the bulls made a raid on the market, but after all the prices did not soar to any marked extent, and the market was fairly well supplied. There was some stiffening of prices, but not enough for any grower to retire upon his season's profits, nor was it enough to work any hardship to the retail dealer. A considerable quantity of large kentias was imported, and used largely for decorative purposes, it having been found more profitable in most cases to import these extra large sizes than to grow them here, for such plants occupy much space and time in their preparation, and are less remunerative to the grower than those of smaller size. The supposed protection of a 25 per cent duty on imported palms will not make a prospective buyer wait until American palms reach the size he requires, and if he is unable to find the plants he needs on this side of the ocean it will not take him long to get a ticket for London or Antwerp. As already noted, there were some palms besides kentias sold, latanias of moderate size selling fairly well if shapely and in good condition, but large latanias are not a good investment to the grower, the demand being small for such.

Areca lutescens is grown in less quantity, but still sells in moderate sizes, there having been a rather small stock in sight of plants of this species in 8-inch or 9-inch pots. They were consequently more in demand. Cocos seems to have been in sufficient supply, with no particular change in prices, plants in 2½-

inch to 4-inch pots being most needed. About the only novelty offered in fair quantity was the dwarf phœnix, P. Rœbelenii, and for this beautiful little palm there may be a future in the trade, though phœnix in general is comparatively slow in reaching salable form, and is therefore not looked upon as a breadwinner for the palm grower. Of other species of phœnix, there is little to be said, there being but small call for any except P. canariensis and this is far from satisfactory unless properly prepared for export by the European growers. Such palms as chamærops, corypha, rhapis, caryota, seaforthia and ptychosperma are seldom inquired for now, and last year was no exception to the rule. On the whole it may be said that last year was one of fair success for the plant grower, not one of excessive profits, for there are constantly increasing expenses to be reckoned with, but one that presents encouragement for the future.

W. H. TAPLIN.

PEOPLE WE KNOW.

Antoine Wintzer.

Antoine Wintzer's father emigrated to America in the year 1854. He brought with him all his family except the oldest son, who was then an active participant in the Crimean war. His father was a gardener and soon obtained a good position after landing in New York. Antoine was six years old when they arrived, and between the years of 1854 and 1862 he attended the public schools, most of the time at Flushing, New York, where his father had moved in 1857. In March, 1862, when he was 15 years old he entered the Parsons establishment as an apprentice. At this time the Parsons were the largest growers of nursery stock in America.

Antoine Wintzer inherited a genius for finding out the requirements of plant life, and under the skilful tuition of J. R. Trumpy, he rapidly acquired the practical features of growing grapes and roses, but after spending two years at Parsons' he became dissatisfied, because the line of work they kept him at was too narrow. So he left Parsons and engaged with Eugene Bauman, one of the most prominent landscape gardeners in the east.

His idea was to learn landscape work, but Mr. Bauman, who had now settled at Rahway, N. J., found that Mr. Wintzer was such a skilful propagator that he gave him full charge of the one greenhouse that he then owned. He allowed Mr. Wintzer to experiment with different methods of propagation and it was here that the latter reached settled conclusions in certain lines, especially the propagation of hardy shrubbery, and he still feels that his experience with Mr. Bauman has been a most valuable asset in his life work.

At Rahway Mr. Wintzer contracted malaria, and left his position with Mr. Bauman to recuperate at his father's home in Flushing. After regaining his health Mr. Wintzer engaged with Mahlon Moon, at Morrisville, Pa., as propagator of evergreens, roses, etc., but his stay here was a short one, he being again threatened with an attack of malaria. From Morrisville he went to Sewickley, Pa., and engaged with James Wardrope, but his stay here was short as he again contracted malaria and left for home. He has most delightful recollections of his short sojourn at Wardrope's.

After recovering from the attack of malaria, he went to West Grove, Pa., and accepted a position with the Dingee & Conard Co. He arrived at West Grove on July 31, 1866, the anniversary of his wife's birth, so he says he cannot forget the date. On August 1 he commenced work. They had two small greenhouses, 10x80 feet each, at this time.

This company at that time was doing a general nursery business having over 300 acres devoted to the growing of fruit and ornamental trees, shrubbery, roses, etc., which they sold almost entirely through agents. This business proved to be unprofitable and it was Mr. Wintzer's ability as a propagator of roses that saved the company from being totally wrecked financially. The company perceived that there was an increasing demand for roses grown on their own roots and Mr. Wintzer was very successful in growing the roses, by a process which he claims was his own invention.

Antoine Wintzer.

At this time the roses were sold almost entirely as one year plants and shipped by mail to the purchaser. By advertising in a very few papers, enough customers were found to take all the roses they could grow in the few greenhouses that then comprised the plant. Other greenhouses were built and a catalogue published to help make sales, the business grew and prospered and most every year new greenhouses were added to the plant. This continued till the year 1892 when the greenhouses numbered 70. Mr. Wintzer's ability as a propagator was now fully established; he had produced fine healthy rose plants all these years and the number he could grow was only limited by the space at his command to grow them in.

Unfortunatedly in 1892, differences arose in the management of the Dingee & Conard Co. and the late Alfred F. Conard, who had always been president of the company withdrew, and a year later in 1893 Mr. Wintzer withdrew, leaving to others a business that had been reared upon his life work as a skillful, untiring and devoted grower of the Queen of flowers.

Mr. Wintzer had purchased a small farm about one mile from West Grove and had built thereon a commodious modern residence and in the fall of 1893 he erected two greenhouses. His business was continued with varying success and connections till the year of 1897. Mr. Wintzer was very anxious to enlarge the business and the late Alfred F. Conard, who had been associated with him for so many years previous to 1892, and S. Morris Jones, a business man of West Grove knowing Mr. Wintzer's great ability as a propagator, furnished him capital to organize the Conard & Jones Company.

The new company purchased from Mr. Wintzer 35 acres of ground and his greenhouse plant, which had grown to seven greenhouses. That year the company erected seven more greenhouses, an up-to-date packing house, a large boiler room, coal bins, and a frost proof house for storing dormant plants. The plant has been largely increased in size so that now the company ranks among the largest in this line of business in America.

The firm issues a catalogue of pages, roses having first place, and in connection therewith shrubbery, cannas, bedding and decorative plants, flower seeds and bulbs. In 1893, when Mr. Wintzer started business on his own account, he commenced a careful methodical line of work to improve the canna. In this he has been successful beyond his most sanguine expectation, but most deservedly so, for no one who has not followed him in it can imagine the amount of work or the time required to develope a shade of color when there is no parent of that shade to work with. It takes exceptionally good judgment on the part of the hybridzer to improve each succeeding year the feature in the plant or flower that he is trying to develop.

Mr. Wintzer has shown that he has this ability in a marked degree, and Mont Blanc, Buttercup, Betsy Ross, West Grove, Maiden's Blush, and other varieties that he has succeeded in originating, place him in the first rank if not at the head of canna producing experts. Mr. Wintzer at the age of 59 is still as hard a worker as ever; his health is good and we look forward to many more years of successful work from his hands and brain.

Above everything else Mr. Wintzer wants it to be understood that rose growing is his specialty; he wants the company that he is connected with to be recognized as second to no other concern in disseminating roses of the very best quality, and on their own roots, and he wants to live long enough to establish the fact that his method of propagating roses is the very best method that has yet been devised for producing roses of the highest grade and greatest vigor of growth. Mr. Wintzer is vice-president of the Conard & Jones Co. and has been general manager of the greenhouse department, ever since the company started in 1897.

THE RETAIL TRADE

Flowers at French Weddings.

The up-to-date French marriage is a much less pompous affair than the weddings of the last century. It is conducted, however, along well defined ceremonial lines from which nobody who pretends to be in the swim dreams of departing.

The obligations of the bridegroom begin the very day his proposal is accepted. He pays his first tribute to his betrothed in the "corbeille de fiancailles," or engagement bouquet. This is a great basket of pure white blossoms; lily of the valley, azaleas, white lilac, white roses and orchids are in order. The basket in which they are grouped is trimmed with lace. Some enthusiastic wooers spend as much as $500 on this first gift, but, according to a leading Parisian florist, $100 is nearer the average.

The floral obligations, however, are continuous. The same florist declares that it is obligatory on the engaged man to send a sheaf of lilies to his sweetheart at least every second day. She finds at her place the first time she dines with his parents a corsage bouquet, and on the occasion of the signing of the marriage contract the bridegroom provides one of white and pink flowers. On the day of the marriage proper, that is, the religious ceremony, he sends a basket of orange flowers garlanded with tulle. The bride provides the women who, in accordance with French custom at events which combine a religious and social character, take up the collection with purses decorated with flowers to match her corsage bouquet.

Table Decorations.

A recent writer comments as follows on table decorations: "Never at any time choose a luncheon table with entirely white decorations. If you choose white carnations and Roman hyacinths and ferns or graceful drooping white lilacs, at least have pink roses at each place, and pink candle shades and bonbons and icings on fancy cakes. If violets are used, or pansies, or purple iris, combine them with just the right shade of light blue for decoration; the blending of violet, and blue is very charming when well done. In the south or wherever the large violets grow well a violet luncheon can be given, with whole clumps of violets transferred to large deep dishes and platters, and bunches of cut violets tied with ribbons for every guest. At one large fete a table was wreathed with a border of violets. Of course, violets look best by daylight and not by artificial light, which makes them appear so dark."

A Floral Basket.

The illustration herewith was taken from a basket made by S. L. Harper, Tacoma, Wash. The height was 4½ feet and the flowers used were carnations, roses and lilies. The arrangement of the ribbons was altered a little by the photographer. This fine basket was to the order of the Olympia club for the funeral of one of its members.

A BASKET OF FLOWERS.

CHRYSANTHEMUMS

Cut Blooms for Various Purposes.

I notice in THE AMERICAN FLORIST of December 29 Gunnar Teilmann endorses some parts of my article on above subject and also asks a few questions, and makes some declarations which certainly deserve a reply. I did not see the French varieties shown at Chicago, which he refers to, but from the scoring of the judges they must have some points of merit, and we should be liberal enough to credit the grower for presenting them in such fine condition.

The discussion did not refer to novelties, but to standard sorts, as no variety can be condemned until fully tested. It was not the "is-to-bes," but the "has-beens" to which my remarks were directed. I think the American hybridizers have always competed against the foreign sorts and with the exception of 1905 and 1906 have been the most fortunate in receiving awards.

Mr. Teilmann evidently thinks it an easy task to originate new varieties and have them in reserve capable of defeating those from all quarters of the earth. Has he forgotten that Fidelity won first place in the seedling class at the St. Louis show in 1904? Has he forgotten that Golden Eagle (Dorner) was awarded the sweepstakes prize at Chicago in 1905? It is certainly unfair to accuse any of the American hybridizers of shrinking from their duty in this respect.

The niche one man occupies in this mighty universe is exceedingly small and it is preposterous to suppose his efforts will invariably be crowned over others. It is easy to make assertions but often difficult to sustain them.

With reference to the commercial value of our products of the past few years I have evidence enough to sustain their merit without endorsing them my-

self. I consider Mr. Teilmann fair-minded enough to admit the stock plants of the older sorts offered in the trade papers indicate the kinds grown the current year by the commercial men, at least, I believe we have no better index.

If he admits this he will find Minnie Bailey, Helen Frick, White Bonnaffon, Lavender Queen, Manrovia, Opah, Golden Age, Omega, Mrs. F. J. Taggart, Sunburst, Convention Hall, John Burton, and Intensity among those offered this season. All of these originated at Adrian, Mich., and have been sent out during the past six years. This list does not include our collection for 1906 which doubtless contains several others which could be included in this category.

Fortunately for myself, or unfortunately for Mr. Teilmann, I cannot boast of 13 fingers on one hand. Evidently his experience is not in accord with that of others.

As to Mr. Johnson's comments I have but little to offer, only I cannot agree with him as to the commercial value of Wm. Duckham and Mrs. Barkley. At least, I could not conscientiously recommend them to be grown in any quantity. The former is produced in magnificent style in a comparatively limited territory in the east but all through the middle and western states, as far as I have been able to observe, it is decidedly below the average. As to Mrs. Barkley, it is too difficult to manage in many ways. If this were not the case, someone would be growing it in quantity and we would occasionally notice favorable comments.

My remarks in the original article were confined to the commercial grower and for this reason could not include Guy Hamilton, Cheltoni, and Nellie Pockett. Such varieties as these have their place and will receive full consideration later when opportunity offers. It is not my purpose to decry any good variety or attempt to dictate what others shall grow, for full freedom in this matter is a prerogative to which every grower is entitled. The point set forth was that up to the present the foreign varieties, with a few exceptions, have not met the requirements of the growers, and I still believe this statement to be true.

ELMER D. SMITH.

The Best Chrysanthemums.

ED. AMERICAN FLORIST:—

What are the best three early and mid-season chrysanthemums, the colors to be white, yellow and pink?

BEGINNER.

Absolutely the best would perhaps be difficult to decide out of so many, but you will hardly do better than the following: Early—October Frost, white, Monrovia, yellow, and Rosiere, pink; mid-season—Major Bonnaffon, white, Col. Appleton, yellow, and Dr. Enguehard, pink. G.

PLAINVILLE, CONN.—The greenhouses and business carried on for some years by Mrs. Woodford have been leased by Daniel and Harry Tompkins. Harry has been manager for Mrs. Woodford for years, and Daniel hails from New York state. Both are young energetic men, and under their capable management the business ought to boom. The chrysanthemums in the houses are now very fine.

To Be Done Now.

IN THE GREENHOUSES.

Continue to remove any useless wood from the rose plants a little at a time, to prevent a chaotic condition of the growth later.

Propagate bedding lobelias freely. If cuttings are scarce sow seeds of a good reliable strain.

Keep the stock chrysanthemums cool, in an airy light house, if you wish to have good sturdy cuttings.

There are not many better ivy-leaved geraniums than the old Madame Crousse for filling baskets for verandas and window boxes. Propagate it.

Select the best plants of mignonette for saving seeds from and do not allow any flowers to be gathered from these for any other purpose.

A couple of short benches planted to white marguerites will enable you to clear out those that have been flowering all the winter, before they get dirty and produce poor flowers.

The older plants of poinsettias may be dried off somewhat more rapidly than younger ones and will produce cuttings earlier.

Decide at once what varieties and in what numbers, you are going to grow for the coming season. Make your plans and leave nothing to chance.

Better wait a little while than commence grafting roses on stocks that are not sufficiently forward for the purpose. Nothing is gained by undue haste.

Rest the beds of smilax a little that were cut down for the Christmas crop. It will start more freely and grow more quickly.

Keep all work well in hand and anticipate the needs of your plants. The busiest time of the year is not far distant, so be prepared.

IN THE STORE.

"Flowers are cheap today" was an invitation to hesitating customers we noted in a store window recently.

That cleaning up you put off until after the holiday rush was over is about due. Set about it right now.

A small leak will, unless stopped, sink the stoutest ship and small wastes in business matters will, if persisted in, cripple the best trade.

Phœnix Rœbelenii is a graceful and novel palm. Possibly it would suit that rather fastidious lady customer of yours.

Because you have Begonia Gloire de Lorraine for sale don't tell your customers it will last longer than an aspidistra.

Orchids are beautiful flowers when used properly, so that each one stands clear of its neighbor and looks out of the design at you. They are useless in bunched-up arrangements.

Always have fresh violets on hand if possible. Their chief value lies in their perfume which is never perfect in stale flowers.

OUTDOORS.

Rolling the lawn in very wet or frosty weather is worse than useless; it is injurious.

Any old piece of iron set up is better than no scraper for the boots, preventing the soil from being carried on to the walks and paths.

Have all badly drained borders turned up roughly and as deeply as convenient, in readiness for the drying winds of spring to do their work.

Keep hardy lily bulbs and herbaceous plant crowns well covered with cocoanut fibre, or some good non-conducting material, to prevent drying out.

Watch the crowns of Eremurus Himalaicus and if they start to grow protect them from frost.

Look over clematis and other pot stock in the cellar frequently and give a little water if the plants are shrivelling at all.

Get a good stock of boxes, hampers, stakes and all other necessaries ready for the shipping season. It is all the time coming nearer.

Fill up all holes and ruts in the roads with hard material, such as clinkers and waste building material.

Hardy Spireas.

The shrubby spireas give a succession of bloom from early in spring until September. They are of easy cultivation and are not at all particular as to soil. From their habits of blooming they can be conveniently classed in three sections. The first produces its blossoms in short or long stalked clusters, along the branches and these mostly bloom in early spring. The second produces flowers in pyramidal spikes at the ends of the branches, which in some species, are much compound. The third has flattish cone-shaped clusters of flowers also at the ends of the branches, and both these latter sections are mostly late blooming. A very large number of species and forms of spireas are mentioned in botanical works, but we will only note a few of the most desirable for cultivation.

S. arguta, occasionally given in foreign lists as S. multiflora arguta, is a most useful early flowering shrub. It blooms early in May, producing numerous small clusters of showy white flowers along the branches. It grows in time to a height of six feet and is a very good ornamental shrub even when out of bloom.

S. Thunbergii, which comes into bloom at the end of April, is one of the parents of the last named, but is not as hardy, or as good a flowering shrub with us, as the tips of the branches are frequently killed in winter. It is, however, a much more graceful shrub in mid-summer, when it makes its growth. The delicate olive green foliage, on the fine sprays of the drooping branches, makes it very attractive. The sprays have a graceful effect when mixed amongst certain cut flowers. The foliage assumes a fine color in the fall. During the past few years it has become liable to attacks of aphis in June, and these insects must be destroyed on sight.

S. prunifolia flora plena, the so-called bridal wreath, comes into bloom about the second week in May, and is a common inhabitant of many old gardens. It is a remarkably showy object at a distance but at a closer inspection the clusters of small, button like flowers, are not particularly attractive. When in good health it makes a fine ornamental bush six to nine feet tall, and has showy colored foliage in the fall. The typical, or single flowering form of this spirea is a rare inhabitant of gardens.

S. Pikowiensis (Syn. S. Nicoudierti) blooms about the middle of May, producing numerous clusters of showy white flowers along the branches, and

is quite attractive when in bloom. It is a somewhat thin habited shrub, from five to seven feet tall, and is not particularly attractive when not in bloom.

S. media (Syn. S. confusa) also flowers at the middle of May. The erect branches, thickly covered with the white flower clusters, are very showy. It forms quite a neat habited shrub in cultivation, about five to six feet tall. It is highly recommended by a prominent English nursery firm as an excellent shrub for forcing, but we have had no experience with it in that respect.

S. crenata comes into bloom about the third week in May and forms a neat, compact bush, seldom over two and one-half feet tall. In its habit of blooming, it might be taken for a dwarf. S. Van Houttei, but it is a perfectly distinct species in every respect. S. crenata is a rarer shrub in American nurseries now than it was 15 years ago, which seems a pity for it is a very desirable garden plant.

S. Van Houttei, which is without question the most useful and showy species in the genus, comes into flower at the end of May and is usually in good condition June 1 in western New York The gracefully drooping branches, bedecked with the numerous white flower clusters, render it exceedingly showy. It may be said when not in bloom to be the most characteristic of all the spireas.

S. Reevesii (Syn. S. lanceolata) is a most beautiful flowering shrub where it proves to be hardy. It is not of much account with us. If the lower branches are buried in snow most of the winter, they will flower freely at the end of May. We do not think it can be depended upon north of New Jersey.

S. bracteata (Syn. S. rotundifolia) comes into flower June 1, and the pure white umbels on longish stalks along the branches are very showy. The roundish deep bluish green leaves are persistent until late in the fall and it grows eight feet tall. It is an exceedingly handsome and characteristic shrub and seems to be one of the hardiest of the spireas.

S. Japonica (Syn. S. callosa) is a good type of the spireas that produce their blossoms in flattish clusters at the end of the branches. It comes in flower from the first to the middle of June and the pinkish red clusters are attractive. The brownish stems are usually about four feet tall. The unfolding leaves are a very attractive reddish purple color.

S. Bumalda, a very compact habited shrub, seldom over two and one-half feet tall, bears showy, pinkish red clusters at the ends of the branches at the middle of June. It can always be distinguished by scattered yellowish pink blotches on the leaves. If the flowers are removed when through blooming, it will produce numerous blossoms late in summer. Its variety, Anthony Waterer, with its bright red blossoms, seldom growing over one and one-half feet tall, is a most desirable little shrub.

S. Margaritae, a hybrid form, producing broad clusters of bright pink flowers at the end of June, is a very handsome and free flowering shrub.

S. albiflora (Syn. S. callosa alba) comes into bloom in July, and has white clusters produced terminally and laterally on the branches. It is an upright neat little shrub, seldom over one and one-half feet tall. It is somewhat tender and should be planted in a warm situation.

S. alba (Syn. S. salicifolia), a good type of those spireas that produce their flowers in pyramidal clusters at the ends of branches, comes into bloom at the end of June. When planted in damp soil it produces immense clusters of white blossoms.

S. Douglasi blooms in July, has dense spikes of pinkish red blossoms, and grows from four to six feet tall. The leaves are downy white beneath. S. Douglasi and S. alba should not be planted in association with very choice shrubs or plants, as they sucker badly, and if neglected soon choke the weaker growers.

S. Lenneana is a hybrid form of very vigorous growth, producing large compound spikes of pink flowers in July, and is much superior to one that is a good deal grown and sold in nurseries as S. Billardi, which has much smaller, pink clusters.

S. tomentosa is the latest of all to flower, the dense pink spikes coming into bloom at the end of July and throughout August. The leaves are densely downy beneath. We have lately grown a white flowering form of this which seems to be quite desirable as a late flowering shrub.

The botanists have lately taken what we have all known as S. sorbifolia and S. ariaefolia out of this genus and placed them under other genera, so we will say something good about them at some future time. JOHN DUNBAR.

A FINE SPECIMEN OF SPIREA VAN HOUTTEI.

NICKERSON, KAN.—On account of the removal of the Santa Fe shops in 1895 the florist business had to be abandoned to a great extent and the glass used for forcing early vegetable plants. With the advent of the newer methods of growing corn and wheat, as well as the growing of immense apple orchards in Reno county, came general thrift. New houses and barns with substantial fences to the farmers' homes are demanding bedding plants and ornamental shrubbery. This demand is continually on the increase and will require a permanent supply.—J. J. B.

Boston.

STOCK IMPROVING IN QUALITY.

The holiday trade was very large and undoubtedly would have been much larger but for scarcity of stock and the high prices retailers were forced to ask. American Beauty roses were very short in supply but of excellent quality, while Richmond has never been excelled for fine color and length of stem. Killarney and Mme. Chatenay were good and plentiful but Bridesmaid was scarce. Violets, lily of the valley and orchids were good and in fair supply, but carnations were short and inferior. In plants, azaleas were prominent and good; cyclamens and the usual Christmas plants were shorter than usual. With a week of good, sunny weather, which has been long overdue, crops have improved wonderfully, both in quality and quantity. Roses have been receiving the principal benefit, and as a consequence, the market is more fully supplied with first-class stock at present than has been the case for several months. Carnations now on sale are the kind for which the growers in this vicinity are noted and are better than heretofore this season. Spring bulb flowers, such as jonquils, freesias, hyacinths, narcissi, etc., are plentiful, and, as is usual at this season, sell well. New Year's day, although not celebrated as prominently in this section as in other parts of the country, was the occasion of many gifts of flowers of all varieties. The remarkable Christmas sales checked the trading for New Year's a little, but the custom of remembering friends and relatives at this season is growing. A great improvement in all kinds of flowering plants is also noted with pleasure as, until now, the products of the season have deserved but little commendation. Azaleas especialy are very attractive and consequently sell better and bring higher prices.

NOTES.

As a result of the crusade by our strenuous district attorney the flower stores throughout the city were closed January 6. Many of these, especially in the residential district, have been accustomed to transacting considerable business on Sundays, and the loss will be serious if this is stopped. Church orders, of which there are always a num-

ber regularly to be attended to, were sent out the night before and under penalty of heavy fines no dealer dared take or deliver an order on December 30. A number of names of employes found engaged in attending to orders were taken by the police, with the result that the men were found guilty of violating the Sabbath and fined $10 each. Appeals followed and we now await the final decision. The best opinion, however, is that under the law a way can be found to transact necessary business, such as church and funeral work, without being troubled.

William J. Hoverty, well known to the trade for the last ten years as shipper at the Tremont street store of Thomas F. Galvin, has been compelled to abandon his position and go to the country in an endeavor to regain his health. His many friends among the trade presented him with a practical token of their estimation in the form of a substantial financial gift. B.

Massachusetts Horticultural Society.

IMPORTANT BEQUESTS.

General Stephen M. Weld, the new president of this society, took office at the annual inaugural meeting of the organization, which was held in the lecture room of Horticultural hall, Boston, January 5. Under the by-laws this meeting does no further business than hear the reports of committees and the inaugural of the new president, but these today proved unusually interesting, in view of the suggestions made by General Weld. There was considerable discussion of these among the members after the meeting closed, and considerable differences of opinion were developed, especially in regard to the limiting of the number of cash prizes, which have already become less liberal than they were a few years ago.

In his inaugural address General Weld asked for the co-operation and assistance of all members of the society, to enable him to maintain the high standard set by previous presidents. He called attention to the fact of its being the seventy-eighth year of the society's history, during which time its usefulness has each year increased. "This," said the new president, 'should stimulate us to renewed activity and endeavor, to broaden our work and increase the usefulness of the society." After touching on the subject of school gardens, which he said had been very successful, General Weld spoke of adding to the work of the society the extermination of the gypsy and brown-tailed moths and other insects. To accomplish this the income of the society must be increased. The treasurer's figures show the income and expenses of the past few years to have been as follows:

"For the year ending December 31, 1906, the income was $21,710.71 and the expenses were $24,112.73. For the year 1905 the income was $17,811.37, the expenses were $20,588.27. For the last four years the average expenses were $22,042.32, and, the average income was $19,372.05. No business concern, whether incorporated or not, can be run successfully with such figures as these. We must cut down our expenses to our income, or increase our income. One way of doing this is to increase the use of our building by letting the same for purposes of fairs, lectures, etc. There is no building in Boston which has a better location than ours for a public hall, but possibly a small sum of money will have to be spent in improving its appearance and in making the acoustic properties better. I would suggest the appointment of a committee to take this matter up and give it the attention it deserves. The rental this year has been about $2800, against $1800 last year.

"Another method of increasing our income is by increasing the membership. Still another method is by doing all we can to get our friends and all persons interested in horticulture to leave us funds by will. The following letter shows you that by interesting even people who are not members of the society in horticulture and in the work of the society, they will often remember us when they die:

" 'Under the will of Charles E. French of which I am one of the executors, your society is entitled to a legacy of $3000, this sum to be held in trust and the income therefrom expended in prizes for the best specimens of such fruit or vegetables as may be selected by your trustees, the trust to be known as the "Benjamin V. French Fund;" and also to a legacy of $5000, this sum to be held in trust and the income therefrom distributed in prizes for such specimens of flora as your trustees may select, this trust to be known as the "John Allen French Fund." The executors are about to close the estate, but before paying these legacies to you they desire your society to pass as soon as possible a vote in substantially the form herewith enclosed, and send a copy of the same to the executors.

" 'OTIS NORCROSS,

" 'For self and coexecutors estate of Charles E. French.' "

Continuing the president advises the reduction of the number and value of the prizes given, substituting medals and certificates. He also spoke of the losses the society had sustained through deaths during the past year, 31 members in all, and called attention to the importance of the society's library which, he was informed, was not as freely used by members as it should be.

San Francisco.

BUSINESS BECOMING NORMAL.

The fateful year of 1906 has gone down in the records and 1907 has started out with glorious bright weather. The growers are glad things are taking a normal course again and the storekeepers are all hustle after a fair and profitable Christmas and New Years. All are putting their shoulders to the wheel, to pull San Francisco, the good old city, back again as it used to be. Carnations have brought good prices, ranging from 50 cents to $1.25 per dozen, and tea roses from 50 cents to $2. American Beauty roses of course brought more, from $6 to $12. Besides these flowers we had narcissi, hyacinths, violets, poinsettias,, and a few chrysanthemums. Ferns, palms, hyacinths, poinsettias, begonias, and other pot plants, sold well at reasonable prices. I have been taking the names of all the florists' established now, and see that besides all of the old storekeepers, quite a few new places have been started. Amongst these latter, four Japanese stores are running full blast with white help to disguise the real thing. The names of these I am unable to give or remember as they are tongue-breaking. All of the others I am giving below:

American Florist (C. Steppenbeck), Polk and Sutter streets.
Art Floral Co. (V. Matraia, Mgr.), 792 Van Ness avenue.
Belmont Florist (Louis Matroni), 2358 Fillmore street.
Boland Floral Co., Geary street, near Market.
California Florist (I. Eppstein), 1451 Eddy street.
Cleis & Jacobsen, 942 Fillmore street.
Forrest Floral Co., 2583 Mission street.
Frank & Parodi Co., 1215 McAllister and Fillmore streets.
Golden Gate Florists (Ayres Bros.), 1006 Page street.
Haight Street Floral Co. (N. Peterson), 324 Fillmore street.
Kahn & Lasscre, 1559 Ellis street.
O'Connor, John T., 531 Hayes street.
Park Floral Co. (R. Groves), 1437 Haight street.
Pelicano, Rossi & Co., 1343 Sutter street and 1944 Post street.
Podesta & Baldocchi, 1206 Sutter street.
Rossaia & Matraia Co., 904 Ellis street.
Serveau Bros., 2110 Fillmore street.
Shibeley, 1205 Sutter street.
Sievers Floral Co., 1660 California street.
Sixteenth and Mission Florist (I. Sutherland, Joe Harris), 1991 Mission street.
Stein & Levin, 1929 Sutter street.
Union Floral Co., 2517 Mission street.
Twenty-second Street Flower Store, Twenty-second street near Mission.
Wickstrom's Floral Depot, 943 Van Ness avenue.
Yakas, T., & Co., 2210 Fillmore street.
Young American Florist, 3008 Mission street.

Two other stores will be opened shortly on Sixteenth street, near Mission street, making in all 33 against four directly after the fire. New places I will add to the list and give to the public as soon as opened. The only store I know of as missing is that of the London florist, Mr. Stevenson. This gentleman has taken to the road as a drummer for a local cutlery concern and from last reports is doing the road immensely.

NOTES.

All growers feel exceedingly sorry for Sidney Clack, who had more than his share of hard luck the last year. First the earthquake, then fire did a lot of damage to his place and now the storm broke 250 to 300 boxes of glass. Mr. Clack felt very much like giving it up, but love of the business got the better of him and repairing is going on steadily.

The Misses Warren, formerly on Post street, are located in Anselmo, Marin county, near this city, and still doing business as decorators. They are at present very busy decorating The Uplands, Crocker's place, in San Mateo, where the young Miss Jenny Crocker will make her debut into society.

Stein & Levin are new beginners as retailers, but long and well known to the trade here. Both have been connected with C. Heppenbeck for many years. They have as cozy a store as one can wish to have on Sutter street, not far from Fillmore street.

Willie Krabbenhoeft, formerly gardener at Claus Spreckles' mansion on Van Ness avenue, has opened a retail liquor store of the A1 variety and invites all to take a drink of Tom and Jerry with him. He is an expert in mixing fancy drinks.

One of the very finest stores in town is that of the Art Floral Co. on Van

Ness avenue. V. Matraia is well known in this city for his artistic and graceful design work and good luck should attend him this year.

F. Fisher of Reno, Nev., has been in town on business. The stork has visited his home and left a beautiful daughter for a Christmas gift.

F. Aby, of Berkeley, managed to get in a beautiful crop of C. Testout rose, which can be seen all over town.

Pelicano Rossi & Co.'s is another artistic place, nothing but the very best being sold there.

GOLDEN GATE.

Kansas City.

MARKET IN HEALTHY CONDITION.

The market and trade in general at present are in the usual condition following the Christmas and New Year's rush. A decrease in counter sales among retailers was noticed last week. Perhaps this is fortunate however for the retailer for the reason that an opportunity to restore things to the usual running order is afforded. Most items are in ample supply. American Beauty roses are somewhat short in supply and the quality is not the best. Teas are fairly plentiful. Carnations are in most cases plentiful, especially colored sorts. Bulb stock moves rather slowly. The first locally grown sweet peas were on the market last week. Reviewing the half of the season closed at the end of the year, it is safe to assert it has been the best ever experienced. The average cutting of stock was of larger proportion and fully up to the standard in quality. Growers admit that weather conditions, taken as a whole, were unusually satisfactory. Among retailers, and shippers, an increase of 25 per cent gives every assurance of the general prosperous conditions, both locally and throughout the west. The Christmas trade was very satisfactory in every respect. Stock in some lines showed the effects of having been held too long. This was especially true of American Beauty and other roses. The demand for blooming plants was large, but the percentage of increase in sales in this department was not so great as in seasons past. Violets were a great feature and the demand proved far beyond expectations. In some instances the price charged to customers seemed a bit exorbitant. In this class of stock a happy medium should be considered, in the matter of retail price, rather than placing the cost at a point that would likely serve to scare the average customer out of the notion of purchasing flowers at all.

NOTES.

Excavating was begun last week on the property near the corner of Armour boulevard and Main street, which is to be occupied by the Rosary Conservatories. It has developed that Edward Ellsworth is back of the project. The location is, without doubt, a good one. Mr. Ellsworth recently resigned his position with Geo. M. Kellogg which he had held for a number of years. This, with experience gained in other local stores, should make Mr. Ellsworth well fitted for the place, and the best wishes are extended in the undertaking.

Enchantress carnations may be seen in perfection out at R. S. Brown & Sons' Englewood place. Nathan Brown may be credited with the ability of knowing how to get the best results out of this class of stock.

J. W. Barnes, reports a large trade during the holidays in his new store and at the greenhouses. At present Mr. Barnes is supplying the trade with a nice quantity of bulb stock.

The People's Floral Co. reports a nice holiday trade. Max was busy last week with the decorations at Progress club for the annual ball of that society.

V. De Rudder, representing K. J. Kuyk, Ghent, and J. A. Vandervoort, of Speelman & Sons, were callers last week in the interest of the bulb trade.

Geo. Bastin is handling affairs nicely at Geo. M. Kellogg's. A visit to that store found all hands busy with funeral orders.

James Truitt, of Chanute, Kans., was among last week's callers. He reports a fine Christmas trade in that place.

Chas. Heite is recovering from sickness which kept him away from his duties during the holidays.

K. C.

Milwaukee.

NOTES.

One of the season's events of special interest to the trade has been the successful undertaking by Aug. Kellner in the New Year's eve decoration of the hall and rooms of the Deutcher club. A comprehensive idea of its unique and artistic arrangement cannot be given by description. Cedar wreathing not only in garlands but in curtains, with large hanging baskets were used for overhead work.

Christ. Volom, gardener for the Vogel estate, we are pleased to note, wears that expression of complacency only possible for a gardener when he has his stock in a well cared for condition. Everything he grows seems to behave as he wants it to and he knows what he wants, notwithstanding his contention that evergreens can be grown within a large city.

Word comes to us from Appleton that Boelter & Zuehlke, proprietors of the Riverside Greenhouses, have concluded to rebuild and enlarge their plant at a cost of $10,000. They will visit Milwaukee and Chicago to acquaint themselves with the most advanced methods and secure a contractor who understands putting up a plant.

Fred Schmeling says this has been the worst season for greenhouse stock for over 20 years in regard to weather, and he keeps careful record. The warm September—one day 94° in shade—with no frost in November, followed closely by a cold snap is most unusual, and the dull weather afterwards was very weakening to the stock.

J. M. Fox & Son are using a clever contrivance for showing carnations. This is a green basket with a high handle; the bottom is zinc lined and there are a middle and upper cover of wire, ¼-inch mesh. Water is used in this instead of moss and the whole thing is worthy of extended use.

The Florists' Club has put on foot a movement looking to the organization of a strong bowling team to represent the local trade. The first meeting of the bowlers occurred Wednesday evening at the Olympic alleys, 177 Second street, at 8 p. m.

Holton & Hunkel say the growers held some stock back for New Year's, not being able to break away entirely from old habits. They would be better advised to ship the stock regularly and let the retailers do what pickling is necessary.

Gus. Pohl has his new crop of sweet peas on time. He has a clever plan of getting three successive crops annually in two houses, stevia, sweet peas and chrysanthemums.

The McKenny Co. could not get violets enough, but reports stock generally satisfactory. This firm is handling cyclamens, from Emil Welke, which are very fine.

C. C. Pollworth & Co. report a shortage in roses.

C. B. W.

Pittsburg.

MARKET STEADY.

The market has again settled back to normal, the demand meeting the supply easily. Saturday afternoon found a clean-up along all lines but long stemmed American Beauty roses. Of these all the wholesalers have an abundance but the medium grades sell well. The demand for Killarney is especially fine. Ivory and Golden Gate are not seen any more as they have been poor sellers for some time. Carnations are more plentiful, the quality being fine. Lillies are very scarce, all local growers being short. Violets are very plentiful and the same can be said of Roman hyacinths, Paper White narcissi and tulips. Greens are plentiful, a good deal coming from the south.

NOTES.

Randolph & McClements had a large decorations at the hotel Schenley, January 5, using hundreds of long stemmed American Beauty roses.

The Pittsburg Florists' Exchange is handling an exceptionally fine cut of American Beauty roses.

The Pittsburg Cut Flower Co. is handling lots of white lilac.

Some very nice carnations of all varieties are shown by J. B. Murdoch & Co.

J.

Los Angeles, Cal.

The annual meeting of the stockholders of the Southern California Horticultural Society was held January 3 and the following directors were elected for the ensuing year: Walter Raymond, Fred H. Howard, J. G. Morley, Ernest Braunton, E. H. Rust, H. W. O'Melveny and Theodore Payne.

ERNEST BRAUNTON, Sec'y.

OBITUARY.

Mrs. Catherine Waters.

The death occurred on December 29 of Mrs. Catherine Waters, of Calumet, Mich., at the home of her daughter. Deceased was well known in the district, having been a resident of Calumet for many years. The cause of death was heart trouble from which deceased had long suffered. She is survived by two sons and two daughters.

THE crop of English holly was a failure in Washington this season and the dealers of that section had to depend on that from British Columbia, Vancouver, Victoria, etc., for their supplies.

EDWIN LONSDALE has a very timely article on "The Plants You Got This Christmas, How to Keep Them Healthy" in the January number of the Ladies' Home Journal, illustrated from photographs supplied by the firm of Henry A. Dreer.

DIRECTORY names and changes are wanted now. If you, reader, have increased your acreage or changed your store or greenhouse location during the past year, we ask, on behalf of all of your correspondents, that you send your corrected address at once. Further, we shall be grateful for any report of trade changes in your vicinity.

NEPHROLEPIS EXALTATA TODEAOIDES is the subject of a full page illustration in The Gardeners' Chronicle for December 29. Apparently this variety, which appeared in the establishment of Messrs. Rochford, does not show its true form in the young fronds and fine though it undoubtedly is we should say that the new variety Amerpohli now being prepared for dissemmination by the Janesville, Wis., Floral Co. is far superior. This at any rate is beautifully crested even in young plants, the small specimens exhibited last fall all showing the filmy, todea-like surface on quite small fronds.

A MILWAUKEE correspondent complains that the growers do not provide sufficient foliage. He suggests the sale of carnation foliage for use with these flowers, for, as he points out, the blooms with foliage are worth far more than those without it to appreciative customers. He decries the custom, now common among retailers, of chopping up Asparagus plumosus for every purpose where common ferns do not answer and suggests the increased culture of A. tenuissimus. We should imagine that enterprising growers taking up the culture of the newer A. Crawshawii would probably find a ready market for it, on account of its distinct and beautiful character.

Society of American Florists.

LADIES' AUXILIARY.

The ladies' S. A. F. pins have been received and will be forwarded to all members as soon as Mrs. Chas. H. Maynard, secretary, returns from North Carolina, where she has been called by sickness.

Missouri Botanical Garden Scholarships.

Three scholarships of the Missouri Botanical Garden, St. Louis, Mo., will be awarded by the director of the garden prior to April 1 next. The successful candidates will be started on their duties as garden pupils April 1. Applications for these scholarships to receive consideration must be in the hands of the director not later than March 1. For full particulars address Wm. Trelease, director, Missouri Botanical Garden, St. Louis, Mo.

Cutting Coupons.

"I would have given a good deal to have had Arthur Newell's photo this morning cutting coupons with a long pair of shears," writes one of his Kansas City friends. "Oh, how neat Arthur is at such work, and it is so very much to his liking."

Asparagus Duchesnei.

ED. AMERICAN FLORIST:—

No doubt you are always willing to accept discussions and corrections. I notice in THE AMERICAN FLORIST this week a picture of Asparagus Ducheni; it is not spelt that way, it ought to be Duchesnei. I may claim to know this plant for I sold the first plant in this country four or five years ago.

It was introduced by L. Linden, of Brussels, and exhibited for the first time at the Palais d'Horticulture in Paris, on September 26, 1900. I will not say that it was introduced directly by L. Linden, but by a botanical mission sent by the independent state of Belgian Congo under directions of M. Linden and named after one of the members, Mr. Duchesne, who is now a member of the firm of Duchesne & Lanthoine Co., orchid growers, Brussels, Belgium. That fall I only sold two or three plants, it being high priced, $25 to $125 with $5 to $25 duty and freight extra. This price was for plants in 4-inch and 5-inch pots.

THOMAS KNIGHT.

Rutherford, N. J.

Wedding Bells.

SHUTT-UPDEGRAFF.

The marriage of Gilbert L. Shutt, late of the park department of Minneapolis, Minn., to Miss Helen T. Updegraff, daughter of the late Judge Robert D. Updegraff and granddaughter of the late Congressman J. T. Updegraff, was solemnized at the family residence, 6314 Franklin avenue, Cleveland, O., December 23, 1906. The bride is well known in Cleveland circles and is one of the most popular young women of the west side. The young couple left, amidst many congratulations and good wishes, for their future home, corner Hamline and Hoyt avenues, St. Paul, Minn.

Mr. Shutt is a hard working, enthusiastic and progressive horticulturist, having spent his whole life at his chosen profession. For a number of years he was employed by some of the leading firms in the country, such as the Wm. H. Moon Co., of Philadelphia, the Storrs & Harrison Co., of Painesville, O., and J. C. Vaughan, of Chicago, Robert Simpson, Clifton, N. J., the Park Floral Co. of Denver, Col., etc. He was employed on the Westinghouse & Jones estates, Pittsburg, Pa., for some time and later as superintendent of "Ben Mac Dhui," one of the best equipped and most beautiful rural estates in the state of Michigan.

He has resigned his position with the park department to associate himself with the Hoyt Plant & Seed Co., of St. Paul, where he will take charge of the fast growing work of their landscape engineering and nursery department. He has many friends in the trade, in both commercial and private lines, who join the writer in wishing him and his better half a long, happy and prosperous married life.

DISSOLUTION NOTICE

ONARGA, ILLINOIS, Dec. 31, 1906.

The partnership agreement heretofore existing between L. J Risser and Ludvig Mosbaek, under the firm name of Ludvig Mosbaek, is hereby dissolved by mutual consent. All debts owing to the firm of Ludvig Mosbaek and all debts owing by the firm have been assumed by the new business, which will be continued under the name of the Mosbaek Greenhouse Company of Onarga, the Iroquois Canning Company, of which Mr. L. J. Risser is President, succeeding to the business.

L. J. RISSER.
LUDVIG MOSBAEK.

AUCTION SALE.

The undersigned will sell on **Thursday, January 17th, 1907,** at 10:30 o'clock in the forenoon.

Owing to a change from horse to electric power I have concluded to dispose of the entire contents of my stable, consisting of the following stock and plant, to-wit: 10 business horses; 8 delivery wagons; 2 double sets of harness; 6 single sets of harness; 2 sets of road harness; 1 fast trotting mare, record 2:14¼; 1 bay road mare standard bred; 1 pair of spotted ponies, wagon and harness; 1 brown saddle horse; 3 surreys; 1 natural wood trap; 3 runabouts; 1 depot wagon, new sulky built by Toomey; 1 Brewster brougham; all carriages have rubber tires; a lot of wagon and stable blankets, halters and stable utensils, etc

The above mentioned stock and plant will be sold at public auction at the stable in the rear of No. 250 Fifth Avenue known as **No. 3 West 28th Street,** Borough of Manhattan **New York City.**

By order of Charles Millang (florist).

SAMUEL NEWWITTER, Auctioneer,
260 Broadway, Manhattan Borough,
New York City.

FOR SALE.

ST. PAUL, MINN.

One of the best located cash retail florist businesses in the city.

Corner store, 25x60, fronting on three streets, and adjoining new federal post-office; also in close proximity to two opera houses, hotels, new auditorium, large department stores and public library.

Long lease, only $75 per month, including steam heat and water; cheap at double that rent.

This is an exceptional chance for the right party to get into an established business of seven years. Fine fixtures. Owner wishes to go into wholesale cut flower business in basement of same st re. Good will, lease and fixtures, $1,500.

RAMALEY FLORAL EXCHANGE,
7th and St. Peter Sts., St. Paul, Minn.

St. Louis.

BUSINESS DULL.

New Year's has come and gone and a week of very dull business has just passed. Dark, rainy weather has prevailed all week. Saturday was a clear and sunny day and if it continues for a few days like this an increase in supply of stock will appear. Violets especially will profit by sunshine. These have dropped to 35 and 40 cents per hundred. Carnations are now selling at lower prices and roses have been very scarce all the week. Complaints continue in regard to the high price of cut flowers at Christmas, more on account of the fact that the quality of the blooms in many instances were not worth the prices asked. Many of the retailers rather than pay the high prices and take chances to get value received actually talked plants, and in most cases succeeded in countermanding flower orders. Now that the holidays are over our local growers are looking around and preparing for Easter.

NOTES.

The Imperial ball given on the evening of December 28 was the largest and most exclusive social event of the city. The Youngs had the decorations, using a large amount of greens and cut flowers. They had eight men working in the ball room alone. As only the choicest flowers were used, American Beauty and Killarney roses, the cost ran into four figures and those who saw it after it was finished say it was worth it.

It is rumored that James Arado, the efficient manager of Young's cut flower department, will in the near future take unto himself a partner for life. Jim, as he is popularly known, is well liked among the wholesalers and the trade in general. They will see that he gets a good send-off when the happy day is announced.

City Forester Andrew Meyer, Jr., is receiving complaints from property holders because of the clipping of trees in front of their property by the telephone company under permit from the forestry department. Mr. Meyer has neither the power to withhold the permit nor to say how the work shall be done.

The Florists' Club will hold their next meeting next Thursday at their new quarters in the Burlington building.

Visitors: L. Baumann, Chicago; A. M. Ausburger, Peoria Ill. W. F.

Des Moines, Ia.

HOLIDAY BUSINESS GOOD.

Taking everything into consideration the holiday business was fully as good as in previous years. The cloudy weather made stock very scarce, the growers being sorry they did not have double the amount, as they could have disposed of it very readily. Those buying out of town were very much disappointed in not getting all they ordered. Quite a number of flowering plants took the place of cut flowers, and were sold to good advantage.

NOTES.

Vaughan's Greenhouses report a very good holiday business. The stock was very scarce on account of the cloudy weather and was therefore entirely sold out every day.

Capt. E. L. Watrous, the well known nurseryman, who was knocked down by an automobile near the state house a short time ago, is now able to be about on crutches.

Chas. McAniff, of Vaughan's Greenhouses, is passing the cigars around, on account of a new girl, which put in her appearance a few days ago.

The Iowa Floral Co. reports a very good holiday business. It had some very fine poinsettias, which were sold very easily.

Miss Gertrude Blair, formerly of this city, but more recently of Columbus, O., has accepted a position in Atlanta, Ga.

Gus. Pafpca, of the Alpha Floral Co., has again resumed his position, after an illness at the hospital.

A. G. Lozier's had several wedding and party decorations during the holidays. M.

Seattle, Wash.

The demand for cut flowers here this Christmas has more than astonished the growers as well as the retailers, everything in the shape of a flower that was any good being sold on Christmas eve. There was not a good rose, carnation, violet or any other flower to be seen in the windows at night, only here and there a few chrysanthemums asleep, and a few poinsettias wilted. The stores all closed early on Christmas day, as they had nothing to sell. This has been a very hard season on the growers as there has been so much wet and cloudy weather; there was not two days sunshine in December. Prices were high, chrysanthemums selling from $6 to $8 per dozen, roses from $12 to $36, carnations from $2 to $4. Holly was in great demand and sold at $1.50 per pound. Lily of the valley was scarce. Pot plants sold well, but the retailers complain that the growers had really no good flowering plants to offer.

C. W. Johnson has left the Washington Floral Co. and gone to New York; he hopes to visit his father in England before starting business again.

Joseph Chalmers has gone back to the Malmo Seed & Floral Co. as nursery foreman. J. C. R.

MARKET QUIET.

Both the expected and the unexpected have occurred this past week. The expected happened in the form of a rather quiet market, funeral work being the chief factor in the situation. This condition is not at all unusual for this season of the year, there generally being more or less of a reaction after the holidays. As far as this is concerned it may be called a normal market. But the unexpected is the weather. While we usually have a January thaw, there has been so little cold and snow so far that everyone certainly expected something different from the fogs and thunder showers of the past week. All this has had its effect on the stock. Roses are off color, weak of stem and soft. There are some extra select long-stemmed American Beauty roses seen. Bride and Bridesmaid showed deterioration perhaps to a greater degree than the other varieties. Bridesmaid for several days has resembled the old Catherine Mermet. Killarney, too, has suffered to some extent, but is holding up in price better than other stock, largely owing to the limited quantity now being grown. Roses, however, have moved off in good shape, the supply often not being equal to the demand. The shading in the prices has been largely due to the general downward tendency of the market, a sympathetic condition, so to speak. Carnations have also suffered from the depressing weather conditions. The red varieties have been in a little better demand than others, but owing to the calls for funeral work white almost, if not quite, kept pace. Violets have been in large over-supply. These have sold as low as 40 cents per 100, and some held-over stock went down to 20 cents. Roman hyacinths have also been a glut on the market, but Paper White narcissi are about over with for the season. Other bulb stock, mignonette, etc., move slowly. Tuberoses have just made their appearance. A cold wave Wednesday had the effect of toning up the market to some extent and was hailed by the growers because of the expected improvement in the quality of the stock.

NOTES.

The annual meeting of the Horticultural Society was held at 13 Congress street January 8. Assistant Secretary Kanst reported the membership dues well paid up. Treasurer Rudd stated that there was a cash balance on hand of $5,665.58 and showed certified checks therefor. The society endorsed the resolutions bearing on an increased appropriation for the state entomologist. Philip J. Schupp and Carl Cropp were elected members. The meeting was adjourned until January 16, when the election of officers will be held, E. G. Uihlein, C. L. Hutchinson, W. N. Rudd and J. C. Vaughan being appointed on the committee of nominations.

Peter Reinberg will build a couple of houses for violets this season. This is in line with the recently adopted policy of Mr. Reinberg to grow all the stock needed to completely fill all orders. This is a decided departure, but one that will no doubt be appreciated by all patrons of this house. Fine lots of rose and carnation cuttings are now being shipped from the greenhouses.

The Flower Growers' Co., proprietors of the Flower Growers' Market, held its annual meeting January 3 for the purpose of electing directors and officers. The officers for the ensuing year are: E. Buettner, president; W. L. Tonner, vice-president; F. R. Hills, treasurer; Alex. Henderson, secretary; Percy Jones, financial secretary and manager.

The A. L. Randall Co. will begin receiving its usual supply of fine white lilac about January 20. A big importation of cycas leaves has just been received. These have heretofore been received from domestic sources, but it is thought that the leaves brought from over the ocean will be better liked and more eagerly taken.

According to the ice men the problem of securing ice for the approaching season is becoming a serious one. If a good freeze-up does not occur within the next two or three weeks ice will have to be shipped from points further north. This is hard, not only on the ice dealers, but the florists also, who are such large users of the article.

The first tulips of the season in this city were seen at Zech & Mann's last week. This firm is also receiving a good quality of Bride and Bridesmaid roses. John Zech has been exceptionally busy the past week owing to the fact that mumps broke out in his bookkeeping department.

C. L. Washburn, of Bassett & Washburn, returned from a stay of several days at West Baden, Ind. Mr. Washburn says it was much more like summer than midwinter, the mercury rising to 70° and over. He plainly shows the fine results of having been daily in the saddle and fresh air.

Charles W. McKellar has in a fine lot of Cattleya Trianæ, which will now be in good supply for some little time. Lælias, too, are a feature of the orchid trade that are in good supply and demand. Gardenias are coming in with good stems and fine blooms.

Sinner Bros. will grow several new varieties of carnations this coming season. Five thousand plants have been bought, including Winsor, Victory, Aristocrat, White Enchantress and White Perfection.

Leonard Kill and wife will attend the convention of the American Carnation Society to be held at Toronto January 23 and 24.

An exceptionally fine crop of Bridesmaid roses can be seen at the present time at Wietor Bros.

August Juergens reports having some exceptionally fine lily of the valley.

A. McAdams is about to go into a hospital for a slight operation.

The following is a list of the various committees named at the recent Florists' Club meeting: Arrangements.—F. L. Washburn, J. Gee, Arthur Graves. Exhibition.—Geo. A. Washburn, F. H. Rowe, W. F. Hempstead. Finance.—J. G. Robinson, Geo. J. Foster, A. R. Knowles. Reception—W. W. Rike, Geo. Callikan, Bruno Nehrling, J. Knowles, F. A. Baller, Geo. J. Foster, J. W. Adams, Andrew Washburn, Harry Johnson, E. L. Washburn, L. G. Adams, L. W. Moran, Arvid Anderson, Fred Madden, Herman Garbe, Joe Kirby.

These constitute the working committee for the annual meeting to be held here February 19 and 20, from which results highly beneficial to state floriculture are anticipated.

J. F. AMMANN.

Indianapolis.

TRADE NOTES AND GOSSIP.

New Year's business this year was ahead of that of last year and business has continued very good since. Demand for cut flowers was greater than supply and prices were according.

We are pleased to report that Edward J. Brown, of Shelbyville, who has been seriously ill for some time, is getting along nicely. Mr. Brown was in Indianapolis last Saturday.

The funeral of Mrs. Murray, of Butte, Mont., who was buried in this city, brought a great deal of funeral work.

A little daughter made her appearance at each of the homes of A. Bauer, of Bauer & Smith, and of Carl Glaubke.

Bertermann Bros. are to plant an acre rose garden on the east side of their sugar grove in Cumberland.

Edward Cossairt, of Cossairt & Son, of Shelbyville, is still in California.

J.

TAYLOR, TEX.—Mrs. Will Reid has just completed a new greenhouse 12 x 30 feet.

WHITE VIOLETS, Exceptionally Fine, $2.00 per 100.
GARDENIAS, In Quantity, 50c each.

Philadelphia.

PRICES OFF.

The past week has been quiet, the weather wet or cloudy and unusually warm for the season. This has had a bad effect on flowers, the stock coming in soft and off color. Prices have fallen considerably. The top price for American Beauty roses is now $9 per dozen. Bride and Bridesmaid roses range from $12 to $15, Liberty $15 to $25. Carnations are in fairly good supply at $6 per 100, with a few of the specials, including the best red, selling at $8. Double violets are now $1.50, singles 50 cents to 75 cents. Blooming plants that failed to make the holidays are now to be had in quantity. Azaleas and cyclamens are the leaders and some choice stock is seen in the store windows. The midwinter balls and other large social affairs are now on. Habermehl had the decorations at the Bellevue-Stratford for the Van Rensselaer and also the first assembly ball, both of which were elaborate affairs in a decorative sense. Carnations are now bursting badly owing no doubt to the dull weather, there being little sunshine lately. Rubbers are deftly put on but are almost invariably looked on with distrust by customers. The best stores will not handle them at any price.

NOTES.

The Leo Niessen Co. is still talking of its great Christmas business. To turn over 13,000 American Beauty roses during Christmas week is a feat which any house in the country would consider an almost record-breaking event. Mr. Niessen said that although carnations are said to be scarce, they sent out the same quantity or a little more than last year and from now on there would be no trouble to fill orders. Some very choice white Laelia anceps is now in stock.

It is said that better bulbs of the various narcissi are now grown in Virginia than can be imported. One large firm is so thoroughly convinced with the results obtained that over 50 acres are now under cultivation with the hope that they will soon be able to control or rather supply the home market.

The finance committee appointed to take up the matter of providing funds for the entertainment of the coming convention met last Tuesday and went over the work in a general way. From the consensus of opinion of those present there will be little difficulty in collecting the necessary money.

The Pennock-Meehan Co. is pushing orchids with a vengeance. Cattleyas are to be seen here in quantity at any time. Extra fine double white and purple violets are handled in large quantities. Coming in at noon of the day they are packed their odor adds greatly to their value.

Robt. Craig has just taken off another large batch of Ficus pandurata branch cuttings, rooted on the plants. As grown here this plant seems well night perfect, but Mr. Craig says wait until convention time next August and I then hope to show the possibilities of this great plant.

The Robt. Scott Co. is now cutting the best gardenias ever seen in this market. The flowers are very large and regular in shape, resembling small camellias. The Pennock-Meehan Co. and Edw. Reid are handling this stock.

Wm. McKissick is handling something fine in mignonette. Natural cycas leaves from local growers are always kept in stock here, a great convenience for the retailer who often wants them in a hurry.

Campbell & Unruh, of Center Square, Montgomery county, have dissolved. Mr. Unruh will continue the business, while Mr. Campbell has engaged with Myers & Sampson, of Wyndmoor.

The paper read by S. S. Skidelsky on our credit system before the Florists' Club at its last meeting was a very able presentation of the subject and created much favorable comment.

Chas. Zimmer, Jr., of W. Collingswood, N. J., died January 4, aged 31 years.

POSTSCRIPT.

Starting Tuesday, January 8, the Florists' Gun Club began a series of five shoots at the Wissinoming grounds for a handsome and valuable trophy donated to the club by a big manufacturing concern. The conditions of the shoots are that a series of five are to be held on the second and fourth Tuesdays of each month, the first starting next Tuesday afternoon. Each gunner is to shoot at 50 targets, handicap rise, with the use of both barrels. The scores of three shoots only will be used in making up the winning total. Any member attending more than three shoots may select his three best scores. All contestants will start at a 16-yard rise and will be handicapped by their own score, the handicap changing every 25 targets. K.

SOME NEW YEAR CALLS.

The private estate of Randall Morgan on Willow Grove avenue is well worth a visit. Although this is not the season when landscape features show at their best there is plenty in sight to prove that good heads and hands have been busy. Incidentally it may be stated that a private estate of 150 acres is seldom found in a great city.

The enlargements that have been made in the ranges of the Burton's since I last visited them speak of abundant prosperity. Just at present, after a big holiday trade, everything is cut pretty close but prospects are promising.

Thaddeus Yates was found in the midst of a luxuriant growth of lilies, azaleas and bedding and box plants. A noticeable feature was the great number of fine variegated vincas, all available space being utilized.

I found John Burton, the hustling man of business, in the tender and sympathetic role of amusing his little grandson. Again the grim destroyer has visited this household and a mother has been taken. S. E.

STOCK GOOD—TRADE DULL.

With rain and fog, and rain again, it was not to be expected, in the opening days of 1907, that the market could be buoyant. In the wholesale district it was remarked by several dealers that as the weather was affecting the growers as much as anybody there was a corresponding decline in receipts, thus leaving room for a reasonably fair clean-up. Notwithstanding the bad weather the representatives of all branches of the trade seem cheerful and hopeful, having faith in the future of the flower trade here. From the large wholesale and retail men, down the line to the humble street vender, there is no such word as fail. It is a tribute to the good work of many growers that stock is as good as it is, considering the weather. Some fine lots of Killarney and Mme. Chatenay roses are coming in, while Winsor, Enchantress, Mrs. Patten and Victory carnations never looked better. Alma Ward is a beauty that comes near being in a class by itself. Cattleyas may be seen in most of the stores, which is evidence that the orchid is coming within the reach of more people as the trade expands. Quite a sprinkling of camellias are to be seen, but whether they will ever regain the popularity they once enjoyed, is a moot question. They deserve a place.

WHOLESALE NOTES.

The weather man laid aside his grouch and smiled benignly on the second annual ball of the wholesale florists' employes, at Manhattan casino, One Hundred and Fifty-Fifth street and Eighth avenue, on the night of January 5. Excellent music was furnished by the band of the 22d regiment; the light fantastic toe was stepped to perfection and everybody was happy. The tickets, admitting gentleman and lady, were sold at the very moderate price of 50 cents.

Alex. J. Guttman, like others of the Twenty-eighth street dealers, is never too busy to be obliging. On January 4 he had on hand a bunch of seedling carnations from Henry Eicholz, Waynesboro, Pa. They had been in the store four days and still looked fresh.

Frank White, who represents John White's greenhouses, Elizabeth, N. J., was on Twenty-eighth street January 5. His firm is sending in fine smilax and stevia.

W. F. Sheridan, genial as ever, said he was very well satisfied with holiday business. He had just received a fine lot of fancy carnations.

The Coogan building shelters a number of good men, Joseph Millang, for example, as well as Moore, Hentz & Nash, and others.

At John Young's shipments are being received of excellent lily of the valley, Alma Ward carnations and a general run of fine stock.

Ford Bros. are handling a good line of stock; worthy of note is a good supply of excellent stevia.

George Saltford is feeling good over the violets which he handled for the holiday trade.

The greenhouse at Chas. Millang's, though small, is well stocked.

John Seligman says he was well satisfied with holiday business.

Reed & Kellar have some good things in store for the retailers.

J. S. Fenrich is handling a fine quality of lily of the valley.

A few tulips are on the market but the stems are short.

RETAIL NOTES.

Though the weather up to January 5 was bad, the retailers seemed to vie with each other in fine window displays. At Warendorf's there were orchids, camellias, baskets made up of roses and other fine stock. The baskets were of budding twigs set in vases, with a card attached reading: "Flowers arranged in water can be sent out just as you see here."

Through jealousy Geo. Falton, retail florist, on the evening of January 7 killed Mrs. Wiedeman, seriously wounded Pauline Ratel and attempted suicide at 30 W. Eighty-second street.

At Fleischman's Broadway store there was a display of cattleyas, banked with adiantum and smilax trimmings, that attracted much attention. His Fifth avenue store came out strong in fine plants.

Beecher once said that God might have made a better berry than the strawberry, but probably never did. The saying could be applied to Alex. McConnell's single violets.

The surroundings at J. H. Small & Son's Waldorf-Astoria store are so dazzling that it takes extra fine stock to compete, but they had it in abundance.

There is a very attractive display of boxwood plants in front of W. H. Donohoe's store, with fine flowering plants and cut flowers in the window.

Thomas Young's Fifth avenue store was beautiful with orchids, gardenias and other fine stock.

Scallen's display of Killarney roses and Alma Ward carnations was very fine.

Bowe has a good display of foliage and flowering plants.

Albany, N. Y.

BUSINESS GOOD.

A resume of the holiday trade for the season of 1906-7 reveals the fact that the florists of Albany shared in the general prosperity of the country to a degree probably beyond the record of any year in the memory of any of them in the business today. Complaint was made of the scarcity of good carnations, particularly of red and pink varieties, but this seems to have been general. The public bought flowering plants in liberal numbers. The demand was greatest for poinsettias in pans, with azaleas and ardisias in about the order named. Next to flowering plants the public asked for baskets, or hampers, of plants in flower of different varieties common at the holiday season. The inauguration of Gov. Charles E. Hughes on January 1 and the convening of the legislature on the following day caused a very large demand for set pieces of goodly size. Many of these were presented to the members of the legislature by admiring friends, and those who were forgotten on January 2 were remembered when the legislature convened again on January 9. The season, so far, is also notable for the number of social functions which have taken place. R. D.

Syracuse, N. Y.

The Dennison-Hudson wedding decorations were in charge of Henry Morris. The altar at St. Paul's church was decorated with Merry Christmas chrysanthemums with a background of asparagus. There were a number of arches covered with asparagus and white Enchantress carnations. Palms were used inside the chancel. At the house, the reception room was decorated with Begonia Gloire de Lorraine and asparagus. Musicians were screened behind palms and the staircases were entwined with smilax. The bridal bouquet was made of lily of the valley, gardenias and maiden hair ferns with white shower. For the matron of honor there was a bouquet of pink roses, lily of the valley and a white shower. The five bridesmaids carried pink roses with pink showers.

Christmas and New Year's trade was about the same as in former years. An increased demand for plants was noticed, but cut flowers were unsatisfactory and the best stock so high that but few would pay the price. Violets had a good sale and the stock was good.

Miles Hencle, formerly a member of the firm of Wheadon & Hencle, who went into the restaurant business, has entered the florist business again in a smaller way. He furnishes flowers for decorations and superintends arrangements.

P. R. Quinlan & Co. are cutting some fine callas and the violet houses are producing well. American Beauty roses have not yet recovered from the holiday cut.

At the Wheadons it was reported that cut flowers are somewhat scarce on account of the dark weather, there having been only one sunny day in a month.

Bard & Davis are rapidly increasing their business in the west end. They have recently put into service a splendid delivery outfit. A. J. B.

VICTORY HAS MADE GOOD.

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

ST. LOUIS, MO.—D. I. Bushnell is making a winter trip to Costa Rica.

CANNERS are ordering seed peas for the coming season in liberal quantities, so contract growers report.

VISITED MINNEAPOLIS: J. B. Agnew, general manager of the Pacific Seed Growers' Co., San Francisco, Cal.

ON January 5 we received Thorburn's trade list, in which that firm draws attention to five specialties in cauliflower seed.

THE Department of Agriculture has recently issued a bulletin on "Experiments in Growing Cuban Seed Tobacco in Alabama," by Geo. T. McNess and Lewis Ayer.

IT is suggested by one who has made careful observations of California grown onion bulbs that the advanced prices now being asked would entitle buyers to more careful selections in planting stocks than recent averages.

ACCORDING to the Crop Bulletin, Ontario, the clover seed crop is a light one, but alsike has turned out well where reported upon. Peas are an improvement over last year but turnip seed will be light. Mangel Wurzel is reported as good.

IT is worthy of note that, notwithstanding the great potato boom of a few years ago in England and the high prices paid for sensational novelties, the comparatively old Up-to-Date has been proved by exhaustive trials at Reading to still give the best results.

VISITED CHICAGO: J. C. Robinson, Waterloo, Neb., on his way to the meeting of the executive committee of the American Seed Trade Association at Washington, D. C.; A. J. Brown, Grand Rapids, Mich.; H. W. Buckbee, Rockford, Ill.; J. Robinson, of Rice & Co., Cambridge, N. Y.; Wm. Hagemann, New York.

FRENCH BULB growers report a mild winter thus far in southern France which has rather over-stimulated the growth of narcissus and freesia bulbs, making considerable injury possible in the event of later severe winter weather. Reports generally indicate the acreage for 1907 crop about the same as that of the past season.

LILY OF THE VALLEY APPRAISAL.—In a recent decision by T. S. Sharretts, the board of general appraisors at New York decided that lily of the valley roots must stand duty on a higher valuation basis. The roots, which were from H. Wrede, of Hamburg, were entered at 20 marks per 1,000, whereas the local officials raised the price to 20.90 marks per 1,000.

THE Batchelor Seed Store of Utica, N. Y., was incorporated at Albany, December 29, with a capital of $5,000. The directors are W. M. Ross and Chas. F. Saul, of Syracuse, and Arthur C. Langdon of Utica. The firm will remove its store from 28 Liberty street to a store in the Orpheum block, Lafayette street, where it will increase its old line of seeds and carry an extensive stock of poultry supplies and horse goods.

HOLLISTER, CAL.—A. J. Pieters, of the A. J. Pieters Seed Co., who expected to leave for the east last month has found it impossible to get away owing to the continual rains. In the heavy December storms in various places between five and 11 inches of rain fell in 36 hours. Since then there have been rains every two or three days so that the planting of seeds has been seriously delayed. Mr. Pieters hopes to call upon his eastern friends in the trade either the latter part of this month or early in February.

Against Free Seeds.

It will not be the farmers of Long Island and their friends alone who will express their contempt and opposition to this practice when the question is revived, but the National Grange, the National Farmers' Congress and other national, state and local organizations affiliated with them, besides the horticultural societies, will be lined up in hostility.—Boston Transcript.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points January 5 were as follows: Cleveland, cucumbers, $16 to $17 per box; mushrooms, 60 cents to 65 cents per pound. Chicago, cucumbers, Illinois fancy, $1.85 to $2 per two dozen; No. 1, $1.50 per dozen; No. 2, $1 per dozen; radishes, 75 cents per dozen bunches; mushrooms, No. 1, 50 cents per pound; No. 2, 25 cents per pound. Kansas City, Mo., radishes, 20 cents to 40 cents per dozen bunches; cucumbers, $1.50 per dozen. Cincinnati, cucumbers, $1.25 per dozen; mushrooms, 40 cents to 50 cents per pound. Boston, cucumbers, $10 to $14 per box.

The Holly Car Hunt.

There was a mild sensation on Railroad Row this morning, when the Twenty-ninth Infantry, fully armed and in heavy marching order, drew up in front of the railroad offices and stacked arms, according to a mid-December issue of the Salt Lake News. Like wildfire the rumor spread that the Interstate Commerce Commission had called upon the United States regulars to enforce the law and see that the Christmas holly was delivered on time.

General Agent Harding of the Colorado Midland was trying to trace a consignment of holly when he glanced up and saw a lieutenant bearing down on the office. For a second his gaze rested on the long line of soldiers and then with a wild whoop Harding jumped for the cellar.

Imports and Exports.

During the week ending January 5 imports were received as follows:

New York.—H. Frank Darrow, two cases, 14 bags and 205 packages seeds, two cases and 22 packages plants; C. Rogers, four boxes orchids; Henry Nungesser & Co., 400 packages and 45 bags seeds; Decorative Plant Co., two cases artificial flowers; McHutchison & Co., 43 cases laurel trees; Peck & Velsor, two cases seeds; H. D. Whitestone, five cases laurel trees; American Express Co., 150 bags clover seed; T. L. Hopkins & Co., nine bags seeds; E. Hoenicke, five bags seeds; Lehn & Fink, 24 barrels flowers, three bags seeds; Vaughan's Seed Store, seven cases mushroom spawn and 16 bags seeds; Silva, Bussenius & Co., four bags seeds; Amermann & Patterson, 14 packages plants; E. A. Havemeyer, one package plants; P. Henderson & Co., 95 packages and three cases seeds; G. W. Sheldon & Co., 307 packages plants and 300 bags sugar beet seed; Stumpp & Walter Co., three cases plants; J. Spiero, one case bulbs; J. S. Bartel, 228 bags seeds; T. H. Gary & Co., two cases plants, one bag seeds; P. E. Anderson & Co., 17 bags seeds; W. Taat, 71 cases lily of the valley pips; Murray & Mitchell, 213 bags seeds; Andreas Olson, 150 bags clover seed; T. C. Pollock, two cases flower seeds; L. J. Spence, 400 bags sugar beet seeds; Waeber & Lea, 20 cases mushrooms; Wakem & McLaughlin, three barrels seeds; Holland-American Line, one bag seeds, two bags beans; Blue Ridge Despatch, 28 bags seeds; W. Hagemann & Co., 45 cases lily of the valley pips; O. G. Hempstead & Son, one case plants; Hensel, Bruckmann & Lorbacher, 21 packages seeds; C. F. Meyer, 46 cases lily of the valley pips; Maltus & Ware, three bags and one case seeds, 26 bags peas and one bag beans.

EXPORT.

New York.—Seeds, $24,226; peas, $2,318; beans, $1,265.

American Seed Trade Association.

A meeting of the executive committee of the American Seed Trade Association was held at the New Willard hotel, Washington, D. C., January 9.

A conference with the Bureau of Plant Industry has been arranged for January 10, when the seedsmen will submit the following questions to the representative of the government:

The Current Catalogue Onion Seed Prices.

As a matter of interest, showing the views of seedsmen in different parts of the country, the following table gives the pound prices from six leading American seed catalogues for 1907 on nine standard varieties of onion:—

	A	B	C	D	E	F
Danvers Yellow, Flat	....	$2.00	$2.25	$1.25	$2.00	$2.25
Danvers Yellow Globe	$3.00	2.50	2.50	1.70	2.25	2.50
Yellow Strasburg	2.75	2.00	2.25	1.25	1.75	2.25
White Portugal	....	2.50	2.50	1.25	2.25	2.50
Red Wethersfield	2.50	1.75	1.75	1.25	1.75	1.75
Southport Red Globe	3.75	2.50	2.25	1.70	2.25	3.00
Southport Yellow Globe	2.75	2.50	2.75	1.70	3.00	3.25
Southport White Globe	4.00	3.50	3.50	1.50	4.00	4.00
Australian Brown	....	2.00	2.00	1.25	2.00	2.00

1.—What is an adulterant, and what seeds should be considered as adulterants?
2.—Should the Secretary of Agriculture fix a limit below which the presence of certain seeds will not be considered as adulterants?
3.—Is the present method of getting seeds for analysis unfair to seedsmen and, if so, can it be improved?
4.—When no specific mention is made of the presence of adulterants, should seed containing them be considered as adulterated, without regard to the price asked or any designation, such as "screenings," "mixt." etc.?
5.—When a seedsman is found to have offered adulterated seed, should he be given an opportunity to explain, and, if so, how can the explanation affect publication?
6.—Should publication be based on mail samples, purchased lots or both?
7.—Should the price at which the seed is offered be included in the publication, and should the price be considered as an indication of the dealer's estimate of quality?
8.—Should the fact that certain seeds, sometimes used as adulterants, may have been harvested with the seeds in which they are found, prevent the latter from being considered as adulterated?
9.—Should the United States Department of Agriculture give seedsmen more assistance in testing seeds?
10.—Would a prohibitive tariff on such seeds as yellow trefoil, bur clover and Canada blue grass be advisable?

Catalogues Received

FINE HOLIDAY TRADE.

A better Christmas trade than ever before was experienced throughout the state. There was an increase of from 10 to 15 per cent over previous years. The weather was ideal, remaining so until New Year's day. Stock was fairly scarce, especially American Beauty roses. Carnations were plentiful. Poinsettias sold well, but were not very plentiful. There is no market for tall poinsettias, the demand being for the low plants in pans. Azaleas sold very well, in fact everything in the line of plants was cleaned up. The only thing that any one had left over the next day was carnations, and that I think was due to the fact that the growers raised the price the week before Christmas from four cents to six, eight and ten cents, which held carnations back from that time until Christmas, and then there was a great slump on the market. Violets went to their usual price, retailing at $4 per 100; in fact, I think we got as high prices for all flowers here as are obtained anywhere in the east. We got from $18 to $24 for long stemmed American Beauty roses.

A meeting was held in the back room of the Alpha Floral Store on January 1, the object being to get together and talk over the past situation in regard to raising the prices of flowers during the holidays, and also to settle on a fair price for white carnations. The retailers seem to think they are being imposed upon by getting over a third of white varieties and paying the same price for these as for the colored, as there is no demand at Christmas for white carnations. We had a very enjoyable meeting. We do not know whether anything will come of it, but we hope so. Everybody on the growers' and retailers' side expressed their views and opinions. Those present were: Messrs. Long, of Elitch's Gardens, Valentine, of the Park Floral Co., Mahler, the violet grower, Braidwood, Wall, of Brinkert & Wall, Reynolds, Phil. Scott, Newlander, of Newlander & Rollin, Hall, Glauber, acting as toast-master, Mann, of the Alpha Floral Co., as host, Sinram, of the Sinram Floral Co., Lewis, of the Gallup Floral Co., Mauff, of the Mauff Greenhouse, Davis, of the Davis Carnation Co., and Walters.

NOTES.

Daniels & Fisher had a decoration at the Denver club, just after Christmas, December 28; also at the Denver athletic club's annual this week, and it has kept them very busy, these being two of the largest decorations of the season.

PLATTE.

Omaha.

HOLIDAY SEASON PROFITABLE.

The volume of Xmas and New Year's business has been immense this season. We had splendid weather before the holidays and therefore stock was good and plentiful. Potted plants in bloom sold better than ever before. Retailers made magnificent displays in their windows. Azaleas, Begonia Gloire de Lorraine, cyclamens, poinsettias, primulas, etc., could be seen in profusion and it seems they were all sold out. American Beauty roses sold from $5 to $18 per dozen; tea roses, from $2 to $5 per dozen; carnations, $1.50 to $2; lilacs, $4; lily of the valley, $1; narcissus, $1; hyacinths, 75c; mignonette, $1.50; poinsettias, $3 to $9; violets, $3 to $4. Holly and holly wreaths sold well. A lot of poor, dried-up holly was shipped in at a great loss to the shipper and the florist. Mistletoe was fine this season and sold well.

A baby girl was an arrival just before Christmas at the home of C. Ederer.

GRIPPE.

Detroit.

TRADE ERRATIC.

Trade conditions since New Year's has been somewhat erratic, varying from rather poor at times to some very busy days, the latter being the result of much funeral work without which many days would be very quiet with most dealers. Roses continue very scarce, the supply being entirely inadequate to the ordinary demand. Carnations too are daily sold out and even Roman hyacinths and Paper White narcissi are none too abundant. Violets are in fairly good demand and the supply fully equal to it.

CLUB MEETING.

The club meeting January 2, was well attended. The subject, "Review of the Christmas Trade," was well discussed and many suggestions calculated to improve the vexatious conditions incident to such a time were made. It was generally conceded that this holiday brought to nearly everyone an increase of business over the same time a year ago. The high prices on some varieties of cut flowers, notably roses, were attributed to the prevailing cloudy weather most general during the whole of December. The invasion of the product of the plant growers for this annual event was well recognized and the growers present gave notice of much greater preparations in this line for the future. Chas. Plumb, who made an extensive visit to Europe last summer, gave a report of his observations floriculturally while there.

A resolution was unanimously adopted expressive of the club's sympathy with Ex-President Robt. Flowerday, whose daughter died on Christmas day. Three more applications for membership were received and will be voted upon at the next meeting. The cigars were passed by A. Sylvester whose broad smiles plainly told it was a boy.

The sympathy of the trade is extended to Robt. Klagge and Herman Klagge whose mother died January 6 and was buried January 9.

J. F. S.

Ottawa, Ont.

Christmas has passed leaving pleasant recollections for all. A record holiday trade is reported but with no features out of the ordinary. Made-up baskets of moderate price sold well, those at $3 to $7 being most popular. Pot plants were in great demand, azaleas, cyclamens, solanums and Begonia Gloire de Lorraine being most in demand. Growers seemed afraid of the more expensive azaleas, but a few hundreds would doubtless have found a ready sale, as there were many inquiries. Cut flowers, especially colored stock, were very scarce, those shipped from a distance being sleepy and of poor quality. Doubtless the cloudy weather in some measure accounts for this. Even with the scarcity business is brisk and there is every indication of great development in the near future.

NOTES.

C. Scrim has a fine house of Lawson carnations and all other stock is looking well. His holiday baskets at the store were very fine and artistically made up.

Tom Davis, superintendent of government grounds, was asking about friends in Montreal and elsewhere.

Graham Bros. handled a large number of baskets but had not enough for their customers.

C. C.

Buffalo.

NEW YEAR'S TRADE GOOD.

New Year's trade was as good as could be expected. The weather scheduled was in some way sidetracked and April weather was what we had. The supply of stock was equal to all demands, carnations being plentiful; also all roses. As to plants, poinsettias and begonias were poor, while primroses and cyclamens were good. The charity ball on New Year's night, followed by the children's ball and numerous receptions, gave all plenty of work. Funerals have been numerous. The designs were of various proportions. Violets are good and having a ready sale.

NOTES.

If none of the florists who are members of the Florists' Club got a hair cut only at each meeting that President Neubeck called, there would be a fine bunch of lilacs on exhibition at the meetings. We may have one before Easter, and that will be three in two years. The only worker is E. C. Brucker, and it keeps him thin trying to collect dues and explain why there are no meetings.

M. C. A. Schnell, who has been with S. A. Anderson, went out with the old year and has opened a store on Broadway near the Market, in a locality where funeral work is a big factor. S. A. Anderson is getting a fine lot of his new unnamed primrose; it is a fine plant and a full bloomer.

We are waiting patiently to anounce the departure of W. J. Pulver, Wm. Scott, S. A. Anderson and L. H. Neubeck on a pleasure trip to rest up after the hard work of Christmas, according to reports they can afford to go.

As we look out of the door today it has every appearance of April. The thermometer is about 60 degrees and a copious rain is falling, which no doubt would be acceptable about three months from now.

The first drummer to arrive this year was C. B. Knickman, of McHutchinson & Co., New York, and Harry Bunyard has telephoned that he will be here shortly.

"Every ready" Grever, with his flower pot cover, has had a good trade.

Palmer & Son are now the owners of a fine automobile.

BISON.

MARYSVILLE, WASH.—C. D. Morrison is building a greenhouse 100 feet long, 20 feet wide at the end next the street and 18 feet wide at the back. This will for the present be heated by a furnace but later, steam is to be adopted.

DREER'S SUMMER FLOWERING BULBS.

The Nursery Trade

American Association of Nurserymen.
Orlando Harrison, Berlin, Md., President; J. W Hill, Des Moines, Ia., Vice-President; George C. Seager, Rochester N. Y., Sec'y.
Thirty-second annual convention, Detroit, Mich., June, 1907.

A nursery is promised at Brookings, N. D., this spring.

AN excellent article on the hardy spireas, by John Dunbar, will be found elsewhere in this issue.

THERE is a merry row on in England about the American gooseberry mildew and some of the mycologists are falling foul of each other.

ALBION, N. Y.—Chas. Gray died December 17, 1906, from pneumonia. Deceased was 56 years of age and carried on business as a nurseryman.

CANAL DOVER, O.—C. Betscher is considering moving his present nurseries to Painesville, O., where he contemplates building a range of glass.

FRANKLIN, MASS.—M. J. Van Leeuwen, of the Continental nurseries is planning the erection of an up-to-date greenhouse, also a show garden of specimen plants. All kinds of shrubs and evergreens that are hardy in this section will be grown and exhibited.

PAINESVILLE, O.—Clare Haven, for several years of the Storrs & Harrison Co., has resigned his position to enter into partnership with the Wildemere Gardens, Highland Park, Mich., a firm which caters to a large ornamental tree and herbaceous plant trade.

WEST GROVE, PA.—A special meeting of the board of directors of the Conard & Jones Co., held December 29, elected Robt. Pyle as president, to fill the vacancy of the late Alfred F. Conard. Roland T. Satterthwaite was elected secretary and Mark Hughes director.

HIGHLAND PARK, MICH.—Wildmere Gardens filed articles of association December 12, showing its capital stock to be $10,000. Of this $6,300 is subscribed and only $400 paid in cash. J. A. Briscoe has 470 shares, Clare W. Haven, Painsville, O., 470; M. R. Briscoe, 50; Samuel E. Beylett, 10.

LARAMIE, WYO.—The State Board of Horticulture has revoked the license of the Mount Arbor Nursery Co. of Shenandoah, Ia., to do business in this state, the firm having delivered in the Big Horn Basin a carload of nursery stock badly affected with wooly aphis one of the seven diseases the board is fighting.—Denver, Col. Republican.

Hicksville, N. Y.

Business is good in every way. In the nursery line, Norway maples sell well, prices having increased 50 per cent the last six months. There is a great call for well grown conifers, such as white pine, Norway spruce, hemlock, arbor-vitæ and Colorado blue spruce. The best selling hedge plants are Berberis Thunbergii, and well grown California privet. Rowehl & Granz shipped 100,000 Gladiolus Augusta to Germany and Holland, January 2.

A Forester's Revenge.

A Bavarian forester, a poor and humble man, received an official communication from the town council partly printed, partly written. In the printed portion was the introductory word Herr, Mr., used in the address. The town council thought the forester not entitled to Herr and crossed it out.

The indignant forester went to see the town council about it, but got no satisfaction. The mayor told him that Herr was struck out because it was superfluous. Then the forester sent a reply to the official letter and addressed it to: "The soft-headed town council," but drew his pen through "soft-headed" as superfluous.—Chicago Chronicle.

City Nursery Projected.

The Sioux City, Ia., park commissioners are said to be seriously contemplating the establishment of a nursery, not only for public utility but also for supplying private citizens with trees. The site is not yet chosen but a small strip of land north of the city along the Perry creek bottom, which was donated to the board last summer by E. P. Parr, is favored by the commissioners.

The establishment of a greenhouse in connection with the Main street pumping station is another project under consideration and it is proposed to heat this with the steam from the exhaust pipes of the engines there. A trip to Omaha, Neb., Kansas City, Kas., Des Moines, Ia., Madison, Wis., and other cities renowned for their parks will be undertaken early this year, with a view of getting ideas about the system to be adopted in Sioux City.

Nurserymen Landscape Despoilers.

IMPORTANT OPINIONS.

There is a good deal of truth in what is said by E. F. C. in his communication to THE AMERICAN FLORIST, also in the clipping from Country Life in America. I do not presume to know enough about landscape gardening or landscape architecture to criticize the the work of those who represent themselves as members of this profession. To my mind landscape gardening in America is still somewhat in the evolutionary stage and no doubt there are many professing themselves to be landscape gardeners who do not possess the requisite knowledge to properly represent the profession. So far as the buyer is concerned, whether he employs the services of a landscape architect, or whether he seeks the advice of any of the several nursery concerns who are undertaking landscape work in connection with their nursery business, he should, for his own protection, place his confidence in firms of responsibility and established reputation. I do not believe that the managers of any responsible, reputable nursery would knowingly foist plans on their customers for the sole purpose of producing sales. I do not see how they could afford to do it, as in the end they would certainly reap a reputation that would be decidedly detrimental to future business.

C. W. WARD.

In regard to this matter I believe the landscape gardener, the man who makes the design for the improvement of grounds, should have no interest in the material furnished. His position with regard to the grounds should be similar to that of an architect with regard to a building. It is unprofessional for either to buy material from himself for his client.

On the other hand, a florist or nurseryman who attempts to make a design for the improvement of grounds, is tempted to put into that design material which he can furnish, without regard for the beauty of the result or the interests of the owner.

O. C. SIMONDS.

The articles referring to this subject in THE AMERICAN FLORIST strike us as being good sound sense. People should always look with suspicion on plans they get for nothing; the only idea in furnishing plans for nothing is to sell as much stock as possible, as the maker of a free plan is never concerned about the results of the plan. The only safe thing to do is to employ a landscape architect of reputation whose future success depends upon the results of his work. J. W. ELLIOTT.

Western Association of Nurserymen.

The seventeenth annual meeting of the Western Association of Nurserymen occurred at the Coates hotel, Kansas City, December 18 and 19. The following officers were elected for the ensuing year: A. Willis, Ottawa, Kas., president; George Marshall, Arlington, Neb., vice-president; E. J. Holman, Leavenworth, Kas., secretary and treasurer; and F. H. Stannard, Ottawa, Kas., chairman of board of directors. The programme consisted of the appointments of committees and the hearing reports on resolutions. Addresses were made by A. Willis, W. P. Stark, J. W. Schutte, J. W. Hill, T. E. Griesa, E. S. Welch and A. C. Griesa. An advance in the price of fruit trees was proposed. The reasons offered for this resolution, said E. J. Holman, secretary of the association, is the increase in the cost of the skilled labor necessary for nursery work. The idea of a trust was suggested during the meeting, but was instantly rejected by the members. The western association, includes all the states west of the Mississippi river. Forty-five members attended the meeting.

K. C.

NEWBURYPORT, MASS.—George E. Tessimond, of the Highlands, has recently enlarged his greenhouse and is now busy working up a stock of geraniums and other plants. Carnations and chrysanthemums are looking well and attracting much attention from visitors.

Cleveland.

PRICES GOOD.

Conditions the past week, both in stock and prices, were about the same as last, stock being all picked up at prices, that were very little below those received holiday week. Though it has been warm, there has been no sunshine, consequently no increase in the cut. Carnations are bringing from $3 to $6, roses $6 to $15, narcissus and lily of the valley $4, sweet peas $1.50, tulips and single daffodils $4, pansies $1.50, stevia $1.50 per 100. There seems to be no indication of a decline in prices unless in the near future the sun begins to shine.

NOTES.

The long wanted article on the indifferent credit system in the trade has come at last, thanks to Mr. Skidelsky. His paper in THE AMERICAN FLORIST for last week hits the nail on the head. May the good work go on.

F. W. Griffin has his new plant stand ready to put on the market; this time it is a plant tilter for the floor, mantel or grate.

H. R. Carlton, of Willoughby, reports having received large orders for spring delivery of his Gov. Herrick violet.

Chas. Bartells, of the Essex Greenhouses, is sending in Lawson carnations that are in a class by themselves.

Joe Strejcek, of Broadway and Fifty-fifth street, has had a very heavy run of funeral work the past week.

OHIO.

Worcester, Mass.

The meetings of the Worcester County Horticultural Society, for the 1907 winter season, began January 3 and are to be continued every Thursday until March 14. They are for the delivery of papers followed by discussion, and commence each day at 2:30 p. m., closing at 4 p. m. The following is the programme: January 3—"Annual Address," by O. B. Hadwen, president: "San Jose Scale—Appliances and Practical Methods for Suppressing," by H. L. Frost, Boston. January 10—"Useful Birds and Their Relation to Horticulture," by E. H. Forbush, ornithologist to the Board of Agriculture. January 17—"Economic Sources of Plant Food," by Prof. J. W. Sanborn, Gilmanton, N. H. January 24—"The Wild Flowers of Massachusetts," by Mrs. Philo P. Holmes, Fiskdale. January 31—"Horticultural Accessories," by Wm. N. Craig, North Easton. February 7—"Flowers for Pleasure and Profit." by Mrs. Edward Warren, Leicester. February 14—"Shade Tree Problems," (illustrated by stereopticon), by Geo. E. Stone, Massachusetts Agricultural College. February 21—"Combinations in Vegetable Gardening," by H. M. Howard, West Newton. February 28—"A Day in Westminster Abbey and Tower of London," (illustrated by stereoptican), by Albert M. Powell. March 7—"Sunshine," by Chas. W. Wood. March 13 and 14—Annual reunion and Massachusetts Fruit Growers' Convention. March 14—"Horticulture in Rural Economics," by Frank William Rane, state forester, Boston.

PLAINFIELD, N. J.—Arthur Brisbane, editorial manager of all the Hearst newspapers, has given out a contract for the erection of a greenhouse on his estate at Netherwood. Work will begin at once.

Montreal.

GOOD HOLIDAY TRADE.

Everybody was well satisfied with the Christmas trade. There was a general clean-up in all lines, the supply being rather short in good flowering plants, notably azaleas, which were over forced. Simon Mardner, Vervæneana, and Talisman were hardly recognized owing to their lack of true color. Poinsettias and azaleas are close rivals for first place as Christmas plants, with cyclamens following closely. Good plants of Begonia Gloire de Lorraine were in evidence all around and sold at novelty prices. Moderately priced baskets sold very well but anything over $12 was hard to dispose of. In cut flowers it was pleasant to notice that the threat of a shortage did not materialize in most lines. There was an abundance of carnations which sold out at from $2 upwards. Roses were not over plentiful but there was enough to go around with careful handling. Prices ranged from $4 to $12 for American Beauty. Lily of the valley was of extra good quality, also violets; mignonette was good but hard to sell as cut flowers; finally it was sold for green. An immense quantity of greens was handled and there was a great demand for holly wreaths with red ribbon. Box green was also handled in large quantities for the first time. The red and green matting is the best thing out yet for pot covers. Some nice fancy ribbon appeared as a novelty and was much appreciated by the public. The wholesale commission house was full of business and proved a great convenience to the retailers. The weather conditions were most desirable and with good roads for sleighing delivery was pleasant. All got through in reasonable time and very few rigs were to be seen on the streets delivering flowers on Christmas day.

LUCK.

BOSTON, MASS.—A certificate of condition has been filed in the State house, Boston, for the Riverside greenhouses (inc.), Templeton, as follows: President, George R. Lowe; treasurer, Arthur F. Johnson; capital stock authorized, $4,000 preferred, $4,000 common; capital stock issued, $1,050 preferred; $3,000 common; capital stock paid in, $1,050 preferred, $3,000 common; par value of shares, $50; number of shares, 80; assets, real estate $5,500, stock and material $800, cash and debts receivable $1,546.66, total $7,846.66; liabilities, capital stock $4,050; accounts payable and mortgage debt $3,774.98, profit and loss $21.65, total $7,846.66.

DAHLIAS.

Now is the time to place your order for Bulbs which will insure you getting named varieties in any quantity; delivery to be made this fall or early spring.

DAVID HERBERT & SON,

Successors to L. K. Peacock, Inc., ATCO, N. J.

ARAUCARIAS

OUR SPECIALTY.

OUR LITTLE PETS.

By Aschmann, in Philadelphia, I bought
An Araucaria, a pet for our little girl—
Now we have two pets, the pride of our thought,
The little girl so sweet, a head full of curls,
And the Araucaria with its everlasting green—
A more joyful home you never have seen.

Araucaria Compacta Robusta or A. E. Glauca

(the size and kind I grow). You will be surprised at the effect that it will make on the table or wherever it is placed. The plants I have are as perfect as nature could produce. The brush of an artist could not paint them any better, and prices are cheap. Just look:

6 to 7 in. pots, 4, 5 to 6 years old, 4, 5 to 6 tiers, 25 to 30 in. high and wide, $1.50, $1.75, $2.00 to $2.50 each.

EXCELSA GLAUCA, 5 years old, 7-in. pots, specimen plants, 6 to 7 tiers, 30 to 35 in. high and wide (you never saw anything better in your life than these are), $2.00 $2.50 to $3.00 each; 6-in. pots, 3 years old, 3, 4 to 5 tiers, 16 to 20 in. high and wide, $1.00 to $1.25 each.

ARAUCARIA EXCELSA, 6-in. pots, 5, 6 to 7 tiers, 4 years old, 25 to 30 in. high, $1.00, $1.25 to $1.50.

KENTIA FORSTERIANA, 7-in. pots, made-up plants, 1 large size about 45 to 48 in. high in the center, and 3 smaller sizes, 25 x 30 in. high around, which gives them a good appearance, $2.00 to $2.50 each; 6-in. pots, single plants, 36 to 45 in. high, 5 to 6 good leaves, 4 years old, $1.25, $1.50 to $1.75 each; 6-in. pots, 32 to 36 in. high, 5 to 6 good leaves, 4 years old, $1.00 each; 5½ to 6 in. pots, 4 years old, 30 in. high, 5 good leaves, 4 years old, 75c.

DRACAENA BRUANTI, (imported), 30 in. high, full of green, waxy foliage from top to bottom; the only Dracaena for parlor store or house culture, that can stand heat, dust and dirt; 6-in. pots, 50c, $5.00 per doz.

BOSTON FERNS, 7-in., very bushy, only 75c; 6-in., 50c or $5.00 per doz.; 5-in., 30c to 35c; 4-in., 20c

NEPHROLEPIS SCOTTII, 8-in., as big as a washtub, worth $3.00, now $1.50; 7-in., as big as a bushel basket, worth $1.50, now 75c to $1.00; 6-in., 50c; 5¼-in., 40c; 5-in., 30c to 35c; 4-in., 20c to 25c.

NEPHROLEPIS BARROWSII, 7 in. pots, as big as a bushel basket, 75c to $1.00 each; 6-in. pots, large, ready for 7-in., 50c; 5½-in., 40c; 5-in., 35c; 4-in., 25c.

AZALEAS, in bloom and bud, Simon Mardner, double pink; Vervæneana double rose variegated; Deutsche Perle, double white, 75c, $1.00, $1.25 to $1.50 each.

CINERARIA HYBRIDA, H. F. Michell's best strain, 2½-in. pots, $4.00 per 100; 3 in., large plants ready for 5½ or 6-in. pots, $7.00 per 100; 4-in., $10.00 per 100.

ARECA SAPIDA, 6-in., 50c each.

CASH WITH ORDER. All plants must travel on **purchaser's risk only.**

When ordering, say whether the plants should be shipped in the pots or not.

GODFREY ASCHMANN,
Importer and Wholesale Grower of Pot Plants,
1012 Ontario St., PHILADELPHIA, PA.

NEW CANNAS.

WILLIAM SAUNDERS The flowers are large, of splendid form, and are borne very freely in immense clusters. The color is a deep rich, shining scarlet slightly dappled with crimson. Foliage is a rich bronze. Height 3½ to 4 feet. We believe that **William Saunders** is decidedly the most perfect canna of this type that has been introduced.

50c each; **$5.00** per doz.; **$35.00** per 100.

OTTAWA is a strong grower, very robust and 5 to 6 feet high. The flowers are large and beautifully formed; color is carmine with tints of old rose and deep coral, add to this the silken sheen and you can imagine the effect a few plants will produce.

NOTE: We had this canna on trial among the Canadian experimental stations last summer and this is the official report of their expert: "Quite distinct and one of the most beautiful shades of color I ever saw in cannas. Of 70 massed in one bed during the past season, this was the most floriferous in the collection, coming into bloom early and continuing until cut down by frost, as many as 13 expanded heads of bloom being counted at one time on a plant, and not a poor one among them, all being of immense size.

50c each; **$5.00** per doz.; **$35.00** per 100.

NEW YORK Has the orchid type of flower. They have much more substance than the flowers of the other varieties of this class, and will stand the hot sunshine as well as the toughest varieties of cannas. The color is a solid, rich scarlet covered with a beautiful glowing sheen. The flowers are large and contrast beautifully with the dark bronze foliage.

50c each; **$5.00** per doz.; **$35.00** per 100.

Send for our list and prices of 60 other leading varieties of cannas.

ROSES **Are our great specialty,** 2¼ and 4-inch pot plants we have in great variety. **Philadelphia** Rambler, Crimson Rambler, Dorothy Perkins, and other climbers in strong field plants.

SHRUBBERY in variety. **Viburnum Plicatum,** Spireas, Altheas, Honeysuckles, etc.

SEND FOR OUR PRICE LISTS.

Orange, N. J.

At a meeting of the New Jersey Floricultural Society, January 4, the following officers were elected: W. J. Bennett, president; Arthur T. Caparn, vice-president; Henry Halbig, secretary; William Reid, treasurer. Reports for the year were read, showing 70 members in good standing and five in suspension under the bylaws, five new members for the year, of which only three had qualified. Eleven monthly floral displays had been held, at which 15 members and four visitors had served as judges and 24 had exhibited. Seven silver cups were awarded as follows: To Peter Duff, Wm. Reid, Max Schnyder, Wm. Phillips and Arthur T. Caparn under general classes, and to Arthur W. Bodwell and Lager & Hurrell for special orchid exhibits. In all 86 certificates had been given. A fall exhibition and special rose and dahlia shows were held, also a special observance of Flag day, June 14. This latter was in conjunction with other societies and the business had reference to the exorbitant charges of express companies and other public matters. A handsome balance on the right side was disclosed by the report of the treasurer. Julius Roehrs, Rutherford, exhibited some remarkably long stemmed lily of the valley 19 inches in height. Thos. Jones, Short Hills, showed a white Cattleya labiata.

J. B. D.

Glen Cove, N. Y.

The monthly meeting of the Nassau County Horticultural Society was held on the afternoon of December 12 and was well attended. Three new members were elected and one nominated to active membership. The roll of active members now numbers 76. This meeting closed the second year of the society's existence. From its birth with a chartered membership of 14 members it has steadily progressed, both in the keen interest manifested by its members and in its financial standing. As an organization it has brought together the gardening fraternity of quite an extended area, having always the elevation of the profession as its chief end in view.

In the point competition H. F. Meyer scored 83⅓ with poinsettias, tomatoes and cucumbers; S. J. Trepess scored 80 with cauliflower and tomatoes.

The prize for 25 carnations arranged for effect was awarded H. F. Meyer.

Alexander Mackenzie was first for the best flowering plant with a beautifully grown specimen of Begonia Gloire de Lorraine in a 4-inch pot; S. J. Trepess second with a well grown cyclamen.

The annual dinner of the society is to be held January 23. The treasurer's report showed a substantial balance after meeting all expenses. The following officers were elected for the ensuing year: Alexander Mackenzie, president; H. F. Meyer, vice president; John F. Johnston, secretary; E. J. Brown, treasurer; J. W. Everett, corresponding secretary.

CARNATION CUTTINGS NOW READY

"BUSINESS NECESSITY"

Edition of 1906, Postpaid, $2.00.

THIS is the only term which describes the American Florist Company's Directory, just out. This book, 476 pages of facts tersely told, is issued annually and is an aid to business and money making which no wholesaler or traveling salesman can afford to be without. It contains the name of every Florist, Nurserymen and Seedsmen, arranged both by states and towns and alphabetically; and lists of experiment Station Horticulturists, Landscape Architects, Horticultural Supply Concerns and Leading Foreign Firms. It will save many times its cost by enabling you to cover America with your catalogue and at the same time waste no printed matter or postage on dead names.

Rooted Carnations

Come and see the healthiest stock in America.

Our new King Construction truss house is a success, 31x300 feet, and good judges tell us we have the healthiest lot of Lawsons in America.

25,000 WELL-ROOTED CUTTINGS

now ready in the best possible shape at the lowest market price. We have pink white and variegated Lawsons, Mrs. Patten, Candace, Melody, White Perfection, Lady Bountiful, Boston Market, White Cloud, Robt. Craig, Victory, Cardinal, Enchantress and Rose Pink Enchantress.

Write for special prices on large lots.

W. W. COLES, Kokomo, Ind.

MABELLE, New Pink Carnation for 1907.

Color—A peculiar shade of lovely pink, with a faint yellowish cast; several shades lighter than the Lawson. Unlike most pinks, the brightest sun does not injure the color. Size—3 to 4 inches in diameter when established. Odor—Pleasing, but not strong. Stems—Invariably strong, but always graceful, ranging from 12 to 30 inches during the season. Habit, etc.—A very quick, active grower, making specimen plants in a short time, even from late cuttings. On account of its rapid growth, requires supporting very soon after benching. Gets away rapidly, blooms early and gives long stems right from the start. Productiveness—Prodigious is the best word we know of to use here. It is the most incessant bloomer, early and late, we have ever grown. Stock limited. Delivery January 5 to 10 and later. Price, $12.00 per 100, $100.00 per 1000.

THE H. WEBER & SONS CO., Oakland, Md.

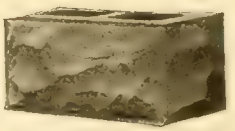
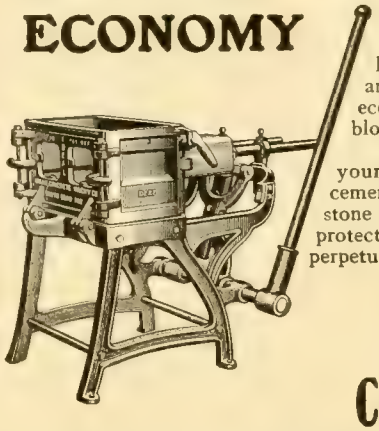
FROST-PROOF ECONOMY



Ideal Hollow Concrete Block construction will protect your greenhouse from frost and secure greatest economy in fuel. The illustration of hollow block explains it's resistance to frost.

With the Ideal Concrete Machine you can yourself make these blocks from sand, gravel and cement at little cost—far below the cost of brick, stone or lumber. Ideal Blocks not only give frost protection, but are absolutely fire-proof, and effect a perpetual saving in insurance.



IDEAL
Concrete Machines

May be operated by any man without previous experience. The process of making blocks is simple as making mortar. Blocks for every building purpose, with plain, tooled, ornamental face or natural stone effect made with the same machine. Simple, durable and adaptable to any size block within capacity.

Our catalogue will show you how to secure frost protection and fuel economy, as well as initial saving over cost of other materials. Write for it and it's freely yours.

If you do not find what you need in our Ready Reference Department, write us about it.

THE RED POT meets every requirement. No packing charges. Prices right.

We Don't Deny

that it is early to solicit this business:

But listen; it is much better for you to have the pots on hand than to take the risk of being unable to get your supply just when you **"must have them."**

Our Stock is Complete and Ready for Business.

You know the inconveniences and probable loss sustained when the time for potting your stock is delayed. When it comes to the worst if you wait until you think you **"must have them"** there may be others who also "have waited" and everybody **then** wants their pots **at once.**

Tell Us how many you want and we will make shipment any time you wish. **Order Now.**

LOW FREIGHT CHARGES.

WE EXPECT ORDERS NOW. IT'S ABOUT TIME.

THE LOW PRICE HEATING PLANTS

The Chicago House Wrecking Co. is in position to offer you an interesting proposition for furnishing you with a heating plant at a saving of at least 30%. Send us a sketch of your houses with preferred location of the boiler, the points of compass and the desired night temperature for zero weather, and we will gladly submit you an exact detail quotation of all material required to install the plant. We have ***heaters*** and ***boilers*** of every kind, both new and rebuilt. We have always on hand a large number of rebuilt boilers suitable for greenhouse heating. Our stock embraces ***fire box boilers, horizontal tubular boilers, Kroeschell boilers, cast iron sectional boilers, Erie City economizers*** and other types.

We can save you considerable money on ***pipe, valves*** and ***fittings;*** also on ***doors, glass, sash*** and everything needed in the construction of your buildings.

SUGGESTIONS FOR FLORISTS.

Verbenas.

The cooler these are grown the stockier the plants will be. Sow your first batch now, using the very best seed. Transplant the seedlings into flats where they can stay until after Easter. Make a second sowing March 1 and another about April 1.

Nierembergias

These are not often seen at commercial places, but where window box and vase plants are required they are of great value. They are of the easiest culture. A good way is to grow them from cuttings taken from fall lifted stock plants, but you can also sow seed now which will produce good plants by spring. There are a blue and a white variety, both beautiful.

Dusty Miller.

Centaurea gymnocarpa makes, if sown now, splendid plants for vases next spring. Its silvery fern-like foliage looks well with that of other plants and for this purpose three and one-half inch stock is best. For edging beds planted with geraniums and other low growing kinds, two and one-half inch stock grown from seed sown at the middle of February is all right. Grow the plants in a low temperature, and they will be the better for it.

Grevillea Robusta.

This plant, known also as the silk oak, may be mistaken for a robust or large growing oak by those who are not acquainted with it, if they judge it by its popular name. It is a most ornamental foliage plant, with finely cut leaves, and is highly prized as a vase plant. The plants for that purpose should be grown in 4 or 4½-inch pots and be about 18 inches high. It takes about 15 months to do this, and seed sown the end of this month will make plants for the spring of 1908.

Abutilon Savitzii.

The present is a good time to propagate this valuable bedding plant. The young growth will root easily in 30 days, but the hard wood will take 10 to 12 weeks. This species, with its variegated foliage, is an excellent edging plant for a bed of bronze leaved cannas, and can also be made use of in any subtropical planting. If you have no stock, buy plants out of 2½-inch pots and lift a few next fall, which if potted up and pruned back a little will produce cuttings for next year.

Bellis Perennis.

If you use the English daisies for bedding, sow the seed now. There isn't a great deal of money in them, yet there are always customers who ask for them. I saw a narrow border of them, about 300 feet long, at the Paris exposition grounds in 1889. The center was planted with a blood red variety and the edge with a white one, which was a beautiful sight, and I have been trying ever since to get a good strain of a real red, without success. There are red varieties offered, but they usually turn out pink when in bloom.

Crimson Fountain Grass.

This is another fine pennisetum that should be more extensively grown. It attains a height of from five to six feet and has deep bronzy-red foliage fully one and a half inches in width. It is a great addition to the list of ornamental grasses; just the thing to give color to a bed of Arundo Donax or Eulalia Japonica, or to be planted out in clumps near the edge of a shrub border. I have noticed that seed is now advertised and that stock for spring planting may be purchased at about $8 per 100. The botanical name of this plant is Pennisetum macrophyllum atro-sanguineum.

A Good Dwarf Salvia.

There are several dwarf salvias now offered, one of the best of them being Lord Fauntleroy. This variety was introduced in 1904 by J. M. Thorburn & Co., and is certainly a gem. Sow the seeds now; they will make nice plants, six inches high, by May, in 3½-inch pots, and each plant will carry a heavy spike of brilliant crimson flowers, set well above the foliage. You will have no

trouble in selling them. If you bed them out allow two feet between the plants. They will then make fine specimens 20 inches in height, and will bloom all summer. If you plant them more closely they are apt, especially in light soil, to grow two or three feet in height. Lift a few of the best plants next fall to provide cuttings in spring.

Pennisetum Longistylum.

Don't neglect to sow seed of this beautiful grass, as it is an ideal edging plant for a bed of cannas. The plants are often bedded out too closely, this resulting in a tall weak growth, and in August and September, when they are full of plumes, a heavy wind will lay them flat on the ground, the appearance of the whole bed being ruined for the rest of the season. Sow at once and the seedlings will be ready for transplanting in about five weeks. Take two or three of them at a time and plant two inches apart in flats. They can stay here until the first week in April; then pot them into 3's and when you plant them out allow 15 inches between the plants. If the beds they go in are large keep them one foot away from the edge.

Salvia Splendens.

If you have no stock to propagate from and want strong blooming plants in 4-inch pots by May, sow the seed now. We have grown the variety Drooping Spikes for several years, saving our own seed in the fall. Salvias can be used in so many ways for bedding, and are, in general, so satisfactory that enormous quantities are sold each spring and the average florist should grow more of them. The greatest enemy salvias have is red spider, which is sure to attack plants kept in small pots in a dry atmosphere. Keep your seedlings in flats in a temperature of 58° until the middle or end of March, then pot into 3's, and give them their final shift into 4's about April 15. After potting, a temperature of 50° is high enough. Don't crowd in the benches. Syringe daily and give the plants a sunny spot. They require a rather rich soil when in pots, but not when bedded out. Watering must be attended to during hot weather if good results are expected.

Storing Canna Roots.

When I reminded you in my last notes about spraying canna roots, if they were kept in a dry place under a bench, I meant to say that it is just as bad to keep them too dry as it is for them to be stored in a place where there is a constant drip from the benches. Canna roots are entirely different from gladioli or dahlias. While you can keep the latter practically dust dry over winter, cannas ought to be taken up in the fall with a good clump of soil, to keep the dormant eyes plump and alive during the winter months. A great many roots are lost each year because they have been brought to the greenhouse in the fall without a particle of soil and have been thrown under a bench, where the eyes become shriveled long before spring, and varieties of the Crozy type are, of course, far more likely to suffer than the old green Robusta.

If the roots are dust dry now, give them a light spraying (not a soaking), say twice a week. This will benefit them a great deal, and they will be in better shape when you begin to start them for the coming season; the eyes will be plump and ready to go ahead. I had intended saying a few words about the starting of cannas, and outline a course which we have found very satisfactory, but there is still plenty of time, and other things are more in need of attention.

Varieties of Canna.

Out of 10,000 cannas which we grow annually, 5,000 are Egandales. It is still, without a doubt, one of our best bedding cannas. Its brilliant, currant-red flowers form a beautiful combination with the bronze foliage. It is one of the freest bloomers and always looks clean. This is not an American variety, but was sent by Mr. Crozy, of France, to J. C. Vaughan, of Chicago, in 1890, with a number of other seedlings, all of which were under numbers and sent for trial. Mr. Vaughan sent one set to W. C. Egan, the noted amateur, to try at his beautiful grounds. In his report that fall, Mr. Egan stated that one seedling in particular was far ahead of all the others in habit, color and blooming qualities, and he considered it a decided improvement on the standard varieties grown at that time. The following year this variety was sent out under the name of Egandale. I may mention here that Mr. Egan's garden has served as a trial ground for a good many novelties in plants, many of which have never been sent out, as they proved disappointing. Of the older cannas, Duke of Marlborough is still one of the best crimsons, Florence Vaughan is yet in the ring as a yellow with red spots, Chicago is a good red, with grand foliage, and Queen Charlotte is extensively grown as a red with a yellow border. Of the newer varieties, President McKinley has proved a grand crimson, Express is a fine dwarf scarlet, Black Beauty has beautiful rich bronzy-purple foliage, but rather small flowers. Niagara is a fine dwarf crimson and rich yellow and Buttercup is the finest of all the yellows.

WITH THE GROWERS

F. R. Pierson Co., Tarrytown, N. Y.

Tarrytown, situated on the superbly picturesque Hudson, some 25 miles from New York, has long been a place where American horticulturists, especially they who devote their energies to that branch called floriculture, may tarry long in thought or person, with profit to themselves, the profession and the general good cause of making life more beautiful. 'Tis a place, too, redundant with scenes and memories in American history and romance, immortalized by pen and deed, for it was here that a sad fate to Washington's army and aims was averted in the capture of Major Andre, and then again but a few yards from this spot is the "Sleepy Hollow" made famous by Washington Irving. The whole section in fact is pic-

CARNATION WINSOR.

turesquely historic and there is a wealth of reasons to make the place a most interesting tarrying town for lovers of the beautiful, the romantic and the ultra-practical alike. Here again, in close proximity and within a radius of a few miles are the palatial homes of some of the wealthiest people of the world; in fact, it can be asserted in all truth that in no other part of the world, in a like space, can such worldly wealth be found and it naturally follows that all that is best in horticulture surrounds it.

CARNATION WINSOR AT THE F. R. PIERSON CO,S, TARRYTOWN, N. Y.

Midst these surroundings, in the ranks, as it were, and yet commanding, is the world-wide known firm of F. R. Pierson Co. Many are the grand acquisitions to commercial floriculture that have been raised and sent broadcast by this establishment, each introduction adding luster to sponsor and locality. At Scarborough, the next station, a few miles higher up the lordly river, there is a most wonderful transformation occurring, for here among the foot-hills, on newly purchased land, coming right down to the railroad station, the firm is establishing what most assuredly is destined to be the most picturesque and beautifully located plant nursery in America. These grounds at present cover nearly 60 acres and many fine collections are to be seen there. The newly acquired grounds form part of an idealic landscape. High up, on the bluffs, are superb views of the Hudson with its guarding Catskill mountains stretching away on both sides many miles in the distance; and from the ravines or vales here can be caught the most enchanting views of an unparalleled panorama of nature's own work. Mr. Pierson intends to enrich this scenery by an extensive and select collection of the flora of all countries, grouped in ways that will not only command admiration but do much to encourage higher ideals in landscape work. Here too, there is being brought into existence, as it were, a veritable ocean of glass; monster crystal-like plant forums or palaces surpassing the dreams of past generations. In addition to the well known eight 300 foot rose houses, there has recently been built three plant houses over 300 feet in length and nearly 60 feet in width. To merely stand at the end of these almost bewilders one and conjures up memories of the days, even in our own time, when the entire commercial plant houses of the state could almost be put within one of these structures.

'Tis here, in one of these enormous plant houses, built on the U-bar design, that we, in company with a party of expert growers from many states found ourselves amazingly admiring one of the grandest sights we at least have seen for many years and positively the best individual flower growing picture we have ever seen. It was a house of blooms and buds of the new carnation Winsor. This particular house is 300 feet long, 50 feet wide, heated and ventilated by the latest improvements among which are numerous innovations. In it are ten seemingly endless beds or solid benches divided half way by a six foot passageway. In these beds are planted 15,000 Winsor, and on these plants—by a carefully counted bench—a fair average would place the number of visible buds and blooms on January 9 at 165,000. Some may look upon these figures with incredulity but they are there to be seen nevertheless. Is there anywhere such another sight? And what is this carnation? Let us first consider it from a cultural standpoint; yet first let us say it is one of the divinest of the Divine Flower. In its history we find that it is a seedling raised from the pollen of the varieties Daybreak and Albertina on that of Lawson, resulting in an entirely distinct and far superior creation, yet withal, retaining, in its excessive superiority, all that is best in its parents. If there is any predominant element in its bearing it is that which distinguishes Lawson. Its robustly healthy and profuse foliage is, if anything, a shade lighter than that of the above mentioned variety. Its flowers are borne proudly on stiff, sturdy, upright stems, on an average from 14 to 24 inches in length, long enough for all and every purpose for which carnations are used. There is none of that costly brittleness about the stem that characterizes some other varieties. In all of these thousands of developed and prospective flowers not a single bursted calyx was discernible, nor have we heard of any among the thousands that have gone before. In size it is the equal of Lawson or the great majority of varieties known to commerce. In productiveness it has no equal. Among its ample foliage there is not the slightest sign of weakness or of the ills peculiar to many kinds. It is in every way the commercial carnation par-excellence of today and of the future and when we say commercial carnation we mean to give it the full significance

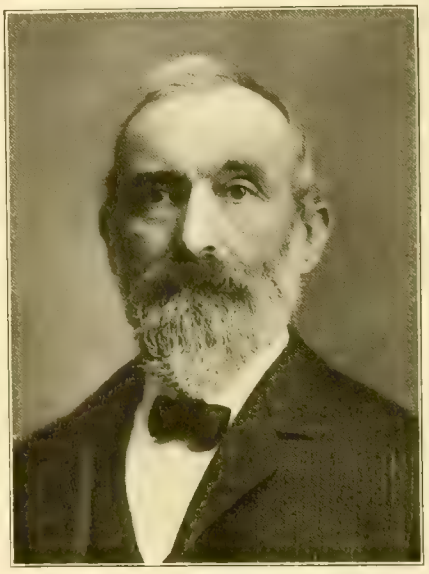
CARNATION WINSOR AT THE F. R. PIERSON CO'S, TARRYTOWN, N. Y.

of that appelation which is warranted by its past and present actualities and its vividly apparent prospects. Here, as if to prove in a practical way its longevity and endless productiveness, are three benches of Winsor planted two years ago. They have never been disturbed, merely receiving the ordinary culture necessary to stock plants. Today they are a mass of healthy foliage, blooms and buds, vying in a way with their progeny's grandeur, a revelative sight.

Twelve thousand plants were put out in these solid beds from 2½-inch pots last June. Large shipments of flowers were gathered in early October. In November 10,000 blooms were picked. In December 20,000 flowers were shipped from them to the most critical of all markets and the fairest calculation is that they will produce 30,000 select flowers in January. The yield at present for these 12,000 plants averages 1,000 fine blooms a day with an endless chain of them in sight, and so by this it will be seen that this wonderful carnation answers the call magnificently during the time flowers are most profitably wanted. It is in no way or sense one of those spasmodic or uncertain varieties called croppers. It is a continuous and dependable bloomer and in this particular it is at once the poor man's friend and the rich man's pride. "Pick and come again tomorrow" is a consistent and applicable motto for this grand flowering plant. To illustrate how highly it is valued in the New York Cut Flower Market would require much space; sufficient to state that it brought $20 per 100 wholesale at Christmas and now averages from eight to 12 cents. Some time ago, in our "Retailers" notes, which particular item was reprinted in European horticultural papers, we stated that the day would come when American growers would supply Europe in winter with American grown carnations. We had in our mind's eye at that time, such a carnation as Winsor, which for its lasting qualities is unusually marked and establishes its claim to being one of the most durable and best of all shippers, a vital consideration in the market at least.

In our depiction of Winsor as growing in the so-called solid bench it must not be inferred that we either argue in favor of this system, or that this variety is particularly susceptible to its advantages, for in one of the other large houses mentioned it is shown grown on elevated benches and under various treatments, on and through all of which it recommends itself to the most critical. For instance, the plants on one elevated bench were from 2¼-inch pots planted here August 1. Flowers were gathered from these in October and there is a fine crop on them now. This particular bench is the wonder and admiration of all visitors. There are many hundreds of new beginners and long struggling flower growers in this country who cannot afford to either invest sparse capital or devote their days and nights in doubtful experiments in highly colored and floridly lauded novelties. Winsor especially appeals to those who need a surety. The conditions attendant on the present era demand to be met with a large amount of resolute certainty. No one, not even the wealthiest, can afford to deal with or look complacently on failures or a too long deferred success. Immediate and lasting results are every business man's ambition and it is a certainty that Winsor will be a boon to all who grow it; more especially will its great qualities recommend it to the small grower with a local trade, the private gardener who must provide flowers at all times, and to they who supply the needs of an avaricious market. Whilst it establishes a new standard in the pink color, one which will often be referred to, and equals in size and quality the best exhibition varieties, yet unlike some pet carnations it does not depend for future existence or popularity on the temporary and fast fleeting praise of victories on the exhibition table. From present appearances it will long remain an ideal money-making carnation. Its color is solid pink, almost true pink, darker than Scott, much lighter than Lawson. The retailer values it highly because its color renders it adaptable to all uses. It is fine under artificial light, inspiring in daylight, lending its beauty to conform with the laws of harmony when in juxtaposition with most other flowers. We recommend it because it is more than good—it is magnificent.

J. IVERA DONLAN.



John E Haines.

John E. Haines, Bethlehem, Pa.

A very interesting collection of carnations were seen at this place. John E. Haines, who began this business but 12 years ago, has, he, tells us, all his lifetime been a great lover of flowers. He has taken a great fancy to raising seedlings of his own and has a very fine collection. Twelve years ago he put up a small greenhouse to raise lettuce, radishes, etc, more for pastime than for profit. In a few years he began experimenting on carnations and finally devoted all his time to raising new varieties, finding the work so interesting and having such fine success in that line. The variety John E. Haines is looking grand, full of buds from one end to the other. Wm. Mangan, the foreman, tells us that they look just that way from the time they begin to bloom until thrown out in July. He says they make three blooms to one of any other red he has yet seen. In color it is a very fine scarlet. Though it was disseminated in 1906, orders are coming in nicely this year.

The benches of Imperial and Pink Imperial show that they are most vigorous growers. The stems soar high above anything else grown in the houses. The colors are popular, both in this vicinity and in New York at A. J. Guttman's, where they found a ready sale at Christmas. Mr. Haines was not able to supply one-third of the demand. Each year he uses more plants for flowering purposes and each year the demand is greater. Among his coming varieties is a fine Daybreak pink, a shade deeper than Enchantress, somewhat like La France rose, beautifully formed with a fine calyx, one flower measuring three and three-quarter inches across with a long stiff stem; it is a very thrifty grower. A pink, marked No. 6, Mr. Haines tells us, is the greatest producer of blooms he has ever grown or heard of, beginning very early and continuing the whole year round. It is also good for field-blooming. Star of Bethlehem, a pure yellow of a pleasing shade, is a very free bloomer and has a good stem. There are other very promising pink, white, red and variegated seedlings coming on.

On the place can be seen growing: Enchantress, My Maryland, Jessica, Perfection, and Pocahontas. Wm. Mangan has worked among flowers since he was a boy of ten years of age. The last six years previous to entering the employ of Mr. Haines, he was in the employ of John Wanamaker. Mr. Haines is also assisted by his daughter, Mrs. Geo. Haines Weber, who takes great interest in the business, and aids her father by keeping the books and attending to the correspondence.

In the summer of 1906 were erected the three greenhouses shown herewith. They are filled with the new varieties, John E. Haines, Imperial and Pink Imperial. The productiveness and vigorous growth of these varieties can be seen, though the photos were taken on December 28, after Christmas, when blooms were closely cut to supply the great demand.

Jensen & Dekema, Chicago.

Well out of the city, in a good clear light, Jensen & Dekema have a most compact and up-to-date plant, the houses being remarkable for light construction and especially suitable for the production of sturdy, healthy stock.

By some unaccountable means we generally gravitate to the propagating house and on a recent visit this was the first house visited. Those who had ordered stock early from this firm are lucky, for as Mr. Jensen pointed out, the earliest plants go to those who send their orders early and some grand plants they certainly are. There is one early batch of novelties such as Winsor, Aristocrat and others, about 5,000 plants, all potted and well established. On another bench we noted an extra fine and level lot of that fine carnation Victory.

The even condition of the plants is remarkable, every one being rooted and each one almost an exact counterpart of the other. Mr. Jensen has a very high

JOHN E. HAINES' NEW CARNATIONS.

Imperial. Pink Imperial.

opinion of Victory and he would appear to be not alone in this, for he says the demand for cuttings at a very early date was quite phenomenal this year.

Aristocrat, too, he has great faith in, and, as is well known, his acquaintance with this fine variety right from its inception gives him the right to speak plainly about it. He has gone into its culture very largely. Quite a long bench of rooted cuttings has already been cleared, and the second lot is just about ready and of the ordinary standard varieties as of the novelties, the stock is even and all sturdy and full of life.

Turning to the benches where the plants are grown for cutting Victory again shines. Although many of the plants had to be cut back for propagating, there are enough to show the characteristic habit and free flowering nature of this superb variety. Not the least of its good points is the fact of its flowers opening quickly. "There it is when you want it," says Mr. Jensen, and this, as is well known, is not the case with all kinds.

Enchantress is in great form, the plants showing their liking for the somewhat heavy soil in which they are grown by the stiff, hard looking shoots. As the majority of the flowers are cut on the close side for shipping to such distant points as New Mexico and Texas, the display of open flowers was not great, but the buds were there, fine, healthy looking fellows standing well up as they always do on vigorous plants. About 12,000 of this standard kind are grown and 10,000 Boston Market, but the latter will be somewhat less grown next year in favor of Lady Bountiful, which is to be cultivated more largely.

One is loth to part with old favorites, but in all probability Lawson will have, in some measure at least, to give way to Aristocrat. Yet to look at the 9,000 fine plants of it grown here it looks as though it was good for a long time yet. Still Aristocrat is a finer flower, a taking color and a most continuous bloomer. It ships well and its keeping qualities are of the best, so what can prevent it making good? Mrs. Patten appeared to be the principal variegated sort grown, about 3,000 of it being benched. Pink Patten was also noted in quantity, as was Beacon and a fine pink seedling raised by Wm. Rudd; No. 181. This was flowering freely in company with other more or less novel kinds.

Jensen & Dekema make a specialty of shipping cuttings and rooted cuttings to the trade, and if healthy parent plants go for anything then the stock sent from here will give satisfaction. There is a great difference between a highly fed, bloated plant and a hard, sturdy one, especially for propagating from and the plants here are in the latter category. The demand for plants and cuttings began here much earlier than usual this season, the orders coming in quite early in December, according to Mr. Jensen. His partner, Mr. Dekema, we were sorry to learn, has had to leave for California for an indefinite time on account of lung trouble. As noted above the plant here is very compact. The principal range consists of four houses, each 27x266 feet, and one 30x266 feet. Besides these there are several smaller houses and convenient packing shed, boiler room, etc. Jensen & Dekema are carnation specialists and devote the whole of their time and plant to the culture of this popular flower.

Patrick Maier Allegheny, Pa.

Pittsburg has many carnation and rose specialists but when it comes to bulbs the first honors are due to Patrick Maier of Millvale. Born near Wurtemburg, Germany, he early learned the growing part of the florist business there. Coming to this country he took employment with John Bader and later with Fred Burki. Four years ago he secured the greenhouses which up to that time had been run by Chas. Koenig, the place consisting of 23 houses, mostly 33x165 feet. At first bedding plants, ferns and palms occupied many of the houses, but later these were mostly discarded for cut flowers which he grows for the wholesale trade only. During the summer months there is always a fine cut of Kaiserin roses, which is followed by Harrisii lilies. His success with these is very pronounced, the blooms always being the best.

Chrysanthemums are given much attention also, all the medium sized commercial varieties being grown. With Paper White narcissi and Roman hyacinths Mr. Maier is always in early and the cut through the season is heavy. More space is devoted to tulips than to anything else. Only the very best bulbs are secured, and the flowers are always noted for their excellence, all the principal varieties being grown. Last fall 250,000 bulbs were imported. Daffodills are also extensively grown with much success. Considering that the place is hemmed in with houses and within the smoky district, surprise is often expressed that flowers of such quality could be grown.

Twenty Years Ago.

Hand painted buckets were fashionable for bouquets and German favors.

The beautiful Comet asters were being sent out as novelties.

Buttercup was one of the most popular carnations.

A floral trowel was one design at a bricklayers funeral; it was composed of white roses, carnations, narcissus and lily of the valley.

Lapageria alba and L. rosea were recommended as good plants to grow.

Nearly $7,000 were offered in prizes at the annual show of the Massachusetts Horticultural Society.

A dinner was tendered to W. Atlee Burpee by a few of his New York friends at Delmonico s.

Violet Victoria was giving great satisfaction to Illinois growers.

That very elegant bronze chrysanthemum Source d' Or was much grown for cutting.

Great annoyance was experienced at Christmas and New Year's from growers holding back stock that was fit for market, in order to obtain holiday prices for it.

The seed firm of J. M. McCullough's Sons of Cincinnati, lost 100,000 bushels of blue grass seed in a fire, the total loss at which was figured as $10,000.

A fine spike of Lilium candidum was recorded and photographed, bearing 22 open flowers and 13 buds, a remarkable development for candidum.

The Moccasin flower Cypripedium spectabile, and Trillium grandiflorum were recommended as suitable wild plants to grow for flowering at Easter.

Seventy-five ladies and gentlemen visited E. D. Sturtevant at Bordentown, N. J., to see the Victoria regia in bloom.

La Triumphante, Phœbus and William Holmes were among the new chrysanthemums. These names conjure up old memories.

To Be Done Now.

IN THE GREENHOUSES.

Sow Thunbergia alata early to have good plants for filling baskets in May.

Tagetes signata pumila is one of the finest annuals for bedding. It should be included in the seed order but not sown too early.

Look over the stock of cannas and pot up any that are to be grown for decoration this way.

Carnations, and other plants peculiarly liable to fungoid diseases, should always be propagated in clean sand as a preventive at the beginning.

Get the late sweet peas planted out before they get hard or pot-bound.

Coleus cuttings struck now are useful during the bedding season and nothing is easier to grow. Seedlings are good if stock is short.

IN THE STORE.

Overcrowding, either of baskets or in the store window, is wasteful of good material and is not nearly as effective as a thinner arrangement, in which the true habit of flowers and plants is seen.

It should never be too much trouble to obtain anything of which you are out of stock for customers. Only this way can you retain them.

It is not wise to be always telling your customers what big prices you have obtained from some one else.

"I use this myself" is not always as good a recommendation as it appears at first. It has been known to have a bad effect.

Freak and unusual decorations of plants are all right as long as the novelty lasts, but there is nothing like first rate stock for a lasting trade.

Brighter days are due now at any time, so have everything clean in readiness for them. The sun is no respector of florists.

OUTDOORS.

Making roads and walks need not be delayed on account of frost. Do a little well, rather than attempt more than you have material enough to finish.

Keep sufficient bulbs in flats out of reach of severe frost for immediate requirements.

Repairs to any hotbed sash, or other lights not in use, done now keeps men employed and saves time and temper later on.

Trees or shrubs that arrive frozen should be thawed out in a shed only just above freezing point, not placed in heat.

A thick layer of strawy litter or manure on the cold side of greenhouse walls is a great saving of heat.

Retain the straw litter shaken out of the manure for mushroom beds. It will be needed for covering later and is much better than clean new straw.

CARNATIONS AT JOHN E. HAINES', BETHLEHEM, PA.

Wooton, the fine residence of Geo. W. Childs, was figured, with descriptive notes, in THE AMERICAN FLORIST.

Robert Craig was instructing readers how to grow chrysanthemums under glass in summer, in the fashion now almost universal.

Marechal Niel was one of the popular varieties of roses for cutting for design and floral work generally.

An itemized bill for a bouquet totaling $8.60 was sent in by a Portland, Ore., retailer.

A floral design, depicting a spider and fly on a web of white Florida moss, attracted considerable attention at the Cincinnati exposition.

A large consignment of hollies in pots, from Holland to a New York merchant, arrived too late for the Christmas trade, owing to bad weather.

Very elaborate table decorations were arranged by the principal florists.

The double white Phlox Drummondi, said to have originated in this country, was offered as a novelty by Benary of Erfurt.

The double scarlet zinnia had a brilliant future predicted for it in these papages which has been fulfilled in a double sense.

The Bride was advertised by J. N. May of Summit, N. J., as a new rose.

Natural gas was working very satisfactorily in Pittsburg greenhouses, night labor being "practically done away with."

Christmas sales in Chicago were above those of the preceding year, while the New Year's sales fell considerably below those of 12 months earlier, thus striking a similar average of holiday sales.

Keep the disbudding up to date on the rose benches. The plants have usually none too much vigor now and certainly none to waste.

After cutting heavily keep the adiantums a little on the dry side, a short rest resulting in more vigorous growth later.

Continue to keep the summer flowering cattleyas on the dry side. When the growth is getting well away on C. Gaskelliana water more freely and if necessary repot before new roots start.

Fine sand that runs together closely is better than coarse for forcing lily of the valley in.

As soon as marguerites are struck pinch the eye out if dwarf plants for selling in pots are needed.

NAHANT, MASS.—A greenhouse and potting shed are to be built on the estate of George Abbott James this spring, from plans by Alden & Parker of Boston.

CARNATIONS AT JOHN E. HAINES,' BETHLEHEM, PA.

Forcing and Retarding in England.

As an example of specialized culture begun in quite a small way, the nursery of T. Jannoch is remarkable in several directions. It was established ostensibly for the cultivation of lily of the valley, and the supply of roots, flowering plants and blooms for cutting. The material supplied to the public, and to members of the trade, commanded great approbation from the first, and the proprietor soon became favorably known as a cultivator and forcer of, and an authority of repute on, lily of the valley.

HOUSE OF LAWSON CARNATIONS AT W. W. COLES', KOKOMO, IND.

Up to that date, now nearly 30 years ago, its culture in nurseries and private gardens was but little understood or practiced, and the special production of flowering crowns by sorting out the one, two and three-year-old crowns (buds) was scarcely known or thought of as being essential by the cultivators of the home grown plants. At that period the late Mr. Herbst of Richmond, and Mr. Iceton, then of Barnes, were the better known dealers in lily of the valley; and these men were forcers of roots—not growers—in the ordinary sense of the term. The supply of clumps and crowns came from the continent. Mr. Jannoch was the first to show us how easy it is to cultivate the plant under suitable conditions in this country, and since that time others have followed in his footsteps; but owing chiefly to the dearness of labor, special cultivation of the plant has not made much progress, with the result that the continental cultivators furnish the major portion of crowns and clumps forced at the present day.

The two methods—retarding in a freezing chamber and etherization—are employed in the production of lily of the valley flowers during practically the whole year. Retarded lily of the valley can be had in bloom at any time during the autumn and summer months, and they will open their "bells" and develop fine foliage in the course of two or three weeks in a cold frame or a greenhouse, and even in a living room they will come to perfection. After October, however, more heat is required from week to week, otherwise success is less certain; and the flowers are weak and stunted, and being too long in opening, many of the flower buds become yellow and finally drop off. The plants require no bottom heat before October, and in no case afterwards should the bottom heat be more than 75°.

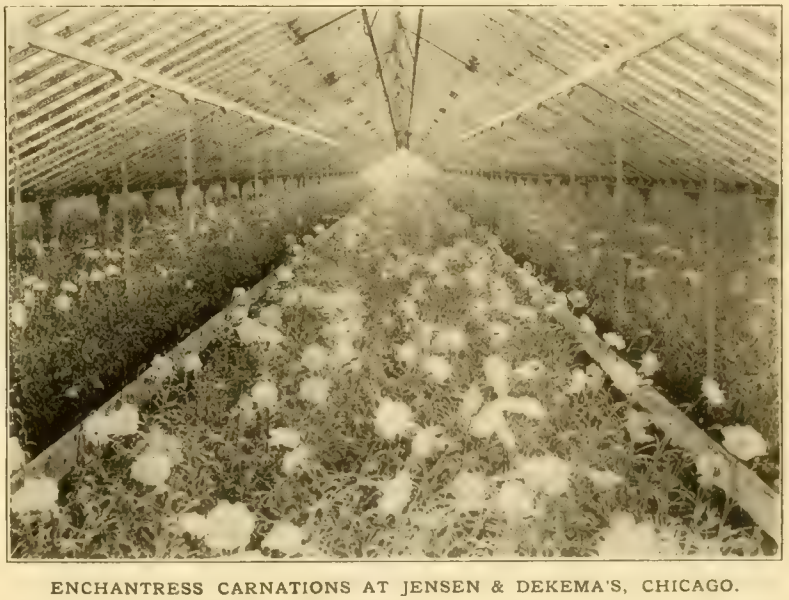
LILACS.

Of late years lily of the valley cultivation at Dersingham has given way to that of lilacs, of which M. Lemoine's fine varieties form the bulk of those grown. Of single flowered varieties there are about 50 of the best; and of double flowered about the same number of varieties. The mother plants are grown in the ground in lines by the sides of the walks, forming a magnificent display when in bloom. The whole of the saleable stock of these plants is grown as potted plants fit for forcing or for planting out.

The largest of these are in small tubs one foot and one and one-half feet in diameter, and in eight and 10-inch pots; the largest plants are furnished with from 25 to 35 shoots apiece, and strong, fat buds that are sure to throw four flower spikes on each shoot, giving a grand display when forced. All blind and weak shoots are carefully removed several times during the season of growth so that the strength of the plant is confined to the main shoots, hence the great size of the spikes and flowers, and the flowering shoots in general measure from one and a half to two feet in length, and are of great strength furnished with large, leathery leaves of a dark green tint, when the flowers are dark colored and of a lighter tint in white and pale colored varieties. It often occurs that triple terminal buds appear, and the center bud is removed by hand in July if nature has omitted to suppress it.

Many, and indeed most, of the older plants are worked on stems of seedling Syringa vulgaris, one and one-half to two feet in height. The second sizes of plants observed are standing in pots of eight to ten inches in diameter, and they are furnished with six to eight leads each, with one and one-half to two feet stems. It is of the greatest consequence that a lilac plant for forcing purposes should have the shoots well matured, and this can only be assured by full exposure to light and air, and with this intent the plants are plunged to three-quarters the depth of the pots, and are never top-dressed with either soil or manure, although during the season of growth manure water is occasionally afforded. They are stood at three feet apart in the lines, with two feet spaces between the lines, there being three lines in a bed; smaller plants on one foot to one and a quarter feet stems are placed at two feet and two and a half feet apart. These plants looked very promising for bloom, and were showing from five to seven shoots per plant. Their ages ranged from three to four years. In every case the plants, after having bloomed, have the last season's growth cut back to within three to four inches of the base.

With the exception of two beds of



ENCHANTRESS CARNATIONS AT JENSEN & DEKEMA'S, CHICAGO.

30 yards in length holding the largest plants, all the other portion of the stock stands on the soil, and thus secures perfect ripening, and there is complete control over the application of water, each plant getting what it needs, and that only. Continental cultivators invariably sink the pots deeply and mould them over, thus inducing roots to grow over the rim, which have to be removed on taking them out of the soil.

MINIATURE LILACS.

These beautiful objects for room decoration, for the dinner table, and general greenhouse display were noted in considerable numbers, growing in 5-inch pots, and reaching a height of only one and a half feet, possessing four, five and six shoots, each furnished with two or more flower buds. These plants are plunged in the soil up to the rim of the pot at nine inches apart.

There were several successions intended for flowering in succeeding years. The plants are never repotted. Miniature plants under ordinary conditions will keep in good bloom from three to five weeks.

Contrary to all practice, plants are taken from pots or the open ground, all the soil shaken from the roots, at once dipped into a thick mixture of cow manure and water, and potted forthwith. This is carried out in the month of July, and the plants are stood in the full sun without wilting or the loss of a leaf.

BUDDING OF STOCK.

This is an operation which is preferred by Mr. Jannoch, although at the start a year is lost as compared with the results obtained by grafting, but the ensuing growth is much stronger, as may be noticed in peaches, pears, etc., and at the first cutting back a strong break of shoots is secured, much more so than from grafted plants.

Budding is commenced in July and continued throughout August. The plants, according to the height at which the stocks are budded, form dwarf bushes, quarter, half and full standards and miniature plants.

REMARKS ON VARIETIES.

The best white lilac is considered to be Frau B. Dammann; it is single flowered, has very large spikes; Grand Duke Constantine has grayish blue flowers, and is one of the finest doubles; the color is that of the Marie Louise violet. Belonging to the same class are Madame Abel Chatenay, a very beautiful, white flower; Mad. Casimir Perier, a quite new variety, white, and excellent for forcing; Mad. Lemoine, white, a large spike; Michel Buchner, pale lilac, a dwarf growing plant; President Grevy, a very double, blue-tinted variety, with a long spike; President Carnot, large pale lilac spike, and free to flower; pyramidalis, large and dense spike of a fine mauve color; Alphonse Lavallee, with large spikes of blue shaded violet; and Charles Joly, a dark purple, one of the finest of the dark colored varieties. Those mentioned force well whether retarded or not, and are fine outdoor objects in the garden. Equally excellent in the same way are the following single-flowered varieties: Charles X., a strong grower, in several shades of lilac, and one of the best for forcing; Claude Lorraine, very large spikes of a deep lilac tint; Madame Francisque Morel; Marie Legraye, large white spikes, forcing well; Reaumur, carmine, flowers of satiny texture, spike very large; Rouge de Marly, reddish purple; Rouge de Trianon, very large spikes, the individual flowers large, and of a reddish blue color; Souvenir de Louis Spath, dark purple, flowers large, the finest of its color; Ville de Troyes, dark purple, a fine variety.

A few other items may be named of which good stocks were noted: Cyclamens, Begonia semperflorens in variety, Phyllocactus Deutsche Kaiserin, a beautiful variety having pink flowers freely produced, which last a long time in perfection; Malmaison carnations, asparagus in all the well known varieties and species; violets, both double and single flowered; hydrangeas in varieties, and numerous species of trees and shrubs for forcing, etc.

RETARDATION OF GROWTH BY COLD.

The action of continued cold upon plants is to keep in check, in actual suspension, the natural tendency of plants to grow at root and top in spring, and this suspension of the vital power may be prolonged from January to June, and probably for a much longer period. The application of the cold process is to a certain extent combined with a certain cost. By the cold process lily of the valley, lilac, various species of lilium, hydrangeas, Ghent and Mollis azaleas, Gueldres rose, prunus of species, Philadelphus hybridus Lemoinei, etc., may be kept till any period late in the year, and they will bloom just as well and as certainly as non-retarded plants; lily of the valley in about three weeks and lilacs in about the same time.

Etherization produces a change in plants that causes them to grow more quickly and open the flowers sooner when they are put into warmth. It is applied in autumn and winter to plants that have not had their usual length of rest. The inventor of the original process was Dr. Johannsen. Ether causes the sleep or repose to be far deeper, and according to the duration and density the more easy and rapid is their recovery. The effect of ether or chloroform vapor is supposed to be due to the drying up of the food juices in the stems and bases of the buds. Before a selected plant is put into the ether chamber, the soil, stems and foliage are thoroughly dried, so much as to be productive of a certain degree of withering. The ether is applied by being poured into a shallow vessel through a short length of pipe inserted in the center of the arched roof of the etherizing chamber, after the door has been hermetically closed; the fumes, being heavier than air, fall down among the plants standing on the floor. The ether is applied in most instances twice in 48 hours, a 12 hours' interval being afforded with the door open. Not all species of plants require two doses.—Gardeners' Chronicle, London, Eng.

Was Lincoln's Gardener.

Louis Klees of Kensington, Conn., celebrated his eighty-third birthday November 1. Gardeners are proverbially long lived but this one claims to have a grandfather alive in Germany 120 years of age. Louis Klees was born in Karlsruhe, where he learnt the rudiments of landscape gardening. After serving in the Prussian-Denmark war in 1849-50 he came to America, and by a recommendation from the German consul he obtained work in Central park, New York.

Various changes brought him at last to the position of landscape gardener to Abraham Lincoln at Springfield, Ill. He was the possessor of a reference written in Lincoln's own handwriting, but this he lost some years ago in a fire. In 1870 he was gardener at a school for girls at Farmington but left this and came to New Britain many years ago. He is now with his sons on their farm in Kensington, where he grows truck for this city. Although so advanced in years he writes a plain hand and does not need glasses.

CHRYSANTHEMUM IVORY AT PATRICK MAIER'S, ALLEGHENY, PA.

Mr. Maier and daughter in foreground.

ELMIRA, N. Y.—Louis Soldan, who opened a store here just before Christmas, found business unprofitable, so sold out and quit.

MARKET GARDENS.

Prices of Indoor Vegetables.

The prices of indoor vegetables at leading points January 12 were as follows: Chicago, cucumbers, Illinois fancy, $2 per two dozen; No. 1, $1.50 per dozen; No. 2, 75 cents to $1 per dozen; radishes, 15 cents to 50 cents per dozen bunches; mushrooms, No. 1, 50 cents per pound; No. 2, 25 cents per pound. Buffalo, cucumbers, $1 to $2 per dozen; mushrooms, 50 cents to 60 cents per pound. St. Louis, cucumbers, $1.75 to $2 per dozen. Cleveland, cucumbers, $16 to $17 per box; mushrooms, 50 cents to 60 cents per pound. Boston, cucumbers, $10 to $14 per box. Kansas City, cucumbers, $1.50 per dozen. Cincinnati, cucumbers, $2 to $2.50 per dozen; mushrooms, 40 cents to 50 cents per pound.

ESTABLISHMENT OF PATRICK MAIER, ALLEGHENY, PA.

Heating Tomato Houses.

ED. AMERICAN FLORIST:—

Please let me know how the following pipe will answer for four houses running north and south, each 23x100 feet, 11-foot ridge and 4-foot wall? One 3½-inch flow and six 1½-inch returns in three of the houses and two 2-inch flows and six 1½-inch returns for the other. There is a large saddle boiler and 100 feet of 4-inch main pipe. The returns are to enter a 4-inch return to boiler, which is guaranteed to carry 3,000 feet of 4-inch pipe. The houses are to be used principally for tomatoes, on the ground.

G. J. B.

The amount of pipe proposed would probably be sufficient in ordinary winter weather to keep up a temperature of 50° or thereabouts, but as you have plenty of boiler power an extra few runs of pipe would be an advantage in exceptionally cold weather. This at least will prevent the necessity of overheating the pipes, never advisable except for applying sulphur or in some exceptional circumstances.

G.

Soot As a Fertilizer.

ED. AMERICAN FLORIST:—

We have noticed several times in THE AMERICAN FLORIST that soot is a good fertilizer, and would like to get a little more information on the matter. Is it good for feeding carnations and roses? How much could be safely used on a bench of 100 square feet, and how often? Is it good alone, or with some other fertilizer and if the latter what should be used?

S. H. S. Co.

Soot is an excellent fertilizer for almost every class of plant and is especially useful for imparting tone and deep color to the foliage. Besides the manurial value it possesses soot is an excellent fungicide and may be used on the carnations and rose benches at the rate of one pound to two square yards, two or three times during the growing season. It may be used either alone or in connection with other fertilizers and is rich in ammonia but deficient in some other ingredients. A favorite and excellent way of using soot is to place a bag full in a large tub or tank of water and allow it to steep for a couple of weeks, stirring it round occasionally. Let it settle for a few days and then either syphon or dip off the upper or clear portion which will be quite dark in color. Dilute this to the color of pale beer for watering strong growing plants but for weaker rooters or for syringing roses or chrysanthemums overhead dilute it still more. Blood manure and soot is an excellent fertilizer for pot plants. Always keep soot for a few months before using it in a dry form, for if used directly from flues or chimneys it may burn the roots or leaves. The burnt-out matter from boiler flues sometimes called soot is absolutely useless as a fertilizer. G.

Woodlice in Mushroom Bed.

ED. AMERICAN FLORIST:—

I have a mushroom bed that is just beginning to bear and am bothered with woodlice eating small patches out of the buttons. Kindly advise a remedy and how to apply. G. J. S.

Lay pieces of old boards on the beds and examine them every morning. The insects will be found underneath the boards. The greatest care is necessary in mushroom houses to keep away all kinds of litter and anything that these insects can hide in. As the bed is in bearing you cannot disturb the sides of it and the insects are so fond of the mushrooms that they will eat nothing else. Still you may try poisoning them with Paris green and sugar or flour. Make this pretty strong and lay it in small heaps about the bed, especially around the edges. G.

IRONDEQUOIT, N. Y.—Edw. Brockmann, the well known carnation grower, reports business better with him than ever. He cut 1800 blooms for Christmas, and the plants are now producing heavily, the blooms being disposed of in Rochester at a fair price. He is building a new greenhouse, 20 x 100 feet, for bedding stock. Another house, 30 x 200 feet, will probably be added in the spring.

BULB HOUSES OF PATRICK MAIER, ALLEGHENY, PA.

The Coming Philadelphia Convention.

The Florists' Club of Philadelphia is taking hold of the convention problem with characteristic enthusiasm, and even at this early date steps are being taken that will insure the success of the great gathering that is expected next August. A finance committee was appointed at the last meeting of the club and this committee held its first meeting January 8 in the club room, at which time representatives of the various departments of the trade were present to the number of about 25.

Among them were prominent men from the growers, the wholesale cut flower trade, the dealers in florists' supplies, and the seedsmen. The meeting was called to order by President S. S. Pennock, of the local club, and at once proceeded to organize by electing Chas. D. Ball as chairman of the committee, and Edwin Lonsdale and J. W. Colflesh as secretary and treasurer respectively.

The city and surroundings are being divided into districts, and sub-committees will be appointed to canvass these various districts in order to provide the necessary cash to thoroughly and properly sustain Philadelphia's well-earned reputation for hospitality. An optimistic atmosphere was distinctly felt throughout the meeting; the discussions were free, and the spirit harmonious, the members being impressed with the idea that as the trade generally is in a flourishing condition there will be no difficulty in raising any required sum.

The meeting adjourned to meet January 15, at the same place, when the sub-committees will probably be assigned to their respective sections, and further detail work of the committee arranged.

T.

Society of Southern Florists,

At a very enthusiastic meeting of the New Orleans members who have the convention for 1907 in charge the dates of the first annual convention were fixed for February 14, 15 and 16, immediately after Mardi Gras, which annually attracts thousands from all over the country. First, pleasure, a whole week of it day and night; and then business. Could the New Orleans florists hold out better inducements to make the first convention a memorable success?

First Vice-President C. W. Eichling knows how to handle an undertaking of this kind. His first lieutenant, R. Lockerbie, appointed his committees and with such men as Steckler, Newsham, Papworth, Chopin, Laponyade, Menard, Paul and Otto Abele, and a number of other good ones, all workers with years' of experience in exhibition work, there should be no doubt of a grand meeting.

Florists all over the south and north should make up their minds now and arrange their business in time to attend the convention. Ample preparations will be made for accommodation if visitors will in time notify the committee on ways and means, of which Jos. Steckler is chairman. The whole programme and details will soon be ready and nothing will be left undone to make the visiting florists feel like coming again.

The trade exhibition will be very extensive, judging from applications for space already received. There will be florists' supplies of all descriptions, baskets, ribbons, greenhouse material and boilers, pots, plain and artistic, plants of all kinds for which the south has always been a valuable outlet. The subjects for discussion will be carefully selected and will be of vital interest to all southern florists. The flower loving public of New Orleans will take an active part in entertaining the visitors, and it is certain that this first convention will be the beginning of new life and concentrated activity in the florists' business.

Illinois State Florists' Association.

A committee of this association, consisting of J. F. Ammann, A. T. Hey, of Springfield, and Prof. A. C. Beal, of Urbana, was in attendance at the meeting of the Board of Agriculture on January 7 and 8, and succeeded with the assistance of Mr. O'Dwyer, superintendent of floriculture at the state fair, in getting an increase in the appropriation for premiums for floriculture at the state fair from $1,500 to $2,500. Each of the above named members of the committee made a few remarks before the board. Prof. Beal showed statistics on a chart giving an approximate estimate on the vast amount of glass area, etc., throughout the state used for the growing of flowers. Mr. Hey urged a more liberal amount in premiums and a general revision of the premium list. Mr. Ammann dwelt upon the necessity of a new building for exhibiting flowers and plants and practical assistance in managing this department. A great many members of this board seem favorably inclined to advance floriculture at the fair, and it is the opinion of this committee that with a little well organized work on their part, floriculturists can accomplish a great deal, but we must keep at it. The committee later met, with Mr. O'Dwyer, and drew up a skeleton premium list, from which Mr. O'Dwyer will have preliminary lists printed and sent out in the near future, giving all plenty of time to grow stock for the greatest state fair flower show ever held.

Newport Horticultural Society.

At a meeting of the Newport, R. I., Horticultural Society held January 8 work was begun in preparation for the exhibitions during the year. Last year and the year before there were only two large exhibitions held by the society, one each year, and these were held late in the autumn. This departure was mainly due to the feeling that if only one large exhibition were held and that at a place frequented by the four hundred more interest would be manifested in the exhibitions and the work of the society would be the more appreciated; but results did not justify expectations, therefore it has been decided this year to go back to the old way of doing things which in the main was very satisfactory.

The first exhibition will be held at the time most suitable for the best display of roses, of which there are a great many grown here and there are also purchased by many who have collections, all the new varieties as fast as they are introduced. Although roses will be prominently provided for in the schedule of premiums for this show, other things will also be well recognized. The second and principal exhibition will be held early in September, when dahlias will be a feature again, but not to any absorbing degree. Provision will be made for groups of foliage plants, specimen plants, cut flowers of all kinds and fruit and vegetables, as well as medals and premiums for new things of merit from any source whatsoever.

Over $1,000 will be awarded in premiums. The expenses of the exhibitions will, it is hoped, be met by the proceeds from the sale of tickets and other sources of income. The price of tickets will be reduced from 50 cents to 25 cents. Music and dancing will enliven the last evening of both shows.

M.

Gardeners' and Florists' Club of Boston.

The officers of the Gardeners' and Florists' Club of Boston are to be congratulated on the remarkable growth of their association. The club has made a net gain over all losses of 250 members since January, 1905. The landscape gardening feature is especially good. Some of the leading florists are taking the course, which covers 40 lessons and costs $8.

Boston.

PRICES HIGH.

A lively social season has been the chief source of business the past week. The legion of deceased increases at this season of the year, and in consequence funeral work has been constantly required. Notwithstanding that the good weather has greatly facilitated supplying the market, which is yet far from being overloaded, prices have been maintained to a surprising degree. An excellent variety of good roses is at present on the market, but at what the buyers consider very high prices, as for less than $2 to $3 per dozen there is nothing attractive. There is a scarcity of medium quality roses which are most useful in work of second grade of which every retailer has a certain amount. There is only a fair demand for American Beauty, and the stock is very good, but the call seems to be for other varieties, such as Richmond, Killarney and Bridesmaid, all of which are excellent, the latter being shown to better advantage than heretofore this winter. Mme. Chatenay and Wellesley have hardly recovered from the heavy inroads made in the crop at Christmas. Carnations are abundant and sell at high figures, the demand and stock being only average. Violets, lily of the valley, orchids and gardenias are rapidly gaining the position of being a necessity to a first class stock. Never has the sale of the latter two been so steady and gardenias are found constantly on hand among the wholesalers who formerly lacked the courage to carry them.

NOTES.

The most prominent affair socially of the season was the Thomas ball, December 11, at the Hotel Somerset. Pink roses and Asparagus plumosus

were principally used, monstrous medallions of Bridesmaid adjoining the balconies and walls, and these with asparagus tastefully displayed formed a simple but unique decoration. Thomas F. Galvin was the decorator in charge.

The Henry M. Robinson Co. is developing rapidly a genuine wholesale flower trade, which along with its already established supply business makes its establishment one of the busiest in the city. The firm is at present handling an excellent stock of gardenias which are now indispensable to first class retailers.

The salesmen who traverse the Back Bay district daily report their business in that section as wonderfully increased even over last year's. There is no question but that this will soon be the center of the high class flower business in Boston.

The Waban Rose Conservatories are cutting an admirable stock of Bridesmaid roses, far superior to anything seen this winter of this variety, which with its companion, Bride, are invaluable. B.

St. Louis.

THE MARKET DULL.

This week has been very dull, in fact there has been nothing doing. Violets were very plentiful in the early part of the week, but became scarce Saturday owing to dark and cloudy weather. Carnations were also plentiful. Roses remain scarce and are very much in demand, especially long-stemmed American Beauty. Already in the down town districts can be seen the signs such as the street men used to exhibit, "Carnations 15 cents per dozen," "Violets 10 cents per bunch." These signs are going west around the vicinity of Thirteenth and Oliver streets. There are signs offering violets at 10 cents, near the wholesale district and the wholesalers are trying their best to get 40 cents per 100 for violets and $2 per 100 for carnations. Jonquils are coming in. Sweet peas are improving. Cannas are selling well. Quite a few narcissi were left over.

NOTES.

The marriage of Alice Ellison and Harry J. Wardy, of Chicago, was celebrated January 8, at the residence of the bride's parents, William Ellison and wife, 4511 Olive street. Religious services were held by the Rev. Bitting, of the Second Baptist church. Harry Ellison, the bride's brother, was best man and Miss L. H. Smith and Miss Ora Bell attended the bride. Master Young Helvig, a cousin of the bride, acted as ring bearer and Miss Mildred Brooks as flower girl. The bride and groom left for the east.

It is by no means certain that the Florists' Club will hold a flower show in 1907. Unless the $10,000 guarantee fund is complete at the next club meeting the project will be abandoned. It is rumored, however, that the St. Louis Horticultural Society will take hold of it and the liberal patronage at its command will provide a show worthy of the city.

The Riessen Floral Co. had its hands full last week. Mrs. Buechel stated that she had not yet experienced any dullness in trade. The firm's windows are elaborately decorated with cut flowers of every description.

BASKET OF AZALEA AND ADIANTUM FARLEYENSE.
By Samuel Murray, Kansas City, Mo.

The Florists' Club held its monthly meeting at the Burlington building, January 10, with Prof. Irish in the chair. About 35 members were present. Among the visitors was Swan Peterson, Gibson City, Ill.

Geo. Angermueller could have disposed of several thousand roses during the past week. He had to turn down orders owing to the scarcity. Everything of fancy grade sold at sight.

Early January 12 a fire broke out in the building occupied by C. A. Kuehn's cut flower and wire department. About $500 damage was done on the second floor in the wire department.

Wm. Winter said that the dark cloudy weather had caused his violet crop to be very short. Mr. Winter is the largest grower in Kirkwood. W. F.

Kansas City.

WHOLESALE BUSINESS QUIET.

The week just passed has been one of most peculiar climatic conditions. During that time we have been subject to a varied assortment of weather, the temperature ranging all the way from zero to that of regular summer weather. Stock, with the exception of roses, does not show the effects of the prevailing conditions. The dark days have served to put American Beauty almost out of the question. The limited quantity that does reach the market is practically unfit for sale. Bride and Bridesmaid are considered very satisfactory under the circumstances. Good prices are commanded for stock of this class. Carnations are in good supply and prices keep up pretty well. Enchantress, Harlowarden, Lady Bountiful and other good varieties bring from $6 to $8 per 100. In the wholesale department, trade is not so brisk as compared with other seasons. However no word of complaint is heard, and all seem to express the same satisfactory showing in average of the season's business. The decorators report much work for the social element. Many affairs are in progress incident to the short season before Lent.

NOTES.

Geo. Kessler, landscape architect for the Kansas City park board, left this week for Syracuse, N. Y., to direct the work on the park and boulevard system in that city. Most of the plans will be carried out in Mr. Kessler's office here.

Sam. Murray was busy last week with several large decorations for the implement dealers. The show rooms of the Parlin Orrendorf Co. are always regarded as the prettiest in town after Sam. is through with them.

The William L. Rock Flower Co. had decorations for several of the large implement houses last week. Mr. Rock has some nice orders tucked away for receptions, dinners and other fashionable events soon to occur.

Work is progressing nicely on the new greenhouses near Armour and Main streets. Judging by appearances Ed. is going at the proposition in the proper manner.

Warren Spain, of Lee's Summit, Mo.,

was a caller last week. Mr. Spain said he experienced much difficulty in obtaining sufficient stock for the Christmas trade.

The high quality of rose stock with Geo. M. Kellogg is remarkable, in spite of the fact that the sun has been almost obscure for the past few weeks.

Max. Eller may be seen hustling around every morning. A good indication that Max. is doing something at Twelfth and Main streets.

Fred Fromhold spent several days hunting last week. Of course Fred landed some game; the exact amount we refuse to divulge.

The R. S. Brown Co. reports a big sale on ferns for dishes. Practically all the fern dishes in the city are filled at Brown's.

R. S. Brown is able to make an occasional visit to his place. He is reported much better than last noted.

Don't forget the regular monthly meeting of the Missouri Valley Horticultural Society.

Mrs. J. M. Gasser, of Cleveland, O., is the guest of her nephew, W. L. Rock.

Miss Moseley says trade in Kansas City, Kas., is far ahead of last year's.

The Alpha Floral Co. had a large sale Saturday on cheap carnations.

Charley Thomas has left the employ of Miss Dalley. K. C.

Baltimore

MANY FUNERAL ORDERS.

With one or two intermittent cold snaps of a day or two each we have had for several weeks abnormally warm weather, with frequent and copious rains. There is no frost in the ground, the grass in many places is as green as though it were April, the buds of trees and shrubs are swelling, and it looks all around as though spring were coming right away. This may be an illusion which will quickly fade as some sudden blizzard knocks us out of our dream of a tropical winter and runs the mercury down from about 78° to 18° or less, as has happened in former years. The mortality lists are unusually long and the prevalence of pneumonia and other lung and bronchial troubles is attributed by the physicians to the soft and unseasonable weather. As a result, funerals are numerous and the demand for suitable flowers for these ceremonies keeps the stores busy and maintains a well distributed trade. But this is the time, too, for festivities and there is a fair inquiry for all the better and varied sorts which are used on such occasions. Good roses and carnations are not over abundant, and violets seem to have lost the place in popular esteem which was long their distinction. The great mass of short-stemmed, pale flowers which are thrown upon the market fail, very often, to find buyers at any price.

NOTES.

James Hamilton, Mount Washington, has added to his already extensive range, two new houses, each 29 x 100 feet, to be devoted to carnations. Almost all of the lumber except the bars was cut and worked in his own woods. The ridge-poles, purlins, plates, sills, etc., and even the ventilating sash were made of cedar cut and sawed on the spot. The walls are of concrete, made of cinders and cement, which are pointed up and given a wash of rich cement and sand, giving a good finish and excluding water. W. Hamilton grows roses, carnations, and chrysanthemums, his shipments of the last-named being very heavy in the season of 1906.

Invitations are out for the marriage on January 24 of John J. Perry, long manager of the Florists' Exchange, and Miss Effie Lillian Shipley, who for several years has been bookkeeper at the same establishment. The contracting parties are well and favorably known to the entire trade, and they will have the best wishes for happiness and prosperity of all who know them. After February 3 the happy couple will be at home at 1836 West Fayette street in this city.

Carroll B. Hoffman has bought the greenhouse property of B. R. Clark, adjacent to his own at West Arlington and will carry on business at both places, making a specialty of carnations, callas, greens, etc.

John Cook's windows are daily filled with huge displays of highly colored, long stemmed violets that seem to embody the fragrance and brightness of spring. S. B.

Toronto.

TRADE QUIET.

Business is only of the usual class for this season of the year as prices are in most cases too high to entice possible patrons. The lack of sunshine has been responsible for the shortage of bloom and even bulbous stock and flowering plants are not as plentiful as usual. Roses continue to be the most prominent of the staples. American Beauty and Richmond are scarce and the other varieties of roses are only in medium supply. Carnations are becoming more plentiful and some very good ones are on the market. Violets are more in evidence than they have been all season. Considerable enthusiasm exists locally over the coming convention of the American Carnation Society and the promised exhibits and members should make this one of the most successful meetings yet held.

H. G. Dellemuth has severed his connection with J. H. Dunlop and is now conducting the store formerly owned by Wm. Jay & Son, 438 Spadina avenue, having purchased the stock and good will.

In the death of Captain McMasters we have lost an enthusiastic friend and co-worker, who was always prominent in horticultural pursuits.

Good single violets are being cut by Carleton and Marks, of Lambton Mills.

Wm. Mackay is cutting Lilium Harrissii, which is very acceptable.

H. G. D.

Washington.

FLORISTS' CLUB PRIZE LIST.

The following is the list of prizes offered by the Washington Florists' Club at its spring exhibition, to be held in conjunction with that of the American Rose Society in this city, March 13, 14 and 15.

PLANTS.

Indian azaleas.—Six distinct named varieties, $12, $7, $5.

Palms.—Pair in pots or tubs, $12, $7, $5.

Ericas.—Six, not less than three species, P. Henderson & Co. prizes, $5, $3, $2.

Orchids.—Three plants, S. C. Briggs prizes, $8, $5, $2.

Hard-wooded greenhouse plants.—Two or more in bloom, azaleas excluded, $7, $3, $1.

Acacias.—Specimen plant, $7, $3, $1.

Hardy primroses and polyanthuses.—Twelve plants, distinct varieties, $4, $2, $1.

Cyclamens.—Ten plants in not over 7-inch pots, $10, $5, $3; single plant, $5, $4, $3.

Cinerarias.—Six varieties, $10, $5, $3; specimen plant, $3, $2, $1.

C. stellata.—Six plants, $10, $5, $3; specimen plant, $3, $2, $1.

Hyacinths.—Twelve named varieties in pots, one in a pot, $8, $5, $2; six named varieties in pots, one in each pot, $4, $3, $1; three pans not to exceed 12 inches, 10 bulbs of each variety in each pan, $8, $5, $2; single pan, not to exceed 12 inches, 10 bulbs of one variety, $4, $3, $2.

Tulips.—Six 8-inch pans, nine bulbs of one variety in each, $4, $3, $2; three 8-inch pans, nine bulbs of one variety in each pan, $3, $2, $1; three 10-inch pans, 12 bulbs of one variety in each pan, Henry F. Michell Co. prizes, $4, $3, $1.

Polyanthus narcissus.—Four 8-inch pots, five bulbs in each pot, distinct varieties, $4, $3, $2.

Jonquils.—Six pots or pans not exceeding eight inches, the number of bulbs in each left to the exhibitor, $3, $2, $1.

Narcissus.—Six 8-inch pots or pans, distinct varieties, single or double, $8, $4, $2; three 8-inch pots or pans, $3, $2, $1.

Lily of the valley.—Six pots or pans not exceeding eight inches, Henry F. Michell Co. prizes, $3, $2, $1.

Crocus.—Three 10-inch pans, three distinct varieties, $3, $2, $1.

Ixias.—Six pots or pans, distinct varieties, $3, $2, $1.

Roman hyacinths.—Six 8-inch pans, 10 bulbs in a pan, Henry F. Michell Co. prizes, $3, $2, $1.

Amaryllis.—Six pots, distinct varieties, $8, $4, $2.

Collection of herbaceous spireas, not less than three varieties, $8, $4, $2.

Display of Easter plants, bulbous plants, Easter lilies and cyclamens excluded, $20, $10, $5.

Fern.—Any variety that has been growing in a dwelling for at least four months previous to exhibition, open to amateurs only, John Clark prizes, $5, $3, $2.

Rubber plant that has been growing in a dwelling for at least four months, open to amateurs only, Peter Bisset prizes, $5, $3, $2.

Geranium grown in a dwelling for four months, Geo. Field prizes, $5, $3, $2.

General display of spring bulbous plants, all classes, $20, $10, $5.

Lilacs.—Six specimen plants, distinct named varieties, $8, $4, $2.

Hydrangeas, Hortensia section.—Three distinct varieties, $8, $4, $2.

CUT FLOWERS.

Carnations.—Vase of 100 cut blooms of one variety with foliage, Washington Florists' Club prizes, $6, $4, $2; 25 blooms any named crimson, $4, $2, $1; 25 blooms any dark pink, Mrs. Lawson or darker, $4, $2, $1; 25 blooms of any light pink variety lighter than Mrs. Lawson, $4, $2, $1; 25 blooms of any named scarlet, Geo. H. Brown prizes, $4, $2, $1; 25 blooms of any named white variety, $4, $2, $1; 25 blooms of any named yellow variegated variety, $4, $2, $1; 25 blooms of any named white variegated variety, $4, $2, $1.

Pansies.—48 cut blooms, not less than 24 varieties, shown in flat dishes, $3, $2, $1.

Violets.—Bunch of 100 blooms Lady Hume Campbell, $3, $2, $1; bunch of 100 blooms of any other double variety, $3, $2, $1; bunch of 100 blooms Princess of Wales, Chas. McCauley prizes, $3, $2, $1.

Orchids.—Display of not less than six genera and 15 named species or varieties, filling not less than 20 bottles.

SPECIAL PRIZES.

Best hybrid geranium, Mrs. S. C. Briggs prizes, $5, $3, $2.

Best seedling carnation, six or more blooms shown for the first time, Mrs. S. C. Briggs prizes, $5, $3, $2.

Best seedling rose, six or more blooms shown for the first time, Mrs. S. C. Briggs prizes, $5, $3, $2.

C. McCAULEY, Sec'y.

Buffalo.

BUSINESS SLOW.

Continued April weather has made trade rather poor. Funeral work was about all that kept the florists alive. Roses are showing the effects of the continued dark weather. Carnations are good. The pink primrose is a winner and having a large sale.

CLUB MEETING.

There was a very good meeting of the Florists' Club on January 9. Considerable business was transacted and two new members were elected. It was also decided to have the usual carnation exhibition in February as in previous years. A committee consisting of Wm. Scott, W. F. Kasting and A. Adams was appointed to make all arrangements for the exhibition and the usual banquet. There is every prospect of a good crowd going to Toronto. Wm. Scott and Wm. F. Kasting spoke about what was going to be done and the good display that was expected and its close proximity made it more of an inducement for the people of this city to go.

NOTES.

The agitation in Boston as to the stores being compelled to close on Sundays is applicable to nearly every other city. The time has passed when the florist has to wait for flowers to open. In some of our most progressive cities the florists are not allowed to open any more than any other store. As to church orders Sunday observance should apply there first. On the other hand if the stores are compelled to close the man with a small greenhouse in a city should be closed also, as the excuse that a man must be there to take care of fires and ventilation does not necessarily mean two other clerks and an errand boy to run the front part of the greenhouse that is fitted up for a store. The florists are not the only ones open on Sundays that should be closed. There are many others that are not any more necessary, but simply open because the laws are not enforced. Any business that has as good a reputation as the flower business should be one of the first to want the stores closed on Sunday. If all are closed no one is a loser, for what cannot be got on Sunday will be purchased on Monday.

S. A. Anderson and wife have gone for a little vacation to Washington and nearby towns. Mr. Anderson has some fine Proserpine tulips.

BISON.

Cleveland.

DEMAND SMALL.

The soft warm weather of the past week had a bad effect on the market and, with a decided falling off in funeral work, stock soon commenced to accumulate. Some of this had to be moved at reduced prices. Roses were about the only stock that retained former prices, as the cut is still short of the demand in this line. American Beauty, also violets suffered along with other stock, as there seemed to be no rush for any particular grade of flowers.

NOTES.

Mr. Smith, of Smith & Fetters, will take an extended trip, either to Europe or Cuba, having stated that he found it impossible to continue business without a rest. Ed. Fetters, a former member of the firm, will resume active business during Mr. Smith's absence.

A visit to the greenhouses of the J. M. Gasser Co. found everything improving, more especially the roses, for which great credit is due Mr. Bloythies, the new manager of the plant.

Mr. Wosko, of Eddy road, has four houses of Prince of Wales violets that give great promise of a heavy cut this spring.

At J. W. Wilson's place stock is all up in nice shape, two houses of adiantum looking very fine.

OHIO.

Pittsburg.

STOCK PLENTIFUL.

Since the last report roses have shortened in supply and carnations have increased. The same prices prevail on American Beauty and other roses but quite a slash was cut in carnation prices. Sweet peas are now plentiful as is lily of the valley. There is the usual over abundance of Roman hyacinths and Paper White narcissi. Tulips and lilies sell on sight if good. Daffodills have made their appearance; green goods are quite plentiful. The price of violets tumbled quite perceptibly during the week.

NOTES.

George Huscroft, Steubenville, O., says he has made some great bulb sales lately. When one considers that every florist in western Pennsylvania, Ohio and West Virginia is personally known to him it is no wonder.

Randolph & McClements are taking advantage of the long American Beauty market and are using great quantities of this rose in their decorations.

Mrs. Elliker, Homestead, had the misfortune to be quarantined at her home for a few days; her daughter, Ida, was in charge during her absence.

There has been quite an activity in ribbon circles; nearly all the eastern houses have had their agents here for the past 10 days.

Ernest Seiger has been laid up for several days, and says he is just getting his rest after the Christmas rush.

T. P. McCormick is no longer with The Florists' Exchange.

J.

New Orleans

WEATHER IS SPRINGLIKE.

Judging from the present outlook we will have no winter at all in our city. The delightful spring weather we are having now causes our gardens to look beautiful for this season of the year. Pansies, phlox, sweet alyssum, petunias and, in fact, all our spring annuals are now in full bloom. Our northern visitors, here for Mardi Gras, will certainly say this is the garden spot of the country.

NOTES.

The first convention of the southern florists will be a success from the start, the attendance will be very large and the space alloted for exhibits is all taken and conditions show that the exhibits of plants, flowers, etc., will be one of the finest given in the south. Joseph Steckler and C. W. Eichling are doing all in their power to make things comfortable for our visiting friends.

The Joseph Steckler Seed Co., Ltd., has moved into its new store and now has the largest and finest seed and supply house in the south.

F. Zeigler & O. Werner have dissolved partnership and F. Zeigler will continue the business on the Valdejo nurseries.

H. A. Despommier is busy in St. James making a 10-acre park for J. Lebermuth, the millionaire planter.

James Newsham is kept quite busy shipping roses and palms all over the country.

Frank Brocker, chief gardener of the city park, has the finest pansies in the city.

D.

Nashville.

LARGE FUNERAL ORDERS.

The trade in this city is in a flourishing condition and enlargements of the stores seems to be the order. Some of the finest and most handsome floral designs ever seen here were made for the funerals of Wm. Herman, a prominent and wealthy wholesale merchant, and L. L. Terry, an old citizen, long connected with the Nashville post office and held in high esteem. These were held on one day and other funerals kept the retailers busy and consumed the stock as fast as it appeared. Flowers have been abundant, the fine weather bringing everything out in profusion.

NOTES.

Joy & Son made some very novel and beautiful designs for Mr. Herman's funeral. A large floral pall was made entirely of violets and lily of the valley, more than 5,000 violets being used. Two urns were unique and very beautiful. One was made of galax leaves and filled with superb specimens of American Beauty roses. The other was made of Lawson carnations and filled with Bride roses of fine quality. Many smaller designs were furnished in the greatest profusion. This firm also made a pall of white roses, carnations and lilies for the funeral of Samuel C. Waggoner. This firm has very commodious quarters in their new store which is immediately opposite the one formerly occupied on Church street, and have besides a cellar of generous proportions.

Geny Bros. were equally busy with the funerals of the above, furnishing to the Herman funeral some handsome bay trees which were placed at the vault, and numerous smaller designs, one of the handsomest being a heart of large double violets. They also made for the Terry funeral a handsome pall, ordered by the post office officials, composed of roses, Roman hyacinths and Easter lilies. This firm is cutting fine Richmond roses, Robert Craig and Enchantress carnations, and are selling fine potted azaleas. They have divided their store heretofore with a tailoring establishment but the latter has had to move out and give them the whole space.

Miss Eda Birn has fitted up her new store at 107 Eighth avenue, N., in a most attractive manner and seems to be in a position to do good business. With C. A. Birn just around the corner on Broad street and the new store of I. H. McBride it makes a new floral centre which ought to bring trade.

The last mentioned is an entirely new

establishment, though Mr. McBride has had greenhouses on a limited scale for some time. He has ferns, palms, bedding and pot plants and will buy his cut flowers. He is located at 809 Broadway, and has been doing business for about one month and reports very gratifying success.

D.

Louisville.

TRADE VERY DULL.

Business the previous week was the worst experienced for a long while and consequently stock was a glut on the market, especially roses and carnations. The weather, being very warm, helped to bring the stock out faster than was necessary to meet the demand. Roses are fair in quality and the supply good. They have had a fair demand compared with other stock. Carnations have been very plentiful and the demand has been very slow; the quality is excellent. Violets have been a glut on the market. Lily of the valley sells well and the supply is about equal to all demands. Bulbous stock has been very plentiful, and had a great deal to do with forming the glut of other stock.

SOCIETY MEETING.

The regular monthly meeting of the Kentucky Society of Florists was held at Joseph Wettle's residence with a very large attendance. A good time prevailed as is always the case when we meet here. It was decided to hold the annual carnation exhibition in February. This is always a great event and it is hoped to see all the new varieties represented.

F. L. S.

Minneapolis.

GOOD AVERAGE TRADE.

Business is back again to normal conditions and prices have dropped from their holiday perch. New Year's saw the merchants well cleaned out, for what was left over from Christmas, went easily a week later. Stock is improving, roses being stronger and in better shape than they have been for some time. Carnations are fine, large and very plentiful. Violets are large and in very good color. Lily of the valley is good. Tulips are in, a little short, but excellent for designs. Greens are in good condition, about equal to the demand. Several very important social events have been engaging the attention of the trade.

NOTES.

Rice Bros. report a splendid business during the holidays, with less falling off now, than was expected.

Ralph Latham reports a business much too large for his quarters.

G. H.

Indianapolis.

The annual meeting of the State Florists' Association was held January 8 and was well attended. The meeting was an interesting one and the little dinner following seemed to have the approval of all. Final action was taken on rules and scales, which shall henceforth regulate the judging of flowers and plants exhibited at the meetings and shows. As the rules are very strict and three most able men were elected judges, it is safe to say, that awards secured from this society will stand for highest excellence. Anything scoring 95 points or better will receive a silver medal and certificates of merit will be awarded for flowers and plants scoring 85 points. Those seeking awards, offered by this society for carnations and roses, will have to exhibit at three meetings or shows and on one occasion the cut flowers will have to be accompanied by a growing plant. Further details, regarding this, can be had by addressing the secretary, A. Baur, of Baur & Smith, Indianapolis, for a copy of "florists schedule." The chair appointed the following committees to wind up the business of 1906: J. Haugh, F. Huckriede and F. Harritt, for auditing committee; H. W. Rieman, C. Sonnenschmidt and R. Hyite, temporary judges; F. Lemon, C. Knopf and H. Junge to prepare an amendment to the constitution.

The following officers were elected for 1907: H. Junge, president; C. Knopf, first vice-president; F. Huckriede, second vice-president; A. Baur, secretary; H. W. Reiman, Carl Sonnenschmidt and J. Hatfield, judges.

The Late James Braik.

See obituary.

Carnations were shown as follows:

F. R. Pierson Co., Tarrytown, N. Y.—Winsor, which arrived in poor condition.

E. G. Hill Co., Richmond, Ind.—No. 69, pink; No. 58, light pink; St. Nicholas, scarlet, scored 85 points.

Stuart & Haugh, Anderson, Ind.—A fine vase of Lawson, Enchantress, Lady Bountiful and Cardinal.

Weber & Sons Co., Oakland, Md.—Maple, dark pink, scored 85 points.

John E. Haines, Bethlehem, Pa.—Imperial, fancy variety; Pink Imperial, scored 86 points. This variety is a shade deeper than Lawson.

The E. G. Hill Co. also showed a vase of seedlings among which were several good scarlets, No. 128 being especially noticeable. The firm's new rose, Rhea Reid, received a great deal of attention, scoring 90 points. The color is a peculiar, pleasing shade of red, the bud finely shaped, foliage and stem all one could wish for and fragrance superior to that of American Beauty.

B. K. & B. Co., Richmond, Ind.—Sarah Hill, white, scored 87 points; Superior scored 85 points. This variety is best described as an Enchantress with Lawson color; it was much admired by many.

Visitors: F. Lemon, C. Knopf, W. W. Coles, J. Haugh and R. Hyat.

J.

San Francisco.

WINTRY WEATHER.

Snow, the real genuine article, is something we don't run across every winter, but that is just what has struck us here on the hills surrounding San Francisco the last few days, and it is still lying. The wind from the east, warm as a rule, has turned icy cold and growers had to be very careful with their ventilating apparatus. Of course in San Francisco it is rain pure and simple, about 12 inches to date and plenty more to come, by the look of the sky. This kind of weather helps to keep the supply of cut flowers of all kinds down and the prices up. The prices on all flowers are not exactly what they were at Christmas but nevertheless profitable. Since my last writing I have discovered eight more Japanese flower stands, making 12 in all. These are not regular flower stores, but mixed goods are also sold. It looks curious enough to see a vase of fine Enchantress carnations or Bridesmaid roses amongst a lot of bric-a-brac, cups and saucers, dolls, happy Hooligans, children's toys, etc.

SOCIETY MEETING.

The Pacific Coast Horticultural Society is working hard to get on its old footing again. The last meeting was held at the lodge house of the Golden Gate park, January 5. Old business was settled and new business started, Mr. McLaren, the superintendent of the park, being a very active member who never forgets to circulate refreshments and Havanas after meeting hours, which all enjoy to their heart's content.

NOTES.

Cleis, Jacobson and Fick have bought the stock of a new carnation, which has not been named yet. It is an immense flower, measuring all of four inches across, yellow, when opening turning to cream in the center and white on the edges after a few days; a first-class keeper, strong, stiff stem and a good continuous bloomer. It can be used for anything from table to funeral work.

R. Groves, of the Park Floral Store, has enlarged his store to the full length of the place, increased business necessitating it; his four greenhouses in the back are in fine trim, a miscellaneous stock being kept here at all times for the retail trade. He furnished a beautiful calendar to all his customers.

N. Peterson has engaged his brother to look after the greenhouses in the back of the store. Some very fine hanging baskets can be seen, of which a goodly number were sold during the holidays.

Aug. Jacquemet and his wife were both sick with typhoid fever but are now on the road to recovery.

GOLDEN GATE.

ADAMS, MASS.—A. J. Boothman, of North Summer street, has opened a store in the Tanner block. Miss Boothman is in charge.

Davenport, Ia.

The holidays have come and gone and no one is sorry, for all are completely tired out, each one having had all they could do. As near as can be ascertained the holiday trade was fully one-fourth greater than that of 1905-6—in fact, the best ever experienced here. The weather was favorable for deliveries and at no time was any extraordinary packing required for the safe delivery of stock. Besides the large holiday trade there were several large weddings and also numerous funerals, the most notable being the funeral of Bishop Cosgrove, who had been a priest here for nearly 50 years. As usual following a month of cloudy weather carnations and roses were in short supply. Carnations sold all the way from 75 cents to $4 per dozen; roses $3, $6, and $9 to $20 for American Beauty. There was not the usual number of blooming plants in the store windows, but what there were went fast. Poinsettias sold better than ever before and holly was a little better than we usually get here. Trade has been rather dull since January 1, but is getting better right along.

NOTES.

Ewoldt Bros. had a fine lot of chrysanthemums in for Christmas and they went like hot cakes, as 6-inch and 8-inch flowers are rarely seen here at Christmas. Timothy Eaton and Polar Queen were the varieties.

Theo. Ewoldt is still on the sick list, unable to do anything at all.

T. E.

Rock Island, Ill.

The regular monthly meeting of the Tri-City Florists' Society was held at the greenhouses of Henry Gaethje, a goodly number being in attendance. The subject up for discussion was "What Are the Best Plants to Raise for the Easter Trade." The subject proved to be a very interesting one and brought out some lively comment. After the usual routine of business a luncheon was served by the hostess and a social hour was enjoyed. The next meeting will be held at the home of Wm. Knees, of Moline, on the evening of February 14. The topic for the evening will be "Hotbeds, the Making and Care, and the Best Flowering Plants to grow in Them for Commercial Use." T. S. E.

Columbus, O.

CLUB MEETING.

The last meeting of the Florists' Club was held January 8. It was a very interesting meeting. Plans are being made for a chrysanthemum show next fall. Several selections were rendered on the piano by a visitor and also by one of the members. Everything is done to make the meetings interesting and the attendance of the club is very encouraging. Prizes were awarded for the six best carnations shown Some fine specimens were exhibited and great interest is taken in these little contests by the members. CARL.

Pasadena, Cal.

The regular meeting of the Pasadena Gardeners' Association was held at the G. A. R. hall, January 4. It was well attended and various topics were discussed. Immediately after the disposal of business the election of officers was held with results as follows: John Blake, president; A. McLeod, vice president; H. Merrell, secretary; G. A. Sawyer, treasurer; A. T. Hanson, trustee.

Meetings will be held as usual on the first and third Fridays in each month at 8 p. m., at G. A. R. Hall, East Colorado street. H. E. G.

Lenox, Mass.

The regular meeting of the Lenox Horticultural Society was held January 5, President F. Heeremans in the chair. The entertainment committee submitted a programme for the ensuing meeting nights. For the February 2 meetings, they have arranged the annual dinner and carnation night for February 16. Harry Bunyard, of New York, gave a very interesting talk, in which he offered to give a medal to the winner of the society's checker tournament and a donation from A. T. Boddington towards our fall show premium list. A. J. Loveless was awarded a first class certificate for Cypripedium Leeanum Adela, a seedling which he raised himself, also diplomas for C. insigne Sanderæ, C. insigne Harefield Hall variety, and C. Leeanum Clinkaberryanum. J. R. Shields, Dalton, was awarded a cultural commendation certificate for some extra fine plants of Begonia Gloire de Lorraine and a diploma for Primula obconica. G. F.

OBITUARY.

Daniel Sidwell.

Daniel Sidwell, of the Ripley Greenhouses, Ripley, O., died January 10, and his body rests under the sod of Maplewood cemetery.

For many years, during his life in close sight of this beautiful home of the dead, Dan's generous heart and his appreciation of the many who had gone before, moved him to plant tokens of affection and remembrance on the graves of the departed ones. He would often place flowers thereon when others neglected or forgot them after the funerals were over. Naturally a good-natured man his fellow beings shared the benefit of his goodness, high aspirations and great thoughts. The world's renown was to him as a bauble, compared with his innate desire to do unto others as he would be done by.

These thoughts are the sincere expressions of one who knew Daniel Sidwell and are written in honor of his name and that of his bereaved family. He was married to Miss Elizabeth Lowe in early manhood and she, with four sons, are left to mourn his loss.

Miss Elsie E. Biggam.

We regret to hear of the death of Miss Elsie E. Biggam, daughter of Mrs. M. A. Biggam of the Fairview Greenhouse, Leavenworth, Kas., which took place December 28 from heart trouble.

James Braik.

As we go to press word is received of the death of James Braik, the highly esteemed and well known assistant superintendent of parks, Buffalo, N. Y.

Ladies' Auxiliary Badge.

ASK for a certificate when securing your ticket for the Toronto convention.

METALLIZING flowers, fruits and other objects, fixing immutably their natural forms, is carried on to a considerable extent in Brussels, Belgium. The finished articles closely resemble real bronze in weight, texture and color.

THE date on the yellow address label on your copy of THE AMERICAN FLORIST will show when your subscription expires. Please renew subscriptions promptly on expiration to make certain of receiving your copy of each issue.

THOS. W. BROWN, who will be remembered as the genial horticultural representative of the British government at the St. Louis World's Fair, has been appointed secretary of the Egypt Horticultural Society, with offices at Cairo.

VERY often the seedsman is blamed for sending out bad seeds of the smaller kinds when the real trouble arises from their being eaten by insects. The time is approaching when a large number of seeds of this kind have to be sown and as the present is not such a busy season, for outdoor hands at any rate, a quantity of fine soil for filling seed boxes and beds should be got ready. When ready place it on top of the boilers or in some such position where it will get a thorough drying and baking. This will destroy all insect and fungus life in it and soil so treated does not so quickly sour on the surface as untreated soil does. No possible harm can be done but of course it has to be well moistened before sowing the seeds.

Carnation Number.

Our annual Carnation Number, containing a full account of the Toronto convention of the American Carnation Society, will be issued next week. Special advertisements for this issue should be mailed as early as possible.

Ants in a Greenhouse.

I saw "J. H. F.'s" inquiry for a remedy for ants in a greenhouse. I had been troubled badly with them. They even tunneled cinerarias out so that the tops dropped over and having tried several remedies with only moderate success I finally tried pieces of pork fat, an inch or two square, a couple of pieces to a house. When these were covered with ants they were scalded which would be five or six times a day, the same piece of fat answering for a week or more. Thus I had the satisfaction of knowing they were dead and not driven to other parts of the house. While it is a little trouble it is effective, as the fat will draw them from all parts of the house.

F. R. M.

American Carnation Society.

CARNATIONS REGISTERED.

By Baur & Smith, Indianapolis, Ind.—Saint Nicholas, the brightest scarlet we have ever seen in any carnation, exactly identical with geranium Trego in color. Does not dull in aging. Large bloom on fine long and strong stem, and very free. At its best during midwinter, but comes in early and continues late. Clean, vigorous, upright grower, with strong constitution. Both parents were seedlings.

May, a full shade deeper and brighter than Enchantress. Bloom of large size and well formed, opens up the center petals as soon as the bloom is unfolded. Good substance and never bursts the calyx. Stem of good medium length and as strong as Lawson. A fine healthy grower and very free, comes in very early and continues until midsummer. Both parents seedlings.

By The Chicago Carnation Co., Joliet, Ill.: Beau Brummel, a large white overlaid with crimson, on the order of Prosperity, having more color than this variety; a cross between a white seedling of our own and Harlowarden; an early free and continuous bloomer, producing large well formed flowers on good strong stems.

ALBERT M. HERR, Sec'y.

Gerbera Jamesoni in the Riviera.

R. Adnet, Cap D'Antibes, France, calls our attention to the fact that the admirable group of Gerbera Jamesoni, to which reference was made in our report of the Paris chrysanthemum show, issue of December 1, page 888, was his exhibit, for which he obtained a large silver medal. Mr. Adnet states that this gerbera grows very freely in the Riviera and that seeds are gathered by the million. That the plant likes the climate of the Riviera is proven by the fact that he produced blooms exceeding five inches in diameter. Some plants in his greenhouses, produced from seed sown June 23, were showing bloom last month (December 23).

New Cleveland Wholesale House.

The Cleveland Florists' Exchange will open as a new wholesale commission house and growers' market at 606 Huron road, Cleveland, O., January 28, with one of the finest equipped stores of its kind in the country. Besides representing the growers of the immediate locality, this firm will carry a full line of florists' supplies. Geo. W. Smith, who the past summer disposed of his growing and retail business, will have full charge of the new concern, which claims to be the only house in Cleveland independent of all greenhouses. We wish the new firm every success.

Probst & Christianson, DeKalb, Ill.

NEW GREENHOUSE-BUILDING FIRM.

This is a new concern with headquarters at 124 North Seventh street, De Kalb, Ill., which will make a specialty of public and private conservatories of steel construction. L. F. Probst has had considerable experience in the greenhouse building business, having been architect for the John C. Moninger Co., Chicago, for five years. He is well known in Chicago, where he has had 20 years' experience in general architecture. Mr. Probst has made a considerable study of iron and steel work in greenhouse construction and he has already done considerable work in these lines. Peter Christianson is well known as a prominent business man of De Kalb and for many years has been a prominent dealer in general building materials.

The new firm will undertake the building and equipment of all kinds of ornamental horticultural buildings, installing water fountains, grottoes, rockeries, etc., as may be needed. The sole agency for all territory west of Detroit, Mich., for the American Tufa Incrustation Co. has been acquired and the tufa stone will be furnished in car lots or smaller quantities. The firm has some good contracts in hand and there is plenty of work coming on to engage its attention for some time to come. There is a big field for a concern of this character throughout the growing west, and we wish its members every success.

Meetings Next Week.

Have You Ever Figured How Much You Are Losing Every Year?

AFTER.

We believe we are safe in estimating the loss through so-called "splits" at from 15 to 20 per cent. of the entire cut. If you had a chance to save all these flowers and sell them for the highest price, would you not do it? That is just what the **Baur Clip** and **Pliers** will do for you at a minimum of time and expense. Made of galvanized wire and but a small portion appearing on the outside of the calyx, the clips are practically **invisible.** They make a perfect job and are instantly applied with our pliers, an instrument **worth its weight in gold,** finely finished and thoroughly nickel plated. Every tool guaranteed. **Will pay for itself in a few days.**

Pliers, $3.00; 1000 Clips, $1.00.

Send for it to-day. Cash with order. All orders filled in strict rotation. Your money back if you are not fully satisfied. Full directions with every outfit. Ready about February 10.

OUR CARNATION NOVELTIES FOR 1907

WINSOR, WHITE ENCHANTRESS and HELEN M. GOULD

One way to judge carnations is to see them on the exhibition tables. A better and more convincing way is to see them growing; therefore we cordially invite all carnation growers to visit us and judge for themselves regarding the superiority of the above-named sorts.

Our carnation houses are at SCARBOROUGH-ON-HUDSON (not Tarrytown). Friends who desire to visit us can take the N. Y. C. & H. R. R. R. from New York. Trains leave there every half hour. Scarborough is the first station north of Tarrytown. Our grounds adjoin the station, and the greenhouses are about five minutes' walk from the station.

We are growing 25,000 PLANTS OF WINSOR for cut flowers alone for the New York market this season, which shows the faith we have in it. This will also enable visitors to see it growing in quantity, and besides that, will give us enough plants to get a great abundance of fine, healthy cuttings without over-propagating. We have already booked a large quantity among the large growers, and anticipate for this variety the largest sale of any new carnation that has ever been distributed, as large growers who have seen it are enthusiastic in regard to its value. Those who have seen it have immediately placed large orders for it, so we recommend those who have not ordered to place order without delay, so as to ensure early delivery.

For full description of these three valuable novelties, see our wholesale price list. Of course, we shall have all of these varieties on exhibition at Toronto, where they can be seen, and where they will speak for themselves.

WHOLESALE PRICES ROOTED CUTTINGS SPRING 1907

WINSOR.—Soft silvery pink. The best color, best keeper, best shipper, best seller—best every way. $12.00 per 100, $100.00 per 1,000.

WHITE ENCHANTRESS.—Has the large size, long stem, productive habit of Enchantress, but is pure white. $12.00 per 100, $100.00 per 1,000.

HELEN M. GOULD.—A beautiful sport of Enchantress. Ground color lovely shade of silvery pink, with very fine pencilings of carmine, making an exceedingly exquisite combination. While on close observation this variety is variegated, the general effect is one beautiful tone of dark pink. Exceedingly valuable because it combines the earliness, freedom, long stem, and large size of Enchantress, giving another color possessing all the other desirable qualities of Enchantress. $12.00 per 100, $100.00 per 1,000.

BEACON.—Orange-scarlet. A vigorous, healthy grower of ideal habit. A profuse bloomer, with long stems. $12.00 per 100, $100.00 per 1,000.

ARISTOCRAT.—Cerise-pink. Will be planted largely in place of Lawson. $12.00 per 100, $100.00 per 1,000.

MELODY.—Daybreak sport of Lawson, about the same color as Enchantress, but much brighter, and does not fade like Enchantress. Also a much better keeper and shipper. Those who grow the Lawson varieties exclusively will find this very valuable and desirable because it gives an improved Enchantress color, which is so popular, and at the same time can be grown in the same house with the other Lawsons. An extra fine thing in every way and in great demand. A great addition to the Lawson class. $10.00 per 100, $75.00 per 1,000.

ROSE PINK ENCHANTRESS.—A sport of Enchantress. Color, dark rose-pink. $7.00 per 100, $60.00 per 1,000.

WHITE PERFECTION.—A novelty of 1906, and a variety for which there is a great demand this season. A third larger than Lady Bountiful and a more perfect flower. $6.00 per 100, $50.00 per 1,000.

VICTORY.—Scarlet. This is giving great satisfaction, being a free blooming, profitable scarlet. $6.00 per 100, $50.00 per 1,000.

RED LAWSON.—A fine red. Our stock of this is superior to many stocks of Red Lawson that we have seen. $4 00 per 100, $30.00 per 1,000.

VARIEGATED LAWSON.—The most productive of the variegated sorts. A favorite. Outblooms Mrs. M. A. Patten. $4.00 per 100, $30.00 per 1,000.

WHITE LAWSON.—An excellent white. $4.00 per 100, $30.00 per 1,000.

LADY BOUNTIFUL.—Pure white. $4.00 per 100, $30.00 per 1,000.

ENCHANTRESS.—$3.00 per 100, $25.00 per 1,000.

MRS. M. A. PATTEN.—$3.00 per 100, $25.00 per 1,000.

MRS. THOS. W. LAWSON.—$3.00 per 100, $20.00 per 1,000.

ROSES SCARCE.

The past week has seen a decided shortage of roses and a decided glut of violets. Carnations, too, were in overabundance, but at the time of going to press the market began to feel a slightly stronger undertone to the trade in this item. Funeral work has been pretty nearly the entire factor in the trade; consequently white stock has been the heaviest in demand. Polish weddings in the city, which used a number of white roses, only accentuated the condition. Bride roses touched almost holiday figures, some extra fine selling at $15 per 100. Bridesmaid did not hold up quite so well, owing to the greater number of pink varieties. Carnations were sold at very low prices last week, some reaching 75 cents per 100 on Friday and Saturday. On the same days violets touched rock bottom at 10 cents per 100, though the best grades brought 50 and 60 cents in many instances. Some lots went even higher. Wholesalers, as well as retailers, are complaining at the quality of ferns. These are exceptionally poor this year. Other greens are in excellent quality, abundant in quantity and moving as well as might be expected at this season. Bulb stock is moving more freely and bringing fair prices.

CLUB MEETING.

The regular meeting of the Florists' Club was held January 10, with President Bruns in the chair. There was a good attendance, and considerable routine business was transacted. Three new names were proposed for membership; Horace Cheeseman, 84 Randolph street; A. T. Pyfer, Joliet, Ill.; Henry Manheim, 37 Randolph street. John Evart, 255 Devon avenue, and Jos. Marks, 21 E. Randolph street, were elected members.

Some reference was made to the forthcoming meeting of the American Carnation Society at Toronto, and it was stated that a rate of a fare and one-third had been secured for this trip. Geo. Asmus, telephone West 624, of the transportation committee, can supply all particulars.

A resolution was offered changing the by-laws so that the nomination, election and installation of officers will take place later in the year. J. Hamlin, of Geneva, exhibited a dish of Sutton's Winter Beauty tomato, evidently a very high-priced European novelty. We must confess that we have seen much better samples produced from old and much cheaper American varieties.

Prof. Hasselbring called attention to the coming meeting and exhibition of the Illinois State Florists' Association, which is to be held at Bloomington next month.

NOTES.

Among those going to the American Carnation Society convention at Toronto from this city are: August Poehlmann, Leonard Kill and wife, L. Coatsworth, J. S. Wilson, P. J. Hauswirth, P. J. Foley, G. Asmus, W. N. Rudd and Bassett & Washburn's representative. A. T. Pyfer and J. D. Thompson, of Joliet, and N. Zweifel, of Milwaukee, will also be in the party. A special car has been engaged, which will leave January 22 at 3 p. m. and arrive in Detroit at 10:40 p. m. Here the Detroit delegation will join the party and leave shortly after 11 o'clock, arriving in Toronto at 7:50 the following morning. The transportation committee is composed of Geo. Asmus, W. N. Rudd and P. J. Hauswirth. The rate of a fare and one-third will make the trip going cost $11.70 and the return $3.90 with certificate. Do not neglect to ask for a certificate when you secure your ticket.

At the meeting of the Horticultural Society at the store of P. J. Hauswirth, January 16, a resolution was adopted endorsing a bill which the Illinois State Florists' Association has caused to be prepared to be presented to the state legislature at the present winter session, asking for an appropriation for investigation along the lines of greenhouse plant diseases and injurious insects. The committee on nominations asked for further time and the society adjourned to meet January 30.

A. J. Graves, of Bloomington, Ill., was a visitor in town this week. He reports having had quite a blaze at his greenhouses Christmas night. His boiler house was burned down and his propagating stock and geranium plants were destroyed. It is characteristic of Mr. Graves' energy that within five hours of the breaking out of the fire he had carpenters at work and the boiler house was entirely rebuilt within 24 hours.

The partnership agreement, heretofore existing between L. I. Risser and Ludvig Mosbaek, has been dissolved by mutual consent, the Iroquois Canning Co., of which Mr. Risser is president, succeeding to the business, which will be continued under the name of the Mosbaek Greenhouse Co., of Onarga.

Heavy crops of roses and carnations are reported at J. A. Bullong's. Bride and Bridesmaid roses are looking particularly fine. Richmond, too, is looking well. In carnations it would be hard to find better Enchantress, Lawson, Nelson Fisher, Cardinal, Mrs. Nelson, Lady Bountiful or Boston Market.

A banana plant bearing 60 fruits is to be seen in one of the carnation houses of N. C. Moore at Morton Grove. Such a plant is frequently enough met with in public and private conservatories, but it is the first one we have found in a commercial place in this part of the country.

The first informal reception of the employes of the Wienhoeber Co. will be held Wednesday evening, January 30, at the Svithiod Club house, 1766 Wrightwood avenue. Goldsmith's orchestra has been secured for the occasion and tickets are $1 each, the time 8:30.

Bassett & Washburn will stage an exhibit of their new red seedling carnation at the coming convention of the American Carnation Society, at Toronto. This firm is showing at its salesrooms some very fine cold storage Lilium giganteum.

Wietor Bros. are cutting from 200 to 300 long-stemmed American Beauty roses daily. These are of exceptional quality for this season of the year, few "bull heads" being allowed to develop. Other roses at this place are also looking fine.

Mr. Dekema, of Jensen & Dekema, has had to leave for California for an indefinite period on account of lung trouble. He reported safe arrival and was feeling better for the change on January 11.

Sinner Bros. have a fine crop of Bride and Bridesmaid roses coming in, which is particularly gratifying when so many of the growers' roses are practically off-crop.

J. F. Kidwell & Bro. have acquired about 200 acres of land at Downers Grove and will start there the erection of about 65,000 feet of glass in spring.

Weiland & Risch are receiving some very good roses and carnations, also some extra fine lilies and daisies, having two houses devoted to the latter.

Chas. W. McKellar is now receiving regular shipments of gardenias. His cattleyas and cypripediums are also shown and are of fine quality.

Fritz Bahr is showing some good plants of an excellent new strain of cyclamens. His new carnation, Lucille, is looming up in splendid shape.

The boiler season is opening up earlier than usual this season. The Kroeschell Bros. Co. has already booked a large number of advance orders.

Peter Reinberg is busy making carnation and rose cuttings and has started the work of grafting his roses.

The E. F. Winterson Co. is showing some very fine boxwood, having received a large consignment.

Scheiden & Schoos are bringing in some fine carnations, chiefly Enchantress and Crusader.

John W. Starrett, formerly with the Chicago Rose Co., is now with Zech & Mann.

Visitors: J. H. Thompson, Detroit, Mich.; Wilfrid Wheeler, Concord, Mass.; James Aldous, Iowa City, Ia.; A. C. Beal, Urbana.

THE MARKET.

Business has been quiet the past week, the demand having fallen off quite perceptibly. One large private ball held in Horticultural Hall, a sort of a carte blanche order for the florist, cleaned up the American Beauty rose market and also helped out some of the growers who had blooming plants in ripe condition. American Beauty has been scarce and with the exception of the specials of poor quality prices ran high, $9 per dozen being asked for the tip toppers. Pink teas are a trifle off color; $20 is asked for the best. Liberty and Richmond sell well. Carnations have softened, $5 to $6 buying the specials. Violets are offered at from $1 to $1.50 for the doubles. Daffodils are now plentiful; $4 is the price. Sweet peas are becoming a factor and always in demand, price 50 cents to $1. Tulips are in but not much can be said in their favor as yet.

NOTES.

The Whitmani fern which, along with all others of the tasselled varieties, has been tabooed by many growers and dealers as a pot plant, has a staunch friend in Jacob Eisele, who has stock of the variety with which no fault can be found. The trouble has been that when in small sizes up to 6-inch pots the plants carry scarcely enough fronds to make symmetrical or shapely specimens. When grown on into larger sizes the fault is that the centers become massed and the older growth soon shows yellow leaves and when these are cleaned out the plant assumes a naked appearance that interferes very materially with its sale. Then the larger fronds of all these varieties become very heavy with their masses of green and are quite easily broken in handling. They are beautiful plants as seen on the top of a stand in the greenhouses where they get all the light and air necessary, but are not in the same class with the straight Boston or Scottii when it comes to utility.

At Myers & Samtman's, the senior partner was feeling happy over a big Christmas cut of American Beauty roses. He informed me that they cut 13,000 blooms for Christmas and over 6000 in the last week of the old year. This, from 26,000 plants, seems good. The entire cut went to the Leo Niessen Co., this city, and J. B. Murdock & Co., Pittsburg. At Christmas the Leo Niessen Co. took over 8000. There is at this range a very promising seedling from American Beauty and Safrano. Said Mr. Myers: "It has been in our possession for seven years but we have just learned how to grow it." As it now appears, it is a fine producer, with the shade of Killarney and the substance of American Beauty.

The decorations at the large ball at Horticultural Hall last Friday, January 11, were executed by the Habermehls. The display was most gorgeous. The effect produced by the thousands of miniature lamps which were used to outline alcoves, arbors and produce symmetrical lines among the masses of foliage and blooming plants was most beautiful. There were in addition to the foliage and flowering plants many vases and baskets of American Beauty roses to emphasize the prominent points. It was a lavish display and a credit to the decorators, for while everything was in great profusion yet it all seemed necessary.

Victor Groschens, who has been the superintendent at the Hugh Graham establishment on Old York road for the past 17 years, has severed his connection there and will go into the business as a grower on his own account. Mr. Groschens is renowned as a skilful gardener and many of the most beautiful foliage and blooming plants seen at the exhibitions of the Pennsylvania Horticultural Society were grown by him. He also raised many choice seedling chrysanthemums and carnations, quite a number of which have become standard commercial varieties.

While it is several moons to Easter the lily men are visiting about, taking notes and comparing prospects. Bulbs taken into the houses from the frames outside the second or third week of December are now up from three to six inches. The interesting time will come about the first week in February, when the diseased (?) bulbs will begin to show. It is astonishing how many such bulbs will be found with one grower, while another, scarcely a stone's throw away, who received his stock the same day as his neighbor, will find hardly any.

Retail dealers are troubled with the ribbon question, which millinery had become so necessary in the business that in volume of money it costs as much as all the other forms of supplies together. A rise in prices from 5 to 10 per cent is now demanded on account of the increase in the cost of raw silk. The S. S. Pennock-Meehan Co. in this department is kept busy answering questions and explaining the difference in price. K.

Tel. Main 2617-2618. **All orders will have prompt attention.** **A trial order will convince you**

Wild Smilax ALWAYS ON HAND.

C. A. KUEHN, 1122 Pine St., St. Louis, Mo.

New York.

MARKET OVER SUPPLIED.

The market is, to some extent, suffering from the after-holiday reaction. This, supplemented by continued bad weather, makes conditions far from satisfactory. While the prices on strictly first class stock have been fairly well maintained, some of the inferior grades are very low. Roses, more than any other stock, are showing the effects of long continued bad weather. There are many weak stems and a deterioration in color. Carnations are more plentiful and there is considerable really excellent stock on the market. Violets have taken a slump and many are being handled by the street men. Paper White narcissus, stevia and smilax are also in over supply. The popularity of Victory as a commercial carnation is established. From growers, all along the line to the consumers, it is praised.

HORTICULTURAL SOCIETY MEETING.

The fourth regular meeting of the Horticultural Society for the season 1906-7, was held in the rooms of the American Institute, West Forty-fourth street, on January 9. Much regret was expressed at the illness of Secretary Leonard Barron, who was unable to be present. Prof. George T. Powell, always interesting, spoke on the relation of agriculture to the prosperity of the country and gave entertaining facts concerning the value of land and its wealth-producing power. Dr. Robert T. Morris spoke on edible nuts, there being an exhibition of many varieties of American wild nuts, due to the enterprise of the American Agriculturist. The course of lectures on agriculture and horticulture, under the auspices of the society, will be continued on the second and fourth Wednesday of each month during the winter. Much interest is being manifested in the coming Toronto convention, and it is probable that quite a delegation will go from this city.

NOTES.

Angelo Dentali, for the past three years in the employ of Young & Nugent as decorator, celebrated his twenty-first birthday on January 5. There was a brilliant gathering of his compatriots at a supper to celebrate the event. After the viands had received due attention there was music and speeches and a happy time in general, showing the good feeling cherished by his friends for Mr. Dentali.

Dailledouze Bros. have fine carnation stock in sight. Welcome, one of their own production, a much lighter pink than Mrs. Lawson but otherwise identical, shows up in fine form. An unnamed seedling from seedlings of Prosperity is also a very promising pink. The Queen, White Perfection and Lieut. Peary are also seen at their best.

On January 10 J. H. Small & Sons executed an elaborate decoration for the annual dinner of the Hotel Association of New York at the Waldorf-Astoria. The banquet hall, magnificent in all its appointments, was made doubly so by a lavish display of American Beauty and other fine roses, palms, smilax and foliage plants.

After a long season of unfavorable weather the Flatbush growers are feeling reasonably happy. It would be hard to find a finer cut of Enchantress carnations than that which Henry Hession is sending in to Ford Bros. His Harry Fenn, Lady Bountiful and Boston Market are also first class.

For the funeral of Walter Hoffman, of New Brighton, S. I., January 9, William H. Donohoe executed a casket cover of lily of the valley and violets, a large number of fine designs composed of the choicest blooms and an appropriate decoration.

Several prominent dealers in the wholesale district have been feeling the effects of continued bad weather on their health. We are glad to say that J. K. Allen, who was not feeling well for a time, is all right again.

Wadley & Smythe, at 49 Fifth avenue, are showing very fine blooms of the Winsor carnation. In orchids and other cut stock they are abreast of the times. Fine plants from the J. Roehrs Co. are in stock.

C. W. Ward, who was on Twenty-eighth street on January 1, has great faith in the future of landscape gardening and ornamental horticulture.

Carl Wehn, a landscape gardener and importer of stock, was seriously, if not fatally hurt in a crush on an elevated railroad platform on January 1.

Secretary Barron, of the Horticultural Society, who has been on the sick list with the grippe, is now able to attend to his duties again.

L. Mulino's store at 503 Fifth avenue, has a good window decoration of lilac, carnations and flowering and foliage plants.

Albert J. Laretz, the retailer of 228 Flatbush avenue, Brooklyn, thinks of going to the Toronto convention.

Visitors to the wholesale district get puzzled over the frequency of the names of Young and Millang.

The Kervan Co. has no particular complaint as to business, but say that moss is scarce.

Joseph S. Fenrich is so young and cheerful that the grippe microbe steers clear of him.

John Scott, he of Scottii fern fame, has plenty of ferns as well as good pot plants.

Chas. Zeller & Son have a fine lot of flowering and foliage plants.

H. E. Froment's store has all the evidence of prosperity.

Visitors: Secretary P. J. Hauswirth of the S. A. F., Chicago, and George C. Watson, Philadelphia, Pa.

New York Florists' Club.

The regular meeting of the New York Florists' Club was held January 14 and much routine business was transacted. L. W. Wheeler, Frank H. Traendly and Wm. J. Stewart, committee on resolutions touching the death of the late Mrs. E. V. Hallock presented the following:

There is no home circle secure from the visitation of death. The most lavish outlay, the greatest human skill, love itself, cannot withstand his entrance, and we must all bow to the Almighty Wisdom which gives and which takes away.

On December 8 last, Frances M. N. Hallock, wife of our esteemed fellow member, E. V. Hallock, was called suddenly to the home that is eternal.

For many years the cherished life partner of one well known and honored in our craft, she leaves behind her the sweetest of earthly memories, that of a faithful wife and mother.

We join in expressing our heartfelt sympathy with him in his bereavement, and we trust that the Supreme Source of help will comfort him, and the love of the children she bore him be his solace.

Newport, R. I.

TRADE FAIR.

Trade continues to be fair, considering that this city has its dull season in winter. A great deal of funeral work kept the florists busy the last few weeks.

HORTICULTURAL SOCIETY BALL.

The Newport Horticultural Society held its ninth annual ball January 9, at Masonic hall, which was transformed into a garden of flowers, palms, bay trees and evergreens. The principal effect was on the stage, where the musicians were seated in front of an artistically decorated background of palms and evergreens. The letters N. H. S. were beautifully displayed in electric lights. D. J. Coughlin was floor manager, and R. A. Smith assistant floor manager. Aids: A. Fraser, T. B. Connolly, A. Christensen, J. K. Sullivan and P. F. Reynolds. Refreshments were served during the intermission. Although it was a cold night there were a great many present, and all had a good time.

NOTES.

Rain, snow, cold and warm, all in one day, is something unusual for this part of the country, but that is what we have had for the last two weeks. The seed houses are busy putting up packets for the spring trade.

Wm. Postings, head gardener to Mrs. Winthrop Chanler, was married to Miss A. Playden January 6, and sailed January 8 for England on their wedding trip, visiting relations and friends.

Wm. Jurgens has completed building one house 100 feet long and is now building another one the same length. These houses will be devoted to growing roses for the summer trade.

Wm. H. Maher furnished the flowers for the double Italian wedding, Papa-Ferraris and Papa-Cassase. Z.

Glen Cove, N. Y.

At the regular meeting of the Nassau County Horticulturai Society, January 8, there was a large attendance, President A. Mackenzie in the chair. Two were elected to active membership and the monthiy points competition closed for 1906 with the winners as follows: S. F. Trepess, gold medal; H. F. Meyer, silver medal; A. Mackenzie, bronze medal. In the monthly point competition A. Janecke scored 95 points; S. J. Trepess, 88⅓; H. F. Meyer, 68⅔. Prize winners were as follows: One hundred violets single, Boulon & Son; 18 carnations, arranged for effect, H. F. Meyer; 12 carnations, arranged for effect, V. Cleres; best flowering plant, Chas. Lenker, with a cypripedium.

It was arranged to have the second annual dinner on January 30 and the following is the executive committee: Thos. Harrison, James Duthie, Chas. Bertanzel, A. Johnston and Wm. Maher.

J. W. EVERITT.

FOXCROFT, ME.—B. T. Genthner carried a heavy holiday stock and enjoyed excellent trade.

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S. Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

GRAND RAPIDS, MICH.—A. J. Brown started on his eastern contracting trip this week.

Visited Chicago: Chas. H. Vick, Rochester, N. Y., Chas. P. Braslan, San Jose, Cal., en route to New York.

BURPEE is offering two new bush lima beans, Fordhook and Burpee-Improved, for which much is claimed.

ST. PAUL, MINN.—Seven wholesale bulb and plant travelers were on the visitors' register here the past week.

AMERICAN seed has so improved the quality and quantity of the Indian tobacco crop that planters are now finding its culture profitable.

G. W. SHAW, of the University of California Experiment Station, Berkeley, Cal., has issued a bulletin on the "Selection of Seed Wheat."

THE Schlegel & Fottler Co., Boston, Mass., is using a halftone view of Franklin park, that city, on the back of its shipping tags, with the claim that it is the sole proprietor of the Franklin Park lawn seed.

DENVER, COL.—Adrien Traverse, formerly manager of the Lee Pioneer Seed Co., and later the Watkin's Merchandise Co., this city, has started in business on his own account in the Sugar building, 1524 Sixteenth street.

ATLANTIC, IA.—The William Ulrich Seed Corn Tester Co. has filed articles of incorporation, with a capital stock of $25,000, with James E. Bruse, president, and William Ulrich, secretary. The firm will manufacture the Ulrich seed corn tester and is fitting up a factory here.

THE Department of Agriculture has recently issued a bulletin on the "Evolution of Corn Harvesting Machinery," by C. J. Zither. It gives statements of cost, the length of service which may be expected under various conditions, and the work which can be done with the various machines.

THE answers of the representatives of the American Seed Trade Association to the series of questions submitted by the Bureau of Plant Industry of the Department of Agriculture, at Washington, D. C., January 10, are of vital interest to seedsmen and will be found in this issue, page 1264.

THE paper by Philippe de Vilmorin, entitled "Notes on Theory and Practice in the Selection of Seeds," presented before the Institute of Agronomy at the University of Louvain, Brussels, last April, has been printed and issued in pamphlet form, covering 24 pages of French text.

IN the year 1905-06 the experiment station of the University of California, at Berkeley, distributed 23,213 ounces of seed, covering 799 applicants and 52 counties, as compared with 4,737 ounces, covering 337 applicants and 48 counties in 1900-01. Fifty-three of the packages were sent out by express and 675 by mail.

California Growers Charge Contract Terms.

C. C. Morse & Co. announce that in common with the other seed growers in California they have agreed to change the terms of payment on contracts which have heretofore ruled in the seed business, making them 60 days or two per cent discount for cash. This action they claim is made necessary on account of general business conditions on the Pacific coast, where there is almost a famine of labor and where nearly everything the grower buys to conduct his farms is bought on a "spot cash" basis. They claim they are only asking that the seed dealers share a small part of their burdens by consenting to these reasonable business terms.

They state that their action in not sending a representative among the trade this year and in not wishing to book advance contracts against their onion crop was not influenced in any way, shape or manner by the attitude or action of any other grower or any other seedsman and was decided upon on account of the general conditions only. Excepting in the matter of terms they state positively that they have no understandings or arrangements with any other grower or growers, and they are in no combinations. Any statement to the contrary is wholly without foundation.

American Seed Trade Association.

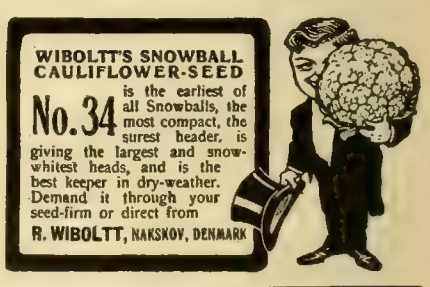
A meeting of the executive committee of the American Seed Trade Association, as stated in our last issue, was held at the New Willard hotel, Washington, D. C., January 9. There were present President Henry W. Wood, Richmond, Va.; Ex-President W. H. Grenell, Saginaw, Mich.; J. C. Robinson, Waterloo, Neb., and Secretary C. E. Kendel, Cleveland, O. By invitation there were also in attendance Vice-President Chas. S. Burge, Toledo, O.; Albert McCullough, Cincinnati, O.; Henry Nungesser, New York; Geo. S. Green, Chicago; Alex. Forbes, New York; W. Atlee Burpee, Philadelphia, Pa.; F. W. Bolgiano, Washington, D. C., and Chas. Breck, Boston, Mass. New York was confirmed as the place of the twenty-fifth annual convention, which will be held next June, and a good programme was arranged.

The committee on seed adulteration had an important and interesting meeting later in the day and in a conference with Dr. Galloway, of the Department of Agriculture, on the following day, they were joined by the other seedsmen in attendance, as above. In nearly every particular the seedsmen agreed with the Department of Agriculture, but they recommended that a high duty should be imposed on all grass seeds that are imported for the purpose of adulterating home grown seeds to cheapen the latter and at the same time to affect the quality. It was also suggested that a duty be charged on all grass seeds that have adulterants to the extent of 10 per cent and that the duty should be charged on the entire mixture. This is to discourage the importation of adulterated seed. The seedsmen are anxious that the farmer should be educated to the advantage of using nothing but the purest seeds that it is possible to obtain.

The seedsmen also recommend that the purity test be made very strict, but at the same time advised caution so that no injustice may be done, that is, the test should be made on the actual seed sold rather than mail samples. They further recommended that where a seedsman is found selling adulterated seed with the evident intention to deceive, no mercy should be shown and that the names of such houses should be made public so far as possible.

Imports and Exports.

During the week ending January 12 imports were received as follows:



The Chas. H. Lilly Co.
SEATTLE, WASH.
—Growers of—
PUGET SOUND CABBAGE SEED

C. C. MORSE & CO.

CHOICE VEGETABLE SEEDS

FOR FORCING.

"STOKES' STANDARDS"

Are simply the cream of the lists. You can't get better value.

Cucumber, Perfection Hot-House Forcing—Repeated selections of greenhouse-grown White Spine. Per oz., 50c; ¼ lb., $1.50; lb., $5.00.

Cauliflower, "Stokes' Standard"—The very earliest in existence, close-growing, compact, perfect snow-white heads. Per pkt., 25c; ½ oz., $2.50; oz., $4.00; ¼ lb., $12.50.

Lettuce, Stokes' Big Boston—A splendid strain of this very popular greenhouse lettuce. Per oz., 15c; ¼ lb., 40c; lb., $1.25.

Lettuce, Stokes' Grand Rapids—A fine forcing strain, the true under glass sort. Per oz., 15c; ¼ lb., 40c; lb., $1.10.

Radish, Stokes' Scarlet Globe Forcing—The true 18 to 20 day sort, with small top and of a deep scarlet color. Per oz., 10c; ¼ lb., 25c; lb., 75c.

Radish, Stokes' White Marble—16 to 18 day sort, snow-white, crisp and tender. Per oz., 10c; ¼ lb., 25c; lb., 75c.

Tomato, Sparks' Earliana—Stokes' special strain. This is not to be compared with the sort usually offered. Per oz., 40c; ¼ lb., $1.25; lb., $4.00.

Rhubarb, for forcing—Whole clumps that have been frozen and are just ready for business. Per doz., $2.00; 100, $12.00; 1000, $100.00.

Five-Year-Old Asparagus, for forcing—Very profitable. Same price as rhubarb.

Adulteration of Seeds.

Ten questions submitted by the Bureau of Plant Industry, Department of Agriculture, at a conference with seedsmen at Washington, January 10, 1907, and the replies of the seedsmen's committee of the American Seed Trade Association to these questions:—

1.—What is an adulterant, and what seeds should be considered as adulterants?

Answer.—Adulteration in grass or clover seeds might be considered the intentional mixing of a cheap seed with a high priced seed of another kind, of similar appearance, for the purpose of lowering the cost price and deceiving the purchaser. In the present state of the seed business we think the following seeds should be considered as adulterated:

Yellow trefoil mixed in red clover; yellow trefoil mixed in alfalfa; burr clover from wool alfalfa; Canada blue grass mixed in Kentucky blue grass; meadow fescue mixed in American orchard grass; English rye grass mixed in American orchard grass; English rye grass mixed in American meadow fescue.

2.—Should the Secretary of Agriculture fix a limit below which the presence of certain seeds will not be considered as adulterants?

Answer.—Yes. No publication should be made in instances when the percentage of foreign seed is less than five per cent unless repeated tests of seeds obtained from any dealer show that he is systematically selling adulterated seeds, so as to come just within the limit.

3.—Is the present method of getting seeds for analysis unfair to seedsmen and, if so, can it be improved?

Answer.—The present method of taking samples for analysis, is unfair as the seedsman has no means of defending himself. A portion of the sample taken for analysis by the government inspector should be sealed and left with the seedsman so as to give him an opportunity in case of an adverse report to have the sample examined by an independent analyst.

4.—When no specific mention is made of the presence of adulterants, should seed containing them be considered as adulterated, without regard to the price asked or any designation, such as "screenings," "mixt." etc.?

Answer.—Seeds sold as screenings, mixed seeds, or seeds sold by sample without misrepresentation being made thereof should not be considered as adulterated or reported on in any way.

5.—When a seedsman is found to have offered adulterated seed, should he be given an opportunity to explain, and, if so, how can the explanation affect publication?

Answer.—When a seedsman has been found offering or selling adulterated seeds he should unquestionably be given a chance to explain, and, upon satisfactory explanation or disposition of the seeds referred to, no report should be made or further action taken. If, however, he persists in selling adulterated seeds, and is again found doing so, the department would be fully justified in making a public report of the matter.

6.—Should publication be based on mail samples, purchased lots or both?

Answer.—Publication should not be made upon mail samples, but when mail samples are found to be adulterated, purchases should be made on the samples submitted and action taken on the analysis of the lots purchased.

7.—Should the price at which the seed is offered be included in the publication, and should the price be considered as an indication of the dealer's estimate of quality?

Answer.—If seeds are purposely misrepresented or purposely adulterated, the price should not enter into the question at all.

8.—Should the fact that certain seeds, sometimes used as adulterants, may have been harvested with the seeds in which they are found, prevent the latter from being considered as adulterated?

Answer.—The fact that certain seeds used as adulterants are sometimes harvested with the seeds with which they are sold should unquestionably receive the most careful consideration and great care should be used before reports are made on seeds of this character.

9.—Should the United States Department of Agriculture give seedsmen more assistance in testing seeds?

Answer.—Yes, regular seed control stations should be established, and, if necessary, a small fee could be charged for each sample analyzed.

10.—Would a prohibitive tariff on such seeds as yellow trefoil, bur clover such seeds as yellow trefoil, burr clover and Canada blue grass be advisable?

Answer.—No tariff should be placed upon Canadian blue grass or burr clover because there is a legitimate use for them as such, but we recommend that a specific duty of 5 cents per pound be placed upon yellow trefoil and also upon any mixture of seeds containing a greater percentage than 10 per cent of yellow trefoil.

In conclusion, we believe that care should be used to do exact justice in each individual case, and that since discretionary power has heretofore been exercised in the execution of this law this discretion should be continued and no publication made until sufficient facts have been accumulated to convince the department that the case under consideration is one of willful and fraudulent adulteration.

The Nursery Trade

American Association of Nurserymen.
Orlando Harrison, Berlin, Md., President; J. W Hill, Des Moines, Ia., Vice-President; George C. Seager, Rochester N. Y., Sec'y
Thirty-second annual convention, Detroit, Mich., June, 1907.

CATALPA seed is reported short.

SOUTH ORANGE, N. J.—W. A. Manda wants to be one of the commission of landscape architects to make the plans for beautifying Columbus, O.

SYRACUSE, N. Y.—Geo. E. Kessler, of Kansas City, Mo., engaged by the city as landscape architect for a term of three years, arrived January 7. He will spend some time in obtaining a good idea of the work necessary to beautify the city and then prepare plans for the purpose.

AMHERST, MASS.—A committee of trustees on arrangement of grounds and buildings has been organized, and Professors Brooks and Waugh have also been placed upon the committee. The committee will be provided with an appropriation of $1,000 for use in their work.

THE annual report, 1906, of the Nova Scotia Fruit Growers' Association is a book, of 153 pages, published by order of the government. It contains a list of officers, financial statement and the text of many very interesting papers and discussions on topics of great interest to fruit growers generally.

Landscape Architects Meet.

The American Society of Landscape Architects held its annual meeting and dinner January 8 in the rooms of the Transportation club, Hotel Manhattan, New York. William C. Barry, the Rochester horticulturist, was the guest of honor and addressed the society on the growth and care of shrubbery and plants in public parks and gardens.

An attempt to give an impetus to the art of landscape gardening will be made soon by the publication of several foreign books dealing with the art as it existed in Europe a century ago. The first to be published are Humphrey Repton's "Art of Landscape Gardening"; Thomas Whately's "Theory and Practice of Landscape Gardening," edited by Frederick Law Olmsted, Jr., and the work of Furst Puckler von Muskau, on his own park in Germany, edited and translated by Samuel Parsons, Jr., landscape architect of the Department of Public Parks of New York. These are all old works and for many years out of print. They will probably appear in May. The present officers of the society were re-elected.—New York Sun.

Sale of a Fine Estate.

The Hayes estate at Lexington, Mass., one of the most beautiful show places around Boston was sold recently, the purchaser being Geo. D. Haskell of Boston. The lands comprise about 28 acres and are highly improved while the buildings are very extensive and unique in construction.

The sale of this fine place recalls the death in February, 1902, of James Comley, who was for many years gardener here and who did so much to beautify the grounds by the addition and care of many choice and beautiful trees and shrubs. Francis B. Hayes, the original owner commenced the collection of rare and fine trees, shrubs and plants in 1860 and continued it for many years. He only survived the building of his mansion about a year when it descended to his son who also kept up the good work.

It is sad to see these fine places going to the builders and land speculators to be "developed." But it is satisfactory to note in this case that this fine place is not exactly given into the hand of the Philistines for Mr. Haskell it appears is going to preserve the trees in all cases where possible. But developing, building high class residences, macadamizing roads and all the rest of it has sounded the death knell of many grand plants and trees that our late friend planted and tended with so much care.

Nurserymen Landscape Despoilers.

Your comment on a recent letter to Country Life in America and the broad gauge thoughts of your intelligent and just correspondent, E. F. C., not only gives us an opportunity to properly mark and classify the expert individual whose advice saved his friend the difference between 40 and 350 plants, but it opens the way for the square dealing nurseryman and landscape gardener to disown relationship with that class of self seekers whom you very properly brand as bumptious, obnoxious, villainous hold-up men.

Every respectable calling is pestered with these parasites, which not only feed upon and destroy legitimate business but prey upon the credulity of the unwary and bring suspicion upon reputable concerns. The man professing to be a nurseryman, a landscape gardener or both who, ignorantly or designedly, subordinates art to commercialism should be branded for what he is as certainly as the quack doctor or adulterator of food. But who are responsible for these pretenders? Undoubtedly the demand is the principal reason for the supply. If the people needing expert service in any sphere of knowledge would simply learn to "know when they don't know" and then seek information from reputable sources only, the lessened demand for that class of pretenders whom E. F. C. styles a "dangerous combination of ignorance, presumption and unscrupulousness" would operate very effectively to reduce an undesirable supply. This course ought to be followed on general principles by everyone seeking information and service in lines where his experience is limited, but in spheres involving special scientific training more than ordinary precaution should be taken.

So far as the arts of the nurseryman and landscape gardener are concerned, a practical way open to the purchaser of their wares and services to escape the inroads of the "landscape despoiler" is to beware of the man who offers something for nothing. The making of a plan or scheme of treatment for either a house yard, large estate or park calls for horticultural and other scientific knowledge of an expensive order, and the man who pretends to dispose of it without fair compensation may be a philanthropist but he is generally a trickster. It ought to be the rule of the owners of suburban and country estates, whether the grounds are small or extensive, to plan before proceeding and to pay for the scheme of treatment as willingly as for the labor of executing it. If this course were followed the temptation to make good the cost of the plan by excessive planting or otherwise would be removed and the customer, not being under any obligation to the landscape architect, would be in a better position to have his purposes properly incorporated in the scheme. Every creditably executed landscape plan is accompanied by its planting key, and as neither need be accepted till thoroughly considered and satisfactory, the chances of excessive planting or other landscape blunders are reduced to a minimum. But no, the all wise owner balks at this initial, and what he terms unnecessary, expense and consequently launches into the work of beautifying his grounds with a half considered scheme which he has had donated to him by an enterprising individual whose object is dollars rather than the production of worthy landscape effects.

If owners would follow the practice of consulting reputable landscape gardeners as early as possible, preferably before commencing building operations, architectural schemes out of harmony with fixed landscape features would be a void and small encouragement given to the "landscape despoiler," whether nurseryman, architect, builder or owner. Every piece of landscape is a picture within a larger scene, and we always experience a rise of temperature in the region of the collar when the smaller is for any reason thrown out of harmony with the essentials of its environment. The "landscape despoiler," whether his purpose is to destroy the majesty of Niagara Falls or clutter a house yard, is a public and private nuisance, and lovers of nature and art should combine to show him up in his true light.

The American Florist Company's Directory of Florists, Nurserymen and Seedsmen of the United States and Canada.

(Copyrighted and Title Trade-Mark Registered.)

DIRECTORY REVISION.

We are revising our **Trade Directory** of the **Florists, Nurserymen, Seedsmen,** etc., of the United States and Canada, and as there have been many changes in firm names and considerable extension of the area under glass, nursery grounds, etc., you would greatly oblige by filling out this sheet.

When was business established?.....

Whom did you succeed?.....

Are you a Florist?.....

Grower?.....*Retailer?*.....

*How many square feet under glass?**.....

Are you a Nurseryman?.....

Wholesale?.....*Retail?*.....

How many acres operated?.....

Are you a Seedsman?.....

Dealer?.....*Grower?*.....

What are your specialties?.....

.....

Firm name.....

Proprietor's name.....

Manager's name.....

Street.....

Postoffice.....*State*.....

* ☞ To ascertain the number of feet under glass in a given house, multiply the length (145 feet) by the width (12 feet) and you have in that house 1,740 feet under glass, thus..... 145 × 12 = 1,740

Horticultural Supply Concerns.

We also list all lines of **Horticultural Supply Concerns,** such as manufacturers of

Greenhouse Building Materials, Boilers, Ventilators, Glass, Insecticides, Pots, Labels, Seed Bags, Fertilizers, Wire Designs, Tinfoil, Vases, Implements, Machinery, Sprayers, Seed Cases, Etc.

The specialties are also listed under these heads in the case of advertisers.

Advertising Rates.

ARAUCARIAS

OUR SPECIALTY.

Araucaria Compacta Robusta or A. E. Glauca

(the size and kind I grow). You will be surprised at the effect that it will make on the table or wherever it is placed. The plants I have are as perfect as nature could produce. The brush of an artist could not paint them any better, and prices are cheap. Just look:

6 to 7 in. pots, 4, 5 to 6 years old, 4, 5 to 6 tiers, 25 to 30 in. high and wide, $1.50, $1.75, $2.00 to $2.50 each.

EXCELSA GLAUCA, 5 years old, 7-in. pots, specimen plants, 6 to 7 tiers, 30 to 35 in. high and wide (you never saw anything better in your life than these are), $2.00, $2.50 to $3.00 each; 6-in. pots, 3 years old, 3, 4 to 5 tiers, 16 to 20 in. high and wide, $1.00 to $1.25 each.

ARAUCARIA EXCELSA, 6-in. pots, 5, 6 to 7 tiers, 4 years old, 25 to 30 in. high, $1.00, $1.25 to $1.50.

KENTIA FORSTERIANA, 7-in. pots, made-up plants, 1 large size, about 45 to 48 in. high in the center, and 3 smaller sizes, 25 x 30 in. high around, which gives them a good appearance, $2.00 to $2.50 each; 6-in. pots, single plants, 36 to 45 in. high, 5 to 6 good leaves 4 years old, $1.25, $1.50 to $1.75 each; 6-in. pots, 32 to 36 in. high, 5 to 6 good leaves, 4 years old, $1.00 each; 5½ to 6 in. pots, 4 years old, 30 in. high, 5 good leaves, 4 years old, 75c.

DRACAENA BRUANTI, (imported), 30 in. high, full of green, waxy foliage from top to bottom; the only Dracaena for parlor, store or house culture, that can stand heat, dust and dirt; 6-in. pots, 50c, $5.00 per doz.

BOSTON FERNS, 7-in., very bushy, only 75c; 6-in., 50c or $5.00 per doz.; 5-in., 30c to 35c; 4-in., 20c

NEPHROLEPIS SCOTTII, 8-in., as big as a washtub, worth $3.00, now $1.50; 7-in., as big as a bushel basket, worth $1.50, now 75c to $1.00; 6-in., 50c; 5¼-in., 40c; 5-in., 30c to 35c; 4-in., 20c to 25c.

NEPHROLEPIS BARROWSII, 7 in. pots, as big as a bushel basket, 75c to $1 00 each; 6-in. pots, large, ready for 7-in., 50c; 5½-in., 40c; 5-in., 35c; 4-in., 25c.

AZALEAS, in bloom and bud, Simon Mardner, double pink; Vervæneana double rose variegated; Deutsche Perle, double white, 75c, $1.00, $1.25 to $1.50 each.

CINERARIA HYBRIDA, H. F. Michell's best strain, 2½-in. pots, $4.00 per 100; 3-in., large plants ready for 5½ or 6-in. pots, $7.00 per 100; 4-in., $10.00 per 100.

ARECA SAPIDA, 6-in., 50c each.

CASH WITH ORDER. All plants must travel on **purchaser's risk only.**

When ordering, say whether the plants should be shipped in the pots or not.

LARGEST STOCK OF ALL

Belgian Plants.

AZALEAS, ARAUCARIAS, SWEET BAYS, PALMS, BEGONIAS, GLOXINIAS, ETC.

Louis Van Houtte Pere,

GHENT, BELGIUM.

NEW CANNAS.

WILLIAM SAUNDERS The flowers are large, of splendid form, and are borne very freely in immense clusters. The color is a deep rich, shining scarlet slightly dappled with crimson. Foliage is a rich bronze. Height 3½ to 4 feet. We believe that **William Saunders** is decidedly the most perfect canna of this type that has been introduced.

50c each; **$5.00** per doz.; **$35.00** per 100.

OTTAWA is a strong grower, very robust and 5 to 6 feet high. The flowers are large and beautifully formed; color is carmine with tints of old rose and deep coral, add to this the silken sheen and you can imagine the effect a few plants will produce.

NOTE: We had this canna on trial among the Canadian experimental stations last summer and this is the official report of their expert: "Quite distinct and one of the most beautiful shades of color I ever saw in cannas. Of 70 massed in one bed during the past season, this was the most floriferous in the collection, coming into bloom early and continuing until cut down by frost, as many as 13 expanded heads of bloom being counted at one time on a plant, and not a poor one among them, all being of immense size.

50c each; **$5.00** per doz.; **$35.00** per 100.

NEW YORK Has the orchid type of flower. They have much more substance than the flowers of the other varieties of this class, and will stand the hot sunshine as well as the toughest varieties of cannas. The color is a solid, rich scarlet covered with a beautiful glowing sheen. The flowers are large and contrast beautifully with the dark bronze foliage.

50c each; **$5.00** per doz.; **$35.00** per 100.

Send for our list and prices of 60 other leading varieties of cannas.

ROSES **Are our great specialty.** 2¼ and 4-inch pot plants we have in great variety. **Philadelphia** Rambler, Crimson Rambler, Dorothy Perkins, and other climbers in strong field plants.

SHRUBBERY in variety. **Viburnum Plicatum,** Spireas, Altheas, Honeysuckles, etc.

SEND FOR OUR PRICE LISTS.

THE GEO. WITTBOLD CO.

1657-1659 Buckingham Place, CHICACO.

CARNATION JOHN E. HAINES.

The leading scarlet, brilliant color, fine stem, the most productive ever introduced; blooms early until thrown out in July; no extra grass. All shoots make flowers. Watch the papers and see what growers have to say about it. None but well-rooted, healthy cuttings leave the place.

Rooted cuttings ready December 15, 1906. Price $6.00 per 100; $50.00 yer 1000.

JOHH E. HAINES, Bethlehem, Pa.

ITS PRICE.

$2.00

Postpaid to any address.

THE AMERICAN FLORIST COMPANY'S DIRECTORY saves many times its price to every one who catalogues or circularizes the trade. Fully revised to date of publication, it puts the mail only to live names, avoiding waste of postage and printed matter, time and labor.

Contains 476 pages, lists of Florists, Seedsmen and Nurserymen of the United States and Canada by states and towns, also alphabetically; firms that issue catalogues, foreign merchants, horticultural societies and much other up-to-date information which makes it a reference book of daily utility wherever a wholesale trade is done.

Rooted Carnations

Come an see the healthiest stock in America.

Our new King Construction truss house is a success, 31x300 feet, and good judges tell us we have the healthiest lot of Lawsons in America.

25,000 WELL-ROOTED CUTTINGS

now ready in the best possible shape at the lowest market price. We have pink, white and variegated Lawsons, Mrs. Patten, Candace, Melody, White Perfection, Lady Bountiful, Boston Market, White Cloud, Robt. Craig, Victory, Cardinal, Enchantress and Rose Pink Enchantress.

Write for special prices on large lots.

W. W. COLES, Kokomo, Ind.

MABELLE, New Pink Carnation for 1907.

Color—A peculiar shade of lovely pink, with a faint yellowish cast; several shades lighter than the Lawson. Unlike most pinks, the brightest sun does not injure the color. Size—3 to 4 inches in diameter when established. Odor—Pleasing, but not strong. Stems—Invariably strong, but always graceful, ranging from 12 to 30 inches during the season. Habit, etc.—A very quick, active grower, making specimen plants in a short time, even from late cuttings. On account of its rapid growth, requires supporting very soon after benching. Gets away rapidly, blooms early and gives long stems right from the start. Productiveness—Prodigious is the best word we know of to use here. It is the most incessant bloomer, early and late, we have ever grown. Stock limited. Delivery January 5 to 10 and later. Price, $12.00 per 100, $100.00 per 1000.

THE H. WEBER & SONS CO., Oakland, Md.

Please mention the American Florist when writing.

The Best Way to Collect an Account

is to place it with the

NATIONAL FLORISTS' BOARD OF TRADE,
56 Pine St., New York.

Why? Because many debtors will pay the Board, fearing otherwise a bad rating in our Credit List. Full information as to methods and rates given on application.

THE LOW PRICE HEATING PLANTS
The Chicago House Wrecking Co. is in position to offer you an interesting proposition for furnishing you with a heating plant at a saving of at least 30%. Send us a sketch of your houses with preferred location of the boiler, the points of compass and the desired night temperature for zero weather, and we will gladly submit you an exact detail quotation of all material required to install the plant. We have ***heaters*** and ***boilers*** of every kind, both new and rebuilt. We have always ou hand a large number of rebuilt boilers suitable for greenhouse heating. Our stock embraces ***fire box boilers, horizontal tubular boilers, Kroeschell boilers, cast iron sectional boilers, Erie City economizers*** and other types.
We can save you considerable money on ***pipe, valves*** and ***fittings;*** also on ***doors, glass, sash*** and everything needed in the construction of your buildings.
Ask for our Special Catalogue No. 47.
